"Necessity is the mother of invention." We are all familiar with the above quotation, and have realized that fact on many occasions when some one has solved a difficult problem in mechanics or manufacturing or merchandising. It has seldom been applied to the science of systematizing and account keeping.

Agreeable to the request of THE PRICE CURRENT-GRAIN REPORTER, I have been pleased to prepare a somewhat brief outline of the origin, development and important advantages of the new Brown Lines System for commission grain dealers. This request was made, first, because of the fact that I was the originator and designor of an elevator grain system which has come into general use and in many directions has been recognized as the best system for country elevators because of its completeness, simplicity and the ease with which many elevator managers are keeping their books correctly.

Necessity made this invention possible for two reasons. First, because some years ago an accountant for a large manufacturing enterprise in Pennsylvania nearly lost his eyesight because of working on books ruled principally in red and blue and using frequently red ink. The oculist whom he consulted told him he would have to quit his job or lose his eyesight. He was too poor a man to lose his job and too old a man to learn another occupation. Necessity then compelled him to find out how to remedy his trouble.

Thorough tests were made, covering a long period of time, the result of which proved conclusively that BROWN LINES and brown ink were by far the easiest on the eyesight of any colors available for books. It was also proven that blue, which is most frequently used in books, is very hard on the eyes and that red is the hardest of all and in fact very damaging to the eyesight. As a result of these tests forms and books for that book keeper were ruled and printed in brown ink. His eyesight was improved and today he is still with the same concern, holding a very important position. But for brown lines he could have been "down and out" long ago.

The second reason for the Brown Lines System for grain dealers was that we were employed to make an audit and to install a new system in a grain commission firm and took that opportunity to originate, design and perfect a simple but complete bookkeeping system for the grain commission business. From investigation we find that the majority of the grain dealers and commission houses are using old style records, many of them bound books, in which the few columns are written in at the top of each page. These records do not contain columns enough to take care of the various items and thus require a great amount of analyzing and detailed posting each month. Even then the records of receipts and expenditures, and particularly the classification of expenses, is far from satisfactory. The books which they are using are for the most part ruled in blue and red ink and there are many instances where clerks and book keepers have been compelled to secure glasses and sometimes leave their jobs on account of the colors which they were working with from day to day and were ruining their eyes.

The Brown Lines System for the grain commission business is ruled and printed in brown ink, with an occasional red or green line to identify columns and to make the whole sheet especially pleasing and restful to the eyes. For the small commission dealers a cash journal with a number of columns is used for all the records of receipts and sales of grain and receipts and payments of money therefor. For the larger grain dealers there has been provided one record for all receipts of grain and money and a separate record for the deposits and checks in payment for grain and expenses for each of one or many banks in which regular bank accounts are kept. The Brown Lines System takes care of the small dealer and the large dealer in an equally satisfactory manner.

The Brown Lines Commission Grain Cash Journal contains thirty-four columns, and yet is a book only eleven and a quarter inches by fourteen inches in size, making it convenient to handle and work upon in preference to the large books which one often sees. In like manner the two or more books for the largest grain commission houses are exactly the same size, which is of great advantage.

The arrangement of columns in a columnar book is of vital importance if the greatest amount of necessary work is to be performed thereon with the least amount of mental and clerical labor. In designing this Cash Journal we have been careful to arrange the columns in such order as to make it possible quickly to enter an account sales or any purchase and settlement record quickly and conveniently. The arrangement of the columns makes it possible at any moment in the day to learn some important facts regarding the business, such as the condition of the bank account, the customers' accounts, the purchases and sales and profit and loss on grain and other commodities and the expenses of the business to date this month or this year.

We were ably assisted by a man who had been a grain book keeper for many years and a grain dealer during recent years. This man was familiar with the records necessary to be kept. Agreeable to his ideas we first prepared a columnar book approximately three feet wide in order to contain all of the columns which he thought necessary. We next prepared a book eleven and a quarter by fourteen inches wide, double-page record, with an insert, which gave us several more columns than the larger book, and also gave a much more satisfactory arrangement of the columns. He immediately recognized the superior advantages of the smaller book and discarded the large book, which he had thought necessary. The arrangement of the columns on the smaller book was also superior and more convenient.

We are justified in stating that we have positively solved the grain commission accounting system with this Brown Lines Cash Journal because it was installed exactly as designed the first time, and since it has been in use we have been repeatedly told that there was not a single transaction which could not be easily and quickly recorded in this book. Also the advantage of having necessary and appropriately arranged columns was appreciated because it made possible important information daily, which was otherwise not readily obtainable. It also very greatly reduced the labor of analyzing and summarizing purchases, sales and expenses and reduced the number of postings in the general ledger accounts to a very few entries each month.

And finally through the co-operation of the ruler and printer, we were able to provide our client with some records which are beautiful to look upon and which really "make book keeping a pleasure."

We feel that the day is not far distant when all of the workers upon books and records will insist upon the use of brown ink and thus preserve their eyesight and increase their efficiency.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Oct. 20.—Provision prices were on the upgrade most of the week and closed around the top for pork and short ribs, October pork gaining 75c and January $1. October ribs closed 72½c and January 67½c higher. Lard had a big advance and a reaction with a gain of 62½c on October, $1.40 on November and $1.72½ on January, a reaction of 55c to $1.25 from the high point of the week was made in the closing days.

Lard was the leading factor in the provision trade throughout the week with heavy covering by shorts, particularly those in the East who were spreading and unspreading between lard and cotton oil, the difference at times being 2c a pound. A great deal of buying was on, owing to there being a better demand from abroad, England, France, Italy, Holland and the Scandinavian countries taking lard in a liberal way. The volume of business, however, was so scattered that it is difficult to estimate the aggregate. Much of the buying of the near futures was by the packers against their sales and this started the shorts to covering. Part of the time offerings were light and advances were sharp. Around the top prices profit taking by speculators and selling by local and western packers had a depressing influence. Loose lard sold freely at 40@50c under October, while recently it was around 30c under. Leaf lard was $29 at the close. There were a few lots delivered on October contract.

The lard situation is most unusual. It is higher than any other product and expectations are that there will be a big consumptive demand, owing to the scarcity of fats abroad. Lard is being used in many foreign countries in place of butter, the Germans especially taking it as it supplies their requirements for an unusual number of uses. The manufacture is large and packers are running more cuts of meats to the tank than at this time in years. Some are even taking a good part of the bellies, as it pays better than using them in the regular way. This is construed by some members of the trade as indicating a small make of short ribs.

January product is receiving the most attention, but short ribs and pork neglected by traders, and there appears to be no particular interest of a speculative character. The cash trade has taken hold freely of both meats and lard of late and supplies are being reduced without any material advance in the price. Supplies of hogs were lighter with a fair run expected this week. Hogs are being marketed closely in some sections, but there is a good crop coming later.

Range of prices in September and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Oct. 18.—The declining tendency of hog prices was a restricting influence on the market for provision products in Kansas City. A fair to moderate demand prevailed this week, buying having been stimulated to an extent by colder temperatures in surrounding territory. Prices show a decline for the week of ¼c to as much as 1c. Fresh pork shared a broadened demand, particularly in local territory, with the East buying sparingly. Loins were about ½c off. The cheaper grades of fresh pork suffered the principal decline. Lard and substitute products were in fair demand, closing fractionally lower. Fancy hams and bacons also improved slightly. Packers report that wide publicity given in the lay press to the sensational declines in hog prices and comparatively insignificant losses on pork cuts tended to reduce buying. The South continues a good buyer of dry salt and heavy smoked meats. A light movement of pork products for export is reported.

Summary of Live Stock Markets.

Highest prices on hogs in leading markets for the week, as compiled by the *Daily Drovers Journal*, follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$15.60	$15.25	$15.25	$14.90	$15.05	$14.80

Lard	2,170,000	7,850,000	1,419,000
Total products.	3,404,500	11,117,550	8,178,000

Early Movement of Live Stock.

Live stock from the range districts is coming to feeding stations about 30 days earlier this year than formerly. Records at the feeding stations show heavy increases in sheep for the months of August and September this year compared with the same months last year, while cattle receipts show heavier increases during July and August.

Live Stock Marke

CHICAGO LIVE STOCK

CHICAGO, Oct. 20.—Hog prices ated sharply last week, althoug spread between the high and th point and the common and the were smaller than usual. Top pri the week were $15.60 made on M while the best on Saturday was the lowest of the year. Average urday was $14.25, against $14.90 a ago and $16.85 last year. The average of $14.50 was the lowes long time, and compared with $ previous week, and $7.65 last Packers were fair buyers, taking 1 against 104.600 the previous wee 142,800 last year. The Armour i took 26,700, Swift, 25,700, Wilso 000 and Morris, 8,600.

Average weight for the week w lbs., against 240 lbs. the previous and 232 lbs. last year. Supplies were moderate and rather slow sa close being at $12.50 to $13.75, acc to weight and quality. The tr bearish on hogs, but the country selling freely at the declining Receipts for the week were 122,49 compared with 115,343 the pr week and 149,829 last year. The markets had 552,700, compared 491,500 the previous week and last year.

Fancy steers sold up to $19. week, or 75c above the previous and the highest in many weeks. met a good demand at all time offerings not large and sever closed around $19 and above. were also fair sales of very good v animals at $18 to $18.75, and t portions of sales above the $17 showed an increase, while $14 bought a large percentage of th and medium cattle with common $10 to $12 and inferior light dropped to $9 and below. Averag of beef steers was $16.65, or 55c than the previous week and co with $13.85 last year.

Western range steers closed ab same as the previous week with 28,000, or 2,500 more than the p week and the same over last ye range being $9 to $14. Price McCulloch, Correspondent.

a, Oct. 18.—The clatter of falling was heard in the cattle yards all The week opened with a run of 32,- d, and when the week's total was p. it amounted to a little over 76,- . a gain of 11,500 head over the for- ord made last week. Inquiry was d for desirable beef. There were ives here, and those that were of- ld anyway 50c higher. Shortfeds nd $11@15, pretty good yearlings $17@17.25, and finished steers ell on up to $18.50. Desirable s also closed a little higher, with $13@15, and good to choice at $11@ Plain and medium kinds broke on the opening, and while part of p was regained they are still 25 wer for the week. Butcher stock pounded hard Monday and Tues- ng at the low time 50c@$1 lower. this was regained later, but closing ere mainly 25@50c under a week oice heavy cows sell at $9.50@10.75, ades at $8@9, fair at $6.50@7.50. ers and cutters at $5@6.25. Calves are unevenly steady to 50c lower, lls are generally a quarter lower, ognas at $6@6.50. ocker and feeder demand was the of the season. On the heavy runs got plain grades of thin cattle c or more, but they regained all line before the close. Desirable ever were hurt much, and in the the latter part of the week they levels that are 25c or more higher week ago. Best heavy feeders sold @13, good to choice kinds bringing 2, and fair to good $8.50@10, with ight stockers on down to $7 and ght and medium weight steers that ality are as high as they have been ime this season. slumped again, and in spite of a action today the market is closing ower for the week. The greatest as been on the common and rough gs, which are selling down to 13. Bulk of the ordinary packing nded at $13.50@14 today, with best nd butchers on up to $14.50. At this week there was a spread of in the range of prices. Receipts very moderate, but offerings are largely to big heavy hogs. and lamb receipts were the small- the range season opened the run head being only a little more than large as for the corresponding year ago. While very little fat coming, demand for killing lambs , especially at the opening of the d packers put prices down $1 Mon- Tuesday. Towards the close there e improvement, and current prices more than half a dollar under last ith fair to choice grades at $14@ let for feeding lambs narrowed deal, and they also show a 50c compared with a week ago, with ping the best close wooled lambs. owed little or no change since last close. Yearlings are bringing $10 wethers $9@9.75, and fair to choice 25@7.50.

Denver Cattle Market.

, Oct. 17.—Receipts of cattle for k have been the heaviest of the nd the per cent of common and inds is more than ordinarily plen- a general way we quote the mar- o 25 lower on good to best steers close of last week, 50c lower on vs, and 50c to 75c lower on the kinds. Stock cows and beet top- steady. There are lots of little ers and heifers selling at 5c to 6c d, common to fair kinds of heifers o 6½c, good ones at 7c to 7½c, fair arling steers at 7½c to 8c, while choice ones are bringing 9c or

Louis National Stock Yards.

H. L. Wyatt, Correspondent.

al Stock Yards, Oct. 18.—The cat- ket has been extremely irregular k. We had quite a few really good ring the period and upon these the is strong to perhaps 25c higher. ing of Missouri fed heavy beeves hree car lot of yearlings sold for highest price we have had on ket for beef cattle since early Aug- medium and common cattle the is around 25c lower for the week. of Westerns and Oklahomas has ry liberal, in fact the heaviest the season on this grade. They d promptly and while they average a little lower for the week they are o steady than any cattle in the class. Butcher cattle shows about the same tone as beef steers. The best ones are higher and the others lower.

The hog market continues to be most erratic. During the early part of the week there was a sharp decline, in the middle of the week a sharp advance and at the end of the week another decided drop. On the whole we figure that we are right at $1.10 lower than the close of last week. The quality of the offerings is fair and a quality of the run somewhat under normal for this season of the year. The week's closing quotations are: Mixed and butchers $14.25@14.75; good heavys, $14.40@14.65; rough, $12.25@13.25; light, $14.25@14.65; pigs, $12.75@14.25; bulk, $14.25@14.60.

The sheep and lamb market under light receipts has held to about a steady basis. The top for the week in the lamb department was $15.50, but unless strictly prime it is doubtful that the same figure could be obtained at the end of the week. It is hard to call the market on aged stock. We are receiving very few in this class—hardly enough to test out the market.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Oct. 18.—Cattle receipts were not any too heavy this week and many more cattle could have been used at the prevailing strong prices. Monday made a pretty good showing there being 4259 cattle coming against 4468 a week ago. The beginning of the week brought several loads of big weighty plain quality steers at $9.00@9.50, but towards the close of the week 10c, which is the top, was gotten on a few loads of plain 1000-lb. steers; other sales at $9.50@9.85 for several loads averaging 950 and 1000 lbs. Packer steers have generally been common to fair quality. This class was considered generally steady and in some cases 10@15c lower. The packer buyers had keen competition from feeder buyers on all classes of steers.

The fore part of the week had lots of stockers in the receipts and a steady to high market, and also closed steady. Receipts were larger and a good many loads of lean two and three year steers brought $8.75@9.60. The quality of calves has been common to fair with practically no good light calves coming. Values on all grades are anywhere from strong to 50c higher.

Hogs are still declining. Quality as a whole was of fair average, with a couple loads of heavies bringing out the full strength of the trade. The top for the week was $15.00.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Oct. 18.—Increased receipts of live stock resulted in irregular price changes in Kansas City this week, with the greatest weakness in hogs and the best tone in cattle. Prices of hogs closed $1 to $1.50 lower. Cattle were mostly unchanged to 25c higher, with only the choicer grades of fat offerings and stockers and feeders showing improvement. Sheep were mostly lower.

Depression marked the trade in hogs, the average cost for the week dropping to $14.31, compared with $15.54 the preceding week. The final top, $14.35, compared with $15.60 a week ago. A feature was the eager buying of stock hogs to go into corn fields. Prices of stock hogs were slow to follow the fat hog market until late in the week. Iowa and Illinois were the principal bidders. Of the receipts of about 60,000 head, about 20 per cent were stock hogs.

In the cattle market a top of $18.35 was paid for choice corn feds, but this sale was not representative of the general trade, the market being on the basis of $9 to $16 for grassers, with the sales of $14.50 to $16 grassers being of animals which have received cake on pastures. The trade was strengthened considerably by the broad and active demand for stockers and feeders. Range cattle direct from Texas sold as high as $13.50 for feeding purposes. An Iowa feeder paid up to $13.85 for feeding steers. While the run was heavy, it is probable that more would have arrived had stockmen been able to obtain cars. Liberal runs are expected to continue for another month, as the southwest movement has been delayed. Texas was credited with buying some cattle to put on her rich grazing areas.

Sheep held up better than lambs, but the general market was weak. Sheep closed steady to 25c lower, while lambs were around 75c to $1 lower for the week. Western lambs closed at a range of $13.75 to $15, with Utah and Colorado offerings predominating in the supplies. Feeding lambs closed at $10 to $12.50.

Canadian Hog Market.

Winnipeg, Oct. 17.—Receipts of hogs at this market were heavy during the week and a gain of $1 was recorded for selects toward the end of the week, quotations for selects then standing at $17.50, heavies $14.50@15.50 with sows up to $13.50. A heavy run of cattle was on during the week and consequently prices eased up somewhat and on Friday choice steers were quotable at $10@11; fair to good quality stuff, $9@9.75.

Ships to move approximately 4,500,000 bus. of wheat have been assigned to Galveston, which it is hoped will break up the congestion in that market and relieve the interior shippers who have been having serious trouble for several weeks.

THE RECORDS of the Flour Mill and Grain Elevator Mutual Insurance Companies
show that 80 per cent of all fires in Mills or Elevators start in elevators. The installation of an automatic feeding device which will positively prevent an elevator choking from overfeeding and an automatic relief which will prevent an elevator choking from bin getting full or spout choking, will annually save millions of dollars in fire loss and add at least 50 per cent to efficiency of any stand of grain elevators. These devices are perfected and are available for mill and elevator owners, are very inexpensive and absolutely practical. Full particulars will be furnished, free of charge by this office, on request.

All Millers and Grain Dealers Need Non-Rusting Metal Baskets
INDESTRUCTIBLE

These baskets are made very strong—with stout rope handles that fit the hands. They are made of galvanized steel with double bottoms riveted on that slide smoothly. They outwear any other basket made. Hold grain, dust, hot ashes, etc. Every miller should have them.
$18.45 per doz. F. O. B. Chicago
SACKETT
1695 Elston Avenue

CONE-SHAPE GRINDERS
KEYS to GRIND ALL GRAINS
Go to the Grinders. They do the work! Bowsher's Cone-Shape Grinders are the correct principle and Mill construction. They have larger grinding surface to center of Shaft; thus More Capacity, Lighter Draft, Longer Life.

"I take pleasure to express my appreciation of your long-lasting, trouble-proof Cone-Shape Grinder. Have used a No. 4 ten years and it has done more than One Dollar per year for repairs." *R. W. Watt, Jacobsburg, O.*
Made in sizes; 2 to 25 H. P. Write for free catalogue.
THE BOWSHER CO., SOUTH BEND, IND.

"RID-OF-RATS"

Is the only **Non-Poisonous Exterminator** of Rats and Mice in existence that is offered under **money-back guarantee.**
Rodents destroy hundreds of millions' worth of merchandise of all description. Why not spend a few cents to kill off the destroyers?
A pound, costing only $1.00, kills over one hundred rats or two hundred mice. Also sold in 15c boxes at $1.80 per dozen. Ask your store, or send money direct to us and shipment will be made promptly; shipping expenses paid by us.

COLUMBIA SCALE CO.
2439 N. Crawford Ave., Chicago, Ill.

The Letter Box

The Car Trouble.

Price Current-Grain Reporter: We deem it of vital importance that we have proper and just distribution of grain cars. We expect to soon purchase a car loader.—*Darrow Farmers' Grain Co., Sheldon, Ill.*

Grading an Important Problem.

Price Current-Grain Reporter: I consider the grading of grain the most important problem confronting the grain trade at the present time. I expect to build a new elevator in 1920.—*J. C. Elvin, Harper, Kans.*

Co-operation Desirable.

Price Current-Grain Reporter: We think it of vital importance that there be coöperation among country elevators. Our corn is good in quality and yield above the average.—*Boone Grain & Supply Co., Lebanon, Ind.*

Will Rebuild Alfalfa Mill.

Price Current-Grain Reporter: We intend rebuilding our alfalfa mill plant at Clinton, Okla., as soon as contracts have been let. We will purchase some belting, transmission machinery and a gas engine.—*Clinton Alfalfa Mill Co., Clinton, Okla.*

Firm Name Changed.

Price Current-Grain Reporter: Kindly note the change of our firm name. A. Lilius Handelshus has been transformed into the Finland Trading Co., Ltd. Our letter and cable addresses are the same.—*Finland Trading Co., Helsingfors, Denmark.*

Government Regulations.

Price Current-Grain Reporter: We think it of vital importance to the grain trade that the Government regulations be discontinued. We hope to build a new elevator next spring and will need equipment for warehouse and elevator throughout.—*Chas. F. Hood, 300 Carter St., Chattanooga, Tenn.*

Directors Elected.

Price Current-Grain Reporter: We beg to inform you that J. G. Vaes, A. Rolf von den Baumen and A. W. L. Talma Stheeman have been appointed directors of our Company. We have had pleasure of knowing these gentlemen for some considerable time and are pleased that they are now joining our Board of Directors.—*Ant. Jurgens' Margarine Works, Nymegen, Holland.*

Building Elevator.

Price Current-Grain Reporter: F. H. Roberts of Sabetha, Kans., has the contract to build our new 22,000-bu. elevator. It will be of wood, steel covered, and have electric power and lights. A warehouse and office 24x76 ft., with full basement, will be connected to the elevator. A 10-ton Howe Auto-Truck Scale is to be installed later.

The estimated quantity of wheat in farmers' hands in this vicinity is about 40 per cent of the crop.—*Farmers' Union Elevator, Hope, Kans.*

Corn Situation.

Price Current-Grain Reporter: Of the many factors entering into the question of corn values at the present time, possibly the most important is the fact that the decline in hog prices has brought down the feeding value of corn to a considerable extent. A year ago, from this date forward, the hog price was stabilized for the winter months at $17.50.

The movement of new corn is developing somewhat, but most sections indicate that it will be several weeks before there can be a general run of corn, and the permit system now established by the railroad board will, it is feared, curtail the opportunity for the farmer to market his corn.

We are advised that feeders in western Missouri have been paying $1.25 for corn, while an eastern Iowa feeder tells us he is getting his requirements at $1.10. Receipts of new corn at Chicago Oct. 24 were ten cars. With colder weather next week a larger supply is possible whenever cars can be obtained.

Premiums still prevail for cash corn, principally on the yellow variety, which is favored by the Eastern consuming trade. We feel that it is well to market corn freely as conditions will permit.—*Wegener Bros., Chicago.*

Improvements at Gaylord.

Price Current-Grain Reporter: The following improvements and changes have been made in Gaylord, Minn., recently:

The Equity Grain Co. of St. Paul has bought out the Pacific Elevator Co.'s house.

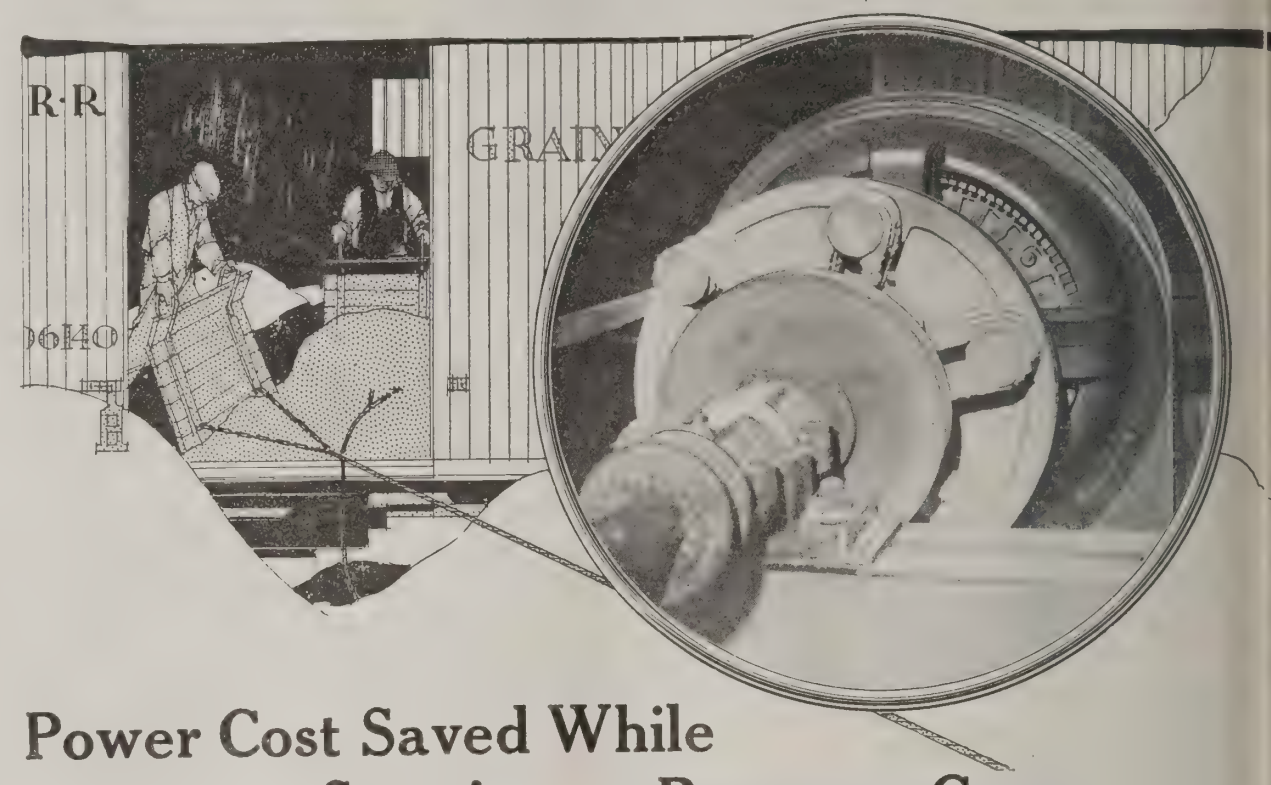
A concrete mill and new loading machinery for the Chaska Beet Sugar Co. are in course of construction.

New coal sheds have been built for the Botsford Lumber Co.

Crop conditions are below normal this season as regards wheat, barley, rye, flax and oats, but corn is the very best.—*Security Elevator Co., Chas. H. Geib, Mgr., Gaylord, Minn.*

Potatoes—Hay—Popcorn.

Price Current-Grain Reporter: There have not been a great many changes since my former report, except that the potatoes and apples are pretty well cleaned up in this section. The little hay that has changed hands has been at steady to lower at $15; demand for baled hay not very strong, although a very few balers are starting work.



There is going to be considerable popcorn to move from this section, and it might be that some machin be needed for getting it ready market in the way of a sheller sibly a recleaner.—*W. P. Bal well, Idaho.*

License Revoked.

The U. S. Food Administra nounced Oct. 22 that the licens Allen & Son, a partnership of J. T. Allen and Leon Allen mon, Okla., had been revoked ther notice, effective at noon 1919. This license was revoked of the licensees' failure to fur essary reports to the U. S. G poration, failure to make a for a Wheat Director license as by law, and of failure to reply and telegrams.

The company held license flour miller, corn meal miller utor of general food commod storer or dealer in feeds and stuffs.

Most of the flour in this country comes from G-E Motor-driven Mills.

Power Cost Saved While Spotting or Between Cars

WITH direct-connected G-E Motors driving your car grain shovels, all power cost ceases except when shovels are actually in use.

While cars are being spotted and doors opened, while planking is being removed, and between cars, the motor can be shut down by a convenient push button.

The type of motor used has no electrical connections between its rotating and stationary parts and so cannot cause a spark, while an enclosing frame makes it rat-proof.

Leading elevators throughout this country are greatly reducing their costs per barrel by using G-E Motors which have operated for many years with practically no upkeep cost.

STOCK FEED SEIZED.

Seizures of shipments of stock feeds on the charge of adulteration and misbranding, because of the sale of reground bran and screenings as shorts, have been made upon the recommendation of officials of the Bureau of Chemistry, Department of Agriculture, who are charged with the enforcement of the Federal Food and Drugs Act.

The feed known to the trade as "shorts" contains more nutritive material than ground bran and screenings, and sells in the market for a considerably higher price. The sale of ground bran and screenings as shorts, in the opinion of the officials, is not only a fraud upon the purchaser, but is demoralizing to the feed industry. The honest feed manufacturers who correctly label their feeds are placed at a disadvantage in competing with manufacturers and dealers who put out cheaper products under the names of higher-priced ones.

The shipment into interstate commerce of ground bran and screenings, labeled as shorts, constitutes both adulteration and misbranding under the terms of the Federal Food and Drugs Act. Inspectors have been instructed to watch for interstate shipments of adulterated and misbranded stock feeds. Action will be taken, say the officials, in all cases found to be in violation of the law.—*Department of Agriculture.*

Corn Millers' Convention.

The postponed convention of the Corn Millers' Federation will be held at the Congress Hotel, Chicago, on Nov. 21 and 22.

Smaller receipts of hay are anticipated from now on at San Francisco, Cal., as the car shortage is reported extremely acute. Receipts for the past few weeks have arrived for the greater part by water, but the Bay districts are now mostly cleaned up. Prices have firmed up somewhat, as it is probable hay requirements will have to be supplied by the warehouses.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

BSINESS AND TRADE CONDITIONS

—IE National Industrial Conference, Mr. Wilson's post-graduate course in Laborology for a selected few, has failed to reconcile Labor and il, and failed to do so for precisely the reason led many to anticipate that it would fail, , because it refused, as of necessity it must refused, to guarantee everything which the Group asked for. Labor leaders, at least, ous of what, with the previous connivance of dministration and Congress, they had tempo- been able to do, have arrogated to themselves preme powers of Democracy and set out to their whimsical will—to force "a rapacious age selfishly taken of the chances of war" in uity upon the entire body of the people, ex- g it as a "deed of eternal righteousness." Mr. rs a week before the Conference "went bank- chiefly through the action of Mr. Gompers f, shaking his finger in the face of Mr. Gary, as sitting in the Public Group, gave notice unless capital shall come to an agreement with vative (?) Labor, it eventually will have to ith rampant radicalism of the I. W. W. type," threat which failed to convince.

Conference having at last dissolved, through tion of the Labor Group, the Federation on ay gave notice that any attempt on the part gress to limit or restrain the power of certain fficials to disrupt the industrial peace of the by calling strikes would be followed by an iate strike of all industries. In other words, eaders of Labor declare their intention to de- war on the United States Government in the of legislation or administrative action not to king. In the meantime the coal miners' lead- ve declared their intention to go on strike on ber 1 unless the "intolerable conditions" under they are working are immediately changed— increased by 60 per cent and working time l to 30 hours per week. This is equivalent to a universal strike of industry, transportation e public service, since nothing in human liv- d doing in the community can in these days without fuel.

attack of a minority upon the vast majority people at last wakened the Administration to a of the responsibilities of their position and uty. The President's manifesto published on morning was tantamount to a confession of ry that the community has a right to exist, at as the chief magistrate of the American nwealth it is his duty to protect that exist- om the attempt now being made to impose the r desires of a minority upon the majority by calculated to paralyze trade and forcibly to de- he people of the essentials of life unless their ls are acceded to. Now, it has recently been aid that "two circumstances have always ac- ied civilization," public order and private y. The maintenance of public order espe- at certain times involves considerable incon- e, especially to office holders and self-seeking ans, because public disorder usually can be eted as at the core a determination of certain t voters to have their own way no matter appens. And just now certain militant leaders ass have by a piece of despicable opportunism the Adamson Act been led to believe them- placed above the law and are acting accord- But no sort of circumlocution can hide the at this means a government by a soviet, an unofficial autocracy, a minority government at its best, created by those who have unwisely conceived that "the rulership of the world belongs to Labor" (leaders). The counterfoil to an autocracy of the present temper is the strike of the majority against this minority, as at Winnipeg in July, of the middle class during the summer in certain German towns, and of Boston against her police, in September. These counter strikes were their answer to this challenge of the right of a community to exist. They were measures which all fell short of the remedies applied in the XIVth century when the numerous "statutes of laborers" were passed to control an exactly similar condition of things growing out of the great scarcity and arrogance of labor in all Europe occasioned by the awful "Black Death," and from the evils of which labor and capital alike did not wholly set themselves free for five hundred years. The people justly sympathize with labor; but from labor's inhumanity to labor every civilized community always has in some sufficient way protected itself and always will.

Mr. Fordney's Ways and Means Committee, if one be allowed to infer it from Mr. Fordney's own provincial views of trade, have been able, not without some degree of satisfaction, to reach the conclusion that Section 9 of the Constitution forbidding port preferences makes impossible the creation of "free zones" at the Seaboard and Gulf Coast to facilitate the handling for transshipment of foreign merchandise without the payment of American duties on goods not entered for consumption, an arrangement which prior to the war had made Hamburg one of the greatest ports in the world, although the German Empire itself was highly protective in policy and practice.

Contrasted with this provincialism handed down from a former epoch was the sitting of the International Trade Conference at Atlantic City during the past week, composed of upwards of fifty picked representatives of the great industrial and commercial interests of France, Italy, Belgium and the United Kingdom, with several hundred Americans, many of the broader-guage type. Before the war the influence of international trade, such as it was on the imports side, was most felt in its effect on the higher material standard of consumption, especially in the improvement, or at least the changes in recent years, in those common consumable goods called conveniences, comforts, luxuries, whether ready for immediate consumption or raw materials for their production at home. Now, however, stress is laid by the publicists on international trade—as far as it can now be called "trade," where so much is taken from America and so little consumable is returned—as a means for reconstructing Europe in order that European foreign debts may be paid according to contract, as a condition precedent to the continued financial and therefore industrial stability of the civilized world and to the restoration of the era of reasonable or low prices and universal and more equable wholesome consumption as a means to widen popular content, so far as human content may be conditional on any extraneous agency.

This aim both Chairman Bedford and James S. Alexander, who welcomed the foreign members, urged should be accomplished by a return to the natural laws of international trade and not by "any scheme or special method for financing trade between Europe and America which did not relate itself wholly to the orderly processes of commerce as they have grown and will grow out of the basic interchanges between peoples. World trade is based upon elemental principles which have not been rendered inapplicable by the war." Mr. Bedford in substance said that "the essential question in his own mind is whether the efforts to stabilize relations between Government and business will recognize that commerce is the greatest of all interests, and that their relation should be based upon that 'statesmanlike conception.' Is commerce to be accorded 'freedom of trade and equal privilege and opportunity,' or be 'threatened with restriction of imports and the menace of Government control or monopoly'? He reminded the Conference that American industry has been open to the investment of the world and submitted the conviction that the correct road now to international coöperation for a common benefit is 'full reciprocity in this particular.' It is not a question of interference or dictation in affairs of other countries, but lowering costs of production, improving relations between capital and labor, and each country utilizing the markets of others in establishing and promoting industries."

Mr. Alexander complemented this with the statement that the trade can be best conducted by so financing it that exports shall naturally be so checked by foreign inability to pay for them that imports shall be so increased as to bring about an equilibrium in the exchanges. "Working toward this balance is to our interest as well as that of other nations"—a condition which the September statement of imports and exports points to, imports having increased heavily and exports decreased. "The Federal Reserve System may be a helpful agency for private enterprise," Mr. Alexander said, "but it must work through the intitative of foreign manufacturers, merchants and bankers, dealing with similar American groups, on assured credits and not through Government operations."

One of the developments expected of the Conference is the formation of a permanent international organization to cultivate better relations between nations, especially members of the League, in recognition of the tremendous fact that the "misunderstandings arising from trade questions have in all ages been a potent cause of wars." Another interesting side-light was the statement made at the food committee conference by M. De Groote of Belgium to representatives of American food producers, that Belgium's principal requirement at the present time is wheat, of which she needs 100,000 tons per month. About three-fourths of this is being obtained in the United States, the remainder from Argentina. High prices and unfavorable freight rates now operate to decrease these purchases, and Belgium is compelled to seek larger supplies from Argentina, Rumania and Russia. He pointed out that Belgium pays a freight rate of 45c per quarter while England gets her wheat carried for half this charge. George S. Jackson, of the Grain Corporation, said in reply that England gains the advantage by compelling her own ships to carry grain at a low rate and that the United States Shipping Board cannot change the situation so long as England maintains her present policy. In order to absorb part of the unfavorable exchange and obviate too high prices, the Belgian Government is selling wheat to consumers at less than cost.

The threatened coal strike, coming on the heels of the dissolution of the Industrial Conference, has added to the uncertainties of all business. Grain prices, of course, were at once affected, but the general merchandise demand was as brisk as ever—nothing seems to be able to check the scramble for consumable goods, which is getting hotter day by day.

Production of steel, which during the crisis of the strike fell off about 40%, is now steadily increasing

on both home and export orders and price advances are expected. Cotton prices reached a new high level during the week at 36.60 and heavy sales were reported in both the Southern and the Liverpool markets. The Government report shows over 10,000,000 bales ginned to Oct. 25. Merchandise prices are steady with a slight lowering of food levels compared with August 1. General manufacturing, though crippled by strikes or labor inefficiency, ranges from fair to active, with a majority of reports indicating efforts being made to fill delayed orders. The bank statement showed a decrease of 68 million of loans and increases of reserves and circulation, the latter small, however.

PERMIT SYSTEM REVIVED

THE permit system has been revived in so far that individual shippers must obtain permits to ship grain to Chicago, Milwaukee, St. Louis and E. St. Louis, Kansas City, Omaha and Council Bluffs, St. Joseph, Peoria and Ft. Worth. All other markets are open, at least so far as this order is concerned.

The unfairness of such an arrangement is manifest, not to those markets only, but to grain buyers in the country to whom only the markets named are available for direct shipments and to farmers whose marketing range is restricted by the order. The order seems to mean, in connection with existing limitations upon open reconsignment markets, that the elevator space in the markets named will be loaded up with wheat and dealers in and buyers of coarse grains in those markets will have to take their chances from now on indefinitely, or until rival markets and competitive buyers in the country shall have cleaned up the early movement of grain, equal, during the next four months, to 50 per cent or more of the entire corn movement on the crop and 28 per cent and more of the oats.

The permit system at its best is most annoying. The present arrangement is more, and we understand the markets held up will enter a protest. But at least for the present (possibly only during the progress of the New York longshoremen's strike) the system is here and for that reason handlers of coarse grains affected by the order should use extreme care in contracting new corn for specific deliveries. Some receivers profess to think that the order will not seriously curtail the supply of cars. Perhaps not; but orders of this sort have at least enough of the element of uncertainty to put dealers on their guard against making commitments, the execution of which is made so dubious and the price possible of realization so uncertain, as both will be during the effectiveness of the order.

A PRESS AGENT NEEDED

MR. GEORGE M. REYNOLDS of the Continental and Commercial National Bank, in his after-dinner talk to the members of the Board of Trade on the occasion of the banquet in honor of Wheat Director Barnes, made the suggestion that, in view of the increasing newspaper and politician attacks on the functions of the Board as a business institution, the Board did not seem to have a very active "press agent." It is unfortunately true that the daily papers, even of Chicago, which in one way or another are paid large sums by members of the Board, rarely come to its or their defense when attacked, but, on the contrary, are habitually the first to distort current news matter involving the Board or its members by treating it flippantly or designedly catering to the popular prejudice against the Board as a great market and so contribute to the fund of popular misapprehension of the Board's real connection with the world's trade and industry. Time and time again members of the Board, able business men and honorable gentlemen, whose word alone would answer among those who know them for any transaction involving any reasonable sum of money, have explained to committees of Congress the character of the Board's business; nevertheless congressmen continue their attacks on the Board and its functions.

There is no institution on earth whose affairs are more open and subject to enquiry or the subject of so much publicity as those of the grain exchanges or of which it is possible to know more in detail. Yet, as Mr. Reynolds said, in the absence of a certain kind of "press agent" it is all concealed from the public or the publication distorted by the systematic flippancy with which the reporter, who is not a market reporter, and managing editors generally treat everything connected with the Board when handling it as "news matter." Even the several editors of the daily press who on Oct. 16 were guests of the Board treated the function and the Board's guest with little other than perfunctory courtesy—

Mr. Reynolds did indeed call attention to an unfortunate state of things. But even the most experienced men of the Board itself will find the problem of a remedy a difficult one.

THE HAUGEN FEED BILL

JUST why Mr. Haugen and the Agricultural Department, whose legal clerks drafted the Haugen feed bill (H. 8342), should consider it necessary to lumber up the Statutes with another act to regulate and give the bureaucrats of the Department power to control the manufacture and distribution of feedstuffs, we do not quite understand, except on the score that legislation in these days, in the mind of the Congress, has degenerated into merely an opportunity to gabble party politics and to meddle and interfere with the business of the people in their individual capacities. The purported object of the Haugen bill is to protect the buyer from sophistication of feed products. In order to do this in this instance this bill would give the Agricultural Department power not only to define lawful feedstuffs in laboratory terms, and to establish laboratory standards, tests and other requirements quite beyond any reasonable requirement to protect the consumer, but also to pry into the private accounts and to investigate and report upon the manufacturers' and handlers' most intimate private formulas and business records at any time and in any manner the clerks and petty lawyers should elect.

It may do this by means of the underhanded route characteristic of this new type of law making by the bureaucrats of this Departments, of permitting the Department to make "Rules and Regulations" to enforce the act, which automatically become a part of the act without, however, having at any stage of the progress of the bill for the act, been submitted to the Congress for debate, for adoption or rejection, or even for its information. Congress in fact leaves the bowels of the act for department clerks to draft without any restraint put upon them and to enforce, no matter how drastic.

Now, by means of similar "Rules and Regulations," made in this way *sub rosa*, without the cognizance but with the permission of Congress expressed in the act, and attached to the Pure Food and Drugs Act, the Bureau of Chemistry is now exercising all the power of policing the feed trade that is necessary for the public protection. On another page will be found the official evidence of that fact in a brief article, "Shipments of Stock Feeds Seized," which came from the Department itself, and which shows just how it is done. Is this not enough? Why should there be more power of espionage, except to make more jobs for cheap men, and why should the Agricultural Department have any power to spy upon the matters which ought not to be made the subjects of public advisement or public knowledge under any consideration?

GRAIN dealers should post in their offices copies of the contract with the Grain Corporation; at least this notice based on the contract:

If any farmer is dissatisfied with the grades assigned to his wheat, at a point at which no licensed inspector is located, he had the right of appeal to the Grain Corporation.

Put the farmer on notice that he must make his objection to the grading of wheat when it is delivered and paid. This is the buyer's protection.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in de "The Price Current-Grain Reporter," these figures senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Oct. 25.	Oct. 18.	Oct.
Wheat—			
Primary receipts	10,568,000	10,324,000	15,

STIMULATING FARM PRODUCTIO

MR. BARNES'S comparison in his St. Lo dress of the increasing money value farm crops grown in 1917, 1918 and 1 an evidence of the efficacy of the efforts of t ernment to increase during these years the fo duction of this country, is hardly up to the his usual quality of thought and statemen Bureau of Crop Estimates does indeed sho the money value of the six leading cereal c creased from 3,256 million dollars in 1914 million in 1918, and in the meantime the bushelage of the same six crops increased fro millions in 1914 compared with 5,421 mill 1918; but it steadily decreased in 1916, 1917, 1 1919 from 5,867 millions in 1915 to 5,403 mil 1919 as forecasted on the basis of the Oct. 1 co

Now, one must give the weather, perhap credit (or discredit) for this showing of proc but barring the weather it does not appear appreciation of the price since 1914 has h other than a detrimental effect on grain pro The more the farmer was paid for his prod less he produced.

The showing also explains Mr. Barnes's statement that contrary to farmers' content popular opinion to the contrary, the farmers fact had the best of the game in the advance prices; though it is fair to say that no one that consciously the farmer has been g profiteering.

INDUSTRIAL concerns are sold well ahead; sale distributors are doing a large business a houses report that public buying shows no tion. This buying is not confined to the nec but dealers in luxuries find an unusual den these articles, even at the extremely high pr prevail. "This fact," says the First Nation Boston, "furnishes a complete refutation of legation that the high cost of living is cau fering and compels severe economy, especia is the general testimony that the greater par buying comes from the wage-earners."

EE DOLLARS a year in the United and Mexico; $4.00 a year for Canada, United Kingdom, the Continent of Australia, and other countries in the al Postal Union. Less than a year at e rate. Single copy 10 cents.

ERS on subjects of interest to those in the grain trade, news items, reports s, grain movement, new grain firms, ain elevators, contemplated improve- ane cars leaking grain in transit are l.

ADVERTISING value of The Price -Grain Reporter as a medium for g the buying power of the grain eleva- is unquestioned. The character and of advertisements in its columns tell worth. If you would be classed with ling firms catering to the grain trade, our announcements in the trade's only which is always first to get the live, ate news to its readers.

ERTISEMENTS of meritorious grain machinery and supply houses and of ble grain firms who seek to serve ealers are solicited.

CAGO, OCTOBER 29, 1919.

RAIN TRADE REVIEW

Vile corn prices have held within ally the same range as for nearly th, indications now are that the t is getting out of the rut, and ere will be a definite trend short- e dominating influence in the sit- at the moment is the attitude farmer. If he sells freely prices be depressed, but the general dis- n seems to be to hold for a more erative figure, around $1.25 being ire for new corn at country load- ations. This figure represents nd over for December at Chicago. rice is being reflected in futures e extent, and the December has a greater premium over the May he expectation that the spread iden still more. Cash houses ather liberal amounts of new old for deferred shipment, partly ern Canada, and then bought the ber as a hedge. This would point lief that there will be a good de- or corn when it begins to move in , although under present condi- o deluge can be expected. car shortage is acute in many s of the grain belt. Some shippers d corn sold for October shipment e now clamoring for equipment to he grain. So far efforts to move irly liberal quantities of wheat ave been piled on the ground in ections of the West, where eleva- m is scarce have met with little . There is a shortage of eleva- m in the big Central and South- n States, and the strike at the rd has prevented large exporters, lone would be sufficient to pro- additional room, from moving abroad. The action of the Gov- t in taking a liberal percentage room at the leading markets for combined with the immense tends to decrease the possibili- accumulating a liberal supply of nd other grains. Despite the letup in clearances of oats the supply has been decreasing be- of domestic takings. When the New York becomes normal again decrease is looked for. of the Seaboard exporters are being unable to do much business, partly because exports of grains other than wheat have been curtailed to give the Grain Corporation the storage room. Efforts are now being made to remove the embargo on wheat which was placed at the request of President Wilson. If it is removed private individuals can then sell that grain to Europe, while at present they are restricted in their operations mainly to South America and the West Indies.

There is still a strong underlying bearish sentiment in corn, but at the moment the believers in lower prices are in the minority. Were export business to develop it might have considerable influence on prices, although the difference between American and Argentine prices is so great that the former would only be taken for special purposes.

Husking has progressed rapidly in some sections, and is expected to be completed much earlier than usual this season. The quality of the crop is excellent, and while several hundred cars of the new grain have been received at terminal markets only a very few have been sample grade. It is rather early for elevator interests to start to accumulate new corn as weather is not cold enough and it might get out of condition. A falling off in the clearances from Argentine is expected due to a scarcity of ocean tonnage.

Little attention is being given to the oat market at present. Grain is being moved from elevators to take care of new corn, and the trade look for a lighter run as soon as this is out of the way. The quality of the arrivals in the main is unsatisfactory. Rye and barley have shown more strength of late and there is a strong belief that rye will ultimately sell much higher owing to the high price of wheat. This makes rye very attractive from a European standpoint. A great deal depends on the passage of the Edge bill.

The condition of the winter wheat crop is reported as excellent where seeding is completed. With the exception of a few sections of Kansas moisture is reported as ample. Much wheat has probably been lost as the result of torrential rains in parts of Texas, and that section has been buying wheat at Kansas City. So far the Government remains out of the flour market.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Oct. 25, 1919.	Oct. 18, 1919.	Oct. 26, 1918.
Wheat	10,568,000	10,324,000	15,468,000
Corn	3,206,000	2,859,000	4,488,000
Oats	4,859,000	4,856,000	6,713,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	18,633,000	26,667,000
Preceding week	18,039,000	30,720,000
Since July 1	349,859,000	429,666,000

Corn prices continue to fluctuate within relatively narrow limits, but the undertone has been distinctly stronger, and commission house sentiment now leans strongly to the buying side on the breaks. The outside interest is as yet, light which makes for sharp reactions at times. Prices had a range of 4⅝c the past week, and closed with net losses of ⅝@1⅞c, December showing the most strength and closed 3c over May against 1¾c over the previous week. The holdings of December by cash houses against sales for deferred shipment tends to restrict pressure from local traders. Hedging sales are not large at the present time, and the country is not selling freely due to unsatisfactory prices.

Oats market is dull, and the range of prices the past week was 1⅝@1¾c, with the close Saturday at net losses of ½@⅝c. The movement from the interior is only fair, and exports very small due to the dockworkers strike at New York. Buying by Seaboard exporters has been rather limited, while the domestic call has increased, prospects of a railroad strike later in the season being a factor.

Receipts of wheat have fallen off somewhat, while the demand has been only fair. Ohio and Indiana mills have taken moderate quantities of soft red winter from Chicago, and mills in all sections are after the hard winter, especially choice grain. Springs were in smaller supply but the demand was not as keen as of late and prices averaged lower. Mills report a good flour demand with many in the northwest sold ahead for 60 days, the limit allowed under the regulations. Range of prices the past week follows:

	High.	Low.	Close Oct. 25, 1919.	Close Oct. 18, 1919.	Close Oct. 26, 1918.
Corn—					
Dec.	$1 27¼	$1.22⅝	$1.25⅞	$1.26½	$1.20⅞
May	1.25⅛	1.20½	1.22⅞	1.24¾	.....
Oats—					
Dec.	.72	.70⅜	.71¼	.71¾	.58⅞
May	.74⅞	.73⅛	.74	.74⅝	.....

Wheat Stocks and Consumption.

Statement of the movement of wheat, and consumption in primary markets, compared for three years:

	1918-19	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to Oct. 25	179,760,000	294,524,000	226,956 000
P. shipments to Oct. 25	107,595,000	150,515,000	125,465,000
P. stocks on Oct. 25	5,561,000	4,742,000	174,000
P. consumpt'n to Oct. 25	70,631,000	139,441,000	102,166,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Oct. 25	70,350,000	108,361,000	106,654,000
P. shipments to Oct. 25	46,503,000	68,591,000	72,373,000
P. stocks on Oct. 25	15,739,000	16,624,000	10,544,000
P. consumpt'n to Oct. 25	21,293,000	27,194,000	24,270,000

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago:

	Oct. 25, 1919.	Oct. 18, 1919.	Oct. 26, 1918.
American	156,000	1,012,000	5,248,000
Argentine	934,000	869,000	850,000
Total	1,090,000	1,881,000	6,098,000

Exports of oats since Aug. 1, 1919 and comparison for three years:

	1919-20.	1918-19.	1917-18.
American	17,170,000	30,813,000	39,991,000
Argentine	6,437,000	10,940,000	1,766,000
Total	23,607,000	41,753,000	41,757,000
Season	113,272,000	140,826,000	

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Oct. 25, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	65,681,000	98,786,000
Milwaukee	7,180,000	12,374,000
Minneapolis	6,886,000	16,715,000
Duluth	26,000	181,000
St. Louis	20,373,000	25,354,000
Toledo	1,190,000	2,609,000
Detroit	1,739,000	4,361,000
Kansas City	16,531,000	31,366,000
Peoria	20,397,000	36,176,000
Omaha	22,596,000	46,159,000
Indianapolis	16,871,000	20,583,000
Total	179,470,000	294,664,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	Oct. 25, 1919.	Oct. 18, 1919.	Oct. 26, 1918.
Chicago	1,209,000	1,247,000	1,995,000
Milwaukee	196,000	93,000	160,000
Minneapolis	91,000	55,000	83,000
Duluth	1,000	.....	.....
St. Louis	386,000	329,000	377,000
Toledo	16,000	17,000	28,000
Detroit	33,000	29,000	143,000
Kansas City	103,000	85,000	361,000
Peoria	601,000	545,000	616,000
Omaha	215,000	191,000	332,000
Indianapolis	355,000	268,000	393,000
Total	3,206,000	2,859,000	4,488,000
Shipments	1,890,000	1,568,000	2,554,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Oct. 25, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	59,252,000	53,646,000
Milwaukee	3,744,000	8,082,000
Minneapolis	48,376,000	56,105,000
Duluth	5,910,000	39,112,000

EASTERN CANADIAN TERMINAL

The Grain Elevator System at St. John, N. B., Canada's Winter Port—History of Construction—Capacity of Plant.

By C. H. BROOKS.

A very important and necessary feature of the equipment of the winter port of St. John, N. B., is its grain elevator system.

At present there are three grain elevators at the port, with a total storage capacity of over two million bushels. Two of these are on the western side of the harbor and are the property of the Canadian Pacific Railway Co.; the other, which was used for the first time last season, is on the eastern side of the harbor and belongs to the Canadian National Railways. The latter took the place of one that was located alongside the passenger depot at the head of the harbor and which was mysteriously burned a few weeks after the war started.

The grain exports statement shows that there has been a gradual increase in the grain shipments through the port of St. John during the past twelve or fourteen years, indicative of the development of ocean traffic.

Grain elevator construction began in St. John in 1892, the Canadian Pacific Railway erecting the first plant at Sand Point on the west side. The quantity of grain pressing for an outlet at the port was so great that in 1898 the C. P. R. found themselves compelled to make a very material addition to the original elevator, giving the company a capacity of 600,000 bushels. This elevator also was found too small within a few years, and a million-bushel building of concrete was erected in 1912 on a site adjacent to the original structure. These two buildings now constitute the grain elevator system of the C. P. R. at this port.

THE GOVERNMENT RAILWAYS ELEVATOR.

On the eastern side of the harbor, within a stone's throw of the Custom House and water front, the Canadian National Railways grain elevator, with a capacity of 500,000 bushels, has been erected. Construction was begun in the latter part of 1916, the contract for the foundations being awarded to the Engineers and Contractors, Ltd., and for the concrete superstructure to the Fegles-Bellows Company. The elevator itself was completed in January 1918, but it was some months afterward before the conveyors to the two adjoining piers were erected.

Rail connection with this elevator is obtained by a track running around the Courtney Bay shore, circling the outer point of the city peninsula, and from thence running up the eastern shore of the main harbor. This track terminates at the elevator, though it also serves the piers, over which considerable West Indies and overseas traffic passes.

Now that peace has been finally and firmly established, it is anticipated that the port of St. John will be utilized to a much greater extent than it is at the present time in the export of western grain and other Canadian commodities.

A STRATEGIC POSITION.

St. John is now in direct touch with Canada's grain center by two transcontinental lines of railway, the Canadian Pacific and the Canadian National Railways. By the C. P. R. the rail distance between St. John and Winnipeg is 1,899 miles. By the Canadian National Railways via Moncton the distance is 1,928 miles. If the connection at McGivney Junction is used, the rail distance St. John to Winnipeg can be reduced to 1,862 miles.

A RECORD GRAIN BUSINESS.

The following was the record of grain shipments through the port of St. John during last season:

C. P. R. elevators—11,998,136 bushels wheat, 3,946,780 bushels oats, other grain, 593,684 bushels; total, 16,538,600 bushels.

C. N. R. elevators—749,258 bushels wheat, 547,136 bushels oats; total, 1,296,394 bushels.

Grand total, 17,834,994 bushels.

This exceeds all previous grain records of the port.

THE ILLUSTRATION.

The illustration herewith is that of the Canadian Pacific Railway elevator and the Government Gallery System at St. John. The elevator was built in 1914. It has storage capacity of 1,032,000 bushels. In its construction 12,044 cubic yards of concrete were used, 440 tons of reinforcing steel and 550 tons of structural steel were used.

The power house equipment is two 500-kw. turbo-generators and four 175-H. P. Babcock & Wilcox boilers.

The Gallery System was completed in March 1914. Six hundred and fifty-three lineal feet of 2-conveyor wood gallery, connecting with the government wood gallery system, consisting of 766 lineal feet of 2-conveyor gallery and 830 lineal feet of 2-conveyor gallery with dock spouts.

CANADIAN PACIFIC RAILWAY ELEVATOR AND GOVERNMENT GALLERY SYSTEM, ST. JOHN, N. B.

Ohio Dealers' Meeting.

The regular fall meeting of the Association will be held at the Southern Hotel, Columbus, on Friday, Oct. 31.

This will be a one-day meeting—morning session at 9 o'clock, afternoon session at 1:30. The program will be informal; every one present will be given opportunity to be heard. The corn crop will be discussed and reports will be made from all sections of the state as to condition, plans for safe handling, fair prices and profits, etc., etc. The rules and requirements of the United States Grain Corporation pertaining to wheat will be discussed; also car supply and transportation.

WEIGHMASTERS' MEETING

List of Members—Opening Address by H. A. Foss—Report of Committee on Scale Testing—Resolutions Adopted

Last week there was reported in these columns in a brief way the proceedings of the Terminal Weighmasters' and Scalemen's Conference at St. Louis on Oct. 12. Those in attendance were as follows:

S. A. Holder, Chief Grain Inspector and Weighmaster, Indianapolis; A. Edw. Kahler, Chief Weigher, Chamber of Commerce, Baltimore; P. P. Quist, State Weighmaster, Minneapolis; Clay Johnson, Chief Supervisor Weights and Measures, Board of Trade, Peoria; Paul Laron, Chief Grain Inspector and Weighmaster, Sioux City; T. B. Armstrong, Chief Clerk, Kansas State Grain and Hay Inspecting and Weighing Department, Kansas City; J. S. Hart, Chief Inspector, Kansas State Grain and Hay Inspecting and Weighing Department, Kansas City; F. H. Schlinkert, Superintendent of Scales, Missouri Pacific R. R., St. Louis; M. H. Ladd, Chief Weigher, Chamber of Commerce, Milwaukee; P. D. Connors, Chief Inspector and Weighmaster, Corn Exchange, Buffalo; Charles C. Neale, Commissioner of Weights and Measures, St. Paul; C. A. King, Chief Scale Inspector, Western Weighing and Inspection Bureau, Chicago; James T. Bradshaw, Warehouse Commissioner of Missouri, Kansas City; G. E. Tunell, Chief Inspector of Grain of Minnesota, St. Paul; Henry L. Goeman, Mansfield, Ohio; Geo. F. Munson, representing D. J. Schuh, Weighmaster Cincinnati Grain and Hay Exchange, Cincinnati; Jas. J. Gilmartin, Deputy Chief Grain Inspector, State of Missouri, St. Louis; Geo. A. Wells, Secretary, Western Grain Dealers' Ass'n, Des Moines; G. O. Aws, Chief Scale Inspector, Missouri State Weighing Department, Kansas City; C. G. Stoody, C. G. Stoody, Scale Inspector, Rock Island Lines, Chicago; E. J. Costello, Missouri State Grain Department, St. Louis; C. O. Sommers, Omaha Grain Exchange, Omaha; Thos. J. Leonard, Chief, Missouri Grain Inspection Department, St. Louis; L. P. North, Scale Inspector, Board of Trade, Kansas City; A. E. Schuyler, Grain Door Reclamation and Cooperage Bureau, Chicago; H. A. Foss, Weighmaster, Board of Trade, Chicago; J. A. Schmitz, Assistant Weighmaster, Board of Trade, Chicago; H. W. Ewert, Weighing Department, Board of Trade, Chicago; W. E. Thompson, Supervisor of Scales, State of Minnesota, Minneapolis; and E. Culver, Chief Inspector and Weighmaster, Product Exchange, Toledo.

OPENING ADDRESS.

In opening the conference, Chairman H. A. Foss of Chicago said:

"It will be remembered that at our conference at Milwaukee, a year ago, we made a number of recommendations the carriers, emphasizing possible provements in box cars and car sea and also, as weighmasters, we agre in the interests of greater uniform of practice, to conform to certain sp fied regulations which were presen to us for discussion.

"To refresh your memory as to resolutions relating to uniform rules which, naturally, we are most in ested, I will briefly review them, follows:

"**Inspecting Outbound Cars**—It was consensus of opinion that those who s grain out of a market are entitled to same protection in the inspection of as has always been afforded those who s grain to a market, and we, therefore, dorsed the practice of inspecting all bound cars.

"**Improvements in Elevator Equipme** We adopted recommendations for the g ance of those who design and build g elevators, to the end that needed impro ments in grain weighing scales and g handling equipment would be brought the attention of those concerned.

"**Uniform Rules for Weighmaste** Another set of rules adopted by us w for the guidance of loaders and unloa of grain and terminal weighmasters.

"**Testing Scales**—This subject was ferred to a committee for handling doubtless we will hear from this commi before adjournment of this conference.

"**Tolerance Questions** — You will re that we discussed the subject of 'tolerat of error in scales,' raising the questio to whether any fixed tolerations of e could be made applicable to grain sc in the settlement of claims or disputes.

"**Shrinkage and Weighing Facilities**— question of so-called 'Natural Shrinka viz., 'Unnatural Shrinkage,' and the ject of 'Automatic Scales,' were tou upon by the conference but without de ion, as was also the mooted questio 'adequate grain weighing facilities.'

"**Standard Weight Supervision**—We fined 'standard weight supervision' at minal markets having duly autho weighing departments.

"**Improvements in Box Cars**—Turn to our resolutions pertaining to pos improvements in the car box. I am ple to report that we received encouragin plies from designers and builders of fre cars, mechanical engineers represen car manufacturing concerns, master builders and others. And the replies cate that our recommendations were comed by those who have the powe bring about the improvements sough the resolutions. While the beneficial fects of placing these facts before freight car people and railroad mecha men will not become apparent until s future time, I am well persuaded eventually much good will result theref However, that you may draw your conclusions, I will quote from a few o answers received.

"An assistant president of a pr nent freight car manufacturing cern, who sidestepped responsib wrote in reply as follows: 'You course, realize that it is our busi to furnish cars to the specificatio the various railroads. We have no tial responsibility in the matter.'

"On the other hand, as official o other car manufacturing company 'Your resolutions are being place the hands of our mechanical de ment for their consideration in preparing of designs on any equip which we may be fortunate enoug secure orders for.'

"A general master car builder o railroad wrote us: 'I would appre it if you would send me six or copies of these resolutions so th may put them in the hands of our men at the shops, with a view to b ing about better cars for grain loa

"Still another letter, from a m car builder, said: 'I consider that eral of these resolutions are very to the point.'

"While another master car bu wrote us: 'We have issued a bul to all our repair men and inspecto grain elevators, drawing to their a tion the defects which have got t guarded against on cars being pre for grain loading, and hope that it have some effect in reducing the lo grain each year.'

"Another master car builder speaking of loose car siding, wrote the course of time, the best siding loosen up by continuous switchi cars, and I agree that the iron str a very good solution of the troub

"From a general car foreman w ceived the following: 'The matte ferred to are receiving our consi tion, and we hope to work out thing that will be an improvement

been experimenting with some way of securing grain strips for months, but have not as yet found what we wanted.'

he following letter was also re-d: 'The points which are brought n these resolutions, I can assure have received careful consideration he Engineers' Committee of the d States Railroad Administration esigning both single and double-hed box cars recently standardized merican service.'

s I have previously stated, the quo-ns I have read are only a few of answers received; and, I believe, abundantly justify my conclusion much good will result from our itions relating to possible improve-s in the box car.

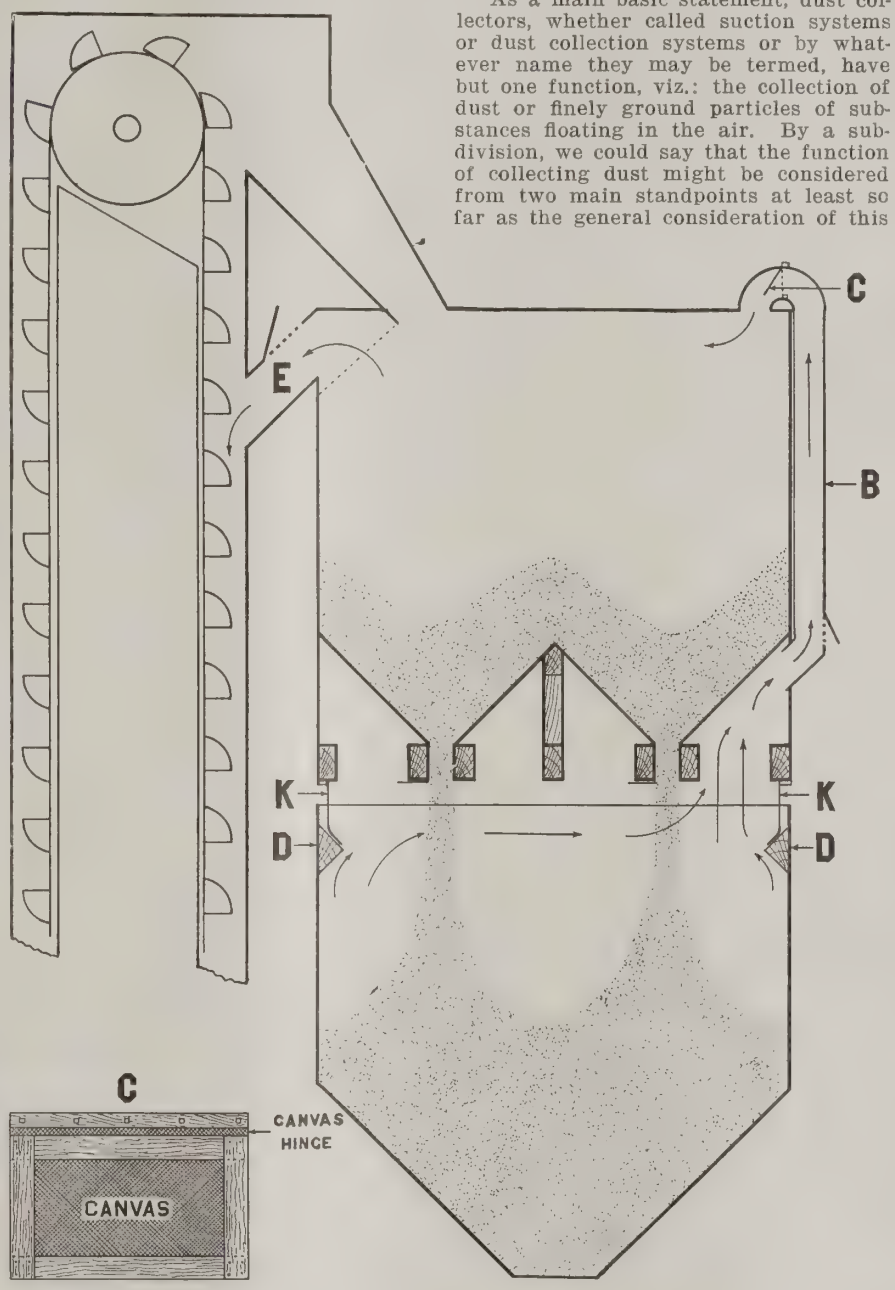
AR DOOR SEAL RESOLUTION.—We re-d generous response from railroads ir resolution relating to car door and also to our resolution relat-o the rough handling of cars in it, all of which were encouraging ne.

GGESTED IMPROVEMENTS FOR GRAIN DLING EQUIPMENT.—You will be in-ed to know that our resolutions ne guidance of designers and build-f grain elevators and grain scales d a lot of wholesome discussion ose concerned, and, no doubt, the res involved, like the features in-d in our box car improvement res-ons, will be considered in planning construction and new scale instal-ns.

will now speak of the objects of neeting. Since our meeting a year and since the committee on grain s, representing the railroads and rain trade, completed their deliber-s, Henry L. Goemann, chairman of hippers' Committee, wrote me, en-g some data that had been sent to relating to uniform rules and the ability therefor to govern terminal weighing departments. In reply-o Chairman Goemann, I referred e work of our conference at Mil-ee last September. I told him that terminal weighing department sented at our Milwaukee confer-was supposed to have amended its and regulations in accordance the provisions of our resolutions n were adopted solely in the inter-of uniform procedure. Now, if are any weighmasters here who not done so, I feel assured that all will be glad to learn from them easons why they have *not* seen make their rules conform to our d program in order that we may ss, and receive the benefit of, such ns; and, if in agreement, that ay be guided accordingly in the gement of our own respective de-ents. For my part, I am well per-d that there is no such thing as er cent efficiency in the work done an, or in the work done by man-machines and devices; hence, ex-ce, and an exchange of views, l enable us to improve our meth-Obviously, if our work *now* was er cent efficient, there would be ed of meeting here today.

conclusion, let me say that each ll of the subjects submitted and ted for discussion at this meeting been placed on the program. You nd copies of the program on your , and, if agreeable to you all, we ake up the subjects on the pro-in the order named, reserving subjects, that any of you may o bring up, for the conclusion of eeting."

REMARKS BY J. A. SCHMITZ.



Foss was followed by J. A. tz, scale expert of the Chicago of Trade, who said:

entists who have studied the sub-f deflection assure us that there such thing as absolute rigidity, hat every beam or column will r compress under load; and that, ans of suitable instruments, we letermine the amount of such de-n no matter how infinitesimal it e. Now, if we accept these state-we are forced to assume that it is *impossible* for us to maintain levers, and their connections, level and plumb, or, at least, theoretically, it is not possible. And yet, we know positively that we do maintain levers, and their connections, in sufficient alignment to secure the degree of accuracy that is demanded of the grain weighing machine. The extent that levers of a hopper scale may move out of level, without impairing the practical accuracy of the scale, has long been a mooted question.

"Now, as you know, scale specifications, generally, specify that new installations shall be placed on *independent, unyielding* foundations, which provision, of course, has the support of all scale men and weighmasters. But, on the other hand, we are confronted with the fact that large numbers of hopper scales in daily service rest on the 'cribbing.' With this in mind, and for the purpose of obtaining data that might be of interest, I have checked the results of our tests of hopper scales covering the period of the last three years. My checkings included a comparison of the results of the tests of the scales resting on heavy, substantial bin cribbing foundations, with the results of the tests of the scales resting on independent foundations, and showed as follows:

"First, that the percentage of scales resting on cribbing foundations, found out of tolerance, was slightly *smaller* than the percentage of incorrect scales found among those resting on independent foundations.

"Second, that the amount of the error found in scales resting on the cribbing is slightly *larger* than the amount of the error found in scales supported on independent foundations.

"Now, at first glance one might conclude from these comparisons that the provision of the hopper scale specifications, calling for independent foundations, was not justified. But, let me say that practically all of the scales listed as 'resting on the cribbing' are of smaller capacities, while by far the largest number of the scales listed as 'resting on posted foundations' ranges in capacity from 1,200 bushels up."

Dust Collectors—Their Functions.

A paper was then read by W. E. Thompson, supervisor of scales, State of Minnesota, as follows:

"As a main basic statement, dust collectors, whether called suction systems or dust collection systems or by whatever name they may be termed, have but one function, viz.: the collection of dust or finely ground particles of substances floating in the air. By a subdivision, we could say that the function of collecting dust might be considered from two main standpoints at least so far as the general consideration of this topic is concerned by those interested in grain elevators and flour or feed mills. These might be classed as follows: First, the function of the system operated as a reduction of the fire hazard; second, the safeguarding of human life and bettering the working conditions. It goes without saying that both of these features are very potent reasons for the requirement of dust collecting systems in grain elevators and mills and certainly no grain elevator or flour mill should be without them.

"The principle upon which many of these devices have been worked out seems to be the movement of a small volume of air under a high velocity, not having regard for the very light character of the objectionable particles to be moved. The dust collection system, or pneumatic system, for conveying finely ground feeds from a grinding machine to a sacking bin or cyclone collector; or the collection of emery dust or grindings of a heavy character from grinding wheels, necessitates a high velocity of air movement, confined in as small a volume as may be possible; but generally speaking, the removal of the objectionable floating dust found in grain elevators and mills can be accomplished and should be worked upon the principle of moving a large volume of air under a low velocity.

"Confining the discussion to this phase of dust collection systems, it has been our observation that even though elevators and mills are equipped to some extent, the equipment has usually been inadequate and houses so equipped are repeatedly found in a dirty condition. This may be overcome to a large degree if not almost entirely eliminated by the installation of larger aspiration pipes, to the ends of which may be attached bell or funnel-shaped hoods, left open, extending downward, and so placed that falling grain streams throw their largest volume of dust into the air immedately under them. A good illustration of this would be the delivery of grain from a scale hopper to the bin floor, or to a conveyor belt, in which case the greater portion of the rising dust would be quickly eliminated.

"From the scale inspector's standpoint, and from the weighmaster's standpoint, a hidden or a directly attached suction pipe connected to any receiving pit, receiving leg, the head thereof, the garner of the scale or its hopper, is objectionable. It is true the speed of the fan could be regulated, but the objection is that it is a direct suction, placed in a hidden manner, and no one, neither the scale inspector nor the weigher in charge of the scale, knows how much or how little any one of the pipes is deducting from the load to be weighed; the worst of all thus connected, they do not take away the floating dust. This objectionable feature can be overcome by making such suctions indirect; or in other words, cutting them so that their operations may readily be seen. In the receipt of grain there are many elements of dust prevention, or what might be better termed, elements to prevent the escape of dust from its natural course with the grain, that might be considered, and if the appliances all along the line to the point of taking the weight are all carefully and correctly put in place, there will be little escaping dust that need be given consideration. It is the escaping dust that needs collection. After the weight has been taken on received grain there is more need for dust collection from the handling of that grain in an elevator than there is up to the point of taking the weight. This subject is largely a matter of detail and if the details are neglected, the result will be the escape of dust all along the line. Please bear with me in the consideration of some of the details of a scheme to better confine dust with the moving stream of grain and, therefore, to keep it from escaping into the elevator.

"Starting first with the scale hopper: this sould be sufficiently tight of itself not only so that grain will not leak from it, but that dust will not be forced out through its sides. Second, it should be provided with an adequate air vent to relieve the pressure on the air it contains as the grain is dropped from the garner into it. The cross section area should approximate 40 to 50 per cent of the area of the garner openings or gates. The grain coming down from the garner into the scale hopper necessarily must replace the air that is in the scale hopper. This air must find a ready point of escape or it will force the dust out onto the weighing floor. The third element is a proper application of the canvas or curtain, which should be hung from the garner, suspended plumb inside of the four sides of the scale hopper. To prevent the bulging of this canvas by the inflow of the grain from the garner, baffle strips of a triangular shape, applied properly and in the proper place on the inside of the four walls of the scale hopper, will deflect the air currents and give direction toward the vent. Next and a very important part of the air vent is the valve or hinged cover of such a vent, which finds its top in the top of the garner.

This valve must be carefully made and of a light material, hung almost in a perpendicular position, so that gravity will close it. Thus applied, it will function properly.

"The garner floor is frequently dusty because of defects in garner construction. When the leg delivers to the garner it is continually pumping air into it with the grain. This current of air, plus the agitation made by the overthrow of the grain, sends up clouds of dust inside of the garner, which must find a vent. After considerable number of experiments, our conclusion is that the most economical vent is a connection of the garner with the back leg at a point at the top of the garner well above the capacity grain line. This vent should have the same cross section area as the back leg and should be provided with a panel made to open for examination and for cleaning. Probably the angle of pitch should be 45 degrees or greater. The action is automatic because of the downward flow of the empty cups in the leg well creating a downward flow of air, the velocity of the flow of air depending upon the speed of the leg. This method of venting the garner, if all other vents are eliminated, will be found satisfactory and will keep the garner floor free from dust, if the garner is properly constructed and if the head of the leg is as tight as it should be.

"Another place involved, from a weighmaster's or scale inspector's standpoint, would be the application of a dust collection system to the boot. This is objectionable for the same reason that has already been given, that usually it is a hidden appliance and hence open to suspicion. Repeated investigations have disclosed that where such pipes have been installed, they are usually over the boot pulleys and in a large proportion of the cases investigated, it was found that these pipes were clogged and hence were not performing their functions. Houses were repeatedly found with basements dirty, due to the fact that even while this device was in operation, it was not doing the work that was expected of it, either by the fire underwriters or by those seeking to safeguard the health of the employes. This may be corrected by applying the indirect method, or in other words, cutting the suction pipe from over the boot pulley and extending the pipe by making a forked branch, or Y, leaving the ends open and made funnel shaped, to collect the dust from the boot pan which escapes from the boot and the leg; which really after all is the objectionable feature that is to be overcome. The dust that is confined with the moving grain is not the dust that causes the anxiety. No elevator or mill need be dirty, if a sufficient number and proper sized dust collection pipes or aspirators are properly placed and properly installed.

"Going a trifle more into detail and following closely the sketch exhibited, the air vent from the hopper speaks for itself, but the detail of the valve 'C,' which is hinged at the top, should be discussed. This valve should be made of very light wood, of thin dimension, halved together similar to the construction of screen windows, and be covered with canvas, the canvas extending far enough up on the upper edge to form a hinge.

"The canvas or curtains which hang from the garner should be suspended so as to drop to the top of the upper edge of the triangular baffle strip or possibly extend down onto the strip just a trifle. They must not be fastened to the hopper. These triangular baffle strips, we find, are preferably made from a 4x4, which should be surfaced on four sides and then cut on a diagonal. These baffle strips may be either nailed, screwed or bolted to the four inside walls of the scale hopper and at a point above the normal grain line for the full capacity of the hopper, which usually is figured on a wheat bushel basis; if coarse grain is used, due consideration to the weight thereof and consequently to the hopper load should be given in placing these strips."

On Scale Testing.

The following report was made by the Committee on Scale Testing:

"1. The standard of mass for testing grain scales shall be derived from primary weights, verified by the United States Bureau of Standards, Washington, D. C., to within what is known as their 'Class B' tolerance.

"2. The 50-pound secondary or working cast-iron weights used directly in testing scales should be of such design as to facilitate stacking; they shall be free from pockets, blowholes, etc., which are liable to catch and hold foreign matter.

"3. These weights shall be tested and adjusted in comparison with the master weight, which has been verified to within 'Class B' tolerance. The working weights shall be adjusted to within 10 grains and maintained to within 25 grains of their true value.

"4. 'Standard' counterpoise weights shall be used for testing leverage ratio and the graduation value of poises.

"5. All hopper scales shall be tested with standard test weights to at least 8 per cent of their maximum capacity, and these weights are to be used in even multiples of 1,000 pounds. For individual corner tests, at least one-fourth of the respective test loads specified shall be used.

"6. In addition to the above test, a load test shall be made to determine if any interference occurs between the fixed and movable parts of the scale, and to discover any weakness due to yielding in supporting structures, etc., by filling scale hopper with grain to an amount equal to the maximum load weighed, less the amount of test weights used. The sensibility reciprocal shall be obtained under this maximum load for comparison with that shown under test with test weights alone, or when the scale is empty.

"7. All scales, whether new, repaired, or rebuilt, shall be tested prior to being put in service.

"8. All scales in service shall be tested at least twice each year.

"9. Whenever possible, facilities shall be provided to apply the weights on the corner test so that the center of gravity of the standard test load will be in a vertical line that passes through, or very near, the centers of the main bearings. As to all *new* construction, means must always be provided to meet the above disposition of test weights.

"10. Scales shall be kept in the closest practical adjustment and shall be considered inaccurate when they cannot be maintained in adjustment to within the tolerance for ratio given in the following table, which corresponds to a tolerance of within ¼ pound per 1,000 pounds:

Capacity of scale in pounds.	Greatest error allowed in excess of deficiency.
3,000	¾ lbs.
6,000	1½
12,000	3
15,000	3¾
24,000	6
36,000	9
48,000	12
60,000	15
84,000	21
96,000	24
120,000	30

"11. In a scale provided with a trig-loop, the sensibility reciprocal is the added weight required to be placed upon the platform to move the beam from a horizontal position in the middle of the trig-loop to a position of equilibrium at the top of the loop. This may be determined by subtracting the weight, instead of adding it.

"12. The sensibility reciprocal shall never exceed the amount given in the following table:

Capacity in pounds.	Sensibility reciprocal.
3,000	1 lb.
9,000	2 lbs.
12,000	3 lbs.
18,000	4 lbs.
24,000	5 lbs.
30,000	6 lbs.
48,000	8 lbs.
60,000	10 lbs.
72,000	12 lbs.
84,000	13 lbs.
96,000	14 lbs.
120,000 and up	15 lbs.

TRACK SCALES.

"1. All scales shall be tested with a load equal to the maximum load weighed.

"2. Railroad track scales used for weighing grain should be maintained so that when a test load, consisting of a one-truck short wheelbase test car standardized on a master scale, is used, the largest algebraic mean of any two errors found for any two positions of the test truck shall not exceed 1/20 of 1 per cent, or one-half pound per thousand pounds of test load applied, provided, however, that no two errors shall be selected corresponding to positions of the test truck equal to or closer together than the distance between the sections of the scale. Moreover, the scale shall be corrected when it is found, on test, that the error exceeds 1/20 of 1 per cent of the load applied, for any position of the test load on the scale. The manufacturers' tolerances on new scales shall be one-half of the above values.

"3. Where railroad track scales are tested with standard test weight, at least 8 per cent of the capacity shall be used, and these weights shall be used in multiples of 1,000 pounds, and the entire test weight load shall be placed on each section of the scale.

"4. All scales shall be kept in the closest practical adjustment and shall be considered inaccurate when they cannot be adjusted and such adjustments maintained to within the tolerances for ratio given above.

"5. The sensibility reciprocal shall never exceed 40 pounds.

"6. All scales in service shall be tested at least twice each year."

The Resolutions.

The conference adopted the following resolutions:

1. Resolved, That there shall be no open garner or scale bin openings, or openings to roof from same, or any connection with any dust collecting system before weighing of grain, and be it further

Resolved, That the chairman appoint a committee of six to investigate W. E. Thompson's report, also various methods to prevent fire and explosion hazards, and to meet with a joint committee on Docket 9009, "Architects and Elevator Builders."

2. Resolved, That hopper scales should be as near carload capacity as the physical conditions of the elevator will permit.

3. Resolved, That the slope of the bottom of all receiving garners be not less than 40 degrees at any point or plane, and that the smallest dimension of any garner opening shall not be less than 10 inches.

4. Resolved, That even draft weighing is conducive to error, and that the practice should be discouraged by weighmasters everywhere.

5. Resolved, That it is the duty of the unloaders to sweep each car clean of all grain; and, further, that it is incumbent upon the supervising weighing department to insist that such sweeping shall be well and thoroughly done at the unloading sinks; and that where the unloaders of bulk grain do not sweep the cars clean, thereby necessitating the after-sweeping of such cars in adjacent railroad yards, such after-sweeping should be done at the expense of such unloaders; and that the grain so swept from such cars should be credited to the cars from which it is swept.

6. Whereas, Registering beams, not automatic, are of material value in verifying the reading and recording of weights; therefore be it

Resolved, That terminal weighmasters should do all in their power to encourage the installation of registering beams on scales now in use, and require their installation on all new scales installed.

7. Resolved, That it is the sense of this conference that posted elevators should be required in all new construction; and be it further

Resolved, That where the cribbing of unposted elevators is of such character and construction that alignment of scales and their accuracy cannot be maintained, the posting of such elevators is essential.

8. Resolved, That loading spouts from hopper scales to car that are not welled in, any part of which run through elevator bins, should be tested at least twice each year or oftener to detect possible defects therein and to insure grain tight spouts.

9. Resolved, That in the opinion of this conference, elevators or man-lifts in grain warehouses and mills for the use of employes and others, whose duties require their presence in the cupalas of the elevators, would pay for themselves by increasing the efficiency of the men and operation of the plants.

10. Resolved, That it is a waste of time to attend this and similar conferences, to talk about improvements in terminal grain weighing service, agree on the needs of such service, and adopt resolutions accordingly, if the terminal weighmasters do go home resolved to act in accordance with such conclusions.

In accordance with resolution pas the chairman appointed the follow committee to investigate W. E. Tho son's report, also various method prevent fire and explosion hazards, to meet with a joint committee Docket 9009, "Architects and Elev Builders": A. E. Schuyler, chairm W. E. Thompson, E. Culver, M. H. L J. T. Bradshaw, C. G. Stoody.

This committee held its first mee immediately following the confer and by motion they requested J Schmitz to serve with the commi They also made definite plans for vestigating the suggestions embodie Mr. Goemann's motion.

INTEREST IN THE INTER TIONAL GRAIN AND HA SHOW.

States south of the Dixie Line attempt to demonstrate at the Int tional Grain and Hay Show, Nov to Dec. 6, that their farms are pr ing more than cotton. During r years the agricultural forces worked for a better balance in the system in the South and have en aged the growing of cereal crops. quality of these products ranks and will make a fine showing in parison with those grown in northern states.

Dr. Bradford Knapp, Chief of Extension Work in the South fo U. S. Department of Agriculture, terested in the Exposition and is g every assistance in the securing of exhibits. Dr. Knapp, in a recent l says: "I am very much interest an adequate and representative ex from the South. The South, toda producing good corn, some very lent wheat, some good barley and and especially good hay. Deans directors of the agricultural colleg Southern States have indicated interest and are making plans not to attend the Exposition but to farmers of their states send exh

County agents and other exte forces in the several states are g active coöperation in securing ex to compete for the $10,000 in cash miums offered by the Chicago Boa Trade at this International Show. ing the months of October and N ber many hundreds of local show community fairs are being held thr out the Middle West. The winnin hibits are being marked and exhi are being interested in the Show a cago and arrangements are being to forward these many exhibits. I way a high quality of corn, small and hay will be secured. The c agents are giving assistance in th ter selection of samples and are taking back some of the winning ples in the shows, eliminating poo of corn and replacing them with that improve the exhibit and mak a stronger show. There is ever dence that there will be a large ber of exhibits and an unusually competition. Farmers everywher urged to get in touch with the c agents and to secure their assi and coöperation in arranging f hibits to be sent to the Interna Show.

PACIFIC GRAIN CO.
Grain Dealers
PORTLAND - - OREGON
Milling Wheat and Brewing Barley a Specialty
Shipment from Principal Grain Points in Washington, Oregon and Idaho

1.42; bright, 1.42@1.44; fair to good, 45 to 47-lb. test, $1.35@1.40; low, 41 to 44-lb. test, $1.28@1.37; 36 to 40 lbs., $1.20@1.28; feed, $1.20@1.30. Iowa quoted $1.25@1.40 for light to fancy; Wisconsin, $1.30@1.43; Minnesota, $1.25 @1.40; Dakota, $1.25@1.40; feed and rejected, $1.20@1.30.

BUFFALO.—Maltsters were out of the market, just waiting, but all living in hopes that they could continue in business. They have quite a fair amount of orders on hand which they can fill with stocks of barley now here, after which it will be up to the brewer. Dealers were asking about previous prices as the West has shown more strength than for some time past. Quoted: Old malting, $1.42@1.48; new, $1.33@1.40; feed, $1.30@1.38 for old and $1.25@1.30 for new, on track or in store, Buffalo.

DULUTH.—Trade in barley was slightly better during the last week, but it was nothing to boast of. Receipts amounted to just 53 cars, as against 54 during the same period last year. Prices were advanced 2@4c, making the range for spot 97c@$1.31. Stocks of barley in the elevators here now aggregate 810,000 bus., an increase of 64,000 bus. during the week.

KANSAS CITY.—Offerings having fallen off sharply, there was a firmer tone in the barley market this week. Prices advanced 2@3c a bushel. No. 3 was quoted nominally at $1.21@1.23 and No. 4 at $1.19@1.21. Receipts were 9 cars, against 16 a week ago and 75 a year ago. Notwithstanding the fact that the crop in the western portion of Kansas City's territory is much larger than in 1918, shipments to this market have thus far been disappointing. Car shortage and the preference given to distressed wheat in the movement are helping to retard shipments of barley. The main reason, according to dealers, is the relative cheapness of the grain, compared to corn and oats, which makes barley the logical feed in the producing territory and between that and Kansas City. Buying here during the week was credited to local feed grinders and shippers. Some cars previously on track went into elevators and the stocks increased 5,000 bus. to 143,000 bus., against 106,000 a year ago. Whole ground barley feed was quoted at $2.70 per cwt., sacked, in carlots, about 5c higher than a week ago.

PORTLAND.—The barley movement thus far this season has been very light, barely half of that of a year ago, although at present prices are considerably above those of last year, No. 3 brewing standing at $64.50, compared with $49 a year ago and feed at $63.25, compared with $47. There is, however, as the *Commercial Review* points out, no brewing demand at this time and very little barley is used for the manufacture of temperance drinks compared with beer of former times. Present stocks of barley at tidewater markets are ample for all inquiries.

SAN FRANCISCO.—Barley stocks in this market are quite large but the market itself is very quiet, buyers taking only sufficient quantities for actual immediate demands. All business at present is at the country points. Owing to embargo at the out-ports shipments by rail have fallen off materially and those by sea from San Francisco are very small, owing to shortage of tonnage. This is rather unfortunate, as Europe, especially Great Britain, is in need of malting varieties and willing to pay a fair price for it and would probably buy here, although India and Japan are shipping small quantities. Barley values as reported by the *Commercial Review* are $3@3.10 for the shipping grades and $2.95@3 per cental for the feed.

CHICAGO.—The barley market during the past week was rather better, in that the demand was consistently good, increasing in force after the turn of the week when prices advanced daily. The demand, however, was as usual from the maltsters chiefly, with the elevators taking some grain, but only the better qualities had any real standing in the market. Arrivals were not particularly heavy, and the anticipated cold weather was expected to cause still further reduction. Monday's market continued the strong tone of the closing days of the past week and a further rise of 2c was noted in prices on the strength of an urgent malting demand, although the shippers also took a few cars. Offerings were quite light for Monday. Sales of 28 cars were reported at a range of $1.20@1.43 with five cars to arrive at $1.31. Futures closed higher—December at $1.38 asked, May at $1.34¼ asked, these prices in both instances being fractionally under the high for the day. Sales of 13,000 bus. were reported for domestic shipment but there was little export inquiry. Exports for the week were 1,088,000 bus., compared with nothing a year ago. The visible supply is shown elsewhere

Canadian Visible Supply.

Canadian visible supply of wheat increased 2,364,000 bu. last week, and oats 312.000 bu. Last year wheat increased 2,915,000 bu. and oats decreased 611,000 bu. Details follow:

	Oct. 25. 1919.	Oct. 18. 1919.	Oct. 26. 1918.

News of the Terminal Markets

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Richmond jobbers very busy this week, as follows:

Feeds—Very active, with quotations as follows: Bran, $42.50@43.50; middlings, $48.50@49.50; reddog, $68.00@69.00.

Hay—Good demand with quotations as follows: No. 1 timothy, $31.00; light mixed, $30.00@31.50; No. 1 mixed, $30.00@31.00; No. 1 clover, $32.00@33.00.

Corn—Very slow; sale prices quoted as follows: No. 2 white and No. 2 yellow, $1.52@1.53; No. 2 mixed, $1.51@1.52.

Oats—Moderate demand with prices No. 2 white, 78@79c; No. 3 white and No. 2 mixed, 75@76c; C. S. meal, 7½% grade, $75@76.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts, 32 cars; market steady, with no material change in values. No. 2 white selling at 70½c; No. 3 white, 70c.

Live stock market: Strong receipts; 500 hogs with good demand, and market about 10c higher. Bulk of sales, $12@13; top, $13.05. Cattle market steady, top beeves, $15.

The permit system which has been put into effect again has caused much dissatisfaction among the country dealers as well as slow movement of grain; many times they have the cars and no permits, and permits and no cars.

Saturday's corn receipts at Peoria, 71 cars, of which 10 were new. Market firm, with active demand for all kinds of corn. Local consumers, dryers and shippers took the corn. Closing prices were ½@1½c higher; No. 1 yellow, $1.39@1.39½; No. 2 yellow, $1.39@1.39¼; No. 3 yellow, $1.39; No. 4 yellow, $1.38; No. 1 mixed, $1.39; sample, $1.10@1.32; new corn, No. 4 yellow, 4 cars, testing 19@19.2, at $1.32; No. 5 yellow, test 20.9 at $1.29, test 20.2, at $1.29½; No. 4 mixed, test 19.4, at $1.30.

SIOUX CITY, IA.

Paul Larson, Correspondent.

The last membership certificate issued at $3,000 was sold last week to L. C. Button. The board of directors voted to raise membership certificates to $5,000 and limited to four at this figure.

The first new corn to arrive in this market was received Friday. One car graded No. 4 mixed, 19.4% moisture, and the other car graded sample grade yellow with 23.2% moisture and of very good quality.

The following were visitors on the floor last week: H. Albers, of the Albers Commission Co., Omaha; Mr. Quimby, of the Holmquist Elevator Co., Omaha; Gus. Lukin, manager of the Farmers Elevator Co., Yankton, S. D.; Will Grettenberg, of the Grettenberg Elevator Co., Pierson, Ia.; Mr. Sullivan, of the Atlas Elevator Co., Allen, Nebr.

The Western Terminal Elevator will finish pouring concrete the first of the week. The tanks are now up 92 feet. The Terminal Grain Corporation Elevator is now up 60 feet, working 24 hours a day and running eight feet of concrete per day. The Flanley Elevator will be operating in about ten days. The Mystic Elevator will be in operation about the first of November.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 134 cars. Stocks at the end of the week were: Flour, 36,000, barrels, increase of 3,500; wheat, 683,000 bushels, decrease of 9,000; corn, 23,000 bushels, decrease of 6,000; oats, 526,000, increase of 115,500.

The Tennessee department of agriculture is continuing active steps to prevent sale of reground bran as middlings or shorts in the state. One dealer who was recently fined for the practice announced his intention of removing to an adjoining state to do business. The department of the neighbor state was notified to look out for his arrival, and take care of him.

Demand continues moderate for corn meal. Southeastern corn mills, with capacity of 144,000 bushels, had output last week of 17,967 bushels, or 12.7 per cent of capacity, which compared with 17,632 bushels and 11.9 per cent the preceding week. Prices: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.30; plain meal, $3.20. The tendency of prices is lower.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

Grain trade was routine last week. Wheat continues very strong, with mills buying supplies in St. Louis and other markets. Rains have delayed movement of new corn. Oats are in fair demand and strong. Quotations last week were: Wheat—No. 2 red, $2.33@2.35. Corn—No. 2 white, $1.55; No. 3 white, $1.53; No. 3 mixed, $1.50. Oats—No. 3 white, 77½c; No. 3 mixed, 76c; No. 3 red, 76c.

CLEVELAND, O.

F. R. Sowers, Correspondent.

The corn market shows a similar decline of about 1 cent per bushel, today's quotation being at $1.48.

Quite a good movement of both corn and oats has taken place in the last week and many cars of new corn are now coming forward as the weather has been favorable for husking.

There has been only a slight variation in the market covering oats, corn, feed and hay in the past week and on the whole oats today are about a cent lower than a week ago, the price ranging from 74 to 74½c per bushel.

Reports from those attending the National Grain Dealers' Convention at St. Louis indicate that it was an occasion long to be remembered. A large delegation from this market was well satisfied that their trip was worth while.

DENVER, COLO.

H. M. Hayter, Correspondent.

Rex Houlton, with the Flanley Grain Co. at Omaha, Nebraska, has been transferred to their Denver office.

Fred W. Elder, of the Fred W. Elder Grain Co., at Hastings, Nebraska, was a visitor at the exchange the past week.

Paul Holmquist of The Conley-Ross Grain Co. of this city made a business trip to Denver the latter part of the week.

D. H. Friend, manager of the La Salle Cooperative Exchange of that city, called on a number of his grain friends the latter part of the week.

Colorado's corn crop this year will be worth more than $15,000,000, according to an estimate issued Thursday by the department of agriculture. The condition of the Colorado corn crop October 1st is rated at 70 per cent.

Wet weather has delayed the harvesting the crops around Rocky Ford, Colorado, to an extent that means a loss unless they should have an unusually early winter. The bean crop is not threshed and little of it stacked.

DES MOINES, IA.

A. McArty, Correspondent.

Sargent & Co., Des Moines, are installing a new fifty foot conveyor to handle their increased business.

Receipts during the week as follows: Wheat, 65 cars; corn, 47 cars, oats, 57 cars; flax, 8 cars; barley, 5 cars; mill feed, 53 cars.

L. R. Goff, manager of the Fontanelle Co-operative Elevator Co., met with a slight accident Oct. 24th while on a hunting trip, having his dog in the car, and the dog got his foot tangled up with the trigger, discharging the gun and slightly wounding Mr. Goff.

C. N. Ward, of the Union Iron Works, Decatur, Ill., is back in Des Moines again at his old stand looking after his old customers and also hunting new ones, they having installed the machinery in the new 35,000-bus. concrete elevator of H. B. McVey at New Sharon, Ia. Also sold a large sheller and cleaner to the Farmers Elevator Co. at Kellogg, Ia., which will be installed at once to handle the new corn crop.

DETROIT.

John Barr, Correspondent.

There is not much doing in the barley deal and the market is firm at $2.60@2.75 per cwt. for cash No. 3.

Rye is firm owing to buying for eastern shipment. The market advanced to $1.37 for cash No. 2. Receipts were not large.

Beans were active and firm early in the week and an advance of 10c was made. Later demand disappeared and the close was dull and weak at $6.90 per cwt. for immediate and prompt shipment.

Buying of oats for local consumption was well sustained and the market ruled firm. There was not much doing for shipment. No. 2 white oats were quoted at 74½c, No. 3 white at 73@73½c, and No. 4 white at 72@72½c.

Corn is showing a little more life. The market has had some rather erratic changes during the week owing to the smallness of stocks. An urgent demand caused an advance of 7c one day, but this was lost in part later. Stocks are so small here that an important demand could not be satisfied and there is not enough coming in from day to day to meet current needs. The closing tone was firm at $1.46 for cash No. 3, $1.48 for No. 2 and No. 3 yellow, $1.46 for No. 4 yellow, $1.45 for No. 5 yellow and $1.44 for No. 6 yellow.

TAMPA, FLORIDA.

Leonard Selz, Correspondent.

Williams & Company, local dealers, advise the trade of the withdrawal of Mr. B. W. Williams from that firm. It is understood that the firm name of Williams & Co. will be retained for a while.

Cottonseed meal, which showed a slight weakness a couple of weeks ago, has once more almost reached the peak of high prices attained at the beginning of the crushing season, 7% Amm. is being quoted at $71.00.

No. 3 white oats are quoted at 89½c, sacked 100 lbs., delivered Tampa, all rail. No. 2 white at 92½c. Receipts of oats during the past week have been fairly heavy, and general quality is excellent. There is a good regular demand from country buyers and floor stocks are being kept well cleaned up.

There is no demand in this section just now for western corn, as Florida corn is dominating the market here now. No. 3 white Florida corn is quoted at $1.57 per bushel, in 100-lb. sacks. Very little trouble is being experienced this season on account of the Florida corn becoming heated and weevil-infested, as the Florida farmer is becoming more intelligent in his handling of the crop, and while for many years the advent of Florida corn coming upon the market was the signal for general dissatisfaction and trouble in handling, it is now looked upon as a permanent factor in the grain business in this state. The few elevators which are operated in the state, are handling the corn nicely; sacking in very attractive printed packages, making a highly merchantable product. The Miller-Jackson Grain Company of this city have done much to improve the Florida corn by their advice to farmers throughout the state.

CAIRO, ILL.

J. E. Clancy, Correspondent.

A. W. Lynch of the Magee Lynch Grain Co. has returned from a two weeks' trip to Wichita, Kansas City and St. Louis.

Farmers say that there will not be enough corn in this vicinity for feeding purposes and they will have to buy corn before January.

The receipts the past week have been light. Shipments are some better and the demand from the south shows some improvement. The shortage of cars is still acute and there does not appear to be any relief in sight.

The Roberts Cotton Oil Co. resumed operation at their plant here, having shut down since the fire which destroyed their warehouse last spring. The new $50,000 fireproof warehouse is about completed and they have installed new machinery throughout the plant.

The Missouri Pacific and Cotton Belt Railroads, which have been operated under the management of the Railroad Administration since the Government assumed charge of the railroads, are to be operated as separate roads after the first of November, so it is reported here.

The Chicago Tribune in commenting on the building up of traffic over the great natural waterways of our country recently credited Cairo with an interesting advantage, stating that three-fourths of the waters of the United States flow past Cairo's door. Waters from 14 states to the Mississippi and from 13 states to the Ohio pass Cairo, indicating its unquestioned importance in the growth of the present plans to which the Price Current-Grain Reporter has given deserved attention

FORT WORTH, TEXAS.

G. E. Blewett, Correspondent.

Corn will be moving again as soon as weather permits and dealers look for an active market in this grain during the winter months.

Demand for mill feeds remain dormant with mills trying to dispose of their surplus bran and shorts at lower prices. Very little demand in car lots and mixed car business is somewhat slower.

Inquiries are being made as to prices on Northern Three White Oats which would indicate that there will be a demand for these in the near future and the fact that the prices on the Texas Red Oats have advanced considerably the past two weeks would suggest the possibility of this, it being almost impossible to buy any Texas oats that will grade No. 3.

Fire Friday morning destroyed completely the frame portions of E. G. Rall Grain Co.'s elevator, located here, with a loss of about 30,000 bus. of wheat and 10,000 bus. of oats, besides sacks. Origin is unknown, but indications point to wiring or hot journals as fire was first discovered in the workhouse tower. Mr. Rall stated he will rebuild at once with much improvements and added space. The large concrete bins were undamaged.

The extremely heavy rains the past two weeks have resulted in receipts at country stations ceasing entirely, consequently there hasn't been any corn, oats or milo maize offered for shipment and those who sold these short for future delivery are finding it not only difficult but extremely expensive to cover their contracts. Considerable apprehension is felt for fear the

Did you get one of those free strokers with all the grain grades printed on it? Yours for the asking.

The first car of new corn was received here Tuesday. It graded sample yellow because of moisture of 24 per cent. Test weight was 51½ lbs. The car originated at Grelton, O.

E. F. Hanson, manager of E. F. Hanson & Co., Wauseon, O., died at Grand Rapids, Mich., on Oct. 20. He had gone to a hospital in Grand Rapids for a slight operation and his sudden death was a shock to his many friends in the grain trade.

Lon Fetterman, who for several years has been manager of the Haskins Farmers Elevator at Haskins, O., has accepted a position as manager of the Avery Farmers Elevator Co., which operate elvators at Kimball, Avery and Huron, O., with headquarters at Avery.

Toledo grain trade will be well represented at the fall meeting of the Ohio Grain Dealers' Ass'n at Columbus, Oct. 31. Those who will attend are: Fred. Mayer and Bill Cummings, of J. F. Zahm & Co.; Joe Doering and Charles Keilholtz, of Southworth & Co.; Chas. Patterson, of John Wickenhiser & Co.; Sam Rice, of the Rice Grain Co.; Dave Anderson, president of the National Milling Co.

Prices for cash grains held about steady last week. Receipts are exceedingly light and buyers are eager for supplies. No. 2 white oats ranged during the week from 71⅝c to 72¼c, basis Toledo rate 23c to New York. No. 3 whites were ⅜c to ⅝c less, with No. 4 white about a cent discount. Heavy weight oats are selling at a premium. A car of new No. 6 yellow corn, 22.8 per cent moisture, sold at $1.19½, Toledo rate. Old No. 5 yellow brought $1.35 Saturday, basis Toledo rate. Northern spring wheat is bringing good prices. A car of No. 5 dark sold at $2.34½. Receipts for the week: Wheat, 118 cars; corn, 15; oats, 40; rye, 57.

Kent. Keilholtz, agile member of Southworth & Co., was minus some of his "pep" when he took his place on 'Change Saturday. The reason is apparent when it is known that on Friday he "walked the hot sands" along with Pete Hipp of the Napoleon Grain & Stock Co., Napoleon, O.; Rush Croninger, elevator manager at Grand Rapids, O., and Charles Keilholtz, of Southworth & Co. It was the biggest class in the history of the Toledo lodge of the Mystic Shrine. All the Toledo grain trade turned out to see that the novitiates were "properly handled." "Kent." must have had the well known "hunch" or knew instinctively that the path would be perilous and thorny, because he made the rounds before leaving the floor and bade all his friends "good bye."

ST. JOSEPH. MO.

W. H. Moore, Correspondent.

Frank Danaher is now traveling for the McKee-Lindley-Dunn Grain Co., and left on his first trip to the west this week.

St. Joseph Grain Exchange weighing supervision was withdrawn from the Schreiber Milling & Grain Co.'s plant on October 22nd.

C. P. Woolverton resigned as vice-president of the St. Joseph Grain Exchange and Chas. A. Geiger was elected to fill the vacancy. W. M. Huff was elected director in the place of Mr. Geiger.

Fred Watts, of the T. P. Gordon Commission Co., was in serious trouble last week when he forgot his wheat license number, and the general question on the Exchange was, "Number, please."

The following were registered on the Grain Exchange during the week: J. A. Johnson, Highland, Kans.; W. C. Bishop, A. E. Taylor, J. N. Frankel, R. F. Uhlman, Archie Aylesworth and J. L. Ballard, Kansas City; F. C. Croupe, Maysville, Mo.; C. S. Schneider and Fred Smith, Sabetha, Kans.; G. F. Ferguson and C. J. Watts, Rosendale, Mo.; Edw. Hersatt, Ft. Smith, Ark.; Fred Warrick, Jr., Sioux City; Wm. Adams, Bigelow, Mo.; C. Davis, Plattsburg, Mo.; C. N. Jackson, Lorainne, Tex.; C. W. Yount, Atchison, Kans.; C. Poe, W. T. Currington and L. R. Jackson, of Gower, Mo.

Cash Markets.

Wheat—Choice milling wheat continues to be in very good demand, arrivals being inadequate to take care of requirements. Ordinary grain remains somewhat draggy. Receipts of red wheat have been heavier, with a moderately good demand at prices mostly 1c over last week. Good quality No. 4 hard is selling 3@5c and choice samples of No. 3 about 2@4c over last Saturday. Receipts are holding up well. Cash follows: No. 1 dark hard, $2.40@2.55; No. 2 dark hard, $2.35@2.52; No. 3 dark hard, $2 30@2.48; No. 4 dark hard, $2.28@2.40; No. 5 dark hard, $2.25@2.32; No. 1 hard, $2.30@2.45; No. 2 hard, $2.28@2.43; No. 3 hard, $2.22@2.40; No. 4 hard, $2.14@2.32; No. 5 hard, $2.08@2.23; No. 1 yellow hard, $2 22@2.23; No. 2 yellow hard, $2.19@2.21; No. 3 yellow hard, $2.15@2.18; No. 4 yellow hard, $2.12@2.14; No. 5 yellow hard, $2.05 @2.10; No. 1 red, $2.27@2.29; No. 2 red, $2.25@2.26; No. 3 red, $2.20@2.21; No. 4 red, $2.12@2.14; No. 5 red, $2.06@2.12.

Corn—Slight gains were made during the week, but closing prices were about the same as prevailed last Saturday. Demand for all varieties showed improvement, and the movement of samples has been more rapid. Shippers and feeders have done most of the buying. Cash corn follows: No. 2 yellow, $1.43@1.44; No. 3 yellow, $1.41@1.42; No. 4 yellow, $1.38@1.39; No. 5 yellow, $1.36@1.37; No. 2 white, $1.40@

1.41. No. 3 white, $1.39@1.40; No. 4 white, $1.36@1.38; No. 5 white, $1.34@1.35; No. 2 mixed, $1.40@1.42; No. 3 mixed, $1.39@1.40; No. 4 mixed, $1.36@1.38; No. 5 mixed, $1.34 @1.36.

Oats—Offerings have been very light, with a somewhat irregular request for supplies. Cash oats follow: No. 2 white, 70½@71c; No. 3 white, 69½@70½c; No. 2 mixed, 66@67c; No. 3 mixed, 65@66c; No. 2 red, 68@69c; No. 3 red, 67@68c.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen visited the floor of the New York Produce Exchange during the past week: M. A. Singer of St. Louis, Arthur Cutten of Chicago, Arthur Jackson of Chicago, R. E. Marshall of Baltimore, N. S. Wilson of Boston, and C. A. Harris of Buffalo.

A moderate domestic demand has prevailed for oats, but the inquiry for export appears to be temporarily withdrawn. Foreign bids in the market are not near a working basis. No. 1 whites are quoted at 82½c; No. 2 whites, 82c; No. 3 whites, 81½c, and No. 4 whites, 81c.

No new features are noticeable in the situation in cash corn in this market. Demand continues on a moderate scale, and offerings have been of limited proportions. Quotations as follows: No. 2 yellow, $1.54¼; No. 3 yellow, $1.53¾; No. 2 white, $1.54¼; No. 3 white, $1.53¾; No. 2 mixed, $1.53¾, and No. 3 mixed, $1.53¼.

A slight improvement has taken place in the demand for cornmeal, and handlers here were consequently a good deal encouraged over the outlook. So far, the demand has been of a jobbing character, but sales on the whole have shown marked improvement over the extreme dul ness which prevailed throughout the summer.

WESTERN CANADA.

A Caldwell, Correspondent.

The export flour trade is quiet, with very indifferent prospects for future business.

It is notable that Eastern Canada is now buying American oats because they are cheaper than western Canada's and they are also buying corn which displaces oats.

Damage to the potato crop has been much more extensive and serious than was at first reported. It is feared that 50 per cent of the total crop is in the ground and may be considered lost.

Hay prices are a little easier, having come down $1.00 per ton all around at the beginning of the week. The severe frosts have taken all feed value out of outside pastures and the consumptive demand for hay will be greatly increased.

With the passing of these conditions reaction seems probable. One feature that stands out prominently is that there will be no excited buying from Europe. We shall not have advances caused by one exporter bidding against another. On the whole the news received here from Liverpool is decidedly bearish.

The movement of wheat shows some falling off, but the coarse grains, especially oats, are moving quite freely. The average daily inspections of oats are more than double those of last year, but offerings of cash oats are very light and the demand poor. Under these circumstances most of the oats are going into store.

Though the weather is milder at the week-end, sub-zero weather over much of the west during the week stopped all agricultural work except odd jobs of late threshing. It is now too late to expect a thaw out and though much fall plowing was done the acreage turned over is much below anticipations earlier in the season.

Sharp frosts during last week delayed and in some districts put a stop to fall plowing. The weather is now milder and there is probability of a return of open weather and further prosecution of farm work. Unfortunately the frosts caught a large proportion of the potato crop still in the ground and very extensive damage has resulted.

Feed grains on this market have shown considerable independent strength this week, due probably to the uneasiness of October shorts at the tightness of the cash market. Farmers show no desire to sell at existing prices and the cash demand is unstable. There are rumors current that an embargo will be placed on oat shipments from the west as the grain board is anxious to get wheat to the seaboard and storage space at the bay ports is getting very tight.

Considerable interest is taken in rumors of the removal of the embargo on Canadian exports of wheat into the United States. Farmers are fed up with the idea that they would get present Minneapolis prices for their product. The grain trade with a more thorough grasp of the situation foresees, on the other hand, a drop in Minneapolis prices and a general leveling up and down, out of which would emerge a stable price not featured by the existing enormous premiums being paid for hard spring wheat.

DULUTH.

S. J. Schulte, Correspondent.

Julius H. Barnes, National Wheat Administrator, left for New York last Wednesday after spending a few days at his home here.

William Dalrymple of Minneapolis was a visitor on the board of trade here during the week. He expressed himself optimistically regarding the outlook for an average crop of wheat and other grains being seeded over the Northwest next spring, taking a line upon the amount of plowing that has been accomplished so far.

Trading in rye covered a fairly wide range on this market during the last week. Spot No. 2 rye closed 21¼c off at $1.35¼. Bookings of additional rye contracts for shipments as soon as present shipping restrictions are removed, were reported. Stocks of rye in the elevators here now aggregate 4,720,000 bushels, an increase of 352,000 bushels in the last week.

Canadian wheat keeps straggling to the elevators here from points in territory served by the Great Northern railroad. The wheat is under the control of the Canadian Grain Board, and is being handled here by McCabe Bros. & Co. mainly. The grain has so far been shipped out from the elevators to a Georgian Bay point whenever any accumulation has taken place.

A. Laird Goodman, manager of the Duluth Universal Milling Co., has returned after attending the annual convention of the National Millers' Federation at Chicago. He found that while the millers at the convention recognized that they are passing through some trying experiences in carrying on their trades under the present restrictions, they are looking forward to the clouds clearing away in due course. The consensus of opinion among the delegates at the gathering was that the trade is in a healthy condition in spite of all the difficulties that have been encountered, and operators in it are prepared to take advantage of any favorable slants that may develop from now on.

Members of the Duluth Board of Trade will take a vote at the end of next week on a scale of penalties for failure to make deliveries of grain under contracts. It is proposed to place the penalties on all unsettled trades as follows: The payment of not less than 3 per cent, nor more than 10 per cent in the case of wheat, rye, barley and oats, and not less than 1 per cent, nor more than 10 per cent, in the case of flaxseed, as the committee may deem just and equitable, above the true commercial or market value of the commodity as so determined by the committee. The only change proposed from the rule regarding penalties now in force is in the lowering in the minimum penalty in the case of flaxseed from 3 to 1 per cent.

MEMPHIS.

George Williamson, Correspondent.

John A. Bubeker, of Kansas City, was here during the week mixing with local members of the hay trade.

Sigmund Rothschild, of Houston, Texas, large dealer in rice, bran, milo maize and other feed products, was here during the week and a visitor on 'Change.

J. Bright Horton, one of the local grain trade members who served his country through the late war, is at home, having received his discharge from the service early in the week. He was major, but never had the chance to get to Europe. He is already in charge of his business, which, during his absence, was handled by his father.

Continued rains have done lots of damage to the cotton crop and interfered with gathering of corn. There has not been any weather cool enough to check the growth of pastures, the result being less than usual demand for grain and feeds. But little fall sowing has been done, as the ground has been kept too wet for plowing, but it is expected the usual acreage of grain will be sown.

Business continues very quiet and the entire trade is waiting for a turn, which is expected soon. They realize that the extremely high prices obtained for cotton will mean good business later, and it may also be a factor next spring in acreage devoted to grain crops. Some cotton has been selling here around 70 cents a pound, but the bulk of it has been going around 45 to 50, which means large prosperity, even with the yield very short.

Announcement has been made that the Quaker Oats Company had purchased a site, corner of the South Parkway and the Frisco railway, and would erect a large branch of their manufacturing department here. Twenty acres have been bought and it is expected ultimately to make this plant one of the largest in the country, as the southern territory will be served from here. Elevator and storage capacity for 350,000 bushels of grain are planned for immediate erection and the capacity of the plant is expected to be 200 cars a day. Mixed feed will be among the products turned out, which will probably make this city the largest center for such in the country, as it already is near the top.

OMAHA.

Leigh Leslie, Correspondent.

The movement of grain to Omaha has been extremely light in the last week and the cash market has been quiet and without particular feature. The first car of new corn to arrive here came in last Wednesday and was sold by the Hynes Elevator Company. It graded No. 4 yellow, contained 18.8 per cent of moisture and sold for $1.35. A car of old and new corn mixed was received several days previously by the Holmquist Elevator Co.

Omaha grain dealers and country shippers of grain throughout this territory are greatly exercised over the doing away of the blanket permit system as applied to the movement of grain to this market and the substitution therefor of the individual permit system. The trade here can see no valid reason for the putting in at this time of the individual permit system, and the Omaha Grain Exchange, through its traffic department, has entered a vigorous protest against the putting it in. In a telegram to C. E. Spens, traffic director of the United States Railroad Administration, dispatched last Wednesday, the change pointed out that every time system has been put into effect it has sulted in unnecessary and unreason delay in the movement of grain with benefiting the railroad administration, public or shippers. "It hampers the g trade in the conduct of its business," telegram pointed out, "and has in m cases resulted in unfair discrimination tween markets and between shippe The individual permit system has not made applicable to either Minneapoli Sioux City. The making it applicabl Omaha and not to Minneapolis and S City is unfair to this market and, if order putting it into effect is not rev quickly, it will result in a great los dealers in this market. "The early m ment of corn from Nebraska will be to Wyoming, Colorado and intermoun territory," it was pointed out in the gram to Mr. Spens. "Dealers here sold very large amounts of corn to go Omaha to the West in competition Sioux City and Minneapolis," the gram goes on to say, "and relying our agreement with Mr. Holden's re sentative, Mr. Clarity, that this obnox permit system would not be put into e so long as there was not congestion they expected to buy the corn to fill contracts in South Dakota in compet with Minneapolis and Sioux City. By ting in the individual permit syste this market and not at Sioux City Minneapolis you will subject dealer this market to heavy losses in favo dealers in Sioux City and Minneapo There is no congestion in the Omaha ket, nor is there any prospect of co tion. The shortage of cars itself prec the possibility of such a thing. O grain dealers and country shippers of throughout this territory resent the away of the blanket permit system a plied to the movement of grain to market and the substitution therefo the individual permit system.

Mr. band, well known as secretary of the rs' National Federation, will investi- the possibilities of a resumption of the rican export flour trade and will visit he principal importing countries of pe with a view towards promoting r relations between the millers of this try and European importers.

n. E. White, one of the old timers but a young man in his ability to originate and keep in touch with the boys, is announced by the J. Rosenbaum Grain Co. as the manager of their private wire system. Mr. White's several connections, which cover a goodly number of years, indicating that there has been nothing unusual in his advancement, includes Finley Barrell & Co., Noyes & Jackson, and he has just resigned from Logan & Bryan.

The early objections of the carriers to the high prices asked for new freight cars is another answer to the present unsatisfactory car supply situation and the criticism of Government control. Our readers will recall that "C. T." cars were mentioned during the proceedings of the Grain Dealers' National convention. This is equipment that is being slowly bought by the carriers from the Central Trust Co., New York City, which financed the manufacture of these cars.

Chester Martin of Burdick, Thomas Co., Detroit, Mich., when in Chicago last week emphasized the growing grain business of eastern Canada with which trade his firm does considerable. This will be encouraged in the present corn movement through its probable excellent quality, making long hauls from Iowa, Illinois, and the great corn producing states to or through Detroit and to Montreal and beyond entirely safe. The elevator facilities of Montreal are now

Wm. E. White, manager private wires, J. Rosenbaum Grain Co.

largely permitting reloading in smaller cars for delivery to dealers and feed manufacturers in the eastern provinces. Detroit is equipped to expedite such business, making immediate shipment from corn stocks to its Canadian trade.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Jacob B. Pultz of the Well known grain firm of J. B. Pultz & Co., is visiting relatives at Poughkeepsie, N. Y.

Louis D. Toll, office manager for S. F. Scattergood & Co., has made application for membership in the Commercial Exchange.

John K. Scattergood of the firm of S. F. Scattergood & Co., grain and feed merchants, this city, is in Milwaukee on a business trip of several days.

The United States Grain Corporation closed its offices at noon on Monday, Oct. 27, out of respect for King Albert and Queen Elizabeth of Belgium, who were visiting Philadelphia.

Receipts of flour and grain for the week ending Oct. 25 were: 1,000 bbls. and 19,297,104 lbs. of flour in sacks; 462,446 bus. wheat; 11,535 bus. corn; 80,073 bus oats; 21,540 bus. rye; 38,750 bus. malt and 520 tons of feed.

Howard Brazer of the firm of W. P. Brazer & Sons, who attended the convention of the National Grain Association at St. Louis and stopped at several points en route for Philadelphia, was given quite an ovation on his first appearance on 'Change, Saturday.

The following out-of-town visitors were registered on 'Change during the week: Andrew Hynding, of San Francisco, manager of the Nevada Alfalfa Meal Co., with mills in Fallon, Nev.; A. M. Burnett, manager of the Crescent Milling Co., Minneapolis; S. R. Swaller, manager of the Williamson Milling Co., Clay Centre, Kan.

Notwithstanding the serious loss that farmers were put to, who grew wheat last season, because of the ceaseless rains that caused much of the crop to sprout and mildew in the fields, they are now sowing an unusually heavy acreage in Cumberland and adjacent counties, New Jersey. Many farmers who heretofore never sowed wheat are now doing so.

Second Vice-President H. D. Irwin of the United States Grain Administration addressed a special meeting of the Commercial Exchange held on Thursday last for the purpose of discussing the permit system now in vogue by the Administration since the beginning of the war. After a very interesting discussion of the subject by the members of the Exchange it was unanimously resolved that it is imperative under the present abnormal conditions that the U. S. Grain Corporation should continue to supervise and issue railroad permits and that it was the general belief of the members that the export movement can best be graduated and controlled under this arrangement, which will keep all ports free and prevent unnecessary embargoes or blockades, and the membership is unanimous in stating that the applications filed have been considered fairly, all sections, all shippers and all grain having been given the best possible accommodation that the port facilities would afford; therefore, be it Resolved, it is in the public interest that the U. S. Grain Corporation shall continue the present arrangement of issuing permits for all grain and grain products consigned to Philadelphia for export, and that the membership of the Commercial Exchange has absolute confidence in the fairness and competency of the U. S. Grain Corporation to properly control the issuance of permits with justice and to the best interests of all concerned.

BUFFALO.

E. Bangasser, Correspondent.

J. C. Monfort of the firm Oatman & Monfort has been spending the last week at Green Springs, Ohio, superintending the construction of a large corn crib to take care of an anticipated large corn business they will have this fall.

Hay pressers are becoming very careless in weighing and tagging their baled hay, according to the state bureau of weights and measures. All baled hay must be marked with a tag bearing the weight and the name and address of the presser. The local authorities are watching this closely.

There were bids for rye here but too low and no sales were reported. No. 2 on track was quoted at $1.44. Wheat was very scarce and inquiry good. No. 2 red was quoted at $2.30; No. 3 red $2.28 on track, through billed. White wheat was very strong and some high prices were asked for shipment.

Announcement is made that J. C. Hennishen and George Meyers of the Star Elevator Co., have purchased the King B Milling Co. at Alliance, Ohio, where they will engage in a general milling business. The two gentlemen mentioned have had a wide experience with the elevator and flour business with the Star Elevator Co. and should make an immediate success of their venture.

J. E. Henniken, chief inspector of the Grain & Hay Exchange, spent Saturday, October 18th, at Erie, Pa., inspecting a car of feed on which there was a question of quality. One of the most valuable services rendered by the inspectors and samplers of the Grain & Hay Exchange is inspecting and sampling feeds as a disinterested party where there is a controversy as to the quality of quantity.

C. H. Hitch, grain and feed broker, 425 Guardian Building, Cleveland, was a caller at the office of the secretary of the Grain & Hay Exchange in the past week, leaving his application for membership in the Exchange and has been tendered the use of the Exchange facilities for weighing, inspecting and sampling until he has been duly elected to membership which will undoubtedly take place at the November meeting of the Executive Committee.

Corn receipts this week were quite heavy, but the price advanced 2c on Monday and then steadily declined, closing 7c lower than the high point reached. There was an easy feeling today as this market has been too high nearly all week. New and old mixed No. 3 yellow sold at a wide range under old yellow corn, but was taken at the difference. Mixed corn, especially low color, was neglected. A car of ear corn arrived this week, the first on the new crop. Closing: No. 1 and No. 2 yellow, $1.48½; mixed old and new No. 3 yellow, $1.45, on track, through billed.

The demand for oats was not so urgent this week and receivers appeared more anxious to clean up. Even then a few cars had to be carried over daily. The mills took most of the good weights but were not willing to pay much premium. There were few extremely light weights on the market. The trade is looking for a better demand next week and lighter receipts. On the whole it was a very steady market, the whole range not being over ¾c during the week. Closing: No. 1 white, 76¾c; No. 2 white, 76¼; No. 3 white, 75¼c; No. 4 white, 74¼c on track, through billed.

Inspection track receipts for the week: Wheat—No. 1 red, 3 cars; No. 2 red, 9 cars; No. 3 red, 9 cars; No. 4 red, 4 cars; No. 5 red, 1 car; sample, 1 car; No. 3 soft white, 1 car; No. 2 mixed, 4 cars; No. 3 mixed, 9 cars; No. 4 mixed, 1 car; sample, 1 car; No. 2 hard winter, 32 cars; No. 3 hard winter, 8 cars; No. 4 hard winter, 1 car; No. 5 hard winter, 1 car; No. 1 dark hard, 1 car; No. 2 dark hard, 1 car; No. 3 dark hard, 1 car; No. 1 Northern, 9 cars; No. 2 Northern, 2 cars; No. 3 Northern, 5 cars; No. 5 Northern, 1 car; No. 1 dark Northern, 1 car; No. 2 dark Northern, 4 cars; No. 3 dark Northern, 3 cars; No. 4 dark Northern, 3 cars; sample 1 car. Corn—No. 1 yellow, 63 cars; No. 2 yellow, 39 cars; No. 3 yellow, 12 cars; No. 4 yellow, 6 cars; No. 5 yellow, 3 cars; sample, 2 cars; No. 1 mixed, 3 cars; No. 2 mixed, 4 cars; No. 3 mixed, 1 car; No. 1 white, 4 cars; No. 2 white, 5 cars; No. 3 white, 1 car; ear corn, 1 car. Oats—No. 1 white, 19 cars; No. 2 white, 65 cars; No. 3 white, 68 cars; sample, 1 car. Barley—11 cars. Rye—3 cars.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

R. B. Hutchcraft, Paris, Ky., has sold his elevator to Lawrence Mitchell of North Middletown and Messrs. Perry & McCann of Shelby County.

Amended articles have been filed by Ballard & Ballard Co., Louisville, increasing its debt limit to $6,000,000 to better finance wheat and flour handling at present price levels.

Hickman, Kentucky, reports trouble over car shortage, with shipments of alfalfa, tobacco, corn, etc., laid up awaiting cars. Very poor river facilities are afforded this season.

The fall racing season is resulting in a good general demand with the local feed houses, as there is a far larger number of horses quartered at the local tracks than usual. Elevators report fair business, with prospects of early corn movement.

The second crop of potatoes has failed to come up to expectations due to rainy weather. It is claimed that a seventy-five per cent normal crop from a much increased acreage will be better than expected. Onion sets should start moving in a few days.

Wheat is bringing strong premiums and no indications are shown of a break. Spring wheat is carrying a premium of forty to fifty cents in primary markets, with hard winter 10 to 15 cents; soft winter wheat is eight to nine cents over the Government figure. Local supplies are fair.

With a continuation of rainy weather indications are that the winter wheat crop acreage in Kentucky will be very small. Only a small percentage of wheat has been seeded, and the ground is too wet for working or planting. Fall seeding of grass seeds has also been light. Seedsmen and farmers are cussing the weather man out most emphatically at the present time.

Farmers WANT Ankorite Steel Drive Posts

MILLIONS of practical farmers are reading hard-hitting facts about Ankorite Steel Drive Posts in all of the leading farm magazines. They know the posts and they want them—and they want to buy them from YOU.

We're getting inquires from thousands of farmers who want to know where they can buy Ankorite Posts. Many of them come from your territory—can we refer them to you? An Iowa dealer writes:

"Please ship us at once 1000 more of your 6 foot 6 inch line posts. We're sold out and the farmers are crying for more posts, so please rush the order and we will do our part."

"Some Post!"

Dealers who began by ordering a few hundred Ankorite Posts are now ordering carload lots by wire! They can't get them fast enough to meet the demand.

Take advantage of this big, smashing, money-making opportunity. Some live wire dealer in your territory is going to make a lot of money through the exclusive sales rights for Ankorite Posts—and we're going to get behind him with all of the resources of the Calumet Steel Company to help him sell posts as he never sold them before.

We want *you* to be that dealer. Sit down right now and drop us a letter or postcard. Just say "Send me details of your dealer proposition and co-operative sales plan." We'll do the rest.

Calumet Steel Company
208 So. La Salle St., Dept. 7

Meinrad Schoenbachler, 88 years of age, native of Switzerland, and for many years in the milling and feed business, is dead. Schoenbachler came to Louisville as a boy and was one of the founders of the F. Raidt Milling Co., which ground corn, rye, and handled feed, hay, etc. This company was sold to the Ballards about two years ago.

KANSAS CITY.

T. J. Tanner, Correspondent.

W. C. Goffe, of the Board of Trade, is in charge of a division in the local Red Cross drive.

John P. Chess, an employe of the Kansas Grain Inspection Department for 28 years, died Thursday in Kansas City, Kan.

A wagon load of alfalfa seed containing 102 bushels sold in Emporia, Kas., this week for $1,927.25, or nearly $19 a bushel.

A son of J. J. Shelley, a statistician in the office of Secretary Bigelow of the Board of Trade, was shot and severely wounded during a Hallowe'en celebration Thursday night.

Alleging failure to make application for a wheat director license and ignoring other requirements, the United States Grain Corporation has revoked the license formerly held by J. T. Allen & Son, millers, at Guymon, Okla.

Between 75 and 90 per cent of the wheat seeding to be done this year in Kansas was said to have been accomplished up to last Tuesday, with the possible exception of some dry counties in the central and southeastern portions.

In view of the pessimistic reports received this week concerning crop damage in Texas, resulting from the wettest season known there in many years, Kansas City corn shippers have taken heart. It is believed here that Texas will buy northern corn before spring. The mills of Texas are already buying liberal quantities of wheat in Kansas City.

Rumors that Kansas City stocks of wheat are seriously infested with weevil are denied by W. B. Lincoln, of the Armour Grain Co., and C. W. Lonsdale, of the Simonds-Shields-Lonsdale Grain Co. "Some red wheat has shown weevil, due to the unclean condition of cars and country elevators," said Mr. Lincoln, "but the infestation is hardly more than usual and is causing no alarm. The insects have not cut the grain." Mr. Lonsdale said cold weather would end the weevil menace.

Fire of unknown origin caused a loss of $75,000 to $100,000 in the coal and feed plant of the F. E. Ransom Coal & Grain Co., in Kansas City, Wednesday night. Responsibility for the fire rests between a defective electric wire and spontaneous combustion of coal. The grain elevator, with a capacity of 200,000 bus., containing 30,000 bus. of oats, corn and mill feeds, was practically destroyed. In the coal pockets were 2,500 tons of coal, which became a smouldering ruin. Insurance covered most of the loss. The plant will be rebuilt. It is located at 3010-3028 East Eighteenth street.

Announcement was made this week that the Murray elevator, in North Kansas City, which was wrecked by an explosion September 13, will be rebuilt by the Burlington Railway Co., owner of the house. Work may begin within two weeks. The Burrell Eng. & Const. Co., of Chicago, has the contract for reconstruction, which will involve an expenditure of $300,000. R. L. Heidenreich, chief engineer of the Kansas City branch of the engineering company, said this week that the "headhouse" would have to be rebuilt, that the foundations would need much repairing, that some tanks were in bad shape and that much new machinery would be required. More than half of the 1,000,000 bushels of grain in the elevator at the time of the fire has been removed. The loss of grain was much less than expected. Fourteen men were killed or fatally injured by the accident. The elevator has a capacity of 1,500,000 bushels, which will not be enlarged.

Cash Grain Markets.

Wheat—Receipts for the week, 830 cars, against 684 a week ago and 1,016 a year ago. An increased supply of cars under the United States Railroad Administration's recent order gave both Kansas City and Kansas shippers a fair amount of relief this week. Notwithstanding that arrivals here increased 146 cars, there was an excess in shipments which reduced the local stocks 494,000 bus., to 14,674,000 bus. Elevator men said many of the cars tendered for loading were new, and that the only restriction was the requirement in some cases that the cars must go only to points on roads owning the cars. The United States Grain Corporation did no shipping, as it desired to allow private handlers a chance to fill old sales and catch up with their business. Incoming wheat went under the individual permit system Saturday, and shipments to this market for the next week or two will be mainly of distressed grain in western Kansas, which is in danger of spoiling. More room must be made in Kansas City before large receipts could be handled. The shippers in Kansas are still complaining as to the inadequacy of cars, but the situation there is much better at many points and interior millers are able to ship more flour. Demand for milling grades of hard and soft wheat was good during the week, with local millers and elevator men buying. Low grades were slow, especially those of the poorer qualities. The grain corporation bought a few cars of objectionable

at, including durum and mixed, each Hard wheat closed unchanged to 2c er and red wheat was 3c lower to 2c er, with the advance on the upper les. Final prices were: No. 1 hard, w berry to dark, $1.22@1.153; No. 2, @2.53; No. 3, $2.15@2.50; No. 1 red, @2.29; No. 2, $2.24@2.25; No. 3, $2.20 21.

rn—Receipts, 97 cars, against 59 a previous and 261 a year ago. While es had a decline of 1@4c, with white most, there was a fair local and feed- demand on recessions. The market ed as follows: No. 2 mixed, $1.41@ No. 3, $1.39@1.40; No. 2 white, $1.41; 3, $1.38@1.40; No. 2 yellow, $1.44; No. $1.41@1.43. Offerings included three of new corn, two from Iowa and one Missouri. The Iowa corn was ed, grading No. 3, with a low moisture ent. It was offered Saturday and d to sell. The Missouri corn was in ear. It hung on the market several without meeting a buyer. Advices ived by local handlers indicate that and Missouri farmers will sell corn y at a little above $1, but the outlook ars to move the grain promptly is un- rable. Stocks here decreased 9,000 for the week, to 47,000 bus., against 00 last year.

ts—Receipts, 94 cars, against 83 a ago and 169 in 1918. The market a very quiet affair, with buying ly by local dealers and shippers. te oats were unchanged from the pre- ng week, at 71@72c for No. 2 and 70½ for No. 3. Mixed sold from un- ged prices to 1c higher, with No. 2 at 8c and No. 3 at 65@66c. The close on oats was unchanged at 67@68c for 2 and 66c for No. 3. Light weights ered sales of many samples difficult, good oats were wanted. Stocks in- sed 13,000 bus., to 1,230,000 bus., nst 2,503,000 a year ago.

nfir and Milo—Receipts, 7 cars, against week ago and 2 a year ago. Car city and weather conditions in Texas blamed for the reduced movement. Oklahoma and Kansas threshing is to be done, and receipts from those s are not expected to be important some weeks. Dealers who sold short October delivery were caught in a los- position, but there is hope that a No- ber squeeze will be avoided. The de- d is fair for spot milo and kafir, but rge lots are being taken on the pres- high level. Prices here were un- ged to 10c higher on the week, closing ollows: No. 2 white kafir and No. 2 $2.40@2.50 per cwt.; No. 3, $2.30@2.40. ks increased 1,000 bus., to 16,000 bus., nst 45,000 last year.

MILWAUKEE.

Protest Individual Permit System.

At a special meeting of the board of directors of the Milwaukee Chamber of Commerce held on Thursday, Oct. 23, it was unanimously voted to send a vigorous protest to the railroad administration against the individual permit system, which, according to advices, will be again inaugurated on grain from all points to western primary markets, on Oct. 25, 1919. At the meeting the following resolutions were adopted:

Whereas, Practically all of the wheat ordered by the U. S. Grain Corporation to be shipped from Kansas City has been received and placed in storage in Milwaukee, leaving available more than sufficient space for any shipments of all kinds of grain from country points, and

Whereas, The placing of restrictions on such country shipments to Milwaukee will tend to divert a large share from territory tributary to this market to Minneapolis and Duluth, where no restrictions are to be placed.

Resolved, That the Chamber of Commerce of the city of Milwaukee strongly protests on behalf of both country shippers and grain receivers against the inauguration of the individual permit system on shipments of coarse grains from country stations to this market and earnestly requests that the individual permit system be not made effective on coarse grain shipments, and further

Resolved, That the Milwaukee Chamber of Commerce is ready and willing at all times to cooperate with the railroad administration in any action which may be deemed necessary and advisable when conditions actually warrant placing restrictions or otherwise controlling the movement of grain to this market.

Mrs. Wallace M. Bell Dies.

Mrs. Margaret J. Bell, wife of Wallace M. Bell, one of the most prominent board of trade men in the northwest and president of the W. M. Bell Co., Inc., grain merchants, Milwaukee, died suddenly at Hot Springs, Ark., Thursday morning, Oct. 23, of pneumonia. She was 55 years old. Mrs. Bell went to Hot Springs about Oct. 15, after attending the National Grain Dealers' convention at St. Louis with her husband. Besides her husband she is survived by a son, Robert G. Bell, secretary of the company, and a niece, the wife of Wm. A. Hottensen, vice-president.

CINCINNATI.

George Mosbacker, Correspondent.

C. S. Custer, manager of the local offices of the Cleveland Grain Co., has returned from a week's business trip to northern Indiana.

John E. Collins, Sr., of Collins & Co., accompanied by Mrs. Collins, will enjoy the hospitalities of their son-in-law and daughter at Cleveland, O., for two weeks.

L. B. Moser, traffic manager of the A. C. Gale Grain Co., returned Saturday from an extended visit to the West, where he succeeded in materially widening the scope of the firm's wheat and corn business.

John De Molet, of the De Molet Grain Co., had the distinction of receiving the first car of new shelled corn of the season. The corn graded No. 3 yellow, of 17.2 per cent moisture, and sold at $1.42½ per bushel.

Rains of the past two weeks have greatly benefited the late commercial potato crop in Ohio, according to a report issued by the Ohio office of the Federal Bureau of Crop Estimates. Reports indicate that the crop has improved from 5 to 20 per cent.

The local trade is expectant of a fa movement of new shelled corn in the ne week. New ear corn arrivals here t past week totaled eight cars of yello which sold at a range of $1.20@1.24 p bushel. White was nominally quoted $1.24@1.26 and mixed $1.22@1.24.

D. J. Schuh, executive secretary of t Grain and Hay Exchange, and Berna Boer, market reporter for a local dail who have worked faithfully in the inte est of the newly organized American L gion, have been nominated for treasur and director respectively of the Robert Bently Post, a local branch.

A number of local members of the gra trade will attend the regular fall meeti of the Ohio Grain Dealers' Association, be held in Columbus, Oct. 31. The meeti will be a one-day affair, the program be informal and every one present w be given opportunity to be heard. Repo on the corn crop will be made from sections of the state as to condition, pla for safe handling, fair prices, profits, et the rules and requirements of the Unit States Grain Corporation pertaining wheat will be discussed, also car supp and transportation.

Washington officials were blamed by Mittendorf, assistant manager of the Tra Department of the Chamber of Commer for the freight car shortage, which is n being relieved. "When the wheat began turn yellow," Mr. Mittendorf said, "Was ington officials became alarmed, thinki that the wheat would spoil if it was shipped at once. They immediately dered 10,000 freight cars to be shipp West. Apparently they forgot that wheat had to be cut and thrashed before could be shipped and as a result the c had to stand idle while this was be done. This naturally led to shortages other places."

Cash Markets.

Wheat—Trading in wheat was the m active, and the volume of transacti larger than all the other grains combi in this market the past week. Nea mill inquiries for good heavy wheat w more urgent and further premiums o the guaranteed price were recorded. Lo grades and smutty grain though rat draggy early in the week also impro in demand later and sold higher. Recei for the week were 101 cars. No. 1 winter, track, $2.29½@2.30½; No. 2 winter, track, $2.28@2.29½; No. 3 red w ter, track, $2.24@2.27; No. 4 red win track, $2.18½@2.21½; No. 5 red win track, $2.14@2.17; sample as to qual $2.10@2.25. Smutty wheat discounted fr 2c to 4c per bushel as to grade.

Corn—Offerings of corn continued sm but the demand was only fair and pri were unchanged to a cent higher as c pared with the close a week ago. Wh held to a premium of 1@2c over yel and mixed, with outside mills princip buyers. The market was featured with first arrival of new shelled corn of the s son, a car of No. 3 yellow, containing s old, of 17.2 per cent moisture, which at $1.42½. Mixed was dull and low gra neglected. No. 1 white, $1.47@1.48; N white, $1.46@1.47; No. 3 white, $1.44@1 No. 4 white, $1.42@1.44; No. 5 white, $ @1.42; No. 6 white, $1.38@1.40. No. 1 low, $1.45@1.46; No. 2 yellow, $1.44@1 No. 3 yellow, $1.42@1.44; No. 4 yellow, $ @1.42; No. 5 yellow, $1.38@1.40; No yellow, $1.36@1.38. No. 1 mixed, $1. 1.44; No. 2 mixed, $1.41@1.43; No. 3 mi $1.39@1.41; No. 4 mixed, $1.37@1.39; N mixed, $1.35@1.37; No. 6 mixed, $1.33@

Oats—Receipts of oats were fairly creased, and though mostly the resul elevator bidding to the country, a percentage was offered, and trading comparatively larger than a week ago. grade whites of heavy weight contin at a premium, with mixed and lo grades ruling about steady. No. 1 wh —@—; No. 2 white, 73½c; No. 3 wh 72½@73c; No. 4 white, 72@72½c; N mixed, —@—; No. 2 mixed, 72@72¼c; 3 mixed, 71@72c; No. 4 mixed, 69@71c.

BROOM CORN.

Marketing conditions have been more favorable in the dwarf areas of the Southwest, and as a consequence there was a little more activity last week in that section. Buyers, however, are absorbing everything available, although the dwarf markets appear to have the better range. Districts in southwestern Oklahoma are reporting prices from $125@200; in Kansas as high as $225 is reported; but in the Oklahoma Panhandle the range is from $125@175 only. Late reports from the Lindsay standard district to the *Broom Corn Review* say that the crop as a whole has been marketed, the amount still in growers' hands being light and quite widely scattered. Quotations in this district run $175@250. The Wichita market was dull, but prices were steady at a market spread of $110@300, the latter of course for selected cars. Stained stock from South Dakota is run from $110@130 with some new dwarf from $200@300. The warehouses are not accumulating stock to any considerable amount. In Central Illinois the movement was rather quiet and the experts believe about 80 per cent of the crop has been sold. Stocks in warehouses generally are light. The latter are offering corn at $150@360, the bulk going at $300 and upwards.

New York Oats Market.

The longshoremen's strike is responsible in some degree for the dullness of trade, as the trucking business has been largely interfered with. Reports indicate that with the action of the Government and the returning to work of some thousands of men, an early ending of the controversy may be looked for. Export business has been at a stan because of the inability to furnish sels for loading at the several elev This in turn has resulted in the roads being unable to unload car has caused considerable yard co tion. We are reliably informed when the strike has been settled shipping matters again become no that it will result in an increase port business for oats, as many o are here at present unfilled.—*L. W bell & Co., New York.*

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

FLOUR NOTES.

Another $1,000,000 milling company is to be organized at Sioux City, Iowa, by the Century Milling Co. of Minneapolis, Minn. This plant will be constructed within six months.

The Baltimore Flour Club will be represented at the coming convention at Buffalo of the Federated Flour Clubs of America. The meeting will be held probably the first week in December.

R. F. Bausman, general manager of the Millers' Export Association, Inc., with headquarters at New York, was in Baltimore last week on a mission, it is understood, to interest some of the Eastern mills in membership in the new association.

Flour Market.

Eastern flour stocks seem to be liberal and the market is quite unsettled, New York reporting that flour can be bought on resale lower than with offerings for future delivery. Other centers than New York report somewhat similar conditions, though less acute than in New York City. Northwestern mills report a good trade in flour and that they are sold up to limits allowed by the Grain Corporation, which is the only obstacle to filling liberal enquiries for far future shipment.

In the soft wheat country the mills are all running at full time with some disposition to put prices up a little. In the Southwest, however, the trade is lighter, owing, doubtless, to the export difficulties of the Grain Corporation. In the Mountain districts and the Pacific Slope trade is about normal, not so active as it has been, but in a wholesome condition.

Nebraska Flour Mills Merged.

A. R. Kinney of Ravenna, Nebr., is president of a company organized to take over the properties of the Omaha Milling Co., at Omaha (optional); the Ravenna Mills, at Ravenna; the Glade Mills at Grand Island; the Hastings Mills and the Blackburn & Furty Mills at St. Edward. Robert S. Dickinson of Ravenna will be vice-president of the company; F. A. Glade of Grand Island, secretary and treasurer, and A. W. Glade, superintendent. The capital now is $2,500,000.

FLOUR MARKETS.

NEW YORK.

New York, Oct. 25.—Condition in the local flour market were very unsettled during the past week and it was extremely difficult to arrive at definite ideas regarding values. Mill offers were not materially altered, in fact, the mills were very firm and in one or two cases were asking more money on account of the firmness in cash wheat. Offers here on re-sale were very much under mill offers, however, and it was possible to buy flour on the spot at prices 50@75c under quotations being asked by the mills. This undoubtedly reflected an over-bought condition here and under the circumstances buyers were not disposed to make new contracts for forward shipment.

Reports from milling centers stated that a good business was being done, and this led to a belief that possibly other markets were not in the same condition as New York. Spring patents were offered by the mills at $11.85@12.50; Kansas straights, $11.25@11.75, and soft winter straights @10.40.

PHILADELPHIA.

Philadelphia, Oct. 25.—Flour receipts the week were 1,000 bbls. and 19,29 lbs. in sacks. There is not much to in the flour market, the conditions b about the same as reported last w

Offerings are more liberal but buyers not disposed to anticipate future req ments and are purchasing merely en to satisfy present requirements. grades are those meeting with most in but buyers are not disposed to pay the limits and are taking second-hand s which are selling at much less than m quote.

Quote, per 196 lbs., packed in 140-lb. sacks: Soft winter straight, Western, 10 25; do., nearby, $9.75@10; hard w straight, $11.35@11.55; do., short pa $11.75@12.25; spring, first clear, $9.25@ do., patent, $12.10@12.35; do., short pa $12.50@12.75; fancy spring and city patent, family brands, $12 75@13.25; flour, $7.75@8 per bbl. in sacks, as to ity.

, except soft winter straights, show s of 10 to 30c, with mills showing a nore eagerness to make sales, though l willing to shade prices. Current ions, f. o. b. Boston, in carload lots, nipment for 196 lbs., in 98-lb. sacks, 2.30@12.90 for standard spring pat-13.25@13.50 for special short patent, 12.50 for hard winter patents, $11@ or soft winter patents, $10.50@11 for inter straights, and $10@10.50 for inter clears. Rye flour is slightly on the outside, $8@8.40 for white Receipts for the week ending Oct. e 35,418 bbls.

NASHVILLE.

ville, Tenn., Oct. 27.—Southeastern eport demand for flour holding up well last week. Consumption has rger than normal and running time s continues above average. Demand as heavy as last month and output g decreased to some extent. Prices onger and 10@30c higher on account price of wheat and lower prices of

ville and Southeastern flour mills, apacity of 200,790 bbls., had output ek of 153,295 bbls., or 76.3 per cent acity, which compared with 226,890 nd 80.2 per cent the preceding week. 6 per cent the same week in 1918. ations: Best patents, 98 lbs., cotton, o. Ohio river points, $11.15@11.75; d patents, $10.40@10.75; 100 per cent 10.20@10.40.

DETROIT.

it, Oct. 25.—A firm market is for wheat and demand is active for and shipment to Eastern points. nge is noted in prices. Country points report a good demand for nd no trouble in securing enough The local wheat market is quoted for No. 1 red, $2.25 for No. 1 mixed, .25 for No. 1 white. Flour is firm active demand. Quote: Fancy patent, $13.25@13.75; fancy winter $12.75; second winter patent, $12; straight, $11@11.25. Feeds are as follows: Bran, $45; standard gs, $49@50; fine middlings, $59; corn meal, $60@61; cracked corn, op, $53@54 per ton, in 100-lb. sacks.

DULUTH.

th, Oct. 25.—Business in flour was ed with millers here during the last wing to their inability to make ship-to the East on account of the prac-nbargo forced through congestion at aboard brought about by the long-en's strike at New York. Trade the district was fully up to the and productions of the mills were unchanged. On account of light de-at the elevators millers were com-o advance premiums paid on No. 1 Northern wheat 10@15c a bushel. of flour are unchanged as follows, rel, in carlots at mills: Family pat-ute, $12.10@12.50; bakers' patents, 1.85@12 25; first clears, jute, $9.25@ cond clears, jute, $7.25@7.50.

MILWAUKEE.

ukee, Oct. 25.—A most unfavorable rtage situation continues to prevail proving one of the most serious ces to the flour trade, the complaint from millers that they are unable e prompt shipments and which to ent is limiting production. As a uyers are reported as being active. a brisk demand for wheat, with siness coming in fair volume. Spring patent is quoted at 30@40c higher, traight also raised 15@20c. s reported as slow, with the cash rather erratic. The trade is slow ring its former impetus and millers orted as having considerable high rye flour on hand. Prices remain

Milwaukee mills during the past roduced a total of 19,450 barrels of f which 14.900 barrels were wheat r about 62 per cent of total mill ion, and 4,550 barrels of rye flour. quotations in carlots, per bbl., in are: Spring wheat patent, $12.50@ traight, $11.35@11.50· first clear, $9

@9.25; rye flour, pure, white, $7.25@8; rye flour straight, $6 95@7.25; rye flour, dark, $6@6.45. Corn flour is nominally quoted at $3.80; corn meal, white, $3.70, and corn grits, $3.70, all in 100-lb. cotton sacks.

BALTIMORE.

Baltimore, Oct. 25.—The demand for flour is quiet from all directions, and the market is dull and featureless with the Grain Corporation not showing any interest in further purchases at the moment, as there is still a large accumulation of flour at the terminals awaiting shipment. The situation still hinges upon ocean freight room. Rye flour is especially dull. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $12@12.25; straight, $11 50@11.75; winter patent, $10.50@10.75; straight, $9.75 @10.25; rye flour, pure to blended, $6.75@ 7.75.

KANSAS CITY.

Kansas City, Oct. 25.—Flour prices here were unchanged and firm this week.

Changes in wheat values were not sufficient to warrant an alteration of flour quotations. The new sales of flour were moderate, due partly to millers' cautiousness. Most of the mills have flour sold ahead equal to or exceeding their wheat stocks and do not like to risk further short selling until more wheat comes in. The stocks of grain held here are owned chiefly by the United States Grain Corporation and outside mills. Demand for patent grades of both hard and soft wheat flour continues good, but shipping directions on old orders, especially on medium and lower grades, have been slow lately. The strike situation in the East has been unfavorable for shipping, but empty cars here and in Kansas are more plentiful. The mills in Kansas City showed an increase of 9,100 bbls. for the week, making a total of 84,300 bbls. There was a fair trade in wheat bran, which advanced 11@12c per cwt., to $1.83@1.85, sacked. Shorts continued slow, with brown at $2.25@2.35 and gray at $2.40 @2.50.

Prices of flour in carlots, sacked, in 98-lb. cotton bags, per bbl.:

	Oct. 25.	Oct. 18.
Hard wheat—		
Short patent	$11.40@12.00	$11.40@12.00

Low grade	6.50@ 7.00	6.50@ 7.50

SHIPPERS' PERMITS REQUIRED.

The shippers' permit system has again been put into effect as to grain, effective Oct. 25 and applicable to Chicago and the following Western markets, Milwaukee, St. Louis and E. St. Louis, Kansas City, Omaha and Council Bluffs, St. Joseph, Peoria and Ft. Worth. The following form of application should be used:

APPLICATION FOR PERMIT.

Date .....
Grain Control Committee at.....

Application is hereby made for permit covering the following shipment:

No. of Cars.....
Kind of Grain.....
Name of Shipper.....
To Be Shipped from.....
Originating Railroad.....
Consignee .....
Destination .....

If permit is issued, shipment will be offered within five (5) working days from the date authority is received by shipper from railroad agent at point of origin.

Cars will be loaded to full capacity, and loading will be completed within twenty-four (24) hours after placement.

(Signed) .....

(Give full information regarding prospective shipment, particularly as to whether it is to fill actual orders; whether such orders have a time limit; and, if an "order notify" shipment, whether draft will be sent direct to destination.)

Application for permits can be made only by shipper at point of origin. It must be in writing and on prescribed form and must be transmitted by the railroad agent at point of origin to Grain Control Committee at destination.

Permits shall not be transferable. They can be used only by the parties authorized therein and for the kind of grain specified. All permits granted will be transmitted by the Grain Control Committee directly to railroad agent at point of shipment, who will note thereon the date of receipt and immediately notify the shipper that permit has been granted and that shipment covered thereby must be made within five working days from date of such notification.

Shipments moving on permits cannot be reconsigned from one market to another market.

Cars must not be loaded for primary markets embraced in the permit system until the necessary permit shall have been granted.

Grain Permits Needed.

It is unfortunate, to say the least, that the inauguration of the Permit System by the railroads, effective Oct. 25, gives cause again for much dissatisfaction; and especially for the belief that there is discrimination in this general order, in that the Western markets, Minneapolis and Duluth, will be free to work under the present system of blanket permits. Unless plans are devised to handle the permits in the corn area with much less friction than was done previously, there may be serious interference with the plans of the producer and country dealer to move the new crop of corn when it is ready. Chicago will be able to take good care of all the coarse grains; in fact, the needs of the market are for all that naturally flows through this gateway.—*Pope & Eckhardt Co.*

November Crop Report.

On Saturday, Nov. 8, at 2:15 p. m. (Eastern time), the Bureau of Crop Estimates will issue a crop summ which will give the following infor tion: The production and quality corn, buckwheat, potatoes, flaxs fruits; production only of clover s grain sorghums, etc.; the percentag the 1918 corn crop on farms Nov 1919; the average weight per meas bushel of the wheat, oats and ba crops of this year.

A general review of crop condit on Nov. 1 will be given, which will clude the following items: The pro tion, compared with a full crop, of peas, small fruits and nuts; condi on Nov. 1, or at time of harvest sugar beets and citrus fruits. No port on cotton will be issued in vember.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Oct. 25:

TRADE MENTION.

Our readers may recall the loss of balloonist Dammann in the last cross-country race starting in St. Louis. He is a brother of Mr. Dammann of the Bosworth Bag Co., Memphis, and latest reports fail to find any trace of the balloonist.

John Hansel, Jr., has been appointed manager of the Chicago office of the national advertising agency of N. W. Ayer & Son. Mr. Hansel has been identified with Ayer service for several years in Chicago and succeeds Mr. Young, the former manager.

Wm. B. Wilson is the new advertising manager of the Weller Mfg. Co. His past experience includes extended services in the same field with the Link Belt Co. of Chicago and the Jeffrey Mfg. Co. of Columbus, Ohio. He is strong for the possibilities of the Weller Line, which is even now so widely popularized and sold among grain dealers, millers, feed manufacturers and allied trades.

The Chicago Grain & Salvage Co., Postal Telegraph Bldg., Chicago, handled 100 cars of salvage from the Central Elevator at Pittsburgh. Most of it was oats, but there were a few cars of malt and of corn. The Chicago Grain & Salvage Co. is handling much of the salvage and off-grade grain now in movement and through many years of experience understands the peculiar angles of this service and through proper conditioning process is conserving feedstuffs of large value annually.

E. H. Matthews, of H. W. Caldwell & Son Co., engineers, founders and machinists, specializing in grain-handling equipment, reports a busy season and heavy trade. This company has been identified with the growth of the grain business from its early days; knows just what dealers need and how much they can or should pay for conveying, power and transmission equipment. They keep large stocks on hand, taking extra good care of orders where breakdowns have been experienced and otherwise transact their business in the way you would like to have it done.

The Flanley Flash.

The grain trade in general and shippers in particular who are watching Omaha as a grain market will be more than ordinarily interested in the weekly flashes of trade news as well as the bits of humor contained in the issues of *The Flanley Flash*, the first issue of which published by the Flanley Grain Co. of Omaha bears date Oct. 8, 1919. Although but a four-page sheet, its intention is to promote coöperation between shippers and the grain trade, and shippers are urged to submit such problems as need discussion and present ideas which may prove of general benefit. The Flanley activities are quite generally discussed in the first sheet and this new feature of the company's general publicity work is bound to be a winner. Consignments go to those who are known, and the Flanley Grain Co. finds it worth while to advertise its business and the fact that it is after consignments. Shippers like to know the people to whom they ship, so through the *Flash*, as well as the extensive advertising program carried on by this progressive Omaha house, the Flanley Grain Co. is making a long list of acquaintances which each day develops some good friends.

Webster-Skillen & Richards Union.

The new plant of the Skillin & Richards Mfg. Co. is fast being completed. It adjoins the present Cortland street plant in Chicago, where Skillin & Richards have been located for many years. The consolidation of their business with that of the Webster Mfg. Co., as recently stated in THE PRICE CURRENT-GRAIN REPORTER, offers terminal and country grain trade, millers, feed manufacturers, etc., an even broader line of machine equipment than heretofore offered by either manufacturer independently. The Webster Mfg. Co. has been prominent during the entire growth of the grain-handling industry, specializing in the larger equipment and have been successful in its installation in typical plants over the entire United States and Canada.

It is now expected that soon after Jan. 1 the offices of the Webster Mfg. Co. in Chicago and the personnel of their main office in Tiffin will be removed to Chicago; combined with the office force of the Skillin & Richards Mfg. Co., bringing to the Windy City the headquarters of these consolidated firms, making access easy for out-of-town buyers, engineers and contractors who desire to personally check over plans and superintend the construction of any special equipment which may be required in their work.

Field Seeds

Louisville Seed Market.

LOUISVILLE, KY., Oct. 25.—Continued rainy weather has resulted in a very dull seed demand, even timothy having slacked off. There is some movement of redtop and bluegrass. Orchard grass is in slow movement. Other lines are not showing much.

Orchard grass is quoted in car lots at $3.25@3.30; bluegrass, $3.40@3.50 a bushel of 21 lbs.; timothy, $11.75@12 a bushel; alfalfa, $32; red clover, $50; redtop, $16.50@17.

St. Louis Seed Market.

ST. LOUIS, Mo., Oct. 25.—The seed market is rather quiet, as offerings are light, and the demand is confined mostly to clover and redtop seed, each of which is scarce and firm. Timothy is dull and slow of sale. Quotations are as follows: Per 100 lbs.: Clover, choice Northern, $50.50; high grade, $48@50; average country lots, free from buckhorn, $46@47.50; heavily buckhorn mixed, $25@36; down to $5@20 for poor and chaffy; alsike, high grade, $40@46; choice, $35@40; poor as low as $10; timothy, choice, $11@11.50; fair, $10.50@11; low grade, $8@9; redtop, choice, high grade, $16; machine cleaned, $12@15; chaffy, less, according to quality; alfalfa, $18@32; sunflower seed, $9.50@10; popcorn, $6@10 for white rice, shelled, at top price; millet, golden, $2.75@3.25; Siberian, $3@3.10; common and hog millet, $2.85@2.95, bulk.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Oct. 25, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts—		Shipments—	
	1919.	1918.	1919.	1918.
Timothy, lbs..	3,079	60,000	60,000	126,575
Clover, lbs. ..	150,517	132,875	78,560	105,100

Toledo Seed Movement.

Weekly Linseed Review.

NEW YORK, Oct. 27.—*United Kingdom:* Dullness has characterized trading in linseed in the United Kingdom. Demand for seed has quieted down considerably during the past few days. Offerings of Indian sorts continue in small volume, but new crop Plate seed is still being offered rather freely.

There appears to be less dema linseed oil, but, on the other han ferings are not as pressing as h fore, and the market presents a ier tone.

India: Arrivals of seed at the for shipment continue of light p tions. Clearances this week amo to 184,000 bushels, all of which i tined to the United Kingdom. O serves of linseed are believed to fair supply. Agricultural cond have been generally satisfactory, full acreage to the new crop pected.

Argentina: During the week was quite liberal buying of the ary delivery by foreign int Short sellers of the new crop o appear to be less aggressive, an unexpected change in the w might cause sharp covering. A has been absorbing nearby seed in erate quantities. The tonnage has decreased somewhat, and rate hardened. Continental demand seed continues about steady. Ne prospects are still considered exc as weather has been favorable.

Kansas City Seed Market

KANSAS CITY, Oct. 25.—Thoug crop matured some time ago, th a surprisingly small movement c let seed thus far. Some dealers handled a few cars, especially coarser varieties, which sold t poultry feed manufacturing trad ports indicate slow threshing, farmers' activities in planting and doing other pressing labor. have been hard to secure. Ever when cars or more plentiful, th being used mainly to carry whea millet crop is believed to be a fa especially in Kansas, but deale not thoroughly informed as to its acter. Sudan Grass.

Reports received relative to the Sudan grass seed crop in the Texas Panhandle indicate that the production this year was considerably larger than that of last year. Most of the seed was contracted before threshing at $5 to $7 per 100 pounds, and later $8 to $9 were paid for it. Practically none of the Kansas-grown Sudan grass seed had moved from the hands of growers by the end of September.—*Seed Reporter.*

FORT MORGAN, COLORADO

Duluth Flaxseed Market.

DULUTH, Oct. 25.—A weak, draggy market was the rule in operations in flaxseed during five days of the last week. Moderate declines were recorded daily, but with bulges up to 12 cents on Saturday on the net result quotations were put up 3 and 4 cents. Specialists who watched the course of trading closely asserted that a substantial proportion of the trades put through were short-covering and speculative. It was noted that crushers sat back as a rule, appearing to be disposed to await developments in the labor and transportation situation.

The market continued to be to a great extent under the influence of Argentine advices regarding shipments and prices down there. The Buenos Aires market did not afford any comfort to operators on the long side, fresh declines being recorded, and with a substantial tonnage of seed enroute from there to the Atlantic seaboard, the linseed oil interests were afforded opportunities to cover their needs at much under the level prevailing for Duluth flax laid down in the East. It was in fact asserted that considerable selling of the Duluth May futures was underway to hedge purchases of Argentine seed.

While supplies of domestic flax are light, crushers were estimated to have sufficient stocks on hand to cover their current oil contracts and that was regarded as accounting for their indifference to the buying side of the domestic market during the last two weeks.

Receipts locally showed a heavy falling off from last year's basis, amounting to 71,761 bus. in the six days, as compared with 316,871 bus. a year ago. Shipments were in small lots to crushers at Minneapolis, and stocks in the elevators here at the end of the week were reported at 186,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Week ago.	Year ago.
On track	$4.34-40	$4.33-37	$4.83½
To arrive	4.34-40	4.33-37	3.81

hulled at this time, but in talking to a party this morning who is operating a huller, he said, "There will be any amount of clover that will not be hulled if the wet weather continues."

There is still considerable timothy seed in the hands of the country dealers, although the farmers themselves have about cleaned up. There will also be some sweet clover hulled in this territory.—*Younkerman Seed Co.*

PROSPECTIVE SOUTHERN CROPS.

RICHMOND, VA.—The very general agitation regarding the high cost of living is having its direct effect on the farmer and he is the one at the present time who is feeling it most. The demand for cattle has slackened, and the prices are low. The farmer who did not sell early is facing a very serious loss. Hogs are coming down gradually to prices not interesting to farmers to raise. The grain markets are seeking a lower level, and this, with the advice of authorities against putting in large wheat acreages, is having the general tendency of seriously reducing the production of human food.

This will result in a much larger acreage of all other crops in the various producing sections. The cotton crop of the South should show a generous increase in acreage and the world badly needs this staple. Cotton seed, therefore, will be in heavy demand, especially the early varieties grown in sections free from boll weevil.

The tobacco crop will also be a very large one in all sections, owing to the extremely high prices being paid for it this year.

We look for a very large demand also for grass and clover seeds, particularly alfalfa, as this hay particularly is commanding good prices. Red clover will probably be in good demand, as the general acreage of clover fields in this country is not heavy just now, many having been plowed up for grain production during the war. Oats will probably be seeded heavily during the spring, as all kinds of clovers and grasses can be put in to good advantage with the oat crop.—*T. W. Wood & Sons.*

United States Seed Co.

The United States Seed Company, with capitalization of $500,000, has just entered the field, with headquarters at Chicago, and promises to be an important factor in the purchase and sale of grass and clover seeds in this country. Perhaps no company was better organized to enter into the business of handling agricultural seed.

The officers of the new firm are as follows: President—Charles A. Heath, for thirty-seven years actively connected with The Albert Dickinson Co.; Vice President—A. E. Reynolds of Crabbs, Reynolds, Taylor Co., Crawfordsville, Ind., field seedsmen and grain merchants. Mr. Reynolds is also identified with The Grain Dealers' Mutual Fire Insurance Co., Indianapolis, of which he is vice-president. Vice-President—H. W. Doughten, owner and president of H. W. Doughten, Inc., wholesale clover and grass seeds, New York, N. Y. Secretary—Harold A. Abbott, who was associated for twenty-one years with the Dickinson Company and organized and developed the large feed business of that company. Treasurer—Arch C. Johnson, formerly connected with The Albert Dickinson Co., being in their employ for twenty years. As a trader and specialist in field seeds, Mr. Johnson has a practical knowledge of field production attained by few seedsmen. Directors—Charles A. Heath, A. E. Reynolds, H. W. Doughten, Harold A. Abbott, Arch C. Johnson, G. W. Hales and C. U. Snyder.

The Company will soon erect warehouses and install modern plant machinery and a full equipment for handling a general seeds business.

Toledo Timothy Seed Market.

Timothy was about unchanged last week from the previous. It is divided, so changes in price are small. October contracts should be pretty well filled, and we look for large falling off with the passing of October; may start again in December to fill contracts. The big trade is now mostly in March, although April is beginning to get more or less active. There was little doing in spot seed; refer mostly to the 1917 and 1918 variety; most of the interest being centered in the futures.—*J. F. Zahm & Co.*

Toledo Clover Seed Market.

Demand for clover seed did not develop last week at Toledo to any great extent. One observer thinks last year's history may be repeated. Then there was little demand even well past the first of the year. Then it came quickly and carried prices up speedily towards the end of the season, Southworth & Co. say; and high prices encourage late demand.

Under present conditions, consignments are especially advisable. There is a good demand for all grades, especially better grades that can easily be made into prime, and a good premium for cash seed. October increased its premium during last week and sold at the end at about $1.50 over December.

Seed Wheat and Oats from Canada.

Seed wheat for planting purposes may be imported from Canada, provided an import license (Application for Import License Form Z) is obtained the United States Wheat Director Broadway, New York, or from one o branch offices. There is no import on wheat.

There is no embargo on the imp tion of seed oats from Canada, but t is a duty of six cents a bu which is the same as that on the portation of oats for any other pose. This commodity does not c under the jurisdiction of the Un States Wheat Director and no im license is required.—*Seed Reporter*

Don't let your subscription lapse; may lose valuable numbers.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Feedstuffs

The Morrow Feed & Supply Co. of Morrow, Ohio, has increased its capital stock from $25,000 to $50,000.

The Service Mill Co. of Bristol, Tenn., has been organized and will soon begin manufacturing all kinds of feed. Officers are: J. A. Goodpasture, president, and C. J. Todd, secretary.

Plenty of feed on hand, sums up the situation in the vicinity of Wagoner, Okla. Rough feeds of every kind are abundant and the prairie hay crop was the best in years. A greater variety of feeds is being raised than in former years.

The feed outlook in the vicinity of St. John, Kans., is not a bright one. Crops were generally light, wheat sowing was greatly delayed this fall owing to dry weather, so that the growth will not be sufficient for winter pasture and farmers are disposing of all surplus stocks in anticipation of a hard winter.

John H. Hailey Co., brokers in cottonseed products and provisions, has opened a branch office at 327 South La Salle street, Chicago, Ill. The firm is a large operator in Houston and Dallas and contemplates extending its trade with feed mixers through the closer touch possible in the Chicago location. W. R. Peniston is manager of the Chicago office, following many years of service with Morris & Co. and Wilson & Co., the packers.

The Smith-Manire Commission Co., brokers and commission merchants, was recently launched in Chicago and Memphis. Mr. Smith has been prominently identified with the Chicago feed trade and Mr. Manire with the Memphis market mainly as a specialist in cottonseed products, for some time. The combination is a good one, affording broader buying powers and increasing the list of those supplying feed manufacturers, distributers, jobbers, domestic and export trade with their requirements.

An Illinois farmer having topped the market recently with his load of cattle, told of the feeding ration which achieved such fine results for him. The cattle were started on silage and clover hay in November and after having been fed this combination for six weeks a combination of cottonseed cake and corn replaced the silage. Two pounds of cake supplemented a gallon of corn and this ration was fed each steer each day. When pastures developed they were turned out and were also given a peck of chopped corn in addition to fur pounds each of cottonseed cake and molasses feed. Average gain for nine months on feed was 450 lbs.

THE FEED TRADE.

While congressmen continue to tinker with bills to meddle with the conduct of the feed trade, already under the control of the Department of Agriculture, acting through the Bureau of Chemistry, feed manufacturers, both those using whole grains only and those using also the by-products of food industries, are turning out their usual products and marketing them under brands whose integrity it is the owner's interest to conserve, and the dealer and feeder are "worrying along" each as he always does and will with about the usual measure of success. The feeder changes his particular brand and kind of feed whenever he thinks better results can be secured by using a different one or a persuasive salesman convinces him that better results can be thus secured; and no one is really dissatisfied with present control and conditions save the department bureaucrats who see an indispensable service being carried on by the regular trade without calling on their super-wisdom for its guidance.

The feed trade is now about to enter upon a winter season of great possibilities, with probably no more aggravation in sight than in times past; and when the Haugen bill is on the Statute Book, if it is eventually placed there, it is our belief that all interested will find that it will have changed nothing except to make more jobs and entail more public expense. All that the bill would or could effect is now possible under the food and drugs act, except to unnecessarily and unreasonably spy upon the private business and records of individual firms for no good purpose whatever. If the present laws cannot protect the consumer any more than the private interest of reputable manufacturers protects him, all the further laws the mind of man can conceive won't do it.

Further Rise in Cottonseed Feed.

KANSAS CITY, Oct. 25.—Delay in the movement of seed to crushing plants in the South, resulting from excessive rains and flood conditions in many districts, forced another upturn in the market for cottonseed cake and meal in Kansas City this week. Closing quotations show a rise for the week of $2.50 to $3 a ton, the 43 per cent protein feed being offered here at $79 a ton, the 41 per cent grade at $77, and 38.5 per cent at $74.50. Cold pressed cake was quoted at $60.50. Linseed feed prices were slightly easier, closing around $76.50 to $77, about $1 off.

Domestic demand for cake and meal is moderate, but with scarcity of seed, mills are unable to fill requirements of the trade.

Feed Salesmen Meet.

Nine salesmen of the Grain Belt Mills Co., of St. Joseph, Mo., met in the Hotel Quincy, Quincy, Ill., Oct. 18, and discussed methods of salesmanship and talked over the prospects of securing more customers. One of the features of the meeting was the reading of a paper by R. C. Burmood, whose home was formerly in Augusta.

Edward Corrigan, sales manager of the company, presided over the meeting of the district salesmen. This district comprises the states of Illinois, Missouri and Iowa and these meetings are held annually to discuss important topics that come up during the year.

The company has customers all over the East, the Southeast and the Southwest, its business being the buying and selling of feeds of all kinds.

During Christmas week the company at St. Joseph will call in all its salesmen and an annual meeting will be held.

FEED SITUATION.

FEEDSTUFFS SHORT.

GRENADA, MISS. (5).—The corn crop in this section is very poor, seeding time was late and wet, making a late start for the growing crop followed by dry, hot weather at time the ear was forming. For past two seasons this county has shipped quite a lot of corn, but this year we will make hardly enough for home needs, and the north-central part of Mississippi will have to buy corn from other sections. The hay crop was fine and there will be some surplus to ship out.

Cottonseed meal will be high and scarce, as the crop is very short all over the South, and we have had three weeks' rain up to this date, and not quite 50 per cent of cotton has been picked, and that remaining in the fields has been badly damaged, and meal made from it will not be so good as it should be.—*Grenada Oil Mills, J. B. Perry, Secy.*

FEED SITUATION IN TEXAS.

FORT WORTH, TEX.—Texas probably never made as much feed as it has made this year. The continued rains during the summer, however, damaged the oat crop considerably, and now is doing untold damage to the maize crop as well as such hay as may be cut and not in the stack. This, of course, makes the feed business quiet, and we do not look for a very big feed business during the coming winter. The pastures are all in fine condition; and unless we have an extremely hard winter the cattle will go through the winter with very little feeding.

The corn crop is exceptionally good both as to quantity and quality. Cottonseed products may be a little scarce on account of the short cotton crop they will be more than sufficient to care of our local needs.

Peanut harvesting is just start and if we can have fair weather will be quite a good deal of peanut and a little later peanut meal from oil mills. Peanut hay will probably high on account of the high price alfalfa, and peanut meal will probably bring a high price to correspond cottonseed meal.

On the whole, the situation looks us very favorable to the feeder but very promising to the feed manufacturer.—*Golden Rod Mills.*

MEMPHIS.

, Oct. 25.—Activity in feed of all ntinues restricted with little prices. Mill feeds are holding d are moving slowly but the d makers are using shorts and cially in their hog feeds. Bran $39 bid and $41 asked on track, shorts were $52.50 bid and $53.50

seed meal there has been limited it prices are steady and holders moderately. The starting of call 7% meal on the floor of the Exchange Monday has helped to rices which now are around $70 that quality at the mill track. of the continued rains in the cottonseed has been bad, which firm the meal market but there to be quiet demand.

BOSTON.

Oct 25.—Quite a little demand or wheat feeds during the past week with prices generally higher and quoted as follows: Bran, spring, sacked, $44 50@45.50 per ton; bran, winter, sacked, $46.50@47.50; middlings, sacked, $50@60; mixed feed, sacked, $48@57; gluten feed, sacked, $69.12; red dog, sacked, $71; second clear, sacked, $70.50; stock feed, sacked, $59.50; oat hulls, reground, sacked, $28; hominy feed, sacked, $60.40; cottonseed meal, sacked, $77.50@82. Receipts for the week ending Oct. 25 were 83 tons.

CLEVELAND, O.

Cleveland, Oct. 25.—The feed market investigation developed that a good many dealers are filled up with good quality of feeds as the demand has been rather light due to the exceedingly good pasturage prevailing throughout northern Ohio. In fact pastures are still good as this goes to press.

There is very little demand for feed for dairy purposes that is not of good quality and in anticipation of the pastures being shortly eliminated by winter weather, there has been a slight increase in mill feed prices the latter part of this week. The following prices will prevail: Flour middlings, $58; standard middlings, $47.50; winter bran, $44; spring bran, $43.50; mixed feed, $47@48.50; hominy, $58; oil meal, $75; cottonseed meal, $74@75; gluten, $65.68; hominy, $68.68.

BALTIMORE.

Baltimore, Oct. 25.—The demand for sacked bran and middlings is rather quiet and present supplies of feed stuffs are therefore ample for trade requirements, in fact, with Western bran "to arrive" offered at considerably under late spot prices, the tendency of buyers has been to hold off and take hold for actual requirements only. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $42@43; Western middlings, per ton, in 100-lb. sacks $47@48; city mills' winter wheat bran, per ton, in 100-lb. sacks, $48; brown middlings, per ton, in 100-lb. sacks, $52; white middlings, per ton, in 80-lb. sacks, $62.

MONTREAL.

Montreal, Oct. 24.—The market is steady. Straight cars of bran are quoted at $45@46 per ton, and shorts at $54@55. Buyers are expecting lower prices and are only buying from hand to mouth. Advices have been received by a firm here from one of the Western mills to the effect that it will be pretty safe to take orders for carlots of bran at $2 per ton under present prices, but no mention was made of shorts. Corn feed is steady and sales are reported at $80@82 per ton, moullie at $69@71, and pure barley meal at $69@70, and dairy feed, $48 @50 per ton including bags delivered.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 209,000 bu., oats 206,000 bu., and rye 160,000 bu. Corn decreased 17,000 bu. and barley 15,000 bu. Details follow, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last year.
Wheat	5,688	12,760	18,448,000	19,171,000
Corn	263	446	709,000	2,379,000
Oats	2,374	4,773	7,147,000	6,612,000
Rye	1,601	1,095	2,696,000	417,000
Barley	71	186	257,000	888,000

Timothy hay thrives in northeastern Missouri and a big crop is reported this season. Farmers are not baling a great deal, but much of the high-grade hay is being threshed.

AT EXPORT MOVEMENT

ssional Committee Investigates at Export Movement—The Senate d the Farmers—Feed Bill Next.

HINGTON, Oct. 25.—[Special Cordence.]—Under authority of a ion adopted by the Senate on the of Senator Owen of Oklahoma, nate Committee on Agriculture an investigation today into the on with respect to the exporta- wheat and the slow movement season's crop to the markets. H. Barnes, Wheat Director, was y witness and had not concluded timony when adjournment was until Tuesday. Mr. Barnes pre- detailed figures showing the of wheat and flour shipped to an countries. He said that the xported during the past three half months, the period of the ent of this year's crop, had ed to almost exactly the same ing the same period last year. als for the period this year were 77,000,000 bus., of which 51,- bus. were wheat and the balance s against 78,000,000 bus. in the months of last year.

esponse to questions by Senator Mr. Barnes said that efforts were nade to relieve the situation in na and other states where it is wheat is rotting on the ground of the lack of cars to move it ket. Instances of this kind are table in the case of a heavy crop. He said that without the system of moving grain on the ls congestion at the terminals, would have resulted, would have jurious to the whole situation. respect to the importation of n wheat Mr. Barnes said it had e policy to refuse permits for vement in this country, on the that our railroads and terminals be devoted entirely to the needs own producers. He had recom- to the President that an execu- ler be issued removing export port restrictions, but the whole has been held up pending the of the President to give it his n. Mr. Barnes said he had re- led that thirty days' notice be any relaxation of the embargo.

TOR CAPPER AND THE FARMER.

ulture has received intermittent n in the Senate during the past Senator Capper of Kansas made t setting forth the farmers' side igh cost of living question and her occasion the subject of the exemption of agricultural organizations from prosecution under the anti-trust laws came up for discussion in connection with consideration of the deficiency appropriation bill. "It is unfortunate but it is true that agriculture never has received recognition in proportion to its vital importance in this country," said Senator Capper. "Always it has been called upon to serve, rarely to participate in making the rules of service. During the war and since the war, in whatever has been done to meet emergencies, it is the consumers' best friend, the producer, who has invariably been hit. He has been the one who has chiefly borne the brunt of it. When the control of the Food Administration was lifted last winter from flour, shorts and bran, these products almost doubled in price immediately. Many dairymen were compelled to go out of business because they could not buy mill feed. But grain made little or no advance. Then came dollar-an-hour wages, which would require about $3 wheat for the average winter wheat grower to break even. And this has now been followed by a decline in the market price of all farm products incidental to an otherwise resultless campaign against profiteering which has left the producer in a position where he is getting decidedly the worst of it.

"Farmers were urged during the war to produce wheat and were rewarded by an appreciative Government with a guaranteed price nearly a dollar a bushel below what was being received in the open market. And the great United States Government profited $23,000,000 at the expense of the farmer in 1918. Then the war having closed, the Government guaranteed the farmers a price for their wheat, and the Congress appropriated a billion dollars to back up the guaranty; but the farmer has been accepting anything from 20 to 70 cents less than the guaranteed price. The Government not only has the billion dollars saved, but the United States Grain Corporation, by means of an embargo on wheat and wheat products to Europe, probably will be able to report an equally large profit for the year 1919.

"The situation of the live stock farmer is even more deplorable. Urged by the Government at the beginning of the war to produce an increasing amount of pork and mutton and beef, he responded as did the wheat farmer. In 1918, with the war on, he made a satisfactory profit, though nothing in comparison with the profits made by manufacturers in practically every line. It takes three years to produce a steer for market. This year, with the Government out of the market, with the European markets closed by reason of prohibitive foreign exchange rates and lack of credit, with the Government making its first essay into the cost of living problems by a demand for a lowering of price of farm products, the live stock man today finds himself with a demoralized market, and a loss amounting sometimes to as high as $60 a steer on the very live stock that the Government induced him to produce. The result has been complete financial failure of many live stock men and immense losses to all who had herds when this year's enormous slumps in prices occurred.

FARMERS AND CONSPIRACY.

Spokesmen for the farmers defeated an attempt in the Senate to eliminate from the deficiency appropriation bill a proviso that no part of a $200,000 item for the enforcement of anti-trust laws should be used "for the prosecution of producers of farm products and associations of farmers who co-operate and organize in an effort to and for the purpose to obtain and maintain a fair and reasonable price for their products." The Senate appropriations committee recommended an amendment eliminating the proviso. Senators Gronna of North Dakota, Curtis of Kansas, Owen of Oklahoma and others, opposed the amendment with the result that it was defeated. There were 28 affirmative votes, 31 in the negative and 37 absent or not voting. Senator Thomas of Colorado made the chief appeal for the elimination of the proviso. "It is not the phraseology of a proviso like this but the construction that is placed upon it and the things done under it which make it formidable and which would require the repeal of both, by which I mean the proviso in this bill and the exemption found in the Clayton Act," said Senator Thomas. "It is the carving out of a class—I care not what that class may be—and making it immune from the operations of a general statute, that has been the prolific source of industrial and social evils in this country for the last 50 years. If this proviso should read that 'no part of this money shall be spent in the prosecution of any organizations in the states of North Dakota and Colorado' no Senator within the sound of my voice would hesitate for a moment in characterizing it as class legislation and in voting against it; but there is no more difference, in legal effect, between such an exemption and the one which is set forth in the proviso itself."

HAUGEN FEED BILL.

The Haugen bill designed to prevent the adulteration and misbranding of commercial feeds may come up for consideration by the House Committee on Agriculture, of which Representative Haugen of Iowa, its author, is chairman, within the coming week. Representative Haugen is re-writing the bill with a view to the elimination of some of its more drastic features to which objections have been made by the trade. No action on the bill is probable until the winter session. Mr. Haugen also is preparing a similar bill applying to fertilizers.

Cottonseed Meal as Feed.

Cottonseed meal and cracked cake have now reached a reasonable basis, and in consequence thereof we are having an increased demand from feeders and dairymen. From no other source can protein be had so cheaply as from cottonseed meal or cake, and it takes sufficient protein in a ration to secure the best results at least cost and in less time. Grain and grain by-products are rich in carbohydrates but shy on protein, and they cannot be used alone in a feed to supply the animal the proper diet.

With cottonseed meal, natural farm roughages can be utilized to economical and satisfactory advantage. Hay, corn fodder, ground cob meal and chopped corn shucks and even straw when fed with cottonseed meal or cake will furnish a very satisfactory feed, and a cheap one on which to winter cattle or carry them to a point where you wish to begin heavy feeding for market. Cottonseed meal and cake are fed with advantage to steers, cows, horses, mules, sheep, hogs and chickens.

Another thing to take into consideration, when utilizing cottonseed meal, is the fertilizing value of it. Cottonseed meal contains nitrogen, potash and phosphoric acid. In feeding, only about 20 per cent of the fertilizer materials is lost; so when the manure of cottonseed meal fed cattle is utilized, the actual cost of feeding is greatly reduced. With potash selling around $500 per ton and phosphoric acid commanding about $120, it is easy to figure that the manure from cottonseed meal fed stock is very nearly as valuable as a fertilizer as the original meal is for feeding.

It is not a question, Can the stockman afford to feed cottonseed meal? the question is, How can he afford not to read it?—*F. W. Brode & Co., Dallas.*

Alfalfa Department

The San Francisco alfalfa market reports but light inquiry, quotations ranging from $17@22 per ton.

Reports from Randolph, Mo., are to the effect that alfalfa does not thrive in that section of the state.

It is reported from Cowley County, Kans., that the alfalfa crop in the bottom lands yielded a good first cutting, but otherwise the crop did not amount to much. Quality of first cutting was excellent.

A 30-acre alfalfa tract near Alexander, N. D., has brought its owner $4,200 for the crop, having produced 111 bus. of seed and 30 tons of hay. The seed sold at $30 per bu. and the hay brought $30 per ton.

An alfalfa buyer of Oklahoma City says that the alfalfa crop of Oklahoma and New Mexico will be a short one this year, as the stand was unusually poor, due to the fact that many fields had been overcut without resowing. Inferior quality is also reported in those districts.

From a Missouri farmer comes the report of four cuttings of alfalfa in spite of an invasion of the army worm and dry weather. He says he obtained at least three and a half tons per acre. At present he plans to raise 20 acres next year, from which he expects a good profit, having obtained as high as six tons to the acre with favorable weather conditions.

An alfalfa contest will be held under the auspices of the Adams County (Ill.) Farm Bureau this fall and all residents of the county or state who have seeded alfalfa during the past spring or a year ago are invited to submit their names for entry. There are five prizes ranging from $5 to $50 and it is expected that the contest will surpass that of former years in the number of contestants listed.

A heavy yield of alfalfa has been reported by a stockman near Lincoln, Neb., with four cuttings prevailing in many sections of the state. Weather conditions were favorable for rapid growth of the plant, but also permitted an abundance of weeds. Quality is reported below previous years, but a large surplus is reported available in spite of the heavy feeding operations anticipated for the state generally.

Alfalfa Milling at Kansas City.

Kansas City's position as an alfalfa milling center has taken a step forward with the announcement of the opening of the grinding plant of North Bros. The plant has a daily capacity of 100 tons. To care for the production of alfalfa meal, the company has enlarged its warehouse facilities adjacent to the mill, the total storage capacity now amounting to 6,000 tons of alfalfa meal, or 3,000 tons of hay. For many years North Bros. have been extensive handlers of alfalfa meal, jobbing the product of Kansas, Colorado and other Western mills. With the completion of their own grinding plant, the company can improve its service with well-established trade connections in the country.

Stronger Alfalfa Meal Trade.

KANSAS CITY, Oct. 25.—An improved inquiry developed for alfalfa meal in Kansas City this week. Prices show a rise of $1 to $2.50 compared with the close a week ago. The volume of business was only slightly larger than earlier in the month, but interest among buyers has been stimulated by the advancing tendency of the alfalfa hay market. Lower prices had been generally anticipated among the mixing trade, and purchases were limited to current needs. Now, however, the trade is entering the market with more vigor. Sales were made to the South, Southeast and Middle West. Offerings were limited.

Choice alfalfa meal in carlots, new sacks, closed at $38@40 per ton; No. 1, $36.50@38; No. 2, $31.50@32.50; brown, $29@31.

A broadened business also was evident in the alfalfa mixed feed market. Colder weather and slight deterioration of pastures, along with the heavy demand for stock and feeding cattle for which feed must be purchased, aided the trade. Prices showed a little change. Business was scattered, but limited mostly to territory west of the Mississippi river. Prices follow: No. 1 alfalfa molasses feed, $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

ALFALFA SITUATION.

ARKANSAS VALLEY ALFALFA.

PUEBLO, COLO.—The alfalfa crop is very good, both adjacent to Pueblo and all through the Arkansas Valley, and most of the hay has been put into the stack in first-class condition. At the present time we understand that the alfalfa meal mills are paying from $16 @18 per ton for loose alfalfa delivered at the mills. The shippers down the valley east of Pueblo on the Santa Fé and Missouri Pacific are getting $23@24, baled, on track, to go to Kansas City and other eastern points. We are buying all the alfalfa that we can use here and storing considerable at an average of $23 per ton delivered at our warehouse door. The general impression is that if we have an ordinarily open winter that there will be but little change in the price of alfalfa in this territory.—*The A. McClelland M. I. & R. Co., by Tim Barbrick, Secy.*

Chopping Alfalfa.

"The practice of chopping hay of various sorts for live stock is an old one and has been in use in certain sections for many years," says a writer in *Farm and Field*, "but only recently has the practice become at all general in the West. In some of the leading fattening districts in the last three years it has become the common practice to cut all the hay fed to cattle as well as for sheep. I refer to the process of running the hay through a cutter which cuts it up into short lengths averaging about an inch. The advantages and disadvantages of cutting, chopping or grinding hay are largely questions of economy in handling and feeding. Very few will believe that such hay is much better for the cattle than the long hay; that is, that the short lengths are more digestible or that they make fatter cattle or greater gains.

"Extensive experiments have demonstrated the truth of this and that there is really very little gain in the way of digestibility. The chief advantages gained by those who make a practice of cutting hay are that it is easier handled and that waste is eliminated. Where cattle or sheep are being fattened on alfalfa hay a large amount of stems and coarse material is not used. This will vary from five to thirty per cent. When cut hay is fed, it is practically all cleaned up in good order and waste is avoided.

"The cut hay may be handled more conveniently than the long hay, and the animals can be fed more accurately. The cutters used for this purpose are similar to ensilage cutters, except that they are much larger, often having knives thirty to thirty-six inches long, and are provided with special arrangements for forcing the dry, loose hay into the cutter. The common practice in the feeding districts is to stack the alfalfa in the field in the summer in the usual manner and then in September or October bring the cutter up beside the stack, fork the hay direct from the stack to the cutter, and after the hay is cut, restack it in the field."

Burlap Market.

Burlaps were more active on the enquiry list last week on the New York market, though no considerable sales were reported, even at Thursday's auction of certain small quantities. At this sale all the following range of figures were paid: 40-inch 8s, 12.50c to 13.25c; 40-inch 9s, 13c; 40-inch 10½s, 13.12½c to 15.25c; 36-inch 10½s, 10.75c to 13.12½c. The *Journal of Commerce* says that "no definite information has been heard on September shipments from Calcutta, though it was stated that shipments for the first two weeks of September to this country amounted to 48,000,000 yards."

Light Crush of Cottonseed.

Cottonseed interests are beginning to consider that the crop situation will compare very closely with that of 1909, when the total crop of cotton in running bales was 10,072,000 bales, and the seed crop 4,462,000 tons. amount of seed crushed will be spondingly less than this, in prop to the amount needed for see other purposes. If the crush an to 85 per cent of the total seed o the total crush would be 3,800,00 or 1,000,000 tons less than in 191 about 2,000,000 tons less than in The crush the past year was 4,4 tons, so that there is a possibil the basis of the indicated crop crush possibly 700,000 tons less last year, which would be a decre nearly 16 per cent.

Reports from various sections o tana indicate that much of the h dered by county agents from fa outside the state has been refus the stockmen. The quality o shipped-in hay is reported to be poor and the price excessively h

Which Road Would You Take?

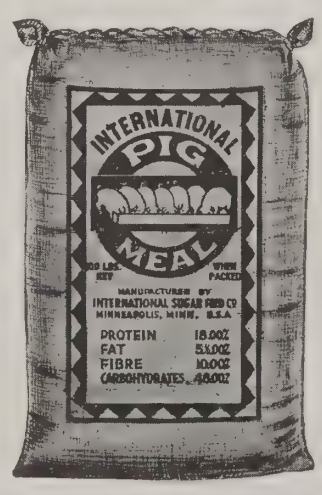
SUPPOSE you had your choice in traveling over two roads, one a good road, the other a bad road. Which would you take? The good road, of course! And so would we!

The same thought applies to your feed business. The bad road leads to poor feeds, dissatisfied customers and poor profits. The good road—the International road—leads to high grade feeds, satisfied customers and good profits.

INTERNATIONAL

"Good Feeds Backed by Good Advertising"

Back of every pound of International Feed leaving our mills—whether it is prepared for cows, calves, horses, sheep, chickens or pigs—is the combined efforts of a corps of feeding specialists—men who have spent a lifetime in the study of this subject. No chances are taken on the ingredients. Daily analyses are made in our up-to-date laboratories. This means that your customer receives a feed that is always uniform—always right.



Build for the Future

Build your business for the years to come by handling feeds that will satisfy your customers. For satisfied customers are the rock-ribbed foundation of every business success. Hitch your business to the strongly advertised International line and watch your profits grow. Write at once for samples, prices, etc.

Good Openings for Live Salesmen

Hay Department

John H. Devlin is back on the job in charge of the hay business of Albert Miller & Co. of Chicago. He was away for nearly three months, as frequent bulletins of this column have stated, suffering an illness, something most unusual for him, and therefore doubly trying. He stated to us, however, that he had thought up a lot of good plans for new business, and the hay trade will doubtless be advised of them in the course of a short time.

John H. Devlin, Chicago, again on the job, recovered from recent illness.

Hay for the Northwest.

Northwestern feeders and hay dealers are buying hay cheap, which is a fortunate thing when the recent drouth and its consequent disaster to many feeders is considered. It is not known how long this cheap hay will be available; but we imagine that as the season progresses country terminal market stuff from Chicago territory and farther east will be in demand by Northwestern feeders. Such business is now impossible because high prices are being paid for hay in Central States, which favors consignments and sales to such markets at present values.

Death of J. H. Lefebvre.

We know that the hay and feedstuffs trade will join with us in profound sorrow in reading of the death of J. H. Lefebvre, a man much beloved by his acquaintances and trade. The office of THE PRICE CURRENT-GRAIN REPORTER has known for some time that J. H. Lefebvre of Quebec, Canada, was very ill and in a sanitarium, but his death is nevertheless a shock.

His firm has been large operators in the Canadian provinces for many years. Mr. Lefebvre's connection with the present firm dated back for twenty years. His interest and that of his firm in the activities of the National Hay Ass'n was typical of the growth of the Association's very excellent progress in eastern Canada. The business of Lefebvre & Mahon will of course be continued on the present basis at the same address, Howick Station, P. Q., Canada.

Cleveland Interested in the Horse.

The hay dealers in this market are very much interested in the "Horse Publicity Campaign" which is being urged by the association in New York and it has their hearty approval. There is no question but that a little propaganda in behalf of the horse will offset some of the work done by automobile truck manufacturers in their endeavor to force the use of that product through advertising and salesmanship, where if the users of horses would make a careful study of their teaming expense they would find that even with high feed costs the horse is much more economical than the truck in at least 50 per cent of the ordinary hauling operations.—*F. R. Sowers, Secy., Cleveland, Ohio.*

Feeding Horses.

The Department of Agriculture has published Farmers' Bulletin 1030, "Feeding Horses," by G. A. Bell and J. O. Williams. The study covers such topics as: "Study of Rations Necessary," "Conditions Affecting Feed Requirements," selecting, balancing and computing rations, "Suggested Daily Rations," etc.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

H. H. Hovey, formerly of the hay and feed reporting service of the Bureau of Markets of the United States Department of Agriculture, has joined the J. C. Kerr Hay Co. Mr. Hovey will be a traveling representative of the concern, covering Kansas and surrounding states. Mr. Hovey has been connected with the hay and feed industry for some years, and has a wide acquaintance among the trade.

A meeting of hay dealers and others interested in the revival of the horse was held in the directors' room of the Kansas City Hay Dealers' Association at the stock yards Monday of this week. Aside from the hay trade, harness and saddlery manufacturers, buggy and wagon manufacturers and members of allied industries in which the horse was formerly a factor, were represented at the meeting. Plans for active publicity for the revival of the horse were discussed, and a representative named to attend the meeting of the Horse Publicity Association in New York late this week.

"Farmers are eager to market their hay," declared Harry J. North of the Midwest Hay Co., "but they are greatly handicapped in disposing of their yields by a scarcity of cars in the interior. There is an enormous amount of hay, particularly prairie, in the country, and with other rough feeds available in large supply, feeders will require only a portion of their production to carry over their own stock. While advices the past few months have reported a large amount of hay and roughage in Texas and elsewhere in the Southwest, dealers of the Lone Star state have recently made inquiries of the trade in Kansas City regarding prices for alfalfa and the outlook for shipments to their territory."

"Some demand is developing f
falfa and other varieties of hay
live stock producers who recently
made purchases of stockers and
ers in Kansas City and at other
kets," declared E. H. Cash of the
Worth Commission Co. "The v
of trade with feeders of this ter
however, is not large, almost ins
cant compared with the volume
tle purchases recently. The ligh
ing is explained by the fact tha
those who have an abundance of
age and other feed are buying th
tle. The bulk of the alfalfa hay
ing to the Central States and E
territory is being purchased by
interests. A good demand preva
alfalfa from the Southeast, an
South, too, is taking a fairly
amount of hay. Shipping dema
hay should increase with the pr
of the season. Pastures now are
cellent condition, and feeders hav
able to reduce their feed bills c
rably by utilizing grass."

The unsettled industrial sit
prevailing in the United States
ing given serious consideratio
members of the hay trade in K
City. Of course, much concern is
fest by dealers, who see the poss
of a rail strike and grave interf
with the forage industry. Unr
labor is an immediate bearish inf
on the market, but, with the les
production in all lines of industri
sulting from strikes, the latter
is bullish for a temporary period

Hay Markets

TOLEDO.

Oct. 25.—Prices here were lower this week in the timothy division. With the increasing movement in the country dealers look for still lower prices. Receipts are good with the exception of clover and alfalfa and the movement of these is light. Prices are: No. 1 timothy, $25; No. 2, $23.50; No. 1 light mixed, $24; No. 1 clover, $26.50 per ton, basis Toledo rate point.

CLEVELAND, O.

Oct. 25.—In the hay market there has been a good demand for a good quality and during the fine weather farmers were in the mood for hauling which has a tendency to favoring this market with one of the best movements of hay experienced in the past year. For this week prices on timothy grades are about 50c lower than last week at this time. No. 1 timothy, $28.50; standard timothy, $27.50@28; No. 2 timothy, $26.50@27; No. 1 mixed, $28@28.50. Straw—No. 1 rye, $10.50@11; No. 1 oat and wheat, $10.

OMAHA.

Oct. 24.—Receipts of prairie hay light and the demand is fair. The better grades of prairie nay some higher. Alfalfa firm and steady with no change in prices. Oat and wheat straw steady.

Upland prairie—No. 1, $21@22.50; No. 2, $16@19; No. 3, $12@15. Midland prairie—No. 1, $20@21; No. 2, $16@19. Lowland prairie—No. 1, $15@16; No. 2, $11@13; No. 3, $8@9. Alfalfa—Choice, $30@31; No. 1, $27@29; standard, $25@27; No. 2, $22@24; No. 3, $17@19. Straw—Oat, $9@11; wheat, $8@10.

PHILADELPHIA.

Oct. 25.—Strictly choice hay is in fair demand with light offerings, and prices for this description are firm with an upward tendency, but there is a liberal supply of medium and low grades which are pressed for sale at low and irregular prices. Straw continues quiet and steady at former quotations.

Timothy hay—No. 1, $32; No. 2, $28@30; No. 3, $24@27. Clover mixed hay—Light mixed, $28@30; No. 1 mixed, $26@27. Straw—No. 1 straight rye, $14.50; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

NEW ORLEANS, LA.

Oct. 25.—No. 1 hay offered at $34, No. 2 at $33, and No. 3 at $30. There is considerable low grade hay on our market and shippers that sold No. 1 and No. 2 are meeting with misgrading. The hay is inspected about No. 3. This low grade stock of hay is not moving and, in consequence, the only available warehouse is the Illinois Central Railroad, which is stored to the roof.

ST. JOSEPH.

Oct. 25.—Alfalfa of all grades was in urgent demand during the past week, prices advancing from $2 to $4, the greater advance being in the lower grades. Prairie hay was in excellent demand at stronger prices, the best demand being for No. 2 or better. Lowland and midland hay were in fair demand at $7 to $15. Clover hay was scarce and the demand good. Timothy and clover mixed hay moved at about unchanged prices. Receipts light and the demand just fair.

The strength in the hay market the past week is almost entirely due to car shortage, as the demand is not extremely heavy and there is an abnormal amount of forage in all parts of the country. The pastures are also better than usual at this time of year. We cannot get very enthusiastic about higher prices for hay and believe that shipments should be rushed forward as fast as cars can be obtained.

Nominal quotations follow: Prairie—Choice, $21@22; No. 1, $19@20.50; No. 2, $17@18.50; No. 3, $12@16. Midland—No. 1, $14@15; No. 2, $10@15. Alfalfa—Choice, $31@32; No. 1, $30@31; standard, $28@29.50; No. 2, $24@27.50; No. 3, $20@23. Timothy—No. 1, $25@25.50; standard, $23@25; No. 2, $21@23. Clover light mixed—No. 1, $25@25.50; No. 2, $20@22. Clover—No. 1, $25@26; No. 2, $18@22.50. Straw, $9@9.50.

MONTREAL.

Oct. 24.—Here the market is steady with sales of best No. 2 timothy at $23@24 per ton in carlots to the city trade, and $21@22 for No. 3 and ordinary No. 2. There is practically no No. 1, as the best timothy is mixed with clover. A dealer from St. Scholastique stated that it was difficult to buy in the country under $20 for good No. 2. At other points farmers refuse to sell at that figure. It is true that the crop is larger than that of last year, but farmers hold no reserves of old hay. Canadian hay is being exported from Montreal, Boston and New York to British ports. No. 2 hay is still being shipped acros the line.

The receipts of hay during the last week at Montreal were 8,570 bales, against 14,886 bales for the same week last year.—Trade Eulletin.

LOUISVILLE, KY.

Oct. 25.—Demand for hay is somewhat better locally due to the fall racing season at Louisville which has resulted in more horses being quartered at the local tracks than at any previous time in the racing history of the city. Straw is also in good demand and also corn and oats.

Principal quotations are: No. 1 timothy, $31, baled, carlots; No. 2, $29.50; No. 1 clover, $31; No. 2, $28; light mixed, $29.50; No. 1 mixed, $28.50; No. 2, $27; wheat and oat straw, $11; rye, $13.

DES MOINES, IA.

Oct. 25.—The offerings of the higher grades of all kinds were hardly sufficient to supply the demand, while the off grades were inclined to drag. Choice green alfalfa, $32@33; timothy No. 1, $24@25; standard, $23@24; prairie, No. 1, $20@21; No. 2, $18@19; straw, $8@9.

BALTIMORE.

Oct. 25.—On the better qualities of timothy mixed and No. 1 clover hay the market is firm, since only a small percentage of the daily receipts is comprised of this class of stock and there is a more or less constant demand heard for good hay. Low grade, unsound, and sample hay is in ample supply for all trade wants, and the movement of this class of stuff is draggy even at its relative value.

The demand for straw is principally of a jobbing character, in consequence of which it does not take a great deal of straw to go 'round. Market quiet and steady. We quote, per ton: Timothy—No. 1, $31@31.50; standard, $30.50@31; No. 2, $30@30.50; No. 3, $25@27. Light clover mixed—No. 1, $29.50@30.50; No. 2, $27@28. Clover mixed—No. 1, $27.50@28; No. 2, $25@27. Clover, nominal—No. 1, $27; No. 2, $25. Sampel hay, $20@22. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

BUFFALO.

Oct. 25.—The market here is strong and there is quite a little doing with offerings of New York state light. No. 1 timothy is quoted at $26@27; No. 2, $24@25, on track. Straw scarce at $12@13 per ton and demand fair.

MEMPHIS.

Oct. 25.—Business continues almost at a standstill. Receipts are light and demand is similar, but there has been stiffening of prices and very little is being offered. On the call board most of the activity is in merely making bids and offers, few traders having gone through. Excellent pastures help to lessen demand.

Plans are being made to establish the plug inspection system on the Illinois Central, Missouri Pacific and Cotton Belt lines, which when it is done will mean that the chief hay-carrying roads will have it. J.

L. Nessly, president of the Memphis Hay and Grain Association, with the hay inspection committee of the Merchants Exchange, during the past week inspected plug tracks offered by the several roads and it is to be only a short time before arrangements will be completed and by the first of the year it is hoped that every line coming to the city will have it installed. Since plug inspection was installed on the Frisco System and the Rock Island road last May there has been an increase of over 280 per cent in the amount of hay brought here by those roads.

CINCINNATI.

Oct. 25.—The declining inclination of local hay prices was terminated this week after gradual reductions to relatively the lowest prices of most leading markets, and with the bottom apparently reached a steadier tone developed and from present prospects at least a slightly firmer market can be expected. The recent lowering of prices had the effect of materially increasing the shipping outlet, which has been extremely dull for some time, and of appreciably reducing the congestion of cars in the terminals, while also of assuring better results to shippers by curtailing the movement of fresh receipts until more normal conditions prevailed. Timothy arrivals largely exceeded other descriptions, and early in the week was a dollar off, but mixed closed 50c higher, and clover $1 better. Alfalfa is scarce and wanted at firmer prices.

Receipts for the week totaled 226 cars, with 18 cars in the terminals on Saturday.

Timothy—No. 1, $27@27.50; standard, $26.50@27; No. 2, $25.50@26.50; No. 3, $22.50@24.50; threshed, $13@15. Light clover mixed, $28@28.50. Clover mixed—No. 1, $27.50@28; No. 2, $25.50@26.50. Clover—No. 1, $30@32; No. 2, $28@30; sample, grassy, $19@22. Alfalfa—No. 1 Western, $38@39; No. 1 local, $35.50@36.50; standard, $33.50@34.50; No. 2 local, $30@32. Straw—Wheat, $7@9; rye, $9@10; oat, $7@9.

DULUTH.

Oct. 25.—Receipts of hay on this market showed substantial improvement during the last week and fair demand was reported for the better grades. Sales of dealers are expected to be on a better scale from now on with colder weather necessitating the withdrawal of cattle from pasturages. Quotations are unchanged as follows: Timothy—No. 1, $25@26; No. 2, $23@24. Mixed timothy—No. 1, $24@25; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $15@16; No. 2, $10@12. Straw—Rye, $9@10; oat, $9@10.

MILWAUKEE.

Oct. 25.—No important change has been noted in the local hay market during the past week. Prices remain steady and unchanged. Receipts are fair and limited by the shortage of shipping facilities. Current quotations are: Choice timothy, $27.50@28; No. 1, $27@27.50; No. 2, $25@26; No. 1 clover, $22@23; light clover mixed, $24@24.50; red top and timothy mixed, $24@24.50; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10.50@11; oat straw, $8.50@9.

NASHVILLE.

Oct. 27.—Hay is in moderate demand with light receipts. Prices: No. 1 timothy, $32@33; No. 2 timothy, $30@31; No. 1 clover, $30@32; No. 2 clover, $28@30; alfalfa, $36@38.

DETROIT.

Oct. 25.—Receipts of hay have been pretty well up to requirements for several days. An active and easy market is quoted. Demand here is nearly all for local consumption. Canada is contributing a few cars every week. Quote: No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $22@23; No. 1 mixed, $24@24.50; No. 1 clover, $24@25 per ton.

BOSTON.

Oct. 25.—The local hay market is dull and inactive. The recent advance in prices did not result in any increase in the demand, buyers refusing to pay the increased prices and only meeting most pressing needs. Receipts during the past week were heavier, with the result that there is now an accumulation of some grades at the various railroad terminals for which there is very little demand. Buyers are pursuing a conservative method of purchasing and in order to move cars and save storage charges receivers are forced to make concessions from asking prices. About $33 per ton is a top quotation for No. 1 timothy in large bales and only extra cars will bring this price. Small bales range at $31@31.50. No. 2 timothy is quoted at $29@30 for large bales and $28@29 for small bales. No. 1 Eastern is a shade lower for the best at $29@30 with No. 2 Eastern at $26@27. No. 3 hay lower at $24@26. Clover mixed hay is offered at a narrower range of prices, being quoted at $27@28. Fine hay is scarce with practically none coming forward and prices range at $24@26. Swale hay is also practically out of the market with prices nominal at $18@20 per ton. Receipts for the week ending Oct. 25 were: Local, 137 cars.

The demand for rye straw is quiet with the market firmer at $17@18 per ton for choice. Only fancy cars will bring the extreme quotation. Oat straw firmly held with moderate demand at $14@15. Receipts for the week ending Oct. 25 were: Local, 10 cars.

ST. LOUIS.

Oct. 25.—Receipts of hay during the past few days have been rather liberal in amount, consisting principally of medium grade and common clover mixed hay.

Timothy hay market continues to rule steady with an excellent local demand for good No. 1 timothy, also a fair shipping demand for the medium grades, but hay that is stained and musty or unsound is very dull and difficult to place. The hay situation is rather quiet throughout the country at the present time as there seems to be no particular scarcity in any one section. Still with the approach of colder weather the trade anticipates an improved demand, especially on the medium grades, in fact there is a much better inquiry now for medium grade hay than there has been.

Light clover mixed hay firm with good demand for better grades also fair demand for No. 2 grades.

Heavy clover mixed hay that contains at least one-half clover is in right good demand but light offerings. Anything that is sound is meeting with ready sale.

Pure clover scarce and wanted. There is very little pure clover among offerings and when here sells readily at top quotations.

Alfalfa hay continues to rule firm with little change in prices. There continues an excellent outlet for good bright leafy hay for dairy purposes, also a fair milling demand.

Prairie hay market steady, receipts small and demand good in a limited way.

Straw steady.

Track sales: Timothy—No. 1, $31@33; standard, $29@30; No. 2, $24@28; No. 3, $21@23; headed, $21@22; threshed, $14@16. Light clover mixed—No. 1, $27@28; No. 2, $24@25. Heavy clover mixed—No. 1, $27@28; No. 2, $24@25. Clover hay—No. 1, $31@33; No. 2, $28@29. Alfalfa hay—Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $28@29. Prairie hay—Choice, $25@26; No. 1, $24@25; standard, $22@23; No. 2, $18@20. Straw, $8.

KANSAS CITY.

Oct. 25.—An advance of 50c to $1 in prairie and a rise of $1 to $3.50 in alfalfa were the only price changes on the market for hay in Kansas City this week. Other varieties displayed a strong tone. Offerings continue limited to the ability of carriers to supply cars, with the total receipts amounting to 685 cars, compared with 607 cars last week and 771 a year ago. Advances in prairie and alfalfa were attributed in a large measure to covering by dealers who previously had sold short. A good demand prevailed for alfalfa, with sales to the Southeast, South and East, in addition to surrounding territory. Stock yards were good buyers of prairie. Some tame hay also is moving to the South. Straw displayed a strong tone, closing unchanged.

Prairie—Choice, $22@22.50; No. 1, $19.50@21.50; No. 2, $16@18; No. 3, $11.50@16.50; packing hay, $8.50@9.50.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice, $31.50@32; No. 1, $30.50@31; standard, $28.50@30; No. 2, $24.50@28; No. 3, $20@24.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

Clover mixed—Light, $25@26; No. 1, $23.50@24.50; No. 2, $17@23.

Clover—No. 1, $24@26; No. 2, $15@23.50. Straw, $10@10.50.

NEW YORK.

Oct. 24.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	4,464	320
Receipts last week	3,460	260
Receipts Sept. 1 to date	33,417	2,302
Receipts same time last year	47,420	2,590

Our market closed quiet and steady last week but some fifty cars were unloaded at 33rd St. shed and at Lehigh pier 66 on Sunday and this caused uneasiness with some recession in values on Monday and Tuesday. But by Thursday stocks were reducing steadily, demand was fairly active and values again hardening with a rather firm undertone on medium and top qualities of timothy hay though there is little or no improvement in the low grades, and in small bales the average of sales is, if anything, slightly lower than at the time of our last report. In Brooklyn the situation is irregular; on top qualities sales could probably be effected above our quotations if the goods were obtainable, but on the lower grades values are hardly up to Manhattan prices: supplies in Brooklyn of all grades are very light and buyers have been forced to seek supplies elsewhere. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$35.00@	$34.00@
No. 2 hay	32.00@34.00	31.00@33.00
No. 3 hay	28.00@31.00	27.00@29.00
Shipping hay	26.00@28.00	25.00@27.00
Fancy light clover mixed hay	@33.00	@32.00
No. 1 clover mixed	30.00@32.00	28.00@30.00
No. 2 clover mixed	26.00@28.00	24.00@26.00
No. 1 rye straw	15.00@16.00	.....
No. 1 oat straw	15.00@16.00	.....

Effective Oct. 21, the Lehigh Valley Ry. placed an embargo on Pier 66, North River, New York.

Effective Oct. 24, the N. Y. C. Ry. placed an embargo on 130th St. Station, New York City.

CHICAGO.

Oct. 28.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Oct. 25, also the total receipts and shipments of hay from Jan. 1, 1919:

	Oct. 25, 1919.	Oct. 18, 1919.	Oct. 26. 1918.
Total receipts	3,525	3,914	6,149
Total shipments	1,069	280	2,425
Rcpts. since Jan. 1	197,009	193,484	263,935
Spts. since Jan. 1	39,635	38,566	77,580

Continued shrinkage of receipts of hay has held prices firmly at nearly the top ranges of the year in spite of the big crop and the belief on some markets that price recessions are due. Monday of this week opened with receipts of 690 tons and shipments of 86 and a steady market and good demand for all hay of good quality. Quote:

Timothy—Choice, $29@30; No. 1, $28@29; No. 2, $25@26; No. 3, $22@24; standard, $27@28; sample, $20@24.

Clover—No. 1 light mixed, $27@28; No. 1 mixed, $25@27.

Prairie—Kansas, Missouri and Oklahoma, choice, $20@21; No. 1, $17@18; No. 2, $12@13; No. 3, $10@11; Illinois, Indiana and Wisconsin feeding, $12@14; packing, $10@12.

Straw—Rye, $12@13; oats, $11@12; wheat, $9@10.

TAMPA.

Oct. 24.—No. 1 Timothy is offered from Ohio and Indiana points at from $35.25 to $36. There is a brisk demand in this section, and the quality being received is excellent. There have been a smaller number of rejections on account of quality this year than any year for a long time. Local warehouses are pretty well stocked with good hay, but with the present good demand from feeders and small dealers, a steady demand from our local buyers may be anticipated.

To the Horse.

e previously announced dinner the Horse" will take place tomor- night, Oct. 30, at the Pennsylvania , New York City, as an interlude to ormal sessions of the convention, ing two days, to formulate plans nduct a campaign to save the horse un's next transportation friend and ompanion in sport. The exploita- nas been undertaken by the Horse city Ass'n of America, Inc., organ- nd supported by a strong body of lly and commercial interests com- g the hay and feed trades.

d M. Williams, of W. D. Power , the New York Hay Exchange, y-third St. and Eleventh Av., is nan of the new Association. rd Gibson is secretary; Thomas ake, treasurer, and L. G. Leverich, Palmer, S. A. Vroman, William and H. S. Lockwood, members executive committee.

he speakers' table of the dinner e Pennsylvania Hotel will be: is M. Hugo, secretary of state; Col. R. M. Danford, commandant est Point Military Academy; Dinsmore of Chicago, secretary Percheron Society of America; S. Horton, agricultural commis- American Steel & Wire Co., Chi- Prof. H. L. Garrigns, in charge mal husbandry, Connecticut Ag- ral College, Storrs, Conn.; Mrs. Speyer, New York Woman's for Animals; R. M. Goodnow, ene, Fulton & Cunningham Co., o.

gates to the convention on Oct. 31 will include representatives e grain markets of Chicago, Mil- , St. Louis, Kansas City, Pitts- Baltimore, Philadelphia and and the entire aggregation of nerchants, harness and wagon , blacksmiths and veterinarians York.

THE ASSOCIATION'S WORK.

ve national associations have heir endorsement to this move- arrying the endorsement of the horse interests in the United and it is liberally supported by luntary contributions of horse in all walks of life.

officials and others connected with the inception of the movement, fully realizing that the motor truck has its legitimate place in the transportation field, which is entirely outside of the horse range area, plan to confine their efforts to the replacement of the horse-drawn unit for short-haul, frequent-stop deliveries, especially in cities; also to encourage the breeding of more and better grade farm horses.

The farm tractor has been proven feasible and economic only on farms of over 300 acres. The small farmer can use the horse more economically and to far better advantage, due to the flexibility and adaptability of the horse to the varied farm uses, plus the cumulative investment through breeding. The Association officials claim that they have facts and figures to support these assertions that the horse-drawn vehicle is an economic factor in reducing high transportation costs of local deliveries.

Fred M. Williams, temporary chairman of the Association, states: "No arguments are needed to demonstrate the claims of horse superiority in short-haul, frequent-stop transportation work. The fact that large corporations, express and trucking companies, dry-goods stores, coal, milk and baking companies are reverting to horse-drawn units for city deliveries after several years' experience proves the economic necessity of reinstating the horse unit."

HORSE ROADS.

Among other activities the Association plans to take up "Horse Roads," on the side of the main trunk highways. With all the magnificent roads throughout the country, no provision has been made for "Dobbin by-ways." The United States Department of Agriculture statistics show that there has been no decrease of draft horses along the rural roads, yet no provision is made to give the horse a firm footing. A horse road alongside the brick or composition road, where possible, is provided for in highway appropriations in several states, and is a sensible and economic necessity.

Among the representative men who will speak at the convention sessions and dinner are Secretary of State Francis M. Hugo, Lieut.-Col. R. M. Danford, on "The Horse and His Work in the Army"; Dr. S. Horton, on "The Horse and His Feed"; Wayne Dinsmore, on the "Economic Relations of Horse Power to National Life."

Mr. Thompson's Outbreak.

Newspapers recently gave prominence to an interview with the secretary of the Illinois Agricultural Association, in which the gentleman was quoted as saying in effect that owing to the decline in prices the farmer was not breaking even, the wheat acreage was being reduced; more feed lots empty than for years past; many silos unfilled, and hog breeders cutting production from 10% to 50% and selling brood sows. And, to quote the gentleman verbatim, "The reason lies in the speculators, the food gamblers, the Board of Trade."

Coming from such a source we cannot let the statement go unchallenged. The Board of Trade has built up the most perfect system for marketing grains ever devised. We now have an open market where all may come to buy and sell their wares. Speculation is an integral part of this system. The speculator performs a useful and a necessary function. Through the operations of speculators as conducted on the Board of Trade, the producer, the consumer, and the middleman all alike are benefited. The Government realizes and recognizes our usefulness. The speculator does not make conditions; he merely follows conditions. Conditions were responsible for the advance in prices following the war, and conditions, not the speculators, were responsible for the recent decline in prices for farm commodities.

Merely a superficial investigation would prove the foregoing assertions to be correct. That a man occupying an official position with a State Agricultural Association should display so little knowledge of the medium through which the commodities in which he is interested are marketed is astonishing.

To quote Dr. Samuel Johnson, "The man is dull, naturally dull, but it must have taken him a great deal of pains to become what we now see him. Such an excess of stupidity is not in nature."
—*L. L. Winters.*

Grain Imports.

The following amounts of grain in bushels and flour in barrels were imported by the United States in August 1918 and 1919 and during eight months of the years named ending with August:

	August		8 months	
Grain—	1918.	1919.	1918.	1919.
Corn	4,305	949,642	1,839,622	6,092,738
Oats	12,601	30,386	1,440,113	496,490
Wheat	981,191	28,697	14,618,568	6,481,336
Wh. flour	3,737	770	153,837	10,249
Hay, tons	22,662	9,283	273,013	134,374
Corn from—				
Mexico		19,879	56,888	35,235
Arg'tina.		923,597	1,612,852	5,521,997

Japan				393,140
Other	3,755	6,166	28,276	141,677

Cotton Crop Reports Bullish.

The feed trade is closely watching the maneuvering of Southern cottonseed millers, brokers and speculative interests, a fraternity that has anticipated considerably and with much bullish emphasis the special report on cotton ordered by joint resolution of Congress and due on Nov. 2, as a result of a special survey made on Oct. 25. The regular report on cotton by the Bureau of Crop Estimates on the first of each month is not issued in November.

The indicated yield for 1919 estimated on Sept. 25 condition was 10,696,000 bales. It is universally expected that this will be reduced, perhaps to around 9,750,000 bales, closely approaching the shortest crop year in recent cotton history (9,510,000 bales in 1901). Bumper years have shown around 15,000,000 bales (11,609,000 bales in 1910, 15,693,000 in 1911, 14,156,000 in 1913 and 16,135,000 in 1914). This season's exports to Oct. 23 as reported from New York were 959,639 bales, port receipts 41,327 bales and port stocks in this country 1,194,454 bales.

Feed mixers are inclined to discount the panicky bullish news from our Southern friends and that is, of course, their privilege; but we would suggest a close investigation into the actual facts and the advisability of being fully covered on your cottonseed meal requirements to at least the new year. Late private reports indicate that the late crop damage has been almost calamitous.

Wheat Movement—Flour Production—Exports.

The Grain Corporation's weekly bulletin covering the wheat and wheat flour movement throughout the United States for the week ending October 10, 1919, in comparison with the figures for the same period a year ago was as follows:

	1919.	1918.
Wheat—		
Receipts from farms, bu.	19,445,000	26,535,000
Previous week	24,187,000	27,559,000
From June 27 to Oct. 10	494,831,000	467,074,000
Flour—		
Produced during week, bbls.	3,503,000	2,814,000
Previous week	3,316,000	2,754,000
June 27 to Oct. 10, bbls.	39,140,000	33,498,000
Wheat stocks—		
Elevators and mills, bu.	288,320,000	262,905,000
Previous week, bu.	281,671,000	253,337,000
Change for week, bu.	+6,649,000	+9,567,000

EXPORTS OF WHEAT AND FLOUR.

Exports of wheat and flour July 1 to Oct. 10, including loadings for export and on shipboard, amount to 51,113,000 bus. of wheat and 5,435,000 bbls. of flour, including non-Europe, making a total equal to 75,571,000 bus., compared with 49,077,000 bus. of wheat and 5,050,000 bbls. of flour last year, October figures last year being prorated to Oct. 10, making a total equal to 71,800,000 bus. Last year's official figures are supplemented by army and Red Cross shipments.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Oct. 27.—Provision prices had a wide range last week and dropped to the lowest in months, as hogs were down to the lowest in 18 months and $10.65 under the high point of July 31, which established a new record. A good rally followed the break to the lowest prices, with the close on pork $2.15 higher for October, which is congested, while January lost 75c. October lard finished with a decline of $1.75, as also did November, while the January was off $1.07½ and short ribs were 50 to 55c lower for the week.

While prices have had a big decline and pork is $9 lower for January than a year ago, October in which there is little trading, except by shorts, is $5.80 higher than a year ago. October lard is $1 higher and November up 55c, while January is $1.85 lower. October short ribs finished $3.50 under last year's and January is off $5.52.

Lard is selling at more than double the price of hogs and is receiving the bulk of the attention of the trade. There is a good demand and a liberal supply. Loose lard is 75c under October, leaf lard was $28.50 at the close. Cash lard is selling at October price to 10c over, with deliveries of over 600,000 lbs. during the week.

Not in years has there been such an output of lard as compared with the run of hogs as has been made of late and is still being turned out. Practically all the hogs, except the lean meats, are being tanked aside from the product needed by the fresh meat trade. This means that the make of short ribs and side meats generally is light. There is a fair domestic and good export demand for lard and compound, the latter selling at a good premium over January product, and considerable spreading was on between lard and cottonseed oil. Shorts were large buyers on the decline, while local and outside packers took advantage of the strong spots to sell against the output of their houses.

Green hams are selling at 17@18c, the latter for 16 lb. averages, and are relatively cheaper than dry salted short ribs. Foreigners are buying fair quantities of hams and other products for deferred shipment and the movement of meats is in excess of last years, being 22,181,000 lbs., against 18,698,000 lbs. last year.

Domestic trade in meats is fair and there is a big profit for packers in cutting hogs and selling all futures. Comparative values of lard and meats are considerably out of line, but the belief exists that if they are left alone to work out in a natural way, they will gradually right their position. There is a loss for the packers on products made from higher priced hogs and still held, while that made recently shows a profit. There would be a large foreign business were exchange rates to improve.

Range of prices in September and previous and for the week follow:

			Close		
			Oct.25,	Oct.18,	Oct.26,

Kansas City Provision Review.

KANSAS CITY, Oct. 25.—Further declines in the hog market, with values now close to the $12 mark, stimulated demand for provision products in Kansas City this week. Many buyers had limited purchases in the hope of witnessing this level of prices in the trade. Provisions were off as much as 1½c during the week, closing generally 1c to 1½c lower. Some fresh cuts were only ½c lower. Demand for fresh pork from the East, and locally, improved, due doubtless to colder temperatures. The South continues a good buyer of dry salt and heavy smoked meats, but unfavorable weather conditions for picking are retarding trade. Smoked meats were down about 1c. Fancy hams and bacons also were off about 1c, sharing a fairly broad demand. Lard was off ¾ to 1¼c, while a firm tone prevailed in the substitute products.

Summary of Live Stock Markets.

Top prices on hogs last week were the lowest in nearly two years. The compilation by the *Daily Drovers' Journal* follows:

	Saturday.	Week.	1919.	1918.
Armour & Co.	1,300	25,900	1,032,400	1,145,100

Low Hog Prices.

One reason for the break in hogs is given in the special review of the hog situation published by Swift & Co., wherein they state that the chief reason is that the foreign demand has practically disappeared, because European countries cannot afford to buy our products. We think the break in hogs will be the means of stimulating the trade and is the best thing that could happen under present conditions.—*W. G. Press & Co., Chicago.*

Live Stock Market

CHICAGO LIVE STOCK.

CHICAGO, Oct. 27.—Hog prices dro to the lowest in 18 months last the inside figures being made We day when the top at the close $12.75 and the highest that day $ At the inside price values were $10.65 from the highest on record July 31. On that day one of the ers claimed that the cost of his averaged $11.90. The average pric all hogs that day was $12.55, the est of the season.

After declining for the first four under the pressure of large re and limited Eastern demand, pa took hold more freely and an ad of 65c was made. On Saturday th price was $13.35 and the average against $17.15 last year. Averag the week was $13.10, a loss of $1. the week, $3.15 from last year, from two years ago and compared $10.05 three years ago.

Average weight for the week wa lbs., compared with 243 lbs. the pre week and 230 lbs. last year. Pa bought 146,500 hogs for the week, pared with 119,500 the previous and 173,500 last year. The Armo terest took 34,100 hogs, Swift, 3 Morris, 10,000, and Wilson, 14,20

Receipts at Chicago for the were 155,141, compared with 1 the previous week and 162,383 last The eleven markets had 509,000, a 474,000 the previous week and 5 last year. The twenty markets 605,000, against 585,700 the pre week and 628,300 last year.

Prices for best steers were well tained last week, the top $19.35, on Tuesday, while the extreme for steers for the week was $9 to $ with the bulk of sales at $12.50 t Average price of beef steers fo week was $16.20, against $16.6 previous week and $14.40 last Plain and medium grades of steers off $1 to $1.50 for the week, th dium grades suffering the most. the common sold around $9 to $11 lies were liberal, Chicago getting compared with 90.077 the previous and 86,198 last year. The eleve kets had 377,000, or 11,000 less th previous week and 77,000 more last year, while the twenty marke 489,500, against 498,600 the pr week and 404,000 last year.

A big run of Western range was on, 26,700 being received, con with 28,000 the previous week, a 500 last year. For the season t the aggregate has been 236,200, 300 more than last year, and con with 218,200 two years ago. Sa common to good were made at th at $8 to $10.50.

Butchers' stock was sold at abo same prices as the previous week a plentiful supply and a fair cal ticularly for the better kind, cow ing around $8.25 to $12.50 and $10 to $15.25 for good to fancy. were 25c higher for the best at t with the range $7 to $7.50, while brought higher prices. Canner cutters were $5.50 to $6.50. Calv ished at the high point of the packers paying $17.75 for the bes ceipts were 18,600, compared wit 000 last year.

In the stocker and feeder trade was a good healthy business with held well throughout the week supplies being generous. The top w for fancy heavy load of Herefords, ing considerable flesh, while the a $10.15, a loss of only 25c. The b sales was at $8.80 to $11.45.

Native lambs closed 15 to 25c h with the top $6 on Monday and th of sales $14.75 to $16.50. Fed w lambs touched $15.75 for the be rangers were scarce at $15.75. high point with others at $14 $15.65. Aged sheep gained 50 t

ulk of the Mexicans, $6.50@9.00.
stock slumped unevenly following
quarter advance. Closing prices
75c below the week's opening,
y to 50c lower than a week ago.
eavy cows, and canners and cut-
as high as at last week's close.
um grades are in extremes as
50c lower. The week's best price
rns was $11.25, odd head, includ-
es selling up to $12.00. Prime
closed at $10.00@11.00, with good
kinds at $8.00@9.50, and fair to
$6.50@7.75. Canners and cutters
$5.00 to $6.25. Choice light veals
5c higher for the week, all other
out steady, and bulls are general-
aged at $6.00@6.50 for bolognas,
grades on up to $8.00 and better.
oke sharply again this week, and
ow time Thursday were nearly
er last week's close, bulk sell-
$12.00. There was quite a re-
action yesterday and today, but values are still $1.25@1.50 lower than a week ago, bulk today going at $12.25@12.75, with a top of $13.25. The reaction on the close was on very light receipts, though the week's total run of 28,632 head is quite a little heavier than for any recent week. Whether or not the market will fulfil the most bearish predictions and go as low as $10.00 is a question that is still open for argument, but later difficulties, which seem to grow worse instead of better, and the lack of export outlet certainly do not make the outlook very bright for the immediate future.

There was a slight upturn in fat lamb values early in the week, but the upturn, which did not amount to more than 25c at the best, was more than lost before the close. On the whole it was a featureless market, receipts being light and demand none too brisk. The week's top on Westerns was $15.15.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Oct. 24.—Cattle receipts this week have been fairly liberal and the market has been in very good shape, with values anywhere from strong to 15@25c higher on steers, fully steady on canners and cutters, with shipper cows steady to a shade lower. Each day we have had an early clearance, giving the shipper full benefit of the good fills. Steers have been exceptionally light, there being a few loads of fair to good natives averaging 1,050 to 1,150 sold at $10.50. Common to fair steers averaging 900 to 1,000 lbs., brought anywhere from $9.25 to $9.35.

No small number of cows and heifers were sold this week from $8.50@8.75, with several bunches as high as 9 cents. There is a strong demand for bulls at strong prices and they are fully steady for the week. Quality of calves, common to fair, with very few light vealers coming $15 being the top on these grades.

In sympathy with the decline of Northern markets, our hog market has dropped this week, it being around $1.00 lower for this week. The top was $14.00. Friday locally a strong 25c higher basis ruled. Receipts were scant that day. 400 head, against 514 a week ago and 1,745 a year back. Stockers are going steady.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Oct. 25.—The cattle market for this week has been on a steady to a stronger basis. The demand for all classes of cattle has been active. In spots our steer market and butcher cattle market is $1.00 higher than last week's close. Canners and cutters in spots are fully 75c higher. The best sale this week was made Wednesday on a bunch of good steers that brought $18.00. Our run of Western and Oklahoma cattle has not been what we expected owing to the car shortage that exists at this time. What Western cattle and Oklahoma cattle we did receive found a ready market at good prices.

The hog market for this week has been on a steady decline. Our receipts of hogs were larger than last week and consisted of fair to good qualitied anima's. The market is closing today at least $1.75 lower than last week's close. The quotations are: Mixed and butchers, $12.50@13.00; good heavies, $12.85@13.00; rough, $10.75@11.75; light, $12.65@13.00; pigs, $11.50@12.50; bulk, $12.50@12.90.

The sheep and lamb receipts were somewhat larger than last week and the market has been on a steady basis. Best lambs sold this week around $15.50. Some right good ewes and wether lambs not strictly choice around $14.75, medium and half fats $12.00@14.00. The canner prices seem to remain unchanged at around $3.00 with choppers and bucks from $5.00@15.50 and breeding ewes around $8.00@9.00.

Canadian Livestock.

Winnipeg, Oct. 24.—Heavy runs of cattle and sheep were characteristic of the livestock market last week. The movement has not been so active for some time past. At the close of the week choice steers sold at $10@11; fair to good, $9@9.75; mediums, $8@8.75. Hog receipts were light early in the week but as receipts became heavier the market declined and on Friday selects were quotable $18; heavies, $16; lights, $16@17; sows, $14.

Denver Cattle Market.

Denver, Colo., Oct. 28.—The week's trading has been active in the face of heavy receipts. All cattle of fat quality are active and fully 25c per cwt. higher than last week's strong close. Common trashy cattle, canners and bulls are unchanged; no one wants them on account of the high priced feeds and there is no broad outlet for them as killers. Future prospects for all good cattle better than at any time during the month.

Receipts and Shipments.

Receipts and shipments of livestock at Chicago the past week compare as follows:

Receipts—	Hogs.	Cattle.	Sheep.
Past week	164,606	94,232	160,290
Preceding week	126,045	88,042	152,480
Last year	173,558	87,315	115,199
Shipments—			
Past week	5,240	30,030	49,968
Preceding week	5,422	32,141	74,603
Last year	6,148	23,542	32,723

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at our command at most reasonable rates.

Hotel La Salle

Chicago s Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person	*Per day*
Room with detached bath,	$2, $2.50 and $3
Room with private bath,	$3, $3.50, $4 and $5
Two persons	*Per day*
Room with detached bath,	$3, $3.50 and $4
Room with private bath—	
Double room	$5 to $8
Single room with double bed	$4, $4.50 and $5
Two Connecting Rooms with Bath	
Two persons	$5 to $8
Three persons	$6 to $9
Four persons	$7 to $12

1026 rooms—834 with private bath

OLLECTIVE BARGAINING

ngs on the Collective Bargaining Bill ot Now a Popular Measure—Ex- v. Yates for It—Barnes Replies.

SHINGTON, Nov. 1.—[Special Corre- ence.]—The Capper-Hersman bill, which the agricultural organiza- are focusing their attention, came ir formal consideration by Con- for the first time during the past

Hearings on the measure, which ls the Clayton act to legalize col- e bargaining by farmers and is ied in the interest of such organ- ns as the milk producers in Illi- who were under unsuccessful ution in Chicago, the raisin grow- California, whose indictment is ened by the Department of Jus- and other groups of producers, begun before the House Commit- Judiciary.

n D. Miller of New York, a dairy -lawyer, who represented the ial Board of Farm Organizations, ed that in view of the present in- al situation the time was pos- not psychologically propitious for esentation of the measure. Some e members of the committee l to feel the same way about it uestioned Mr. Miller and other ses rather closely about their as to class exemption from the ion of any particular act. Even entative Volstead of Minnesota, an of the committee, who stated ie favored giving farmers the f collective bargaining, expressed ubts as to the measure. "While or the right of collective bargain- farmers, the question is, where going to lead?" remarked Mr. d.

eems to me that under this bill s' organizations would have un- authority," said Representative Missouri, Democrat. "There ap- o be no safeguards at all for the ers."

members of the committee, in- Representative Yates of Illi- xpressed their support of the e. "I think I can give my sup- this measure," said the former governor. "It is a bill which mers require and I believe it mmand cordial support all over ited States."

Miller in arguing for the meas- lared that within a decade the States would cease to be self-sus- unless the farmers of the coun- e assured more satisfactory re- He said the uncertainty of con- under the Clayton act has cre- n intolerable condition. "Able disagree as to the interpreta- the Clayton act and even United district attorneys reach conclu- at are entirely at variance with ier," said Mr. Miller. "The pres- ertainty is intolerable, and to this we are asking the com- to report this bill. It must be lawful or clearly unlawful to acts which can only be per- through coöperation."

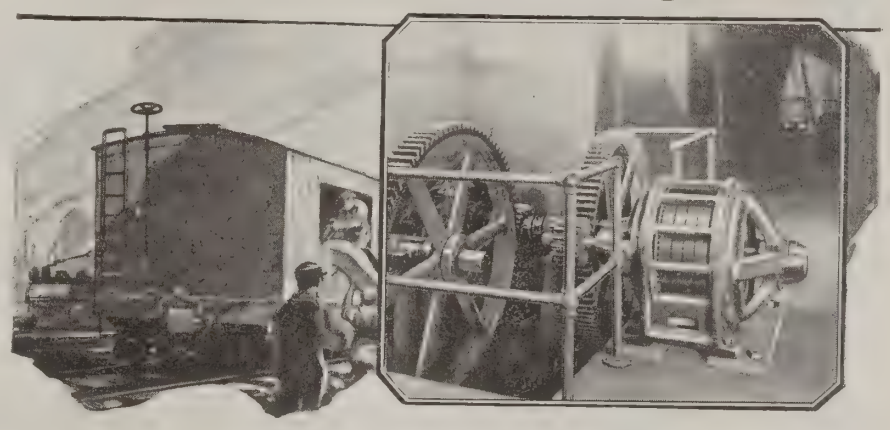
NES AND THE WHEAT MOVEMENT.

nvestigation of the wheat situa- the Senate Committee on Agri- continued during the week with I. Barnes, United States Wheat , again on the witness stand. Barnes told the committee that no necessity of prescribing op- margins for the milling indus- here is no evidence of abuse," . Barnes. "Competition is free n and this natural protection resent is much safer than at- at arbitrary control. The offi- istics show between June, 1913 the war influence) and June is is the relation: The farm wheat has advanced 176 per ie retail price of flour has ad- 127 per cent; the retail price of as advanced 77 per cent; there evidence here of the full oper- such protection of the public. emergency has passed. Trade nger disorganized by its influ- ence. The Grain Corporation offers daily to release its standard grades of flour in carload lots at its average cost basis and by stipulation reflect to the final consumer at the fair relation. The American people apparently want a whiter flour. Even the bakers largely demand a finer grade, and this demand has forced certain grades and varieties of wheat above the Government price basis with all the inherent risks to millers and dealers from possible price declines. Without a stabilized basis price for wheat and uniform flour extraction (no authority existing for either) operating margins would be very difficult to fix fairly, and if done unwisely might destroy manufacturing and produce local flour famines; an end to be seriously guarded against."

Mr. Barnes took exception to a statement by Senator Gronna of North Dakota, chairman of the Committee on Agriculture, in a speech on the floor of the Senate relative to control of wheat exports by the Wheat Director. "On Oct. 9 your chairman stated in the Senate that 'there has been, and there is now, an embargo on wheat and wheat flour, and that is the reason why wheat is not being exported,'" said Mr. Barnes. "Contrary to this impression, the real facts are that export permits have facilitated the export of wheat and wheat flour to the extent of 77,000,000 bushels in three and a half months, an amount that has been exceeded only twice in our history.

"I am fully of the opinion that step by step and at the earliest possible moment this Government agency of the Grain Corporation, nationally dominant and controlling during two years of war, should now be prepared to withdraw and broken international trade connections should be encouraged to reknit. One of these steps would be the elimination of export and import embargo restrictions."

A View of Corn.



After five weeks of erratic and unimportant fluctuations, during which time a feeling of indecision possessed the trade in general, the corn market on Saturday got well out of the "rut" in an upward direction, accompanied by a sudden revival in outside interest. Perhaps the chief contributing influence was the strength displayed in the stock market, which brought about a realization that grain is practically the only speculative article that has not so far participated in the advances elsewhere. Aside from this, fundamental factors are certainly not encouraging to operations on the short side. December is still at a discount of nearly 15 cents under the cash; stocks in Chicago are inadequate; the producer maintains a holding attitude and is not attracted by the present price; most important of all, the importance of the car situation has too long been ignored. Where corn is available at a country station the shipper either finds himself without a permit or unable to get cars; mostly the latter, because permits are being issued almost as fast as applications are received; but the railroad administration is diverting all empty box cars to sections where wheat must be moved in order to protect further deterioration. The recent decline in hogs was drastic, but has now run its course and a firm market is looked for.—*Logan & Bryan, Chicago.*

Farmer Grain Dealers at Omaha.

The Nebraska Farmers' Coöperative Grain and Live Stock Association convention will be held in Omaha Nov. 18, 19 and 20, headquarters, the Rome Hotel. Mr. Shorthill, secretary of the association, estimates that there will be at least 300 farmer elevator companies represented at this convention.

An advancing market in red clover seed is reported by a Paris seed house to C. A. King & Co., Toledo. A smaller crop than previously anticipated coupled with the good demand from America is responsible for the upturn of prices.

Help release cars for moving our great crops by quick unloading

Quickly Spotting Cars With G-E- Motor-driven Pullers

DEMURRAGE need never be feared by mills using pullers and grain shovels operated by G-E Motors.

Remarkable unloading and grinding records have been made at prominent G-E motor-operated mills throughout this country.

These mills are producing highest grade flour at lowest power costs per barrel—in some cases half that of their competitors.

The motors have been in use for many years, in some cases well over a quarter of a century, and the upkeep cost has been negligible.

NEW WEIGHTS ON GRAIN.

Walker D. Hines, Director General of Railroads, on Oct. 31 authorized the following:

The Railroad Administration is about to file with the Interstate Commerce Commission, effective upon five days' notice, supplements to tariffs providing for the establishment of minimum weights on grain and grain products designed to secure heavier loading and to make available additional freight cars for the transportation of grain and grain products. The amended tariffs will provide that the new minima are made effective purely as an emergency matter. When the emergency has passed, the tariffs will be withdrawn.

This step has been made necessary by the extremely heavy demands which are being made upon the Railroad Administration for the transportation of grain and grain products and by the fact that in many markets cars are being ordered loaded only to the existing minimum weights even though these are considerably less than the capacity of the cars. These minima are not being established for the purpose of securing revenue or as a permanent policy, but solely to assist in providing more freight cars during the present emergency. The new minimum weights will be as follows:

On grain, all kinds, the minmum weight will be the marked capacity of the car, except that where the marked capacity is less than 40,000 pounds, the minimum weight will be 40,000 pounds per car. The actual weight will apply when grain is loaded to within twenty-four inches of the roof at the side walls of the car for the purpose of Federal or State inspection by Grain Exchange at points where Federal inspection is maintained (notation to that effect being inserted in the bill of lading by shippers) or when grain is loaded to proper grain line of cars so marked.

On grain products, the minimum weight will be 60,000 pounds per car provided that when the marked capacity of the car is less, the marked capacity, but not less than 40,000 pounds per car, will apply, and provided further that when a car is loaded to full space capacity the actual weight will apply.

The British government has decided to extend the Wages Regulation Act until Sept. 30, 1920, which will insure the continuation of war bonuses until that date. The extension is conditional on amendments clearly defining the Arbitration Courts' work in the adjustment of wages to the cost of living, and also the protection of industries from strikes, while the guarantees provide that production will be maintained at the highest level of the war period.

Exports of Corn.

The exports of corn from principal United States ports, as reported by the Chief of Bureau of Statistics of the Department of Commerce, for each month, for four years:

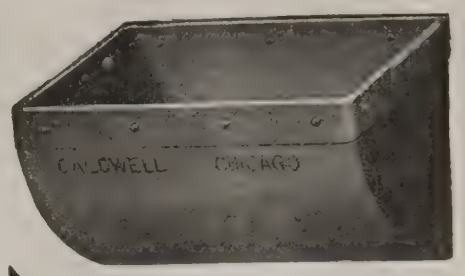
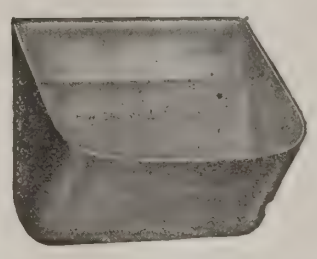
"See How Simply It's Built"



The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

USINESS AND TRADE CONDITIONS

HE coal strike is on in spite of the injunction against it issued by the Federal court at Indianapolis. The Fuel Administration has been ed to mess up the distribution of the petty sur- upplies and to keep down the price of coal, thus ing as long as possible the effect of the cessa- of supplies, which should be permitted to oper- once in order that the full force of disorder of ature may be felt by everybody as speedily and ighly as possible that it may be ended quickly. ffort to ration something which does not exist tility; therefore, the fact that there is no supply hy there is none should be made plain to all earliest moment in order that public opinion unction at once.

or leaders are of course enraged at the injunc- roceedings. Responsible to no one themselves, ell along in the way toward the point of utter pect for the rights of property and the duty of overnment in respect to property rights, the junta have long been fighting the principle of tion, which would prevent wrongdoing by for- g it in advance rather than endeavor to redress for injuries committed by irresponsible s who could make no restitution, thus forcing ner to carry an unmerited loss or the public to t good to him by taxation. This Federal court te, which is aimed at something different from pective loss by a specified individual, has been l by Lewis for the miners, while both Mr. rs of the Federation and Mr. Stone, represent- e railway employes, have made their threats the action be proceeded with by the Govern- hey will not be responsible for the future acts body of organized labor. The Government, in words, is distinctly challenged by practically a tion of war upon its executive functioning.

men will concede the right of workingmen to ork for any reason sufficient to themselves. ilization is based on the coöperation of all s of organized communities. Its continuance s upon the individual's use of his property or or in the way best satisfying to himself, yet injury to others and without depriving any- e of his rights. The striker, however, is one rs, in substance: "I mean to get my living by his one thing as my contribution to the work ry to maintain the social life, but I will do it terms dictated by myself." As this is not an easy program for the individual to put en have organized groups who go farther and his much for each of us; and in order that we ve our will, we give notice that as a group all ill act to prevent all others from working ex- terms and in the manner prescribed by us." position involves several details essential to ummation, such as the exercise of power (1) e the Congress and the Executive to do the he group; (2) to imperil the health, safety sical welfare of the public, if necessary; (3) t injury on individuals; (4) to breach con- will; (5) to intimidate or to conspire to in- to coerce other men to do these things. The exercise at any time or place of this power oup or groups, severally or in combination, he abrogation of the functions of organized ent whose first duty is to protect the coöper- ustries and social life of its citizens and the on by a group of supreme power to be ex- s occasion suggests for the sole benefit of a few. The right of coal miners to strike can hardly be seriously questioned, if personal liberty is to obtain; but it is quite different to concede the right of all coal miners to conspire to strike in unison in order to force the community by imperiling its health or by forcibly stopping the processes of the industry and distribution necessary to its existence in order to obtain the wishes of the group, and the right of outside groups to conspire with a disorderly group to inflict injury upon the great body of the public, in order to arbitrarily force demands the group will not submit to examination. Disorders created by groups to work their will should be forbidden, not by injunction by virtue of "war legislation," which public opinion conceives as obsolete, but by laws which are based on a sound philosophy of social homogeneity and which are not mere decrees made by opportunists to get around acute difficulties created by other laws designed to grant class immunities. Either labor has the right to upset all industry when minded so to do, or it has not. The law should say. It should also distinctly mark the limits to which organized labor may go. Capital is already more or less in the shackles. It is now time to protect the "unforgotten man" called "the public," not as a matter of sentiment but as a matter of right as well as of expediency. The proposal of Senator Edge to wipe off the statute books all laws granting immunity to laborers and farmers from investigation and prosecution under the anti-trust laws, which Congress but recently slavishly refused to do, is distinctly a proposal in the interest of good government and fairness to the "forgotten man," the law-abiding man.

The International Trade Conference came to an end with a report of the committee on credit and finance, in which confidence was expressed that ways and means will be found to meet the needs of the countries represented at the conference, more particularly France and Italy whose needs are most acute and enormous. The committee, however, said that "the world situation presents today the greatest financial problem of history" and constitutes a "challenge to the skill, the ingenuity and the public spirit of America." It went further, and agreed to the principle laid down in the welcoming address of President Alexander of the National Bank of Commerce in New York, that the problem must be solved, taking due regard for the natural laws of commerce and apart from any financial intermeddling directly by governments. The Edge bill to facilitate the mobilization of the financial resources of American people in order to extend the credits required, was commended with the reservation that, "It should be stated that no corporation which can be set up can take the place of individual ingenuity and the wide variety of effort and skill on the part of business men and bankers working out in detail with business men and bankers in Europe specific transactions." The report, in fine, kept it distinctly in view that international commerce consists of transactions between individuals and not nations; therefore all credits extended must be, as formerly, to individuals through the bankers who are trained to the particular service of international exchange. In these views the report in question is supported by the Federal Reserve Board, whose Governor, W. P. G. Harding, has said that this Government can not "without the most harmful inflation continue to make advances out of its treasury to foreign countries; and I am convinced therefore that the problem of financing Europe, as far as America is concerned, is one for private initiative and individual enterprise."

The bearing of all this for the reader is in this, that unless the normal course of commerce and trade is speedily resumed and freed of all impediments caused by restrictive laws or by the inability of European merchants to pay for their imports, either in cash or with bankable paper, there will have been created an artificial but sufficient dam against our exports, especially of agricultural products, which will materially and seriously affect their prices as exportable commodities, which will be reflected back to the farms. Already this influence has been felt upon meat and coarse grain prices and is causing unrest and especially a voluble discontent of those half educated agitators among farmers and farm newspapers, who do not or will not or can not understand the influence of the foreign ability and willingness to absorb the surplus products of American farms on their prices in preference to those of our competitors. The rapid recovery of European farms, even now shown in an exportable surplus from both Roumania and Russia, the heavy surplus of corn in Argentina and South Africa, and prospectively the larger yields of all grains in the exporting countries in the near future, make it expedient in the interest of the American farmer, as well as the industrial producer, that the desired equilibrium of exchange be naturally restored as speedily as possible.

September's record of foreign trade shows continued heavy exports ($593,000,000, the largest September total recorded), especially of foodstuffs, but also the largest September imports on record ($435,000,000), leaving an excess of exports of only $158,000,000, the smallest September since 1915. Thus the first three months of this fiscal year, as the *Federal Reserve Bulletin* said of July and August, "are characterized by a diminution of the outward movement of goods," while July and September were marked by distinct advances in the volume of the import movement and decreases of the excess of exports, which is distinctly encouraging, since a continuance of this condition would be likely to cause improvement in the cost of living situation in this country. As it is, the calls on our stocks of foodstuffs and coal continue with the wartime insistence.

"Business" does not seem to take the coal strike any more seriously than it did the steel strike. It is not expected to last very long nor to be universal. The West Virginia and Kentucky fields are still at work, as are scattered mines in all the Central States. Nevertheless considerable doubt exists. Naturally all prices have stiffened in the possibility that all industry and distribution would be affected by the fuel shortage and the poor at once felt the pinch of scarcity. The steel industry shows an acute shortage of goods and a large gain in orders so that a busy year is certain all through 1920. Current deliveries by the mills are increasing slowly. Copper is quiet at 21½ to 21¾c. The demand for textiles is good but is beginning to feel the check of high prices. Cotton continues high in the face of good European demand and continued rain damage to the crop. The longshoremen are still nominally out, but the men are going back now and vessels are again clearing. As saving is unfashionable in working class circles, the retail trade is everywhere good and failures rare, only 109 last week in the United States and Canada against 148 a year ago, same week. The stock exchange continues active and in spite of the coal strike news the average prices of 67 leading industrials advanced for the week to $112.82 vs. $110.74 the previous week and $70.95 a year ago. In fact, as the *Monthly Review* of the National City Bank of Chicago said, "The country is still highly prosperous.

The crop sections are making an excellent showing, except in occasional instances where unfortunate conditions are reported. The country is doing an immense volume of retail business with noteworthy activity in the West and South. Unrest of labor has been a deterrent in certain industrial lines where important projects have been held up, but the average American business man is hopeful about the future. He believes thoroughly that better times are ahead for the American people. And within the last few weeks he has indicated his confidence in the future by giving out large orders for the purchase of seasoned securities. We have entered the season of usually firm money rates and although there is an active demand from various quarters, there is nothing in the outlook to suggest undue stringency or the development of conditions which will make it difficult for legitimate borrowers to obtain necessary accommodation."

SENATOR CAPPER EXCITED

SENATOR CAPPER is a publisher who caters to the farmer in general and particular. Recently he added to the gaiety of the Nation by announcing the discovery that $1.86 for wheat to the farmer realizes $1.30 a bushel to the baker. And this, too, when "farmers are selling wheat at 20 to 70c less than the guaranteed price."

There are some farmers who may be rendered more or less hysterical by such clap-trap; but let it be hoped not many. A far more dependable authority on such a subject is Julius H. Barnes, a man handling an enormous responsibility who knows how to keep his head out of the cumuli and his feet on the ground. He told a Senate committee on Oct. 28 in answer to Mr. Capper's hifalutin, that "there is no evidence of abuses. Competition is free and keen, and 'this natural protection' is 'safer than attempts at arbitrary control.'" Mr. Barnes said that official statistics show that between June 1913 and June 1919, while the farm price of wheat advanced 176 per cent, the retail price of flour went up only 120 and that of bread only 77 per cent. As the Food Administration followed the wheat from the farm to the consumer of bread, always with an eye single to the prevention of profiteering at any point in the course, and went, as some grain dealers used to think, rather beyond a reasonable limit to see that the farmer "got his" and every penny of it, the complaint of Senators that the farmer has been mistreated may be set down as pure buncombe devoid of truth and really beneath the dignity of the Senate.

THE FEEDER TRADE

FEEDERS who are in the game as a scientific business, and first-class farmers who know the value of cattle to the farm, continue to set at naught the predictions of ruin in the beef cattle business. because of low beef prices and high feeds. The fact is that the demand for feeders in all the markets is good, and the number of cattle going back to the farms is as great now as it was a year ago, notwithstanding the great decline in slaughtering values. Certain feeds are high, notably the cottonseed by-products, but hay and farm-made feeds are abundant, and fall pastures have been exceptionally fine in the cattle states, while corn is much cheaper and better than a year ago; so that the cheap roughness is met with cheaper grain. The receipts at the yards have been of rather better quality of late, containing many higher bred cattle, which, however, have not been well enough finished to command prices which choice beef cattle have brought, but they are attractive to the feeder who wants to get the profit the shipper could not or would not exert himself to get. These animals are now going back to the feed lots, and the number of buyers in the markets is evidence enough that the game is not finished yet, in spite of the pessimists abroad. The real secret of the profit as the *Journal-Stockman* hints will be the intelligence applied to the final marketing—not to send these warmed-overs back faster than they can be absorbed. "Every animal that goes on feed this fall will be needed within the next six months, but the country must bear in mind they will not all be wanted during the next three months. A longer feeding period on cheaper feeding material will help considerably."

THE METRIC SYSTEM PROPAGANDA

THE Decimal Weight Bill (H. 9755, Vestal) has been recommended for passage by the House at Washington. This means the metric system, the title being deceptive, for a purpose, no doubt. We presume our readers understand what this forcing of the metric system upon them will do. It will junk every scale and measure in their possession without salvage.

The purported demand for the metric system as a national proposition is pure fiction. It appears to emanate from the so-called "World Trade Club" of San Francisco, W. H. Hammer, president, 681 Market St., a mysterious club (?), which is said to have spent $100,000 in circulating "suggested" editorials, petitions, etc., and sending "literature" broadcast over the country for "the good of mankind." What's the big idea? This flood of dope has dribbled into this as into all other newspaper offices, but we have yet to find in it all one substantial reason for the change of weights and measures proposed. The "dope" very cleverly exploits the metric but calls it the decimal (cental) system which Texas has just put into force and effect for flour packages.

There never has been any demand for the metric system in this country that has not been confined to a few professional high-brows in public offices or colleges. Business in this country has taxes enough to carry now without loading it down with the increasing expense of junking all its weighing and measuring machines and buying new.

THE DAIRY OUTLOOK

THE dairy interest, like the beef cattle and hog industries, is suffering from the Jeremiads of the inefficient rather than from any discernible weakness of the industry itself. *Hoard's Dairyman*, one of the sanest and most dependable of authorities, is distinctly optimistic of the future, but of course *Hoard's* opinion is predicated upon intelligent dairying, to which it caters, not the slapstick methods of the in-and-outers who almost invariably lose money and do the calamity howling. Prices are good now and are not likely to recede much for sometime to come because the export outlet for both milk and products is good and as the *National Stockman and Farmer* says "will be large for some time to come, especially for condensed milk." More than likely some decline will come in time, but when the foreign demand does decline as the *Stockman* expects it will there will be new home demand enough to keep the price of milk at a profitable level. The consumption of milk can be measured by proper publicity. As a substitute for beer alone the possibilities are enormous if taken advantage of in a forceful and intelligent way. Now, says the *Stockman*, is the time for dairymen to plan for future events in this industry. If the decline reasonably to be expected in prices doesn't happen, nobody will be hurt; if it does come, all hands will be hurt less by being prepared for it than if they wait until confronted by conditions for which they are not prepared.

DEALERS' ADVERTISING

FEW country grain dealers advertise. The presumptive reason: "Everyone knows where I am and what I am doing—why spend money in that way?" The world's great retail stores are all located by the people and what they are doing is equally as well known. But they are the greatest of all advertisers. Why? Because, as we tried to show in these columns a few weeks ago, advertising creates demand.

The best advertisers among country dealers now coming to our notice are the farmers' companies. They are handling pretty much everything of a bulk

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in de "The Price Current-Grain Reporter," these figures senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Nov. 1.	Oct. 25.	Nov
Wheat—

nature that their stockholders want or nee many are advertising for trade and getting it. profits on side lines reduce the overhead, and where the manager is a good business man makes every part of his business pay its wa return all profits in dividends a reduction of head may be reflected in a non-competitive pri grain bought.

But the main thing is that the handling o lines is a distinct service, just as the great d ment store gives service (by concentrating go save the buyer time and travel) rather than r prices. Farmers are human; and the major them appreciate the value to them of real servi esteem it as highly as they do a fraction of per bushel on grain. Indeed the effect of goo vice to hold an uncomplaining patronage is more abiding than a petty addition to the niggardly paid for the grain, if that is all.

EDITORIALETTES

THE car scarcity and the permit system con constitute a trade feature of enormous tance. The situation is likely to grow instead of better. Don't forget it for a momen

THOSE who could have laid in their suppl feeds when the going was good may regret it but there's no use crying about it now. Get and do the best under the circumstances.

NEW carload minimums are coming, with the trouble with the sampling of overloaded grain Do your loading as carefully as possible to pockets and so lessen the risk of changes of on reinspection.

THE main objection to the Cummins railroa is that it does too much. It would make cont cumbersome that the whole system might conce break down under the weight of a Transport Board and a Commerce Commission also. The merce Commission would suffice if the Exe could be induced to appoint fewer political dead to its seats and more practical men.

RAIN TRADE REVIEW

orn market is out of the rut lding within narrow limits for ix weeks. The advance was getting under way and many ulls sold out on the first small . The short interest was much han the trade in general be- and the rise was very rapid e market got under way. The was not surprising in view of inued wet weather, scarcity of d limited storage room and ountry offerings. The cash s been inclined to lead the ad- with industries free buyers of and new corn. After a break earlier in the season, a reac- arge proportions was to be ex- nd sentiment now is as radi- lish as it was bearish a short o.

appears to be little hope of any increase in the movement e country for some time to ars are very scarce, available t having been rushed into the t to take care of wheat which piled on the ground. It is believed that it will be at weeks before this equipment available in volume to move rmits are being issued as rap- pplied for, but cars are not nished; so that shippers are if any better off with permits are without. At the same permit system tends to check to arrive. The country is not nxious to sell, although the tures brought the price up to here $1.25 might be paid at ading points. Wet and rather ther has caused husking to be w in some sections in the lt. Much depends on weather from now on.

he Peace Treaty is ratified it d that large commercial cred- e granted to European coun- that considerable grain will Very few people in the trade orn to be bought, however, ine prices are much lower in this country, but the de- e will probably be for hog meats and lard, and this should affect corn.

The dockworkers' strike at New York, which has been a great drawback to general business in cash grain of late, is regarded now as broken, and a better demand, especially for oats, is expected to develop shortly. About 600 vessels were reported tied up at New York, and should they take out the grain cargoes forecasted a heavy reduction in stocks of wheat, oats, rye and barley might result. This would permit shipments from the West to move to the East and provide some much-needed storage room in the Central West and Southwest.

There is no great surplus of wheat in the world as shown by the report from the International Institute of Agriculture at Rome which indicated that the crop this season was considerably short of the five-year pre-war average. The amount of good quality spring wheat in the United States is relatively small, as shown by the high prices being paid for it, as high as 62c over the basic being secured for dark No. 1 Northern at Chicago. Winters have also firmed up considerably. The demand for flour is fair with some mills sold up to the 60-day limit allowed under the regulations. Bran and mills feeds have declined somewhat of late, but there is a fairly good demand. There is some shortage in cottonseed meal and also in linseed meal. Both of these are selling at much higher prices than last year.

The condition of winter wheat is excellent in practically all sections of the belt. Seeding delayed by rains is still under way in some parts of the Southwest, and while there has been considerable rain in some sections the land has in most instances dried out rapidly. Streams are over their banks in parts of Illinois, Missouri and Indiana, and sections of Texas have had more rain than for some years. A little damage to corn has probably resulted, and gathering of the crop has been slow as farmers could not enter the fields.

Oats continue in a rut, although prices are higher, mainly in sympathy with corn. There has been nothing to cause independent action. The visible supply showed a moderate increase the past week, but a rapid reduction is expected as soon as port conditions at New York become normal, as there are large quantities of grain sold for shipment that have been tied up as the result of the dock strike. A marked change in conditions in Europe is reported, and a much better demand prevails there, with prices somewhat higher. The European crop was very short, and if the cables regarding the losses of potatoes are correct more grains may have to be taken. Reports have been circulated that large credits have been granted to Germany by Holland, but they lack confirmation. Part of the $250,000,000 loan to Great Britain will be spent in this country for cotton, grain, etc.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2. 1918.
Wheat	9,485,000	10,568,000	11,457,000
Corn	2,799,000	3,206,000	4,117,000
Oats	4,982,000	4,859,000	6,565,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	17,266,000	22,139,000
Preceding week	18,633,000	26,667,000
Since July 1	367,125,000	451,805,000

Corn prices advanced into new high ground on the present upturn the past week as the result of heavy covering by shorts and also an increase in the outside buying. Offerings became lighter as prices advanced and the close was at the top with net gains of 4@5⅜c, the latter on December, which finished at 4⅜c over the May, against 1¾c over at the close on Tuesday. The holdings of December by cash houses combined with the relatively small receipts and light country offerings tended to tighten the December. Prices are now materially higher than a year ago. The producer has been dissatisfied with the price offered for grain and has been holding tightly. Industries were free buyers of cash corn.

Oats prices held within relatively narrow limits, but closed at the top with net gains of ⅞@1⅛c, the latter on the May. December feels the pressure of light weight No. 3 whites which were delivered on September contracts and have not been sold as the demand for this class of grain is slow. Seaboard demand has been slow, but the domestic call fairly active with rather liberal quantities taken almost daily. Country offerings light.

Cash wheat prices have been firming up under the combined influence of small receipts and a good demand from mills. Springs are selling around the best prices of the season for the choice grain of which there is a small supply. As yet the Grain Corporation remains out of the market owing to congestion at the seaboard. Mills have little trouble in disposing of their output. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2, 1918.
Dec.	$1.31½	$1.25⅝	$1.31¼	$1.25⅞	$1.13⅛
May	1.27	1.22¾	1.26⅞	1.22⅞	.....
Oats—					
Dec.	.72⅛	.70⅝	.72⅛	.71¼	.67¾
May	.75⅛	.73⅝	.75⅛	.74	.....

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the Geo. Broomhall service and forwarded to this paper:

	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2, 1918.
American	295,000	156,000	2,644,000
Argentine	451,000	934,000	1,221,000
Total	746,000	1,090,000	3,865,000

Exports of oats since Aug. 1, 1919, and comparison for three years:

	1919-20.	1918-19.	1917-18.
American	17,465,000	33,457,000	42,096,000
Argentine	6,888,000	12,161,000	1,766,000
Total	24,353,000	45,618,000	43,862,000
Season	.....	113,272,000	140,826,000

Wheat Stocks and Consumption.

Statement of the movement of wheat, and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Nov. 1	243,668,000	263,440,000	90,633,000
P. shipments to Nov 1.	104,851,000	105,248,000	43,817,000
P. stocks on Nov. 1	56,914,000	91,931,000	4,707,000
P. consumpt'n to Nov. 1.	84,845,000	66,487,000	46,398,000

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Nov 1, 1919 (000 omitted):

The Pacific Coast export hay trade is reported light, due to the stevedores' strike.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Nov. 1, 1919, with comparisons with 1918:

	1919-20	1918-19.
Chicago	60,294,000	55,542,000
Milwaukee	4,003,000	8,691,000
Minneapolis	52,402,000	57,472,000
Duluth	6,757,000	43,899,000
St. Louis	30,604,000	30,380,000
Toledo	6,063,000	3,871,000
Detroit	1,085,000	803,000
Kansas City	48,471,000	42,053,000
Peoria	2,023,000	2,892,000
Omaha	15,962,000	12,087,000
Indianapolis	6,004,000	5,850,000
Total	233,668,000	263,540,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2 1918.
St. Louis	1,021,000	1,136,000	562,000
Kansas City	1,335,000	1,046,000	1,375,000
Omaha	555,000	659,000	552,000
Toledo	220,000	163,000	136,000
Detroit	42,000	68,000	38,000
Indianapolis	104,000	122,000	102,000
Peoria	34,000	50,000	33,000
Chicago	1,042,000	1,410,000	1,896,000
Milwaukee	259,000	280,000	609,000
Minneapolis	4,026,000	4,708,000	1,367,000
Duluth	847,000	926,000	4,787,000
Total	9,485,000	10,568,000	11,457,000
Shipments	4,636,000	5,951,000	5,512,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Nov. 1, 1919.	Oct 25, 1919.	Nov. 2. 1918.
American	4,200,000	5,033,000	5,053,000

O GRAIN DEALERS MEET

leeting at Columbus Well Attended—t Explosions Discussed—Report on raffic Matters—What Is Doing With New Corn.

Reported by J. C. STRONG.

regular fall meeting of the Ohio Dealers' Ass'n was held at Cos on Friday, Oct. 31. The day ainy but it did not dampen the of the dealers in attendance. leeting was opened by the singing merica," Fred Mayer of Toledo g.

. Cook read Bulletin No. 15 as by H. D. Irwin, zone manager U. S. Grain Corporation, regardain dust explosions, which called on to the illustrated lectures beven by Dr. H. H. Brown of the Dept. of Agriculture on dust exis under the auspices of the U. S. Corporation. Mr. Irwin stated in cular that the Grain Corporation coöperate with the National of Underwriters when it found ons in plants that might lead to xplosions.

Brown was introduced and spoke t as follows:

ke pleasure in bringing to you essage on measures to be taken ent fires and dust explosions in nd elevators. Since the war we ad a great deal of trouble with ons. Between March, 1916, and , 1917, twenty months, dust exs destroyed four of the largest nd cereal plants in the United and Canada, killing 24 people, g 36, and destroying $6,000,000 of foodstuffs and buildings. ctober, 1917, through the period ve were at war there was not osion because care was taken by s to prevent destruction of prop- We feel that it was due to the tion employes had on care and ance of plants that prevented isastrous results. In fact, the ion from explosions was 40 per s than normal and fires 30 per s, but from May, 1919, to Sep- 1919, there were five serious ns. Two explosions occurred o-called fireproof plants but enly a small fire loss. However, constructed plants are not losion proof. To have explo- e must have dust and air in on and a spark to set it off. st will be set off by static elecsome from a lighted match or l cigar. A carbon electric lamp heats sufficiently to ignite the d cause an explosion.

id of carbon lamps and open n your elevators. Use a vaporobe around your electric light. get rid of the dust is the thing. levator will be equipped some no dust gets out around into t and a suction fan will be innd so piped as to carry of light t floats around when there is f grain. So long as there is suspension there is danger of t. Dust is just as dangerous losive as the gasses. Grain losions move at the rate of 9,r feet per second and coal dust s over 6,000 linear feet per Coal dust explosions exert a of 10 pounds to the square cereal dust 16 pounds to the ch, so you can see how dangrain dust is. You elevator for dust on the basis of grain rought into your elevator. The o sends you his grain ought r the dust that is taken out. rs do exist through which you without a duster and your hes and come out and hardly hing. There is hardly enough nd the plant in which to write e. Whenever there is dust liability of explosions. The xplosions in concrete houses d out more prominently than ouses is due to the fact that sions in the old wood house ally reported as fires, but in fireproof elevator after the damage has been done by the explosion, the plant does not burn.

Ventilation in an elevator by windows does not help, but suction fans are a great help. In an old country elevator I would put in dust collectors, vent the bins to the outside, have the house cleaned at all times and do away with old lanterns and use an electric flashlight which is safe. It is well to put a pipe to the elevator boot and suck out as much dust as possible.

In concluding his remarks, Dr. Brown called attention to the moving pictures which were being shown on the screen of some of the plants that had recently been destroyed by a dust explosion, also illustrating some of the experiments conducted by the laboratory, the effect and action of dust with open flames and electric sparks.

COMMITTEES.

Pres. Cook announced the appointment of the following committees since the annual meeeting at Cleveland, which are as follows:

Arbitration.—J. H. Motz, Brice; M. A. Silver, West Jefferson; E. W. Scott, Columbus.

Legislative.—Charles E. Groce, Circleville; C. K. Patterson, Piketon, E. C. Eikenberry, Camden.

Membership.—S. L. Rice, Metamora; F. O. Diver, Middletown; R. W. Graham, Liberty Center; Geo. E. Stephenson, Rosewood, A. R. Morse, Tiro; H. L. Frisinger, Rockford, J. Y. Stimmel, Payne.

Board of Agriculture, Ohio Agriculture Experiment Station, Ohio State University.—C. M. Eikenberry, Hamilton; C. O. Barnthouse, Agosta; A. M. Daugherty, Derby; Philip Horn, Monroeville; W. M. Latham, Hayden; R. W. Lenox, Richwood, A. V. McClure, Eldorado.

Traffic.—H. L. Goemann, Mansfield; W. T. Palmer, Celina; F. E. Barker, Hamilton.

IN MEMORIAM.

Pres. Cook presented the following resolution on the death of Earl C. Bear, former president, which was adopted by a standing vote, the members remaining silent for one minute.

Whereas, The Supreme Ruler of the Universe in His infinite wisdom has seen fit to remove from among us one of our esteemed and worthy members, Earl C. Bear; and,

Whereas, The long and intimate relation held with him as a member and officer of this Association makes it eminently befitting that we make record of our love and appreciation of him; therefore, be it

Resolved, That the wisdom and ability he has exercised in the aid of our Association by his counsel and service will be held in grateful remembrance;

Resolved, That the removal of such a life from among our midst nof only leaves a vacancy and a shadow that will be deeply realized by all members of this Association, but will prove a serious loss to his neighbors and many friends as well;

Resolved, That as we extend deep sympathy to the bereaved relatives of the deceased, we are expressing our hope that we receive reconciliation of this loss to us all in the thought, that the giving and taking of life emanates only from the hand of Him who doeth all things well; and, be it further

Resolved, That a copy of these resolutions be spread upon the records of our Association, and also a copy be forwarded to the bereaved family.

"Life's race well run,
Life's work well done,
Life's crown well won.
Now comes rest."

TRADE ACCEPTANCES.

Mr. Bennett of Grafton gave a talk on trade acceptances. At the last meeting of the Association, Mr. Bennett gave a most interesting talk on the use of trade acceptances in the business of the country elevator man, and his report this time further emphasized the advantages to be gained by doing away with book accounts and asking the customers of the plant to sign a trade acceptance, acknowledging receipt of the goods bought and a promise to pay at some future date, either in 30, 60 and not to exceed 90 days, and told how when the acceptance became due the bank handled it exactly as the check would be handled. He told how the elevator man could handle a large amount of business without impairing his credit by the use of trade acceptances as they were liquid assets while open book accounts were an unknown quantity on which loans could not be made.

E. C. Eikenberry thought this form of paper would increase the inflation of our currency.

L. W. Dewey: It is a question whether we carry our accounts in a negotiable form or on our books and how it will effect our business and benefit our community. I think we owe the Federal Reserve Bank a great deal of credit for advocating the trade acceptance.

Afternoon Session.

H. L. Goemann, chairman of the traffic committee, made his report. He said he thought that the transportation problems of the country should be covered by the Interstate Commerce Commission which should consist of ten men of very high standard. He said that it had been proposed to establish another committee and that the Chamber of Commerce of the United States had taken a vote of the Chambers of Commerce of the country on the establishment of a traffic board in addition to the Interstate Commerce Commission and the result was unfavorable for the establishment of such a board, the consensus of opinion being that the Interstate Commerce Commission could better handle such problems and that their power should be enlarged. To support his position, he submitted the following resolution which was adopted:

Whereas, There has been submitted to the president of the Ohio Grain Dealers' Association a communication from the Cooperative Committee on Railway Legislation regarding the enactment by Congress of comprehensive railroad legislation; and,

Whereas, Said committee favors the creation of a Transportation Board who are to certify to the Interstate Commerce Commission the following principles:

1. A Transportation Board to (a) determine and require provision of adequate transportation in the effective co-ordination of rail, water and highway facilities; (b) to determine the financial requirements of the carriers; (c) to certify revenue required; (d) to regulate wages and conditions of labor; (e) to exercise final authority over consolidations and security issues.

2. The certificate of the Transportation Board to be mandatory upon the Interstate Commerce Commission as to amount of revenue to be produced.

3. Authority for the Interstate Commerce Commission to regulate maximum as well as minimum rates, with jurisdiction over all rates of instrumentalities of interstate commerce.

4. Revision of the traffic provisions of the Interstate Commerce Act so as to adapt them to present conditions, with care to avoid unnecessary disturbance of established commercial relations.

5. Statutory requirement of rates adequate for necessary expenses and such return on capital invested, considering average conditions, as will provide a proper credit basis for needed improvements and extensions.

6. Legislation designed to promote consolidation into strong competing systems.

7. Early provision for improved service which the Transportation Board may deem essential in the public interest, to be attained through such moderate increase in revenue as will enable the stronger roads to accumulate a surplus, part to be advanced to weaker lines under conditions determined by the Transportation Board for improving facilities and service, and an adequate part to be retained by the road that earns the income as an incentive to economy, efficiency and enterprise.

8. Legislation to require that railroad companies and their employes adjust differences without interruption of service.

Whereas, This Association is not in sympathy with creating an additional board to be known as Transportation Board; therefore, be it

Resolved, That it is the sense of this Association that, instead of the establishment of this additional Federal Board, the powers and functions of the Interstate Commerce Commission be enlarged and strengthened and surrounded with such safeguards as is for the best welfare of the public.

JAS C. JEFFREY ENDORSED.

Mr. Goemann told of the vacancy now existing on the Interstate Commerce Commission and wanted the association to go on record as recommending someone to fill the vacancy and presented the following resolution which was unanimously adopted:

Whereas, Mr. James C. Jeffrey has been recommended for the vacancy now existing on the Interstate Commerce Commission and knowing that he is fully qualified to acceptably discharge the duties of Commissioner, therefore, be it

Resolved, That the Ohio Grain Dealers' Association endorse his nomination and appointment to membership to the Interstate Commerce Commission and that a copy of this resolution be submitted to the President of the United States.

ARBITRATION FEES.

Sec'y McCord in talking about the arbitration cases that came before the Association said that a large number of cases that were submitted involved a very small amount and such cases should be settled without coming before the committee unless some vital principle was involved and he recommended that the fee for arbitration before the State Association be increased from $10 to $20, which was carried.

CAR CONDITION REPORTS AT PHILADELPHIA.

Pres. Cook read the following resolution on the failure of the Philadelphia Grain Exchange to issue car condition reports, which was unanimously adopted:

Whereas, Quite a number of complaints have been registered by grain shippers against the Philadelphia Grain Exchange on account of its failure to provide for and issue an adequate car-condition report on grain shipments to that market similar to those issued by grain exchanges in New York, Baltimore and other markets, and,

Whereas, In lieu of such a report, when a car of grain arrives at that market and there has been leakage or loss of seal, the shipper receives only a simple notation to that effect, and much time is consumed in asking for and receiving the detailed information regarding the condition of such cars, so necessary in filing claims; therefore, be it

Resolved, That it is the sense of this Association that the Philadelphia Grain Exchange should, without delay, create, adopt and put into service a car-report form such as is used by other grain exchanges.

WAR TAX ON TRANSPORTATION.

Col. Groce of Circleville spoke on the war tax to be imposed on shipments of grain to Seaboard for export, and that it was intended a tax of $3.00 a car would be retroactive on all shipments; and he urged that some bill be presented Congress. His motion was amended and it was left to the executive committee to endorse the resolution as presented to the Grain Dealers' National Association at St. Louis on war tax on transportation, which was as follows:

Whereas, The Treasury Department through the Collector of Internal Revenue, has recently issued ruling known as T. D. No. 2889 prescribing certain requirements which must be fulfilled to secure exemption from war tax on transportation on the inland movement of export traffic, including grain, from point of shipment to port of export, which requirement cannot be complied with by the grain trade due to the existing and customary methods of marketing and handling grain at the export markets; and,

Whereas, The export grain markets have jointly conferred with the Collector of Internal Revenue at Washington, and proposed certain modifications which would give the desired relief; and,

Whereas, The Collector of Internal Revenue after giving careful consideration to the proposals of the export grain markets has replied at great length, giving legal reasons why he cannot grant the modification asked for, due to the existing interpretations of the Revenue Act and the Constitutional Exemption covering tax on exports; therefore, be it

Resolved, That inasmuch as the tax assessed will be borne by the producers of the grain who are represented by this Association the Legislative Committee be instructed to proceed toward securing the passage of an amendment to the Revenue Act that will exempt from Transportation Tax the inland movement of grain from the shipping point from which it is consigned on the bill of lading to any export elevator and concerning which declaration is made on the bill of lading by the shipper that the grain is for export; such amendment to further provide that the exemption so obtained shall not in any manner be precluded by the necessary suspended movement, sale, temporary storage or grading necessary in conformity with the U. S. Grain Standards Act at the point of export before final delivery to the vessel.

CORN CONDITIONS.

The meeting then resolved itself into a round table discusssion on corn conditions, many dealers giving their views as follows:

Philip Horn, Monroeville: We have taken in about 3,500 bushels of new corn, averaging 71 pounds to the bushel. The average moisture content is 23 per cent which we dried down to 14 per cent with a shrinkage of 513 bushels. We are paying $1.35 per 100 to the farmer.

Mr. McDonald, Washington C. H.; We have taken in 5,000 bushels new corn, quality was fine up to the time of the rains and the moisture two weeks ago was lower than at present. At that

time it averaged 23 to 27% while it is now running from 25 to 29%. We are paying $1.00 for 70 pounds of corn in the ear and drying it down to 15 and 15½%.

ASHEVILLE GRAIN CO.: We have taken in 1,500 bushels and put it in cribs. The moisture runs from 23 to 28%. We are trying to stay away from new corn.

H. G. POLLOCK, Middlepoint: We have had a very dry season in our section and better than the average crop of corn, of better quality than for the last five years. There is only one drier in our country and we have no report from them. Corn looks about 26 to 27%. Lots of it damper and more moisture than two weeks ago. If we have two weeks more of this wet weather it will not be safe to ship the corn. It is selling freely and we are paying from $1.25 to $1.40 per 100. Farmers will be free sellers on account of hogs getting down to 10c. If hog prices advance more corn will be fed.

Col. GROCE: We have tested some corn which was 23% and some has tested as high as 29%.

Mr. CLARK, Mt. Sterling: Corn tested about 23 to 25% before the rains. Now it is 2 to 3% more. We have a fine, well matured crop if the rains only stop. We have not shipped any and are paying $1.00 for 70 lbs.

E. T. CUSTENBORDER, Sidney: Shelby County has the best crop of corn in several years. The rains, however, have played some havoc. We have not shipped any. Farmers are willing to sell at $1.40 per 100 lbs.

Mr. CHENOWETH, London: We are not taking in corn. It has tested 25%. Weather too wet.

J. H. MOTZ, Brice: We have not taken on any corn.

Mr. TEEGARDEN: We are trying to stay away from corn and are not taking in any.

E. T. CUSTENBORDER: At our local meeting last year we passed a resolution to pay 5c difference between yellow and mixed corn, but the dealers did not stick to it and they have paid the same price for either. This year we passed a resolution to pay 3c difference in price and intend to live up to it. We should not pay the same price for good yellow corn as we do for mixed as the yellow is worth more. We should refuse to buy the mixed corn.

Mr. POLLOCK: Years ago in Van Wert County we made a difference of 5c between yellow and mixed and stuck to it. Now there is practically no mixed corn coming to our elevators due to our educational propaganda.

Mr. HORN wanted to know if the dealers paid the same for machine husked corn as for hand husked, and it was stated that the same price was paid.

Mr. BARNTHOUSE, Agosta: We have only taken in 500 bushels of new corn which has run from 18 to 19% moisture.

F. E. WATKINS, Cleveland: We should not encourage the growing of mixed corn by buying it, but should do everything possible to get it eliminated.

W. D. RAPP, Sabina: We started out with a good crop, reasonably dry, but the rains are starting to do some damage.

E. T. CUSTENBORDER: Many of the elevator men have farms, and by taking care and pains in the selection of seed corn could add half to the yield of corn in this country. There is no reason why two ears of corn eight inches long and weighing about 12 ounces could not be raised to each hill which will make 75 bushels of corn to the acre. It takes better farming and land to produce large ears.

CORN SHOW TROPHY.

Mr. Parks of the University of Ohio Agricultural College was presented and called attention to the Farmers' Week in January, when there would be a corn show. He said that a premium will be put on corn that is sound and thoroughly matured and results of the men's Ten-Acre Corn Contest to produce largest yield from 10 acres would be submitted, for if a large yield can be produced on 10 acres, it can be produced on 40 or 100 acres. Several men in the contest have produced over 100 bushels on these 10-acre plots. The judging will be on the following basis: 40 points on the cost, 40 points on the yield and 20 points on the rest. The Ohio dealers might be interested in putting up some prize or trophy at the State Grain Show to induce better production of good corn and encourage better methods of farming.

H. C. DEHRING: We should try to grow corn with a deep kernel and small cobs. By producing corn with lots of cob, you do not produce so much corn.

Sec'y McCord moved that the Association offer a trophy to be used as a premium at the Corn Show for 1920, which was duly carried.

The meeting then adjourned.

CAR FAMINE IN COLORADO.

By Geo. A. Flannigan,
Sec'y. Public Utilities Commission.

Wheat estimated as running into the millions of bushels is threatened with serious damage, and in many instances with total loss, as a result of a famine of grain cars in eastern Colorado. Piles of grain ranging in size from a few hundred to fifteen thousand bushels dot every farm in the wheat belt, while other thousands of bushels are held in open bins, all exposed to the action of the weather, with consequent deterioration and loss to the owners. Every elevator is filled to capacity. In many of the towns motor trucks and wagons, loaded with grain, stand for days at a time waiting their turn at the elevators. On the farms every conceivable facility is used to protect the wheat, the living quarters of the family frequently being restricted in order to create additional storage room. At the present rate cars are being furnished

2,000 BUSHELS WHEAT PILED ON GROUND, PEETZ, COLO.

it is estimated it will take three years to move the record crop of wheat in Colorado grown in 1919.

The most serious conditions are in the country around Haxtun, in the extreme northeastern part of Colorado. There, it is estimated, not less than a million bushels of wheat are piled up in the field. Similar conditions prevail along other lines of the Burlington Railroad north of the Wyoming and east to the Nebraska lines, and on the Rock Island east to the Kansas line. Fifty and sixty-mile drives overland are not infrequent when farmers hear that cars may be available on some railroads other than the one to which they naturally haul their grain. When they arrive at their destinations they usually find a situation similar to that in their own community.

The situation has grown more serious with the appoach of winter weather, despite repeated appeals to the Railroad Administration at Washington and Chicago sent by the Colorado Public Utilities Commission, local commercial organizations and individual growers and buyers.

The car shortage in Nebraska is reported as growing steadily worse and shipment of wheat and potatoes are being seriously delayed. The Railway Commission is taking steps to relieve the situation.

HOW CANADIAN WHEAT BOARD CONTROLS THE GRAIN TRADE.

By C. H. BROOKS.

The Canadian Wheat Board, which was recently established, has commenced its work. Much concern has been expressed within certain quarters of the grain trade over the possibility of the future control of exports of grain from Canada. Without discussing the problems of future years at any length, the question of the need of such an organization as the Canadian Wheat Board in Canada during the present crop season may be very opportunely and pertinently examined at the present time.

TEN THOUSAND BUSHELS OF THRESHED WHEAT

On the ground and in open bins, near Haxtun, Colo. It is estimated that the nearly a million bushels of wheat exposed to the action of the weather in the tory surrounding Haxtun, due to lack of storage facilities in a new agric country and the inability of farmers to get sufficient cars to ship their wheat photograph was taken early in October; situation unchanged October 20, 1919.

During the last two years of the war the movement of grain from Canada to Europe was conducted under the direction of the Royal Wheat Commission which sat, in London. Through the pressure of the demands of war, Canada, so far as her export trade in grain was concerned, assumed the position of a contributing colonial possession of Great Britain. That relationship has ceased to exist. The place of the Wheat Export Company, which was the Canadian outpost of the Royal Wheat Commission, has been taken by the Canadian Wheat Board, and the old manager of the former organization is now the chairman of a thoroughly Canadian institution.

WHEAT PILED ON GROUND AT PEETZ, COLO.

The work of the Canadian Wheat Board has been very simply ou It must sell the Canadian wheat of 1919 at a price which will bri greatest possible benefit to the D ion as a whole. This means tha Canadian Wheat Board will sell t portable surplus of the crop to th ernment purchasers of the cont countries overseas at the highest that it is possible to get. In words, this Board, as the adminis of the Dominion's greatest ma asset of the present year, will ac truly national capacity.

Closely affiliated with the grain is the milling industry. Durin war, the Canadian millers were a increase their export trade from thing under four million barrels to nearly eleven million barrels a This remarkable increase was a panied by a very material ga profits. One of the main reaso the growth in flour exports duri past five years was the fact tha question of cost had no place in th eral scheme of war. There wa submarine danger at sea and th raid menace on land, and there wa the exhaustive demand upon Briti dustry for men to serve in the tre During the war, the main conside of the Allies in Europe was to ge plies of men and food in sufficient tities to bring about final victor the enemy. In the rush of the w British miller, for one, was no sidered. Flour was wanted and be supplied from every available s

But the end of the war has br to Great Britain as well as to t tions of the continent the desire habilitate industry, and the Eu miller hastens to resume the po which he held before the war. As sequence of this, the demand fro rope has been for grain rather for flour. The Canadian Wheat is obliged to obey this demand, a doing so has been obliged to re strong and persistent effort o part of the millers to gain poss which would enable them to co their increased export trade, ever involved a sacrifice of the wide more representative Canadian in of producers and consumers. Canadian Wheat Board also has resist demands on the part of

aders for increased charges in the siness of handling grain. The exist- machinery of the grain trade is be- employed, as far as possible, by the nadian Wheat Board, but with the derstanding that such employment ll be paid for at the same rate that would cost the Board to do the same siness.

An important result of the operation the Wheat Board is that the Cana- n Trade Mission, established in ndon last November, can no longer ndertake contracts for the selling of nadian wheat. The Canadian Trade ission in relationship to the handling the Canadian wheat crop is simply agent of the Canadian Wheat Board. Canadian Trade Mission in Lon- , as shown by recent returns in the use of Commons at Ottawa, has rely assumed the role of a promoter nanufactured goods from Canada in at Britain and the countries of Eu- e. Wheat and other foodstuffs have n used by the Trade Mission in Lon- as a means of inducing needy peo- in Europe to purchase Canadian ufactures as well as Canadian food. r $100,000,000 of Canadian credits e already been extended to European tries by the Canadian Trade Mis- in London for the purpose of ncing exports from this country. erally speaking, the basis upon h the Trade Mission has arranged e Canadian credits has been to de- a proportion of three-fifths to ufactured goods, one-fifth to food ufactured goods, one-fifth to food ufacturing purposes. In some even the proportion of one-fifth not been given to foodstuffs. In the of Roumania, which received a t of $25,000,000, only some $662,- has represented foodstuffs, all of amount having been spent for t. The balance of the credit of 00,000 given to Roumania has been in financing contracts for manu- red goods. With the appointment he Canadian Wheat Board, the e Mission in London, if it sells any t at all, must take its instructions the offices of the Wheat Board in ipeg. Grain is now, as it always been, Canada's chief exportable odity. There is every reason, fore, for keeping the business of sing of her exportable surplus in under an organization which is ate and distinct from a body such e Trade Mission, whose character urpose are entirely connected with facturing industries, and not with trading.

placing of control of the grain in the hands of the Canadian t Board for this year promises to to the very best advantage of the al interests of Canada. This is proceeding along straight, utili- lines which should bring the st good to the greatest number ple. The producers of Canadian and the consumers of it repre- he greatest number of people in a. Whatever the Canadian Wheat may do to serve the interests of hese classes will be for the best sts of the whole country. Whether the present system of controlling ain trade will continue after the t crop season has ended remains seen. Evidence would suggest ne Canadian Wheat Board, in em- g the services of the grain trade as possible, regards its term of ice to be only one year.

ty of hay is reported from south- n Missouri, one producer stating p "could hardly be better." The crop was a good one and excel- asture was afforded by the stub- lds after the crop had been har-

The Letter Box

New Elevator Ready.

Price Current-Grain Reporter: I have just completed building an elevator.—*Joe Milburn, Glensted, Mo.*

Planning an Elevator.

Price Current-Grain Reporter: We are planning the erection of a grain elevator to cost $20,000 at Hemingford, Nebr., in the near future.—*C. O. Rosenberger, Alliance, Nebr.*

Need Cars for Grain.

Price Current-Grain Reporter: We think it of vital importance that we get cars for the movement of grain.

We expect to soon purchase a grain cleaner and an automatic scale.—*T. D. Guy Grain Co., Trail, Okla.*

Car Service Important.

Price Current-Grain Reporter: We think the car service situation is of vital importance, with ability to make shipments to the Seaboard.

We do not plan on any new buildings or installation of machinery.—*J. P. Burroughs & Son, Flint, Mich.*

Mills Must Have Wheat.

Price Current-Grain Reporter: We think it of vital importance that some way be devised to keep a steady supply of grain to the mills without having to call on elevator operators.

We expect to make some repairs next spring and will purchase a dust collector, elevator supplies, grain cleaner and an automatic scale.—*Wright Roller Mills, Dongola, Ill.*

Would Not Be Without.

Price Current-Grain Reporter: I am glad to advise you that we are getting your paper regularly under the name of the Guthrie Mill & Elevator, of which we are a subsidiary company. I assure you that I would not be without your paper when we have any chance to obtain it.—*Sun Grain & Feed Co., F. J. Olson, Mgr., Guthrie, Okla.*

"Boosting the Horse."

Price Current-Grain Reporter: The two days' convention now in progress to consider the question of horse vs. motor delivery traffic is exciting considerable interest, and at the banquet last evening (Oct. 29) there were more than 500 people present. Plans no doubt will be formulated that will give considerable impetus to this movement; and the writer is very anxious that all trade papers shall push the work along. —*L. W. Forbell & Co., New York.*

Seed Potatoes—New Construction.

Price Current-Grain Reporter: The L. J. Upton & Co., Inc., Harrisville, Mich (potato contractors), have shipped 54 cars of potatoes South for seed. They are still loading out cars. The potatoes are the Red Queens, the seed coming from Maine. The crop is extra good for the season.

C. B. Pyle, pea contractor, Harrisville, Mich., is repairing and enlarging his elevator, and expects to have a first-class elevator when finished.—*Baird & Upton, Harrisville, Mich.*

Feedstuffs—Bought Mill, Etc.

Price Current-Grain Reporter: We have not been following in the markets very close on feedstuffs on account of the recent purchase of the Reliance Milling Co.'s property and the taking over by us of their stock. We, however, look for a good market for feedstuffs in the near future, as there is very little oats and barley in this section for the farmers to grind. The corn crop is good here, as it is everywhere else.

In regard to the mill, we have removed all of the old machinery and have bought a short system mill of sixty barrels capacity. We expect to have this mill installed and running by the fifteenth of this month. The mill is now in transit.

We have also purchased an elevator at Watrousville and are installing some new machinery and building a new warehouse.—*Vassar Farmers' Elevator Co., by Charles Harpham, Vassar, Mich.*

New Elevator.

Price Current-Grain Reporter: The Farmers' Union has just completed a 30,000-bushel elevator at this place. The Farmers' Union of Pauckana and the Farmers' Union of Kadoka, S. D., are building a new elevator, and the Farmers' Union of Plankinton, S. D., has just completed an elevator. The White Lake Milling Co. of White Lake, S. D., has just remodeled its elevator. Our mill is also being remodeled and we expect to purchase and install a Cyclone Dust Collector.—*Kimball Roller Mills, Kimball, S. D.*

Hay and Crops in Northwest Indiana.

Price Current-Grain Reporter: There is no surplus clover or timothy hay in our territory. The surplus hay is prairie hay in these parts; 60 per cent of the crop has been moved and very little is in farmers' hands; what is there is mostly packing hay. We think the prices of all grades of hay low enough.

The corn crop is good, both as to yield and quality. There is a much lighter acreage of winter wheat sown than last year. The acreage of rye is about normal. The fall seeding looks well. No Hessian fly reported.

We are having lots of rain, but none too much. Corn husking on and a good quality of grain is going into cribs.—*James R. Guild & Co., Medaryville, Ind.*

Effect of Weather on Corn.

Price Current-Grain Reporter: The winter wheat has an excellent start; alfalfa and pastures about as good as can be.

With a rainfall of five inches during the week just past and a total of seven inches for October, Illinois has had a good wetting down that seemed to be really needed. In fact, this water has mostly gone into the ground; not many ponds were formed on the surface till the last day or so, and but few streams are out of their banks. Weather has been unseasonably warm most of October—some of the hardier flowers are still in bloom. Such weather has not been favorable for husking and curing the corn crop; in fact, it has put the farmer behind with his work and he will feel the necessity of gathering the new crop of corn to the exclusion of marketing any grain until this job is about done. The grower is simply not offering new corn for sale, and will not be in condition to sell or deliver new corn for some weeks yet. In fact, three fourths of the crop is yet out in the field and in worse shape for shipment than a fortnight ago on account of the warm, wet weather. One hears complaints of corn sprouting in the fields where it is down on the ground, which fortunately is not the case often. Many farmers would contract new corn at $1.25 per bushel, should it reach that figure.—*H. I. Baldwin & Co., Decatur, Ill.*

ARGENTINE WHEAT AND CORN.

"There is now very litte wrong with the crop prospects all around," says *The Times of Argentina*, Sept. 29, just in by mail, "and the market has dropped steadily owing to the general conviction that Argentina will have very heavy stocks to dispose of throughout 1920. Certainly we shall be carrying over 3,000,000 tons of wheat and maize into next year from the last crop even at the present high rate of shipment. All futures are therefore very weak, though spot linseed keeps steady, for there cannot be much more than 150,000 tons left in the country and most of this is already in exporters' hands. Thus, though futures are weak it is difficult to buy linseed.

"As regards wheat, a different state of affairs prevails, for there is too much spot stuff for the comfort of dealers, and shippers are not showing very much interest therein. There is also plenty of maize on offer, and the recent frosts seemed to bring it all into excellent shipping condition. It is only recently that the new crop maize has been in fit state to ship. The market in oats has ruled weak on good prospects of the growing crop, though there has been a bigger export enquiry for this cereal than for the others, as may be gathered by the number of steamers recently chartered to load oats during the next two or three months."

DUST EXPLOSIONS.

The campaign to eliminate dust explosions started by the Grain Corporation is being continued and meetings arranged for the benefit of millers and elevator men at which addresses and illustrations will be made will be held at the following places: Nov. 7, St. Louis; Nov. 8, Kansas City, Assembly Room of Grain Corporation, Elmherst Bldg.; Nov. 10, Cedar Rapids, Chamber of Commerce; Nov. 11, Chicago; afternoon meeting arranged by the Grain Corporation; Nov. 12, Milwaukee; Nov. 13, Minneapolis; Nov. 14, Duluth; Nov. 18-19, Omaha; the second meeting being at the Nebraska Farmers' Convention; Nov. 21, Fargo, at the Agricultural College. Where no hour or meeting place is announced details will be arranged by local representatives of the Grain Corporation.

CANADA'S CROPS, 1919.

The Dominion Bureau of Statistics has estimated the yield (preliminary, Aug. 31) of Canadian crops for 1919 as follows:

	Acres		Yield, bus.	
	1918.	1919.	1918.	1919.
Winter wheat	416,615	797,750	7,942,800	22,875,800
Spring wheat	16,937,287	16,484,820	181,132,550	181,874,000
Oats	14,790,336	14,754,150	426,312,500	388,380,000
Barley	3,153,711	3,017,920	77,287,240	67,542,000
Rye	555,294	565,275	8,504,400	8,297,500
Flax	1,068,120	1,069,330	6,055,200	7,368,000

COMPARATIVE MONTHLY AND YEARLY EXPORTS OF WHEAT.

The following table, compiled by THE PRICE CURRENT-GRAIN REPORTER, from Treasury Department statements, shows the monthly and yearly exports of wheat, including flour, from the United States, and the yearly exports for Atlantic and Pacific ports separately, for the years indicated:

	1919-20.	1918-19.	1917-18.	1916-17.	1915-16.	1914-15.	1913-14.
July	13,624,000	10,951,000	8,429,000	10,583,000	11,649,000	30,174,000	12,967,000
August	20,310,000	15,496,000	9,739,000	14,919,000	20,439,000	27,618,000	28,348,000
September	24,816,000	28,347,000	7,182,000	18,160,000	26,301,000	31,436,000	17,513,000
October		24,441,000	11,418,000	16,131,000	23,769,000	25,664,000	13,111,000
November		21,989,000	10,615,000	19,006,000	19,264,000	25,897,000	9,617,000
December		33,539,000	15,315,000	18,689,000	20,416,000	37,122,000	10,620,000
January		22,103,000	12,442,000	24,003,000	20,872,000	32,027,000	9,705,000

Crop Reports

Compiled by GEO. A. WELLS

The views expressed in the general reports published below by dealers in many localities throughout the corn belt indicate that farmers will not be free sellers of corn at present values. It is possible, however, that this expression is inspired by the feeling of dissatisfaction among farmers regarding the decline in the prices of corn and hogs and that if the lower price level would seem to be established farmers will adjust their views accordingly. It is reported that the farmers in some sections, particularly in Iowa, are disposed to contract corn with the dealers. There will be undoubtedly as much corn offered for shipment as there will be cars provided for under the existing conditions of car shortage and the cumbersome methods involved in the individual permit system.

The weather during the month of October has been unusual on account of rainfall which was needed in many localities, the soil condition now being favorable for the fall crops.

The reports and compilations given below are based on conditions existing October 28-30 and any changes in climatic conditions since those dates should be taken into consideration.

SOIL CONDITION.—The soil condition is reported largely "favorable" in all of the surplus states, except that portions of Ohio, Indiana, Illinois and Missouri are reported as "too wet" and portions in Kansas "too dry." On the whole the soil condition is good for the germination and growth of winter wheat and fall pasturage.

WINTER WHEAT.—Basing the Government term normal at 100, the comparative percentage of the growth condition of winter wheat as reported by our correspondents is as follows: Ohio, 94; Indiana, 93; Illinois, 94; Missouri, 81; Nebraska, 88; Kansas, 78 and Oklahoma, 90.

The comparative percentage of the acreage sown this fall with last fall based at 100 is now reported as follows: Ohio, 87; Indiana, 72; Illinois, 71; Missouri, 58; Nebraska, 74 and Kansas, 67. The flat average of the above reports is 72 as compared with the flat average of 70 indicated in our reports of October 2.

FALL PLOWING.—The percentage of the fall plowing that has now been done is reported as follows: Ohio, 51; Indiana, 54; Illinois, 71; Missouri, 58; Iowa, 74; Minnesota, 82; North Dakota, 87; South Dakota, 61; Nebraska, 82; Kansas, 81 and Oklahoma, 85.

FARM SURPLUS, WHEAT.—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold is reported as follows: Ohio, 76; Indiana, 81; Illinois, 88; Missouri, 85; Iowa, 84; Minnesota, 58; North Dakota, 63; South Dakota, 76; Nebraska, 67; Kansas, 63 and Oklahoma, 69. OATS.—Ohio, 67; Indiana, 67; Illinois, 53; Missouri, 77; Iowa, 59; Minnesota, 43; North Dakota, 74; South Dakota, 62; Nebraska, 64; Kansas, 67 and Oklahoma, 82.

General Reports.

The general reports given below as to the disposition of the farmers to sell new corn considering the present market values of corn and hogs and whether or not excessive speculation in farm lands by the farmers will force the selling of new corn to any extent are self-explanatory.

OHIO.

Agosta (5): Farmers are slow sellers of new corn although a little is beginning to move. Not much speculation in land here. Will have no affect on movement of grain.

Bryan (1): Farmers are not selling corn here as yet but think they will sell surplus only at present prices. Do not think farmers will be forced to sell corn immediately.

Eaton (2): Farmers are slow to sell corn. The speculation in farm lands will probably cause the farmers to sell corn during the winter.

Sidney (2): Farmers will sell new corn freely soon as dealers will take it. Recent heavy rains here will delay movement two weeks or more. Farmers have not been buying high priced lands. They are letting the "town" farmer have it.

Circleville (6): Farmers are free sellers of new corn. Majority farmers will market new corn to meet their obligation.

Blanchester (3): Would have been 100% corn crop but wet weather has delayed sowing of at least 20%. Still very wet.

Upper Sandusky (4): This county rarely ships away any corn, and will not this season. The crop is fine and high quality. There has been very little speculation in land here.

Springfield (2): Farmers not selling or at present prices will not do so. Farmers in this locality have to sell to meet obligations.

Greenville (2): With decline in hogs believe farmers will be disposed to sell more corn but do not believe will have what would be considered free movement.

Bucyrus (4): Farmers in this county do not sell any corn at all. There is a great deal of corn shipped into this county for consumption. The farmers might, if forced, sell their corn but ordinarily not.

Portsmouth (6): Rains for past two weeks have prevented farmers from sowing wheat and also prevented corn husking. Corn and buckwheat being damaged by rains considerably.

Xenia (3): Farmers show but little disposition to sell new corn. They expect both corn and hogs to sell higher and are holding accordingly. Speculation in land will not force the marketing of commodities in this locality.

INDIANA.

Monticello (1): With cold weather, farmers' sales of corn will be moderately free. Do not think farm land speculation will have any effect on corn sales.

Kendallville (7): There is no surplus of corn in this section. Our farmers feed all the corn grown in this locality.

Waveland (2): Don't think there will be any corn shipped out of our section.

Decatur (7): Farmers not selling new corn. Asking price to buy from neighbors. Will feed corn and sell oats. Few will have to sell corn to make payments.

Winchester (8): Farmers will not sell corn around present prices if hogs stay above 13c. They are very short of hay. Oat crop was light. They are feeding new corn heavily now. Selling very few oats; feeding them also. Hog crop very large.

Princeton (3): Continued heavy rains during October has prevented sowing of wheat; not over 50% of usual crop now sown and rains increase. Great damage from over-flows may be expected. Farmers not inclined to sell new corn. All corn saved from floods will be needed for home use.

Kentland (1): Farmers not disposed to sell corn at present prices. Land speculation will not force corn on the market to any great extent here.

South Whitley (7): No corn to speak of will be marketed here. Most of it will be bought by feeders.

Frankfort (2): Think farmers will sell corn freely when elevators will take it. Know of no other way for farmers to meet their obligations on land speculation except to sell the product of the land.

Tipton (5): Corn crop good, quality good. Some being cribbed now.

Portland (7): Farmers are willing to sell corn and would market freely but ground is too wet to get in fields. Now raining hard and has been for forty-eight hours.

Jasper (3): We do not think excessive speculation in farm lands will force the farmers to sell new corn. Farmers will not be free sellers of corn at $1.20 per bushel.

Bloomington (3): Are having no trouble buying new corn at $1.00 per bushel. Corn contains too much water. Too warm and rainy for proper drying out of corn.

Shelbyville (5): Farmers will be rather slow sellers of corn at present values. But little land speculation in this section.

Wabash (4): Farmers slow to sell corn at present prices for new corn.

Angola (7): Not enough fall plowing done here to consider. Very little corn will change owners. No excessive speculation in land. Good farms still sell at $100.00 per acre or less.

Markle (7): Farmers will not sell corn very freely, at present prices.

ILLINOIS.

Paris (8): Farmers are not selling any corn only to people who will pay 10c above market price. The advanced price on land will not cause much corn to be sold.

Mt. Pulaski (5): No new corn selling.

Freeport (4): Farmers show disposition to sell new corn. Believe there will be considerable more corn from this section this winter than for the last four years. Do not believe speculation in farm lands will cause farmers to sell corn in the next three or four months.

Ashton (4): Corn will be sold freely at present prices. Sales of farms will cause a large movement of tenants March 1 and would cause a larger movement of corn.

Odell (7): Farmers are slow to sell corn at present prices. Very little corn will have to be sold for land payments.

Rantoul (5): Not selling much corn. Not selling hogs freely. Farmers may sell corn by March 1 to pay for farms bought, but money plentiful.

Pocahontas (3): Corn crop a failure. Farmers buy corn to fatten hogs.

Riggston (5): Not selling new corn as the price is too low.

Sidell (8): Farmers not inclined to sell new corn freely at present prices. They think it worth around $1.25 basis cost of production. Don't think speculation in farm lands will have much affect on movement of new corn.

Ashland (5): Corn will not move at present prices.

Earlville (4): Farmers that bought land are in good shape to meet payments and will stand no crowding for money.

Wenona (4): Do not think any new corn will be sold in volume until husking is finished.

Marshall (8): Farmers disposed to sell corn sparingly.

Mattoon (8): Farmers will hold new corn more than usual unless price advances ten or fifteen cents. Farm speculation has nothing to do with corn holding.

Decatur (5): Farmers not inclined to sell corn.

Rockford (1): Don't think much corn will move at present price.

Princeton (4): Farmers not very anxious to sell new corn. There may be some selling of new corn to meet speculators' obligation.

Eureka (1): Very slight disposition to sell corn at present. Land speculation will have no immediate effect in selling of corn.

Mt. Carroll (4): No corn coming to market. Expect to feed all surplus on farm.

Highland (6): No surplus of corn in this vicinity. Shipping some in.

Belleville (3): Some corn moving and paying $1.20 a bu. majority. Will sell at that price. In our territory farmers are not speculating in land.

Vermont (2): Farmers in general willing to dispose of considerable corn at prevailing price ($1.10 to $1.20) for November and December delivery. I do not consider that speculation in farm lands was excessive in this vicinity, therefore there will be no farmers who are forced to sell.

MISSOURI.

Elsberry (8): Farmers are not selling corn at present prices. This section is thoroughly saturated with water. Has been raining steadily for 48 hours and no let up.

Chillicothe (1): Farmers will not sell corn freely at prospective market prices. Do not think land sales will effect corn marketing.

Salisbury (4): New corn is offered by farmers, but too much moisture to handle through elevator. Wheat is up and getting good root.

Carrolltown (2): Until Saturday some of the late sown wheat had not sprouted. Early sown growing nicely. Farmers will not sell corn at present price.

Corning (1): Farmers not disposed to sell much new corn. Speculation in farm lands will not force selling of corn.

Lamar (3): There is no surplus corn in this territory for shipment. I believe we will require some corn shipped in later in the season.

Clinton (1): No corn to sell here.

Marionville (3): Farmers are all buyers and no grain or stock food to sell.

Columbia (5): We feed 85% of our corn here at home.

Bethany (1): Corn prices not satisfactory, very little being offered. Excessive speculation will not force much corn out.

Charleston (9): Think farmers willing to sell at around $1.25. Under that will hold as a rule until spring.

Richmond (2): 25% willing to sell.

IOWA.

New Hampton (7): Don't believe there will be much corn shipped from this county. Don't think settlement of land purchases will affect corn much.

Truesdale (1): Farmers do not seem disposed to sell corn and hogs at present prices, do not think much corn will be sold to meet farm speculative obligations.

Corydon (6): Farmers are not selling corn at $1.00. Have plenty of funds to meet obligations.

Wright (5): Farmers are not inclined to sell corn at present price.

Arthur (2): Disposed to hold. Speculation of land will not affect selling of new corn.

Patterson (5): Farmers don't feel like selling at present prices.

Marcus (1): Farmers won't sell corn for $1.00. Farmer's hogs and cattle will be gone by March 1 to meet land debts.

Washington (8): Farmers not free sellers of corn at present prices.

Coburg (3): Farmers won't sell corn below $1.25. Sales of farms will ha nothing to do with sale of corn.

Avoca (3): Think corn will move fr ly at $1.25 in December. A few will ha to sell account of land purchase.

Hamlin (2): Will sell corn if hogs at present price. Don't think speculat will make them sell corn.

Henderson (3): Farmers think pres prices of corn too low. Land will affect corn price.

Lowden (8): Do not look for hea movement of corn on account of la sales.

Oakville (9): Present prices of corn not high enough. The price of farm la will have no bearing on selling of corn

Onawa (2): Very little disposition the part of the farmer to market corn, up to date we have not bought bushel. Do not think the speculation land will cause a rush of corn to mar as most of the land speculators are n producers.

New Sharon (5): Farmers not incli to sell much corn until cribbing is do Price seems satisfactory.

Clemons (5): Farmers will not sell c at the prevailing prices. Most are eit building large elevators or are stor corn in open cribs. No corn for mar here as the hail storm cut our crop sh Much corn growing in fields.

MINNESOTA.

Eden Prairie (6): Very dry for plowi About one-third plowing done but we ha had about four inches of snow so if does not freeze up it will be all right plow. About one-half of wheat sold.

Farmington (9): Farmers are sell corn freely at present and are not ki ing on the price. They seem to think is better to sell the corn than feed it present price of hogs. Our local farm are not investing in the high price la here much. If one sells he either reti or goes where he can get cheaper la Next year we will have a lot of n farmers who may find it a little bind to meet their payments.

Henderson (6): Farmers want at le $1.25 per bushel for new corn. Specu tion in farm lands will not force any c on market here.

Minneota (3): Farmers not disposed sell corn at present price. There will ways be some corn come in but believe the main corn will be held for hig prices. Do not think corn will be for in to any great extent to meet obligati on farm lands.

London (6): Farmers are feeding ab the same amount of hogs they did a y ago. Farmers around here that bou land are meeting their obligations but m of the land sold here is bought by Illi or Iowa men.

Hutchinson (6): There is no wi wheat here. Farmers will not sell c at these prices and speculation in land nothing to do with it.

Donnelly (2): Will not sell corn v freely. The speculation in lands does call for cash until March 1.

Albert Lea (6): Farmers are willing sell new corn at present prices if h are going to stay at present prices. big drop in hogs have made quite a farmers bears. Do not think speculat in land enters in the selling of this c crop in this section.

Grand Meadow (9): No corn ship from here, all fed.

Warren (1): All corn fed locally.

Wells (6): Do not look for much crease in marketing of new corn bef the 15th to 20th of November. Noth moving at present. Hogs are being m keted quite freely, also cattle.

NORTH DAKOTA.

Fargo (8): Very little corn to be off. Will be fed out quite generally. L inquiry not applicable to this state.

St. Thomas (7): No corn raised for market. Not much oats for mar on this crop. Barley was a poor c Will have to ship in corn if farmers k their hogs.

Lakota (7): Oats short crop, very li for sale. Corn raised here will be on cob or fodder. Soil very dry. Gro frozen and some snow.

Blabon (7): No more plowing as gro is covered with eight inches of snow almost zero weather. Farmers are hold off for higher prices in wheat and bar

Drayton (7): No surplus corn h Wheat is being marketed more fre In fact large amount of crop already m keted.

Great Bend (9): No corn market h

SOUTH DAKOTA.

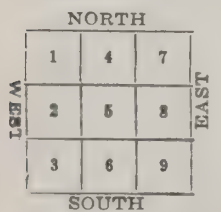
Hurley (9): No winter wheat to re on.

Mitchell (8): Husking is pretty slow account of so much wet weather. Fa ers do not talk about selling. Not m speculation in land here.

Canton (9): Farmers will sell corn $1.00. Speculation in land by farm confined to few and will not show volume of corn marketed.

Brookings (8): Do not look for any rush of corn on the market. Farmers that hogs will be worth more money la on and will feed hogs that can be carr over profitably.

Flandreau (8): No new corn offered yet. Picking in progress when weat permits but too much snow at pres Can tell more about farmers as "l sellers" of corn in another thirty d hence.



Elk Point (9): Farmers not inclined sell new corn at present prices. D think the speculation of land will fo selling of new corn to any great exte

NEBRASKA.

Pierce (7): Farmers will not sell present values. Speculation in farm la

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

t excessive. Plenty of credit and plenty oney in banks to meet all payments.
Schuyler (7): Farmers not disposed to ll new corn under $1.25. Do not think any farmers around here have to sell rn right away to meet speculative obli- tions on land.
Ashland (9): Farmers not disposed to rket new corn. Do not think land eculation will cause selling of corn.
Winnetoon (7): Most farmers are try- to feed most of their corn. Others it intend to sell will market as soon as ssible.
Belden (7): Do not look for much corn move before middle of December. rmers generally will not be forced to l corn on account of obligations.
Humboldt (9): Account of lateness in ting sown, due to too dry for plowing ly, think farmers will sell around $1.25.
Loseland (9): Acreage of corn below rmal. Very little corn will be shipped l none will be coming in before De- mber.
Beatrice (9): Corn crop here is light l farmers not inclined to sell. Few ners care to sell their farms.
Fairmont (9): We have no corn to sell, crop being a failure. Speculation will force selling of new corn here.
Superior (9): No surplus corn or oats sale here. Purchasers of farm lands not depending upon crops for pay- nt. Lots of purchases on contract basis completion new sowing. If buyers 't resell will let their deposit go.
Superior (9): No new corn will be sold . We will ship in a great deal.
Heligh (7): Farmers expecting to get for new corn. Think will sell at basis.
Orleans (6): Farmers will sell corn ly in about thirty days. No rush to owing to high price of land.

KANSAS.

Logan (4): Corn gathering has just be- It will be three or four weeks be- any corn will be marketable. lled.)
Ellsboro (5): There will be no new sold in this section. We will have hip in for home consumption.
Hiontown (9): There will be no corn hip out, will have to ship in. Not many hogs in the country. They t like the way prices have gone to s after having fed high-priced corn.
Pleasanton (8): Weather has been very and farmers could not prepare the nd which will greatly reduce wheat age. Have had good rains in the past days.
Thol (4): Farmers seem to be rather to let loose of corn. If the price es around $1.25 they will sell freely.
Junction City (7): There will be very corn marketed here. Any surplus will undoubtedly be taken by feeders.
Modesha (9): Not over 25% of the t seeding is done as yet. Warm her and insects delaying. It has been for some three weeks, not partic- y wet but too much to go on plowed nd.
Ellington (6): No corn here to speak Farmers will sell their surplus at

Medicine Lodge (6): Not much corn l in this county.
Mia Vista (8): We will have to ship rn and oats for feed.
Madison (9): No new corn for sale, will e fed and corn shipped in. No spec- ons in farm land here yet. Farmers ed to sell new wheat.
Pengs (5): Not enough corn raised in ocality to supply local demand. Corn e shipped in.
Waldo (5): No corn raised in this lo- . Wheat never looked better. Too or threshing. Grain deteriorating in

Humboldt (9): It has been so dry that s almost impossible to plow. Have ome rain in the last two weeks.
Oman (9): Are on the buying end of rn and oats.
Peca (7): Farmers not disposed to orn at the present price of corn and at the present time. Maybe so on.
St. John (5): We will have very little to sell. Farmers will hold and feed e. Farmers in reasonably fair shape ioney, don't have to sell.
Wego (9): Don't think over 25% of heat has been sown yet and it is here most all the time. Do not we will ever get in over forty or er cent of an average crop this sea-

Waska (4): Farmers inclined to hold ccount our corn crop being so poor Can't say that farm speculation ut any ice here.
Weyer (7): The buying of land will ave much to do with the movement n. There will not be a great deal

OKLAHOMA.

Enid (7): Have been paying $1.30 for orn on the ear. Farmers have been d to rush in all they could as fast y believe price will be lower. Not e surplus here.
Fay (4): Corn acreage small account wheat acreage past crop. Farmers d to sell surplus rather than hold ding hogs under present conditions.
(4): Farmers would sell freely but rs are congested with wheat and to procure cars for shipment.
(4): Corn is being sold freely at t price.
Fisher (4): Wheat is going in in ape and will grow nicely.
Bell (2): No corn will be offered for local supply.
Hall (5): Farmers will sell corn as s wheat seeding is finished. Corn will not be forced on the market in this section to meet payments on farm speculation.

THE PERMIT SYSTEM OF DISTRIBUTING GRAIN CARS.

By GEO. A. WELLS.

The purpose of the permit system of distributing grain cars is to prevent congestion on tracks in terminal markets when the elevators are filled, and thus avoid tying up grain car equipment, resulting in a greater number of grain cars available for active service. The permit system differs from the embargo in that it effectively controls the loading at shipping points, whereas the embargo stops delivery at the terminal and results in tying up all the carloads moving in transportation from shipping points to destination at the time the embargo is put into effect.

There are two separate permit systems which have been in use, viz., the blanket permit and the individual permit, both of which have been applied by the U. S. Railroad Administration.

The blanket permit, which has been applied to the Grain Corporaton zone terminal markets for some time until recently, provides for the distribution of grain cars among the different railroads serving the market according to the elevator capacity available for unloading the cars received from day to day, each railroad distributing the cars thus apportioned among its shippers in the same manner as was done previous to Federal regulation and control. This system, in the experience of the grain trade, particularly country shippers and the primary terminal markets, has been fairly satisfactory.

The blanket system, however, has not apparently been satisfactory to the traffic officials of the U. S. Railroad Administration, as explained in a letter which I have just received from C. E. Spens, Traffic Director, U. S. Railroad Administration, Washington, D. C., as follows:

Mr. Geo. A. Wells, Sec'y, Western Grain Dealers' Ass'n, Des Moines, Iowa.

Dear Sir—Your favor of the 27th relative to individual permit system received.

The blanket permit system did not accomplish the desired result, very much to our regret, and it therefore appeared necessary to reinstate the individual permit system, which, as you know, obtained last year.

During the time the blanket system was in effect, as you are probably aware, it became necessary to issue absolute embargoes several different times at the markets of St. Louis, Kansas City and Omaha, the loading receipts exceeding the amount allocated to the individual railroads and exceeding the amount the markets could absorb.

It is a very difficult matter to control the situation in a practical manner under the blanket system at markets served by a number of railroads. It is also difficult, under the blanket system, to give relief to the sections which, comparatively, are in greater distress. With the benefit of the experience of last year, it is to be hoped that there will be less ground for complaint under the present operation of the indlividual permit plan.

One of the principal difficulties that we experienced last year in the proper operation of permits was the fact it very frequently happened that country elevator operators would file applications with Grain Control Committees at various markets, covering the same prospective movement, on the theory of course that if permits would not be issued at one market conditions at other markets might be different. The result was that permits on the same grain were issued at two or more markets, each Committee anticipating that the permits would be used, and would make their calculations as to possible receipts accordingly. While an attempt will be made to control the situation, so far as possible, through the local agents of the railroads, at the same time, if shippers would advise Grain Control Committee in case of non-use of permits, this would tend to improve the situation.

It has been arranged that as permits are issued, copies shall at once be transmitted to the Transportation Department of the railroad, that it may be arranged to have "the car follow the permit," so that the delay, in so far as the shipper is concerned, in securing equipment to load after he has received the permit, may be reduced to a minimum.

While it may be true, as you state, that today the coarse grain receipts at markets are comparatively light and are being rapidly absorbed, this condition, in all probability, will be of very short duration, in view of the exceedingly heavy crop of corn and other grains that will offer for transportation within the immediate future. So long as the coarse grain movement is comparatively light, permits will of course be issued on that class of grain without delay, and immediately upon receipt of applications.

The matter is receiving our closest attention, and you may rest assured that in co-operation with the Railroad Administration, everything possible will be done that the individual permit system may be operated with the least possible burden on shippers and on the carriers.

Very truly yours,

(Signed)
UNITED STATES WHEAT DIRECTOR.
By C. E. Spens, Manager Inland Traffic.

It would seem that the principal objection to the blanket system is that it did not definitely control deliveries at terminal markets and that it was necessary to issue embargoes several different times. However, we believe that even though it might be necessary to issue embargoes occasionally to complete the control under the blanket system, it is a better system than the individual permit system which has recently been made effective by the U. S. Railroad Administration.

The writer recently mailed a questionnaire to each member of the Western Grain Dealers' Ass'n, of which he is secretary, the members being almost entirely country shippers, making inquiry as to their experience and for their opinions regarding the so-called individual permit system. The replies received express the most bitter complaints against the individual permit system; and it is the opinion of the writer that the officials of the U. S. Railroad Administration, who have promulgated the individual permit system, have done so entirely from the terminal viewpoint without carefully considering the practical trade conditions that surround the business of the country elevator at the original point of shipment, and that the method and accounting service employed by the Railroad Administration is inefficient and inaccurate, the result being endless discrimination and confusion in the distribution of the grain car equipment of the country.

The reports received indicate that there is much abuse practiced by shippers in making applications for more permits than are used. This is no doubt the weak point in the system and we believe that it would not be possible, under the conditions that exist, to police or control this situation effectively.

The country shipper is required to first file his application for the permit with the local agent who will forward same by mail (not telegraph) to the Grain Control Committee; and when granted the acceptance is returned by mail to the local agent who notifies the shipper. After the permit is recived by the local agent and the shipper notified, he then has the privilege of ordering a car on that permit, the result of such a practice being that the shipper is burdened with a double uncertainty as to when the car will be placed for loading—first, the delay and uncertainty of obtaining the permit, and then the additional delay and uncertainty of receiving the car.

The method is most cumbersome as it relates to the country shipper. He is required to state in the application the kind of grain to be shipped, the name of the consignee and the terminal market to which shipment is to be made. We concede that it is obviously necessary to name the terminal market to which shipment is to be made but we can imagine no reason whatever why the shipper should be required to name the kind of grain or give the name of the consignee in the application for the permit, as these requirements seriously restrict the merchandising opportunities necessary to the successful operation of a country elevator business; and the community served suffers accordingly. During the delay in granting the permit and the other delay of obtaining the car after the permit has been granted, market conditions may change so that the shipper would find it advantageous to load the car with a different kind of grain or make shipment or delivery to a different consignee and these specifications in the application are not, we believe, essential and should not be required.

It is a matter of some satisfaction to note that it has been arranged that as permits are issued copies shall at once be transmitted to the transportation department of the railroad that it may be arranged to have the car follow the permit so that the delay so far as the shipper is concerned in securing the equipment to load after he has received the permit may be reduced to a minimum.

We trust that it may also be arranged that it will not be required to state in the application for the permits the kind of grain or name of the consignee. At least it should be sufficient, we believe, to state "wheat" or "coarse grain," as in many instances the shipper, after having waited a long time to receive the car, may find conditions changed so that it would be necessary for him to load out a different kind of grain than he at first intended; and it frequently occurs that the shipper, having a car of grain moving in transit on consignment, may desire to change the delivery to apply on "sale to arrive" with a different consignee to be named.

Grain shippers state in their replies that frequently the empty cars are placed before notice that the permit is

News of the Terminal Markets

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

C. W. Hacker, clerk of the Mystic Milling Co., returned to his desk after an operation for appendicitis.

F. H. Schroeder, of J. J. Mullaney, left last week for a two weeks' duck hunting trip in western Nebraska.

M. King, of the Western Terminal Elevator Co., left the last of the week to attend to business in Chicago.

The McCaull-Webster Elevator Co.'s elevator at Burbank, S. Dak., burned to the ground the first of the week. There was about 2,000 bushels of grain in the elevator when it burned. The elevator will be rebuilt this fall.

A. E. Schuyler, of the Grain Door Reclamation and Cooperage Bureau, of Chicago. Mr. Schuyler was sent here by the railroads entering Sioux City for the purpose of looking over the situation with a view of installing a bureau of grain door reclamation here.

F. R. Warrick, Jr., of Kansas City, Mo., arrived the first of the week to take the position as assistant to his father, F. R. Warrick, Sr., manager of the Terminal Grain Corporation. For the last ten years Mr. Warrick has been employed by terminal grain companies at Kansas City and St. Joseph, Mo.

NASHVILLE.

John Leiper, Correspondent.

D. Y. Conatser will enter the grain and feed business at South Pittsburg, Tenn.

Receipts of grain at Nashville last week were 174 cars. Stocks at the close of the week were: Flour, 40,000 bbls.; wheat, 709,000 bus.; corn, 19,200 bus.; oats, 477,000 bus.

The Louisville & Nashville Railroad has filed a request with the Federal District Freight Committee at Louisville asking for cancellation of the milling in transit privilege at Nashville and Chattanooga and points between those cities, on grain drawn through Cincinnati from points in central Kentucky. No date has been set for a hearing.

Slight improvement is reported in sales of corn meal. Southeastern corn mills, with capacity of 138,000 bushels, had output last week of 16,649 bushels, or 12 per cent of capacity, which compared with 12.47 per cent the preceding week. Prices: Bolted corn meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.20@3.30; plain meal, $3.10@3.20.

Grain trade was routine last week. Milling wheat continues to command a good premium, with supplies arriving from other sections to meet demands of mills. Rains have interfered with movement of new crop corn. Supplies of corn are light, with fair demand. Oats are steady, and in moderate demand. Prices: Wheat—No. 2 red, $2.33@2.35. Corn—No. 2 white, $1.53@1.55; No. 3 white, $1.50@1.53; No. 3 mixed, $1.50@1.52. Oats—No. 3 white, 77½@78½c; No. 3 mixed, 76@77c; No. 3 red, 78@79c.

DES MOINES, IA.

A. McArty, Correspondent.

Taylor & Bournique Co. have removed their office from the Hubbell Building to the Davidson Building

Receipts at this market: Wheat, 62 cars; corn, 38 cars; oats, 61 cars; flax, 3 cars; barley, 2 cars; mill feed, 28 cars; hay, 18 cars.

W. H. Bartz & Co. state that Major Moberly is now associated with them. He has traveled extensively for western houses and will be a valuable addition to the growing Bartz business.

The country shipper feels that he is severely handicapped under the requirement in filing the application for the permit to name the market and the consignee. A vigorous effort will be made to secure consideration by the Railroad Administration of these cumbersome conditions.

Country grain shippers in this territory are complaining bitterly of the individual permit system for distributing cars, and the general sentiment is that the Railroad Administration and the Grain Control Committees are considering the matter entirely from the terminal market viewpoint without any attention whatever to the cumbersome results inflicted upon the country shipper.

Geo. A. Wells, secretary of the Western Grain Dealers' Assn., has been making an exhaustive inquiry by questionnaires mailed to country shippers and a review of the conditions reported indicates clearly that while the individual permit system may be effective in stopping the movement of grain to a congested market and in that respect prevent the tying up of grain car equipment, that, on the other hand, experience shows that empty cars are standing on side tracks waiting for permits to load or for movement in distribution and that the abuses practiced by country shippers, which cannot be policed, defeat the purpose of the individual permit and results in endless discrimination and confusion.

DETROIT.

John Barr, Correspondent.

There is nothing doing in the barley deal and the price is nominal at $2.60@2.75 per cwt. for cash No. 3.

All the activity has gone out of the bean market and the price shows a loss of 15c. The market is easy and dull at $6.75 for immediate and prompt shipment per cwt.

Demand for rye decreased and the price declined sharply, but came back again part of the way and closed with a loss of only ½c. No. 2 was quoted steady and quiet at $1.36½.

Manager Sam Selden, of the Reliance Milling Co., Vassar, Mich., was a caller on 'change last week. The mill has been sold to a farmers' company and Mr. Selden is going into the electric light business at Lapeer.

Local consumers were active buyers of oats all week and the market had an advance of 1½c, closing firm. There was something said about shipping demand, but not much business. Receipts were small. Quote: Cash No. 2 white, 76c; No. 3 white, 74½@75c; No. 4 white, 73½@74c.

Corn was quiet and firm all week and made an advance of 6c owing to small supplies and a moderate demand. Stocks of contract corn here are down to 22,000 bus., the lowest on record, and receipts give no promise of building the total up. A little corn was shipped east, but most of the demand was for local use. The close was firm at $1.52 for cash No. 3, $1.54 for No. 2 and No. 3 yellow, $1.52 for No. 4 yellow, $1.51 for No. 5 yellow and $1.50 for No. 6 yellow.

OMAHA.

Leigh Leslie, Correspondent.

George A. Wells, secretary of the Western Grain Dealers' Assn., was in Omaha last Friday and was a visitor on the floor of the exchange.

E. C. Twamley, of J. E. Twamley, Son & Co., returned home last Friday from the sandhills of Nebraska, where he spent two weeks shooting ducks.

Some new corn has been arriving in this market in the last week, but the movement has not been considerable, nor is there any likelihood of its assuming considerable proportions in the near future. Farmers in this territory are not at all inclined to sell corn at present prices.

In a telegram from Washington, under date of October 31, Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, said: "Effective November 5th individual permit will apply on all grain to Minneapolis, except grain originating in Minnesota, both Dakotas and Montana. Average daily corn receipts at Minneapolis last 30 days less than 10 cars and at Sioux City 2 cars average daily receipts. All grain Sioux City, six and one-half cars."

The putting into effect last Saturday of the individual permit system as applied to the movement of grain to this market has resulted in greatly reduced receipts of grain this week. Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, went to Washington early in the week to see those in authority with reference to the permit situation. The directors of the exchange have entered vigorous protest against keeping the permit system in effect here. The fact that it was made effective at Omaha and was not made applicable to either Sioux City or Minneapolis they particularly resent.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is no change of quotations in shelled corn and spot cars are being moved within range of quotations given last week. Best grades are holding around $1.51@1.52 a bushel. Mixed corn is selling 2c under yellow grades.

Receipts of oats show a decided decrease over the same period last year. Only 124,000 bushels came into the market, as compared with 198,000 bushels the year before. The arrivals, however, have been more than enough to meet the light demand, and prices have been shaded a fraction. No. 1 white is selling at 76¾@77c a bushel; No. 2 white, 76@76½c.

Receipts of corn were largely in excess during the last period over the corresponding period a year ago, a total of 31,200 bushels being bulletined. A fair amount of new era corn is coming into the Pittsburgh market, but demand is very slow. Feeders apparently think it is too early to put in a supply of new corn, although the grain is in excellent condition. The weather is having a great deal to do with the backward condition of the corn market, and it is believed that if a cold spell occurred it would have a tendency to stiffen prices and stimulate demand. New No. 2 yellow ear corn is being offered on the local exchange around $1.30, with $1.25 bid.

NEW YORK.

J. M. Nugent, Correspondent.

The market for cash corn in New York ruled firm and higher with an improved domestic demand in evidence. No foreign enquiry was reported. No. 2 yellow quoted at $1.62¼; No. 3 yellow, $1.61¾; No. 2 white, $1.62¼; No. 3 white, $1.61¾; No. 2 mixed, $1.61¾, and No. 3 mixed, $1.61¼.

Among the visitors upon the floor of the New York Produce Exchange during the past week were W. H. Martin, of Chicago; B. G. Hudnut, of Boston; W. E. Harris, of Baltimore; Leroy Snyder, also of Baltimore; L. R. Wilson, of Montreal; T. J. Thatcher and J. J. B. Orth, both of Chicago.

Prices for spot oats remain firm. There was a better demand from foreign interests in the market during the week, and a fair trade for export was reported. The domestic demand continues about steady. No. 1 white, 82½c; No. 2 white, 81½c to 82c; No. 3 white, 81c to 81½c; No. 4 white, 80c to 81c.

MEMPHIS.

George Williamson, Correspondent.

W. E. Fildes, of James Bennett & Co., Chicago, was a visitor on the local exchange Wednesday.

The Standard Hay Co., through its vice-president and general manager, R. N. Archer, has made application for membership in the Merchants Exchange.

J. T. Halbert has bought the Merchants Exchange membership of the Riverside Elevator & Storage Co., which has been forced out of business because the plant was destroyed by fire, and will engage in the grain and hay brokerage business.

Receipts of corn continue almost nothing and prices are practically nominal. Demand is light, for everybody is waiting. Mills are doing very little. Oats have been coming a little more freely, but business therein is small and prices are firm and some higher. Cash No. 3 white sold Friday at 75½c and they were firmer next day, but no sales reported. No. 2 white 75½c was bid.

Continued rains throughout this territory have lessened an already light demand for grain and feedstuffs. During the month rainfall at this station broke all records for October, being over 10 inches, compared with a normal of less than three. One result was that farm work has been interrupted and pastures are better than ever known at this time of the season. The roads are so bad that hauling is almost impossible, which has also checked demand for grain. The cotton crop has been seriously damaged by the unprecedented rainfall, but enhancement of price has helped offset it. Chances now favor a heavy planting of cotton next spring, which may affect the area devoted to grain crops.

DULUTH.

S. J. Schulte, Correspondent.

A local committee in attendance at the Chicago hearing beginning Monday, Nov. 3, on the Johnson Amendment comprised C. M. McDonald, E. M. White, Benjamin Stockman and D. T. Helm.

A. D. Thomson, who has been laid up for several weeks through an indisposition, is reported to be improving. It is said to be uncertain, however, as to when he will be able to devote much attention to business.

George A. Robson, who has been devoting his attention to his firm's interests on the Minneapolis Chamber of Commerce during the last several months, spent the last week on the Duluth board. He does not look for any extended movement of grain to the terminals here prior to the close of the lake navigation season.

The great bulk of the wheat coming in here this fall is durum. Stocks of it in the elevators aggregate 2,331,000 bushels, while only 864,000 bushels of spring wheat is in store. Supplies of all grain in the elevators at this point now aggregate just 9,362,000 bushels, compared with approximately 23,000,000 bushels at this time last year.

B. E. Baker, one of the pioneer operators on this market but who has during the last year been superintending the development of an oil proposition in the Southwest, has returned to Duluth and will resume his former interests in the grain trade on this market. He and a coterie of Duluth associates are reported to have made a nice cleanup through the sale of their oil holdings to interests supposed to represent the Standard Oil.

The best grades of good milling wheat continue to command high premiums on this market. No. 3 dark northern, for example, sold at as high as $2.75 during the last few days. Spot No. 1 northern closed on Saturday at $2.65@2.70; No. 2 northern at $2.60@2.65, and No. 3 northern at $2.55@2.60. Eastern millers have been in this market during the last few days, buyers for them being anxious to contract for wheat to be shipped out before the close of navigation. So far wheat has only been going in lots of 25,000 and 50,000 bushels on the package freight boats, and it is estimated that not more than 200,000 bushels has been contracted for so far eastern shipment.

Officials of the Duluth Board of Tr are calling upon members to comply stri with the rule requiring reports of all c sales of grain for the purposes of the ords. In order that the reports shall dicate clearly the character of the grai flaxseed sold, members are required state in reporting sales the amount dockage affecting the price received. general they are called on to indi clearly the character of the grain or or the conditions surrounding the Any failure to report cash sales is garded by board officials as a violatio the spirit that should govern in comm cial transactions. Any trader viola the rule is subject to such penalties prescribed for infractions.

KANSAS CITY.

T. J. Tanner, Correspondent.

J. J. Kraettli, of the E. D. Fisher Grain Co., was called to Clay Center, Kans., Saturday on account of the death of his father, Jacob Kraettli.

C. W. Lonsdale, of the Simonds-Shields-Lonsdale Grain Co., returned Saturday from Denver, Colo., where he attended the funeral of his father, the Rev. Frank Lonsdale, who died at the age of 79 years.

Movement of wheat in Oklahoma, which is to be increased by the cars now en route to that state, indicates that the crop was underestimated. Some private estimates run as high as 50,000,000 bushels.

A demonstration of fire and grain dust explosion prevention is to be given in Kansas City November 8 by Dr. H. H. Brown, of the Bureau of Chemistry, Department of Agriculture, Washington, D. C. A lecture will accompany the demonstration.

Accused of not paying a fair reflection of the guaranteed price of wheat to producers and ignoring communications from the United States Grain Corporation, the Farmers' Elevator Association, Mound Ridge, Kans., has been deprived of its federal license.

Kansas City grain men and millers did their usual big part in helping to raise $2,500,000 for local charities and a memorial to the 400 Kansas City boys who fell in the world war. Several firms and individuals contributed $1,000 to $1,500 each, and the gifts running down to $5 were numerous.

C. B. Cozart, of Oklahoma City, who was in Kansas City Thursday, said the big kafir and milo crops of Oklahoma were ready to move. While rains had retarded threshing, he regarded the actual damage as light. Farmers, he said, were anxious to sell at the high prices now prevailing, but were very short of cars.

While most reports concerning growing wheat in Kansas are favorable, there are serious complaints as to the condition of stubble fields in Ellsworth, Saline and Lincoln counties. Pasturing of wheat fields has begun in all southwestern states, effecting the saving of feed. Last year wheat pasturage was an important factor in the feed situation and farmers hope to use it freely this year.

October receipts of wheat in Kansas City were 6,056,011 bus., the largest for that month since 1916, but 4,124,250 bus. less than for September. The reduction reflects the car situation in the Southwest, which is being slowly relieved. Corn receipts were 583,750 bus.; oats, 793,000 bus.; kafirs, 73 cars; rye, 54 cars; barley, 56 cars; millfeeds, 445 cars; flour, 6,378 cars. Shipments were: Wheat, 4,222 cars; corn, 180 cars; oats, 373 cars; kafirs, 43 cars; rye, 6 cars; barley, 52 cars; millfeeds, 755 cars; flour, 1,368 cars.

Complaints as to the manner of granting individual permits for shipping grain to Kansas City have become so numerous that W. B. Lathrop, chairman of the transportation committee of the Board of Trade, has taken the matter up with the local grain control committee. It is said that in some cases where cars are provided and wheat loaded no permit can be obtained for the movement of the grain to market. In others the permits have been granted, but no cars can be obtained. The cars supplied are going mainly to the western portion of Kansas and to eastern Colorado, where much wheat is on the ground and where a great deal of threshing remains to be done.

While the nation-wide coal strike is regarded with apprehension by all industries in Kansas City, the elevators and mills here that use coal for fuel are generally provided for one to three months. Many of the larger plants secure their power from central power houses, which have fair supplies of coal. The Kansas City Northwestern railroad, which runs from here to Virginia, Nebr., has shut down, owing to the lack of coal and the embarrassed position of its finances. The road in in the hands of L. S. Cass, receiver, who has been endeavoring for some time to have the property taken over by the railroad administration. It brings in a small amount of grain and carries more milk to Kansas City than any other road. The street car service in Atchison, Kans., was discontinued Saturday as a means of conserving coal for other uses in the city.

Cash Grain Markets.

Wheat—Receipts for the week, 974 cars, against 830 a week ago and 1,055 a year ago. Increase in the offerings was not sufficient to check advancing prices, particularly on milling grades of hard wheat, as the demand from local mills and shippers was good. Hard wheat closed 1c to 15c higher, with No. 1 ranging from $2 35 to $2.57, No. 2 from $2.33 to $2.55. Red wheat gained 1c to 4c. It closed with No 1 at $2.29@2.30, No. 2 at $2.26@2 28 and No. 3 at $2.23@2.25. Cars for shipment of wheat from local elevators were in lim-

ited supply and stocks decreased only 143,000 bus., to 14,531,000 bus. Holdings here are about 300,000 bus. less than a year ago. The inward movement included some of the distressed wheat in western Kansas, which is to be given preference until moved. There were many complaints from other parts of the state as to the inefficient workings of the individual permit system. At some points where elevators are full no cars were obtainable. At others the cars were provided and loaded, yet no shipping permits were granted. At the end of the week the transportation committee of the Board of Trade took the matter up with the local grain control committee.

Corn—Receipts, 124 cars, against 97 a week ago and 248 a year ago. The offerings included a few cars of new corn, which showed good quality and sold at a slight discount under old corn prices. Demand was slow in the early part of the week, but, after a decline of 1c to 2c, there was improved buying, with fair shipping and local orders. Stocks decreased 4,000 bus., to 43,000 bus., against 492,000 a year ago. Dealers expect a larger movement, dependent upon the car situation, and are anxious to see elevator stocks of wheat reduced to make room for corn.

Oats—Receipts, 65 cars, against 94 a week ago and 135 a year ago. The trade was active and stocks were drawn upon to the extent of 54,000 bus., leaving 1,176,000 bus. in store. Both shippers and local dealers were buyers. Much of the oats taken was shipped southward. The heavier samples were in the best demand. White oats closed 1½@2c higher, with No. 2 at 73@73½c; No. 2 mixed, 2@2½c up, at 68@70½c; No. 2 red, 3@4½c up, at 70@72½c.

Kafir and Milo—Receipts, 1 car, against 7 a week ago and 1 a year ago. Recent rains and the shortage of cars were held responsible for the very light offerings, but the time is approaching for the movement of crops in Oklahoma and Kansas, which are expected to be liberal. It is said that some loss was suffered in Texas, but not much in either Kansas or Oklahoma. Production in all three states is large enough to afford considerable reduction. Demand for small lots is urgent and shorts are anxious. Prices here advanced 20c for the week and were quoted as follows: No. 2 white kafir and No. 2 milo, $2.60@2.70 per cwt.; No. 3, $2.50@2.60. Stocks were reduced 6,000 bus., to 10,000, against 40,000 last year.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

C. C. Lewis, of Buffalo, N. Y., was a visitor on 'change this week.

There will be no session of the Minneapolis Chamber of Commerce on Nov. 11, Armistice Day.

H. F. McCarthy, of the International Grain Co., returned this week from a two weeks' vacation at Excelsior Springs, Mo.

The Froedtert Malting Co. has been granted corporate privileges in the Minneapolis Chamber of Commerce association.

Parker Harding, of E. S. Woodworth & Co., returned today from a trip through the Southwest visiting old friends in the grain business.

C. V. Fisher, Kansas City, Mo., F. R. Windee, St. Joseph, Mo., and C. S. Johnson, Boston, Mass., were visitors at the Minneapolis Chamber of Commerce during the week.

Delegates from eight Northwestern states gathered at the West Hotel, Minneapolis, last week and formed a Northwestern District association of the Community Millers' association.

The Big Flat Elevator Co. has been incorporated at Harlem, Montana, with a capital stock of $15,000. E. P. Ekegren is president, W. H. Reed vice president and M. L. Johnson, secretary-treasurer.

Cash Wheat—The demand for cash wheat in the Minneapolis market is good and prices show a very stubborn tone. Farm deliveries at interior elevators are very light and country elevator stocks were well cleared up recently when the car situation improved. Commission houses report light shipping advices. Good spring wheat is very scarce and when seed requirements are deducted from the marketable quantity of good wheat only a small total is available for milling. The total out-turn of the Northwestern states is estimated around 124,000,000 bushels and considerable of this amount consists of durum wheat. Mills are keen buyers of spring wheat that runs strong in gluten. There has been considerable buying of wheat for eastern shipment lately and this caused a firmer tone in the low grades.

The demand for winter wheat is good, but most of the holders are asking a sharp advance on account of the gains in Southwestern markets and the light movement to terminals. Buyers want the wheat but will not follow the sharp advances freely. Dark and semi-dark winter wheat is in very good demand. Yellow wheat is in quiet to slow demand.

The demand for durum wheat ranges from dull to good, according to kind and quality offered. Amber durum is wanted by macaroni makers and durum flour millers. Offerings are moderate.

Corn—The demand for old crop corn is very good and prices have been advancing moderately owing to the light offerings and strength in the December future. New crop corn is quite wet and the offerings are in quiet to fair demand, according to moisture test. Offerings of new corn for November and December shipment are fair and at good demand. December shipment is offered at ½c under the future. Some late November shipment corn is selling around December price. The demand seems to be good.

Oats—There is a good demand for heavy feeding oats and the market is stronger in tone compared with the futures. Old crop heavy oats are arriving in very small volume and are in good demand. Western buyers are taking most of the heavier quality. Thin oats are going chiefly to the elevator companies and No. 3 white sells at ½@¾c under December. Weight and transit will carry prices as high as 1½c over December. No. 4 white sells at 1@3½c less.

Rye—An elevator company is buying rye freely at ½c over December for No. 2 and there is a good milling demand for a certain quantity of white milling rye. Offerings are very moderate. Farmers are not selling much. The new crop is germinating in spots, but the average is poor.

TOLEDO.

Carl Bryant, Correspondent.

Flour mills in Toledo will not suffer for want of coal as a result of the strike of coal miners. They report having several weeks' supply.

The condition of Frank I. King, of C. A. King & Co., has steadily improved and he has been able to be on 'Change almost daily of late. He left Sunday for a short sojourn at Baltimore, Md.

Toledo grain dealers attended the meeting of the Northwestern Farmers' Elevator Assn., at Jewell, O., Monday evening. Those attending were: Joe Streicher and Harry Zimmerman, of J. F. Zahm & Co.; George Woodman, of Rice Grain Co.; Kent Keilholtz and Chas. Keilholtz, of Southworth & Co.; George Forrester, of E. B. Slawson Co.; Paul Barnes, of the Young Grain Co.; Harry De Vore, of H. W. De Vore & Co.; Fred. Wickenhiser, of John Wickenhiser & Co., and Oliver Randolph, inventor of the Randolph Grain Drier.

Considerable damage to corn resulted from the continued wet weather the past week, says John Wickenhiser, of John Wickenhiser & Co., grain dealers. He says there are many fields of husked corn in water soaked fields that will be a complete loss. The movement of new corn to market the past week is no criterion of what the movement will be this year. The few cars straggling in amounts to only the surplus in farmers' hands, and the general attitude is to hold off for higher markets. Bulges in the market will bring out a few oats from time to time, Mr. Wickenhiser believes, but the big oats movement is a dream and will not materialize. He points to the action of many farmers who have recently installed storage tanks on their farms as proof that they are in no hurry to sell and intend to let the market come to them. Contract grade of new corn is bringing about $1.41 in Toledo basis in store.

Some time ago we announced in this column the formal opening of trading in bean "futures" on the Toledo floor, the sale of one 100-lb. bag of choice hand picked having been recorded by George Forrester, of the E. B. Slawson Co., to Walton Stone, of the Churchill Grain & Seed Co. Last Saturday was "delivery day" and comment was heard on all sides as to whether the "Bean King" would be able to deliver. Stone indulged freely in remarks of a sarcastic nature and so riled the "King" that he resorted to drastic efforts to make good before the 12 o'clock gong. And the villain was foiled. A few moments before the fatal hour a dark-hued husky came a-grinning and escorting the 100 pounds of beans on a truck and deposited them at the feet of Stone. The deal was officially closed and Stone was seen to curse beneath his breath. It was stated later that the "King" had planned personally to demand his gold in payment before the beans were turned over, and had he carried out his threat—we shed a tear for Stone.

The grain markets were a dull and featureless proposition last week except for the upturn Saturday. Several cars of new corn were on the sample tables. A car of new No. 3 yellow sold on basis of $1.41 in store here. Two cars arrived in heating and musty conditions, both grading sample. They brought $1.22½ for one testing 20.8 and $1.28½ for 18.4 per cent moisture, basis 23c rate to New York. No. 2 white oats sold at 71⅞c to 73½c; No. 3, white, ⅛@¾c less and No. 4 white 1c discount. Oats testing 36 lbs. brought 1¼c premium over ordinary run. Sales Saturday were at the top of above range. Wheat receipts have been fairly good, probably as result of inability to secure permits for seaboard shipment. Spring wheat has been bringing handsome premiums on the sample tables. No. 1 dark northern spring sold as high as $2.80 and No. 3 dark $2.75 during the week. While dealers here note a good export inquiry for rye no business has resulted as buyers do not seem to want to take hold. Rye with corn as a feed is cheap and dealers are advocating the mixture. Rye is worth $1.37 to $1.37½. Barley market is narrow. Receipts light. Price about $1.40. Week's receipts: Wheat, 140 cars; corn, 10; oats, 34; rye, 40; barley, 2.

WESTERN CANADA.

A. Caldwell, Correspondent.

There is very little speculative interest in the market and unless there is some radical news to advance prices it is probable the public will stay out. Speculators here like a bull market and seldom butt into any other. At present sentiment is, on the whole, bearish. Brilliant crop prospects in Argentine are making exporters cautious.

Winnipeg.—All hopes of a delay in the closing down of winter may be abandoned. There have been heavy snowfalls over most of the prairie provinces during the past week and sub-zero weather has been the rule. Of more importance is the probability of an unusually early tieup of navigation. This probability was reflected on the market on Saturday and undoubtedly one of the factors of the strength at the close of the week. Shipping firms were active buyers on all recessions and there was a keener cash demand for both oats and barley than for a considerable time.

Rumors have been in circulation that the wheat board would put an embargo on coarse grain shipments and make extraordinary efforts to get wheat to the seaboard. There does not appear to be any necessity for taking any action at the lake head terminals or in the West. There is plenty of storage at the terminals and no trace of car shortage. The grain movement would have to be far heavier than it is at present to cause any congestion from lack of cars. In the East a different situation prevails, the elevators at the bay ports are overfull and generally there is shortage of storage right up to the Atlantic ports.

The export flour trade is very dull and there is no prospect of an immediate improvement. Europe wants to buy wheat to grind and to utilize the offal for stock feed. Canada wants her wheat ground at home and exported as flour so that the mill feed will be available for stock feed. Under these conditions the Canadian mills are confined to supplying domestic trade, which is not sufficient to keep them bu We can't sell flour so we have to wheat. In pre-war days a good exp flour trade was done with South Afri For the present Australia has this bu ness but Canadian mills are hopeful of capturing it.

Wess, extensive retail feed to lead the Democrats of St. Ber- (a suburb of Cincinnati) for the position. Both combine a high de- f executive ability with the quality sonal magnetism, are both officials Cincinnati Grain and Hay Exchange hamber of Commerce, and to those ange in daily intercourse with them oked upon not alone as leaders but larly deserving of the votes of the on election day next Tuesday.

The Louisville District Freight Traffic Committee has set Nov. 12 for a hearing at Cincinnati of the request of the L. & N. Ry. for cancellation of the present commodity rates on seed, grass, clover and millet, straight or mixed carload, from Cincinnati, Louisville, Evansville, Cairo, St. Louis and Memphis to Nashville and Clarksville, Tenn., also the request for the establishment of milling-in-transit arrangements to Knoxville on hay (carload), and barley, corn, kaffir corn, oats, alfalfa meal and wheat drawn from or through Cincinnati and the product shipped via the Louisville and Nashville to stations on the Knoxville and Atlanta divisions and branches of the Louisville and Nashville south of Knoxville.

Cash Markets.

Wheat—Receipts for the week were fair, but quality mostly poor. Good heavy milling wheat held a steady tone, but low grades and smutty sold slowly at a loss of 2c to 3c from last week. Toward the close even the top grades showed an easiness of tone, and prices a trifle lower under smaller milling inquiries.. Receipts for the week, 99 cars, of which only 15 cars graded No. 2 red. No. 1 red winter, track, $2.29@2.30; No. 2 red winter, track, $2.28@2.29; No. 3 red winter, track, $2.22½@2.24½; No. 4 red winter, track, $2.15@2.17; No. 5 red winter, track, $2.11@2.13; sample, as to quality, $2@2.20. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—Shelled corn was only in fair demand, but slightly higher than a week ago on option influences. Buying was almost wholly for shipment, and mainly for white and yellow for milling account. The former continued to maintain a premium over yellow and mixed. New corn arrivals were light, and mostly of low grades or sample of heavy moisture and damaged grains: No. 1 white, $1.51@1.52; No. 2 white, $1.50@1.51; No. 3 white, $1.49@1.50; No. 4 white, $1.47@1.49; No. 5 white, $1.45@1.47; No. 6 white, $1.43@1.45; No. 1 yellow, $1.47@1.48; No. 2 yellow, $146@1.47; No. 3 yellow, $1.45@1.46; No. 4 yellow, $1.43@1.45; No. 5 yellow, $1.41@1.43; No. 6 yellow, $1.39@1.41; No. 1 mixed, $1.46@1.1.47; No. 2 mixed, $1.45@1.46; No. 3 mixed, $1.44@1.45; No. 4 mixed, $1.42@1.44; No. 5 mixed, $1.40@1.42; No. 6 mixed, $1.38@1.40. New yellow ear corn ranged at $1.20 to $1.23, white at $1.21 to $1.24, and mixed $1.19 to $1.22 per bushel. Old from $1.20 to $1.40.

Oats—There was only a fair demand for oats during the week, but the movement was moderate and prices ruled steady to a cent higher. Grain of heavy weight continues to command a premium. No. 2 white, 74½@75½c; No. 3 white, 74@74½c; No. 4 white, 73@74c; No. 2 mixed, 73½@74c; No. 3 mixed, 73@73½c; No. 4 mixed, 72@73c.

CHICAGO.

The membership of D. R. Howland has been posted for transfer.

William W. Norris, secretary of the Wm. Nash Co., and well known member of the Board of Trade, died last week.

Two newly elected members of the Chicago Board of Trade are J. C. Knoche and John H. Van Dyke of the Nye & Jenks Grain Co.

The November, 1919, interest rate has been fixed at 6½ per cent per annum under the provisions of Section 15 of Rule IV of the Board of Trade.

The directors of the Board of Trade have decided to appoint a committee to prepare rules and regulations for a corporation plan for clearing trades on the Board of Trade.

Among recent visitors on the floor were S. S. Carlisle, Omaha; Harry Stratton and H. H. Ladish, Milwaukee; W. H. Hutton, Davenport; H. D. Raddatz, Toledo, and H. L. Webb, London, England.

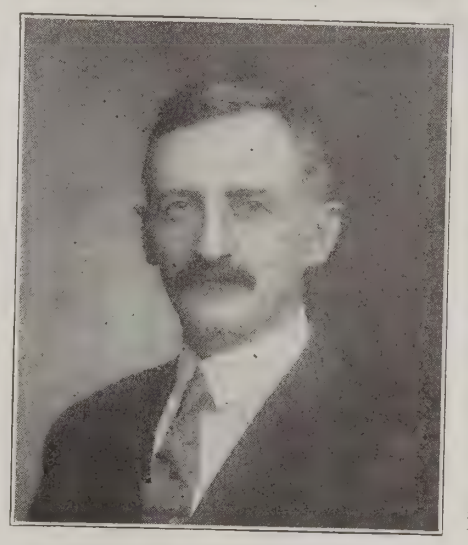
Board of Trade members defeated the proposed change in the rules which would have denied employes of one house the privilege of trading through another house without the permission of their employers. The vote stood 451 to 117.

Elevator interests of Chicago and vicinity assert that they will not be affected by the coal strike inasmuch as they have on hand a two or three months' supply of coal. However, a strike lasting throughout the winter would be a different matter.

A step which it is expected will check the movement of corn from northern Iowa is the fact that effective Nov. 5 individual permits will be required to ship grain to St. Paul and Minneapolis. This does not include shipments of grain originating in North and South Dakota, Minnesota and Montana.

PEORIA, ILL.

L. L. Eckard, Correspondent.



Oats receipts were 15 cars, demand good and market quoted unchanged to ¼c higher; No. 2 white, 71¼c; No. 3 white, 71c.

J. A. Waring, of S. C. Bartlett & Co., spent a few days during the week inspecting their country elevators which they recently purchased.

Peoria live stock market strong. Saturday's arrivals were about 800, with market 15@25c higher. Trading active at the upturn, with bulk of sales ranging from $13.80@14.25, with a strong demand on all grades. Cattle market steady at the recent decline. Top beeves, $15.

Peoria cash corn strong throughout the past week. Receipts were light, due mostly to the permit system and shortage of cars. Saturday's receipts were 26 cars, with market 1 cent higher on old corn and 2 cents higher on new corn. No. 1 yellow, $1.46@1.46½; No. 2 yellow, $1.45¾@1.46; No. 2 mixed, $1.45½@1.46; No. 3 mixed, $1.45@1.45½; new No. 4 yellow, $1.36½; new No. 5 yellow, $1.34; new No. 5 mixed, $1.32. Very few sales of new corn to arrive have been reported.

Announcement, Murphy-Grier Co., Peoria, Ill. T. A. Grier, of T. A. Grier & Co., Peoria, Ill., and M. F. Murphy, of the Murphy Grain Co., Springfield, have consolidated their interests in the above firm. J. W. Bryan, formerly manager of the Murphy Grain Co. at Peoria, and A. F. Rhodes, formerly with the Murphy Grain Co. at Springfield, Ill., are now connected

J. A. WARING

Recently Announced a Further Consolidation of Peoria's Grain Trade in the S. C. Bartlett Co., of Which Firm He Is General Manager.

with the new firm, which will carry on a general grain business in all branches, with offices at Peoria and Springfield. The firm is also correspondents of the Armour Grain Co., having private wires to all leading markets. The business of the Murphy Grain Co. will be continued as it is, the other stockholders having bought Mr. Murphy's interest.

ST. LOUIS.

E. E. Reeves, Correspondent.

J. A. Bushfield of the Bushfield Grain Co., receivers and shippers, Pierce building, was recently elected to membership in the Merchants Exchange.

Anthony H. Norris of the United States Grain Corporation is an applicant for membership in the Merchants' Exchange. Mr. Norris formerly was a member, but sold his membership.

Grain men on the Merchants' Exchange are loud in their complaints in regard to the delay incident to the individual permit system for moving grain which was inaugurated by the Government.

Bert H. Lang, second vice-president of the United States Grain Corporation, purchased the membership of Henry Harsh of the Harsh Grain Co., Nashville, Tenn., and presented the certificate with the transfer fees to his assistant, Anthony Norris.

Julius G. Meyer, who has been connected with the grain business in St. Louis for years, has associated himself as a solicitor, with the office of the Chris J. Muckermann Insurance Agency Co. Mr. Meyer, prior to his entry in the insurance business, was an officer of the Brinkmeyer-Meyer Grain Co.

W. J. Edwards, of W. J. Edwards & Co., who, with his wife, departed on a vacation trip three weeks ago, returned Monday, looking much improved as the result of his trip. Mr. Edwards visited Atlantic City, New York, Philadelphia and Cleveland on the tour, and reports that he had a very enjoyable time.

Local commission men are receiving many complaints of heavy losses of grain on account of the serious floods in this vicinity. There has been more than six inches of rain here in the last week and the Mississippi, Missouri, Meramec, Osage and Gasconade Rivers are all high and much damage to the grain of all kinds in the bottom lands has resulted.

Reports to local commission men indicate that farmers in Illinois will suffer heavy losses on account of the ravages of the Hessian fly in their wheat fields. Although instructed by both federal and state agricultural agents to delay their wheat seeding in the affected area many of the farmers were so anxious to take advantage of the big wheat prices that they disregarded this advice and sowed their wheat so early that it became infected with the flies.

Gilbert Sears, who had charge of the elevators for the C. H. Albers Commission Co., died at his home Nov. 3. Mr. Sears was the victim of several unfortunate accidents since he came out of the hospital after an operation for cancer of the jaw. Shortly after his recovery from the operation he was attacked by the flu, and while convalescing from that he fell in the bath tub at his home and broke his leg. Since then he had a severe attack of gout in which his limbs swelled to twice their normal size. His death was due to cancer.

Charles G. Simon, formerly president of the Great Western Feed Co., has just returned from Western Canada, where he has been operating an immense wheat ranch, seventy miles northeast of Calgary. Mr. Simon reports that he secured half a crop of the finest wheat he ever saw this year, but his neighbors were less fortunate, as most of their crops were ruined by the drouth. He brought with him a liberal sample of his wheat which, according to Canadian standards, tested 65 pounds to the bushel, but according to the Grain Corporation here it tested 62 pounds to the bushel. Mr. Simon has resumed his position on the Merchants' Exchange and will engage in the commission business, with an office in the Pierce building. He will remain in St. Louis until next fall when he will return to Calgary to superintend the harvesting of next year's wheat crop. The Great Western Feed Co. burned out in October, 1917, and Mr. Simon purchased his wheat ranch shortly after that.

PHILADELPHIA.

Geo. A. Rudderon, Correspondent.

Exports for the week ending Oct. 24 were: 298,591 bus. wheat, 20,000 bus. oats and 1,796 bus. barley.

The Commercial Exchange was closed on Tuesday (election day) it being a legal holiday in this state.

F. W. Behrens, the well known bag agent and member of the Commercial Exchange, has just returned from a successful business trip in West Virginia.

H. Polinsky & Co., 900 Passyunk Ave., has filed suit against Rosario Gambino, 816 Carpenter St., to recover $674, alleged to be due for flour sold and delivered.

The Grocers and Importers Exchange telegraphed their congratulations to President Wilson on the firm stand he took with regard to the coal miners strike.

George I. King, traffic agent for the Philadelphia and Reading R. R. Co., at the Commercial Exchange, left on Saturday for a ten days' hunting trip in the Bushkill mountains.

Gross Brothers of Hightstown, N. J., and John McGingan, Jr., general manager of the local branch of the Taylor & Bournique Co., have made application for membership in the Commercial Exchange.

Receipts of flour and grain for the week ending Nov. 1, were, 400 bbls. and 19,990,444 pounds of flour in sacks; 65,310 bus. wheat, 16,128 bus. corn, 78,335 bus. oats, 31,452 bus. rye, 38,750 bus. malt and 260 tons of feed.

The following out of town visitors were registered on 'change during the week: W. P. Greene, representing the National Oats Co., St. Louis; A. K. Taylor of Taylor and Bournique Co., Milwaukee; F. J. Malone, manager of the Halliday Milling Company, Cairo, Ills.; W. E. Messerole, assistant sales manager of the Omaha Alfalfa Milling Co., Omaha, Neb.; F. J. Koplin, Topeka, Kas.; J. N. Claybrook and R. T. Bansman, New York City.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

As the result of a collision of a motor car and a heavy street car D. J. Leverone, of Louisville, a poultry supply and feed dealer, is dead, having died on Oct. 27, of injuries received in the wreck.

Heavy rains during the past week have resulted in wheat seeding being further delayed, and it is now reported that the winter wheat acreage in Kentucky and Tennessee promises to be very small.

A meeting of the Louisville District Freight Traffic Committee will be held on Nov. 5, at which time a request will be considered for a revision of transit circulars to cover milling in transit grain in Louisville.

A telegram received from Franklin, Ky., Oct. 25, stated that Robert A. Aspley, 50 years of age, of the College Mill Co., died on that date of a hemorrhage of the brain. He is survived by his wife, son, and a number of relatives.

Louisville corn millers have reduced prices all along the line due to an effort to establish their prices on what they fig-

ure will be the December market when new corn is moving, thus enabling them to book immediate order business and sixty day business. Unbolted meal is quoted at $3.05 a hundred, with peal, cream and hominy grits at $3.25; corn flour, $3.35; and hominy meal, $57 a ton.

Alfred Brandeis, chief of the Enforcement Division U. S. Grain Corporation, reports that the license of J. T. Allen & Son, a partnership at Guymon, Okla., has been revoked until further notice, due to failure of the concern to furnish necessary reports of its operations to the Government.

R. E. Belcher, of the A. S. Krider Co., St. Louis, chairman of the National Bankruptcy Law Committee, was the principal speaker at a meeting of the Louisville Credit Men's Association at the Ballard & Ballard Mills on Oct. 27, the meeting following a dinner served from the company cafeteria. Mr. Belcher explained the present law, and the work being done in Washington to amend the law for the protection of general business.

THE CORN ADVANCE.

THE PRICE CURRENT-GRAIN REPORTER hit it just about right in considering corn values in our Grain Trade Review Oct. 8, when we said, "Efforts to talk the price down are made right along, but corn is a domestic supply and demand proposition and does not reflect as rapidly as would wheat any change of importance—the supply of old corn back in the country is much smaller than the trade believes—it will all be wanted before the new is ready to market—the cash situation has become somewhat stronger than during the previous week and the market failed to break with the passing of the September delivery."

Again in THE PRICE CURRENT-GRAIN REPORTER Oct. 22, we said, "A more favorable review regarding the ultimate price for corn is noted in many quarters."

Our consistent bullish advice was followed in THE PRICE CURRENT-GRAIN REPORTER Oct. 29, just before the sensational advance of Nov. 3, with the following, "While corn prices have held within practically the same range for nearly a month, indications now are that the market is getting out of the rut—the general disposition seems to be to hold for a remunerative figure, around $1.25 being the desire for new corn at country loading stations: this figure represents $1.35 and over for December at Chicago."

Oats in Primary Market.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	29,745,000	46,798,000
Milwaukee	9,955,000	15,569,000
Minneapolis	7,476,000	13,690,000
Duluth	376,000	1,788,000
St. Louis	7,166,000	7,878,000
Toledo	1,252,000	4,145,000
Detroit	725,000	1,520,000
Kansas City	2,541,000	7,010,000
Peoria	2,359,000	3,548,000
Omaha	2,988,000	7,231,000
Indianapolis	4,017,000	5,699,000
Total	68,600,000	114,876,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2, 1918.
Chicago	2,044,000	1,956,000	2,675,000
Milwaukee	874,000	946,000	1,419,000
Minneapolis	469,000	565,000	511,000
Duluth	7,000	19,000	44,000
St. Louis	568,000	539,000	482,000
Toledo	75,000	75,000	175,000
Detroit	46,000	43,000	88,000
Kansas City	141,000	152,000	226,000
Peoria	301,000	196,000	135,000
Omaha	186,000	140,000	402,000
Indianapolis	271,000	228,000	408,000
Total	4,982,000	4,859,000	6,565,000
Shipments	3,995,000	3,541,000	5,766,000

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 168,000 bu. last week and rye 46,000 bu. Corn decreased 116,000 bu., oats 90,000 bu. and barley 1,000 bu. Details follow, the last three ciphers omitted, except in the total:

	Public.	Private.	Total.	Last yr.
Wheat	6,010	12,606	18,616,000	20,160,000
Corn	244	349	593,000	2,173,000
Oats	2,376	4,681	7,057,000	6,129,000
Rye	1,650	1,092	2,742,000	439,000
Barley	61	195	256,000	1,359,000

TRAPP DUMPING SYSTEMS.

considerable time was necessary rain dealers to adjust their meth- of dumping grain from auto trucks nveniently as from the long-used wagon. Their properties were ly adjusted to accommodate the truck, for inventors quickly over- the difficulties which confronted rst auto truck users when hauling grain crops to the elevators; and is time there are many different anical methods of dumping grain motor-driven vehicles.

able among these is the Trapp ing System, perfected by C. L. of Omaha, Neb., who adopted the nical principle that it is always o handle heavy loads on a hori- l plane. His device causes the wheels of a truck to be raised by essed air to such height as is nec- to cause the grain to flow from uck body. The wheels are raised orizontal platform, and all danger e truck running backward and ing the housing on the rear axle uring the box off the chassis is ated. In fact, it is not even nec- to block the truck in any way, can run neither forward nor back- as the truck wheels are on a ntal plane before and after being to be dumped. The platform, always level at whatever height, ars on each of the guide posts n the function of keeping this tely in position and the platform e enough for all size trucks.

operation of the dump is ex- simple. The auto truck should be run forward until the back of the truck is over the pit; then by the turning of a valve compressed air does the work. The power device is a cheap one; in fact, there is nothing cheaper. Compressed air handles enormous weights with perfect safety, and it is not necessary to run the elevator machinery all the time in order to operate the dump. The air is pumped into a large steel pressure tank which holds enough air to dump enough loads of grain to fill the ordinary pit. This tank can then be replenished whenever the machinery is running to elevate the grain out of the pit. Compressed air means no jarring of the truck when the dump is being lowered, a fact which truck owners will greatly favor, for they appreciate hauling to a house which has considered the convenience and welfare of its patrons.

Elevator men who are limited as to space will find the Trapp Auto Truck Dump takes but little space. The air compressor may be hooked on to the line shafting at any convenient place, and the steel pressure tank may be set in some out-of-the-way corner and piped to any distance necessary. Installation of the dump may be readily accomplished by any handy mechanic, although if requested the company will send men to do that work. However, the dump is built complete at the factory and a man needs but few instructions to install it. It is not necessary either to tear out the old dump logs in houses already fitted up with wagon dumps, for the Trapp Dump should be placed just ahead of the dump logs and both truck and wagons dump into the same pit.

THE TRAPP DUMP FOR MOTORS AND WAGONS.

In addition to the dump above described the Trapp-Gohr-Donovan Co. of Omaha also manufactures a combination truck and wagon dump, the principle being the same as the auto truck dump. However, two lifts are used, one placed ahead of the other in the driveway to accommodate the different length in wheel base of trucks and wagons, both dumping into the same pit. The operation is a noiseless one. Teams will not be frightened nor can the horses injure their legs, as there are no open spaces into which they can step.

Already the company lists a long line of satisfied mill and elevator men, and George E. Winslade, general manager, will quickly respond to any queries regarding this dump, which is easy to install, economical to operate and is capable of handling the heaviest loads with absolute safety to all trucks.

Body of C. W. Dammann Found.

As a sequel to the mention of C. W Dammann, in this paper on Oct. 29, p. 35, the Bosworth Bag Co., of Memphis, under date of Oct. 31, wrote us as follows:

"We regret to advise you that C. W. Dammann, the balloonist, lost his life in the balloon race and his body has been found and buried in St. Louis. The remains were finally located in Lake Huron on the Canadian coast. Mr. Dammann's brother, C. J. Dammann, who is with me, has been in St. Louis for several weeks on account of this tragedy."

BARLEY MARKETS.

MILWAUKEE.—The local barley market opened up strong and 2@3c higher the early part of the week following the reports of the president's veto, but later business fell and lagged quickly as a result of the prohibition vote of Congress. Industries and shippers are operating only in a small way, the demand for all grades, particularly the lower, being slow and weak. Receipts also are small, there being only 142 cars for the week, as compared with 164 cars a week ago and 275 cars in 1918. Current quotations are: Good to choice, 48 to 50-lb. test, is quotable at $1.40@1.42; bright, $1.42@1.44; fair to good, 45 to 47-lb. test, $1.34@1.40; low, 41 to 44-lb. test, $1.25@1.37; 36 to 40 lbs., $1.22@1.26; feed, $1.22@1.30. Iowa quoted $1.25@1.40 for light to fancy; Wisconsin, $1.30@1.43; Minnesota, $1.25@1.40; Dakota, $1.25@1.40; feed and rejected, $1.22@1.33.

BUFFALO.—Although maltsters were out of the market to all appearances, it is generally believed they will again get busy and if the right kind of near-beer is made it is said more malt than ever will be used. It all depends on the brewer to make the lawful liquid popular or a failure. The supply of barley here is light and prices low enough compared with the West. Old malting is quoted at $1.42@1.48 and new $1.35 @1.42. Feed barley, $1.29@1.35.

MINNEAPOLIS.—The undertone of the market has been firm to strong lately because of a better malting demand that has prevailed. Choice barley is scarce and wanted. Thin barley is in slow demand, but daily offerings are absorbed. At times the market shows a weak tendency, but generally recovers before any important loss is noted. Country movement light and receipts are limited, being extremely light compared with the figures of the previous year.

CHICAGO.—The barley market last week was very slow and erratic. Receipts were light; quality not particularly good. During most of the week the market was decidedly easy to weak and prices generally somewhat lower than previous week. Maltsters were rather reluctant to take hold and after Thursday showed no desire to make purchases on account of the coal strike. The domestic demand throughout the week was very slow and there was only a show of interest on the part of exporters. After a very slow week during the closing session on Saturday the elevator interests seemed to show more interest and gave some little life to the market. Monday developed a stronger undertone without, however, any material change in prices. The demand was better both from the maltsters and elevator interests but the industrial demand was slight. Offerings continued light. There were reported sales of 22 cars at a range of $1.24@1.39. Futures were irregular. December sold off 1c and closed at $1.37½. May closed higher by 2¼c@$1.34. Exports from Atlantic seaboard were 313,000 bus., compared with 56,000 a year ago. The visible supply for the whole United States decreased 11,000 bus. and the local stocks by 1,000 bus.

KANSAS CITY.—Coincident with a further advance of 4@5c in cash prices of barley this week there was an increase of 10 cars in the receipts, indicating that the level established is more satisfactory to producers. Total offerings were 19 cars, against 60 a year ago. No. 3 closed nominally at $1.26@1.27; No. 4, at $1.25. Demand for both local and outside accounts was good. The filling of shipping orders reduced stocks 15,000 bus. to 128,000 bus. Much of the barley raised in western Kansas and Colorado has been feed because it was cheaper than corn or oats, but car shortage has been a big factor in retarding the movement.

DULUTH.—Business in the barley market remained absolutely dead during the last week. With shipments to the East curtailed on account of freight congestion, operators received no demand from that quarter. Receipts for the six days were only 17 cars against 184 last year. Quotations are unchanged to 4c up at 97c@$1.31.

PORTLAND.—Prices for barley are somewhat firmer with fair inquiry during the past week. Offerings, however, the *Commercial Review* says, have been ample but buyers are rather slow to take hold. Choice stock is in best demand and of course the prohibition law has affected prices on this variety. No barley is being exported from this market. Prices for No. 3 barley is $1.65; for feed quality No. 2 Eastern $61 per ton.

SAN FRANCISCO.—The demand for barley is good and prices are slightly stiffer and higher. The trade, however, is only on small lots, as buyers are inclined to believe the market will have to go lower. Quotations for spot feeding varieties are from $2.95@3 cental, shipping barley $3@3.10.

RECEIPTS AND PRICES OF

Receipts of rye at the principa mary markets of the Central We the week ended Oct. 31, and fo corresponding week last year, as piled by the Minneapolis *Market ord*, were:

Wheat Movement from Canada.

At Washington last week senators questioned Mr. Barnes as to reports that Canadian wheat is being brought across the line. He said that approximately 3,000,000 bus. were moved into the United States by farmers living near the border. This was permissible under the "courtesy" arrangement which allows a farmer to haul in his wheat in wagonloads where nearby markets are across the international line. Exchange of "courtesies" between the United States and Canada is limited to wagon movements between the two countries. Although 3,000,000 bus. approximately were brought in from Canada last year, very little went from the United States into that country. This is explained by the fact that most of the mills are on the American side, he added.

The North Dakota Experiment Station represents Marquis wheat as the best hard wheat for production in that state. Although susceptible to rust, early planting is advocated.

Speaking of a Commission Firm---The Unfailing Choice of Men of Good Judgment is usually BRIDGE & LEONARD, Chicago.

Burlap Market.

The burlap market in New York has been under the weight of the longshoremen's strike. There are not many goods on shore, while the vessels of wheat are in the harbor with burlaps on board cannot be unloaded, so that they might almost as well be back in Calcutta as they cannot be reached. Reports from Calcutta are indicative of a firmer market there and of a good recovery from the slump a fortnight ago.

Corn Advancing.

We had a steady advance in corn last week. Shorts had only started to cover. There is no immediate prospect of having a sufficient movement to even supply the cash demand. Our market is in excellent condition for consignments. We would not be surprised to see a marked advance in the futures; at least, do not think it safe to be short. December corn increased its premium over the May, reflecting the short interest in the December, which is quite large.—*W. H. Perrine & Co., Chicago.*

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The Globe Milling Co. of Stockton, Cal., purchased an additional 400 foot frontage on Stockton channel. The company now has 1400 feet of waterfront. The Globe Milling Co., when ready for operation, will be a $1,000,000 institution.

The Oklahoma Flour Mills Co. will increase the capacity of its plant at Enid, Okla., to 200 bbls. daily. J. R. Chapman, general manager, says the new mill will be capitalized for $100,000 and will be owned by himself and Fred L. Meyer. Additions to the Oklahoma Mills will be made at the present site and the new machinery installed there.

A new six story concrete flour mill with a capacity of 700 bbls. will be erected at Sterling, Kansas, for the Arnold-Madaus Milling Co. A large elevator and a two story warehouse will adjoin the mill and it is expected the plant will be in operation by June 1. A corn products mill of 300 bbls. capacity will also be operated. The Finton Construction Co. of Kansas City has the contract.

The Northern Flour Mills Co., Portland, Ore., recently incorporated with a capital of $500,000, is now in full operation. The company formerly operated at the Northern Grain & Warehouse Co. of Portland and decided to divorce the milling business from the grain and warehouse operations. The new milling company was formed as a separate company. The milling interests comprised in the consolidation are the Vancouver Flour Mills, Vancouver, Wash.; Eureka Flour Mills, Walla Walla, Wash.; American Falls Milling Co., American Falls, Ida.; Ravalli Flour & Cereal Mills, Missoula, Mont.

FLOUR MARKET.

Except in the East the flour market is generally active, with mills sold up to the 60-day limit. In the East, however, there is considerable uncertainty as to cereal stocks, and the market naturally is somewhat erratic, but dull as a whole. Mr. Barnes says that the Americans seem to prefer white flour, the whiter the better apparently, as the lower priced grades are not wanted. Resale offers are still a factor in the New York market. In the West and Northwest prices are firm to advancing, while in the Southwest distinct advances have been made during the past fortnight. In the soft wheat belt the mills are running full time, not unfrequently making 16 hours a day. The Southern trade is not brisk but healthy, while the Southwest reports no material change in prices but distinct firmness.

FLOUR MARKETS.

DULUTH.

Duluth, Nov. 1.—Both milling companies operating on this market report that they are sold ahead to the two months limit permitted under the Grain Administration's regulations. They have lately on that account been compelled to turn down some proffered business. Inquiry for flour is active with dealers looking forward to advances on account of the stiff premiums being paid for wheat. Prices of flour are unchanged as follows, per bbl., in carlots, at mills: Family patents, jute, $12.10@12.50; bakers' patents, jute, $11.85@12.25; first clears, jute, $9.25@9.75; second clears, jute, $7.25@7.50.

BOSTON.

Boston, Nov. 1.—Conditions in the local flour trade are fully as unsatisfactory as recently noted. Some selling agents report their mills as having sold practically all the flour possible under the sixty-day clause of their licenses, while with others business continues dull and uninteresting. It is surmised that even those who have come nearest to selling their capacity for the balance of 1919 could still fill a few carloads that could be delivered to a good customer. When analyzed, the situation seems actually to be that sellers are disappointed over the fact that the market does not show more snap.

Usually at this season most of the larger buyers would be covered well into the new year, in many cases far ahead as next July. Current prices for wheat flour, f. o. b. Boston, in carload lots, mill sh ment, for 196 pounds, in 98-lb. sacks, $12@12.85 for standard spring pate $13.15@13.40 for special short patents, $ @10 for spring clears, $11.50@12.50 hard winter patents, $11@11.50 for s winter patents, $10.25@10.75 for soft w ter straights, and $10@10.50 for win clears. Receipts for the week ending N 1 were 45.765 bbls.

NASHVILLE.

Nashville, Tenn., Nov. 3.—Flour trade the Southeast holds up well. Soft wh mills are running three-fourths of pacity. Prices are firm. Millers have s out notice to buyers that the clause the Grain Corporation prohibiting sa for more than sixty days must be stric enforced and if flour is not withdra within the time contracts will be c celled.

Nashville and Southeastern mills, w capacity of 196,470 bbls., reported out last week of 150,567 bbls., or 76.6 per c of capacity, which compared with 153.

and 76.3 per cent the preceding week 104,001 bbls. and 54.1 per cent the week last year.

Quotations: High grade soft winter at patents, 98 lbs., cotton, f. o. b. Ohio points, $11.50@11.70; standard patents, $10.50@10.80; 100% flour, $10.20@10.40.

NEW YORK.

New York, Nov. 1.—The same conditions which characterized the local flour market two weeks ago continued to prevail this week. Mills, especially in the spring wheat sections, were very firm and prices experienced slight further advances. Hard winter wheat flours were also steadily held and there was a lack of pressure from the trade in general.

The demand here was extremely slow and was supplied largely through resales. There appeared to be an overplus of flour on hand here and as owners were willing to make sacrifices in order to meet financial obligations and to reduce storage, they offered flour at concessions and much under mill prices. It is the consensus of opinion among local flour merchants, however, that most of the distressed flour was of a quality not actually wanted here and represented purchases made earlier in the season at lower prices. The trade at large again displayed a willingness to buy in a moderate way of flour of established quality, and fixed prices were not too high.

Spring patents were quoted at $12@ Kansas straights, $11.25@11.75; and winter straights, $10@10.40.

BALTIMORE.

Baltimore, Nov. 1.—The domestic demand for flour continues disappointing and there is also very little doing for export, in consequence of which there is considerable flour at the shipping terminals awaiting the arrival of ocean steamers to take on board. The Grain Corporation is again trying to sell flour at $10.25 per bbl. in round lots, specifying profits to be allowed the jobbers and retailers, and this is exerting a quieting influence upon the movement of known brands at a higher level. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $12@12.25; spring straight, $11.50@11.75; winter patent, $10.50@10.75; winter straight, $9.75@ rye flour, pure to blended, $6.75

DETROIT.

Detroit, Nov. 1.—Millers are active purchasers of wheat and there is quite a scramble to secure spring and hard winter varieties. The market is firm and unchanged at $2.27 for No. 1 red, $2.25 for No. 2 mixed, and $2.25 for No. 1 white. The trade is in fair demand but nothing extra. The bakery trade is pretty well supplied with this territory. Mill feeds of all kinds are in active demand. Quote: Fancy spring wheat flour, $13.25@13.75; fancy winter wheat flour, $12.75; winter wheat, second grade, $12; winter wheat, straight, $11@ per bbl. Bran, $76; standard mids, $51@51.50; fine middlings, $61@ cracked corn, $63@64; coarse corn-meal, $58@60; chop, $51@52 per ton, in 100-lb. sacks.

KANSAS CITY, MO.

Kansas City, Nov. 1.—Irregular reports were made this week on flour business but sales were generally active on new and old crops, the latter predominating. Production was 84,300 bbls., the same as a week ago. Shipping directions on previous sales were slow and flour, especially the lower and lower grades, accumulated. The best demand was for short patent, which was taken by the family trade. No export sales were made by the Government during the week. The mills were chary about making too much patent in view of the limited limitation of choice hard and soft wheat in the local offerings. Cars

for shipping flour were fairly plentiful here and mills in Kansas were able to send flour out more freely. There was a fair trade in mill feeds with bran in better request than shorts. Bran closed at $1.80 @1.83 per cwt., sacked, or 2@3c lower than a week ago. Brown shorts were worth $2.25@2.35; gray shorts, $2.40@2.45

Prices of flour in carlots, sacked, in 98-lb. cotton bags, per bbl.:

Hard wheat—	Nov.1.	Oct. 25.
Short patent	$11.50@12.40	$11.40@12.00
Long patent	11.10@11.60	11.00@11.50
Straight	10.60@11.25	10.50@11.15
1st clear	9.60@10.60	9.50@10.50
2nd clear	7.50@ 8.50	7.50@ 8.50
Low grade	6.50@ 7.50	6.50@ 7.50
Soft wheat—		
Fancy patent	10.80@11.10	10.80@11.10
Standard patent	10.40@10.70	10.30@10.60
Straight	9.80@10.00	9.70@ 9.90
Clear	9.20@ 9.40	9.20@ 9.40
Low grade	6.50@ 7.50	6.50@ 7.00

MILWAUKEE.

Milwaukee, Nov. 1.—The local flour market has been fairly active during the past week, showing a continued increase in demand for wheat flour. However, it has developed to a point where increased production is sought for rather than demand as the majority of the local mills are already reported as being booked up 30 to 60 days in advance.

The demand for rye flour is reported easier and slow. It is expected, however, that the rye market will be greatly enlivened with the coming of colder weather, which will make flour generally less easily obtainab'e with the usual congested winter shipping facilities, and stimulate buying to assure winter supplies.

The car shortage is regarded as very critical which is greatly delaying incoming and outgoing shipments. No relief is in sight.

The Milwaukee mills showed a slight increase in production this week over last, producing a total of 22,200 bbls. of flour, of which 16,400 bbls. were wheat flour, or approximately 68 per cent of total mills capacity, and 5,800 bbls. were rye flour.

Current quotations, in car'ots per bbl., in cotton, are: Spring wheat patents, $12.60@13; straight, $11.40@11.80; first clear, $8.50@9; rye flour, pure, white, $7.50 @7.75; rye flour, straight, $7@7.25; rye flour, dark, $6.50@7. Corn flour is nominally quoted at $3.80; corn meal, white, $3.70, and corn grits, $3.70, all in 100-lb. cotton sacks.

PHILADELPHIA.

Philadelphia, Nov. 1.—Flour receipts for the week were 400 bbls. and 19,990,444 lbs. in sacks. The market shows no improvement over a week ago. The general trade is dull and sluggish with buyers and sellers apart. The firm attitude maintained by the mills in the Northwest does not appear to have much influence here as long as buyers can obtain enough second-hand flour to satisfy present wants on resale at about 60@75c per bbl. under mill limits, and these prices even fail to stimulate business to any extent.

Quote per 196 lbs., packed in 140-lb. jute sacks. Soft winter straight, Western, $10 @10.25; do., nearby, $9.75@10; hard winter straight, $11.35@11.55; do., short patent, $11.75@12.25; spring first, clear, $9.25 @9.75; do., patent, $12.10@12.35; do., short patent, $12.50@12.75; fancy spring and city mills patent, family brands, $12.75@ 13.25; rye flour, $7@7.35 per bbl. in sacks, as to quality.

Exports to Europe.

The London *Grain Reporter* gives the following totals of exports to Europe from North America and Argentine from Jan. 1 to Oct. 2, 1919 in quarters:

Corn	6,671,500
Barley	5,174,000
Oats	5,729,000

Community Millers.

The Northwestern district branch of the National Community Millers Ass'n has been organized by delegates from eight states who met recently at the West Hotel, Minneapolis. The district officers are R. D. Collins, Windom, Minn., president; Peter Vandergon, Maple Lake, Minn., secretary.

Wheat Movement—Flour Production.

The Grain Corporation on Oct. 28 reported the wheat and wheat flour movement throughout the United States for the week ending October 17, 1919, in comparison with the figures for the same period a year ago, as follows:

Wheat—	1919.	1918.
Rec. from farms, bus.	19,398,000	27,884,000
Previous week	19,445,000	26,535,000
Rec. June 27-Oct. 17	514,229,000	494,958,000
Flour produced—		
During week, bbls.	3,394,000	2,660,000
Previous week	3,503,000	2,814,000
June 27-Oct. 17	42,534,000	36,158,000
Stocks—		
Wheat, all	288,504,000	271,373,000
Previous week	288,320,000	262,905,000
Change for week	*184,000	*8,468,000

*Increase.

EXPORTS OF WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to October 17, amounted to 52,234,000 bus. of wheat and 5,475,000 bbls. of flour, making a total equal to 76,872,000 bus., compared with 53,881,000 bus. of wheat and 5,271,000 bbls. of flour last year, October figures last year being prorated to October 17, making a total equal to 77,609,000 bus.

Export Markets for Argentine Flour.

Flour milling is one of the best organized and most highly developed industries in Argentina, the total production of flour reaching nearly 1,000,000 tons per year. There are about 370 mills of which practically 70 are in the provinces of Sante Fé and Cordoba. Argentina is now an exporter of flour to Brazil and other countries. 56 large mills are advertising in a North American trade journal in the hope of being able to export flour to the United States. —*Commerce Reports.*

An employment agency conducted by the Iowa Employment Bureau during the first seven months of 1919 found places for 4,700 special harvest hands at $3@3.75 per day in the Southwest and $5 per day in the Northwest. Sc counties paid as high as $6, the hig average wage for the state being $4

The Rotary Club at Port Arthur, T has taken up the matter of securin grain inspector. Although considera wheat is shipped out of that port it pears there is no official inspector th

Newton, Kans.—The Goerz Flour Mills Co. has completed plans for the erection of a new two-story fireproof office building.

Whitewater, Kans.—The Whitewater Flour Mills Co. is preparing to make a large addition to its present plant, in the way of more store room.

Kansas City, Kans.—John P. Chess, for 28 years a member of the Kansas state grain inspection department, died at his home in Kansas City after an illness of some time.

North Topeka, Kans.—The Farmers' Union at Seal and Bunbeam school districts, west and southwest of town, have over $5,000 in sight towards the building of a Farmers' Elevator here.

Colby, Kans.—J. L. Herlacher and his son will soon start work on the erection of a new 25-bbl. flour mill for Colby. The mill will be equipped with the best up-to-date cleaning and scouring machinery.

MICHIGAN.

Dafter, Mich.—Chippewa county contemplates the erection of a mill with 50 bbls. daily capacity. John C. Taylor and R. J. Forgraves will build a mill here to be in operation March 1, 1920, to cost $14,000.

MINNESOTA.

Pine River, Minn.—The elevator of the Erwin Milling Co. is completed and all machinery installed.

Gordonsville, Minn.—Will Plowman is the new manager of the Thompto & Heiny elevator, taking the place of L. Bolton.

La Salle, Minn.—The Farmers' Grain Co. closed a deal whereby they became owner of the elevator formerly owned by the Eagle Roller Mills.

Guckeen, Minn.—The Guckeen Farmers' Elevator Co. has been incorporated with a capital stock of $25,00 by Henry Seglum, F. E. Child, John W. McGoff and Neal Kennedy.

Madelia, Minn.—The Equity Co-operative Exchange is negotiating with contractors to build the elevator, and as soon as balance of stock is sold the building operations will begin.

Elk River, Minn.—The new flour mill at this place has been opened with C. R. Remer of Grace City, N. D., in charge. The daily capacity is 60 bbls. The firm is known as the Elk River Milling Co.

Bemidji, Minn.—The Beltrami Elevator & Milling Co. completed its new 28,000-bushel elevator and warehouse, replacing plant destroyed by fire in the spring. The elevator has 11 bins and is 36x36 feet long and 87½ feet high, covered with galvanized iron sheeting. Warehouse is 50x50 feet. Thos. S. Ervin is president.

MISSOURI.

Jenkins, Mo.—The mill owned by Davis Bros. at Jenkins was burned.

St. Joseph, Mo.—The Schreiber Milling & Grain Co. is building an addition to the heading house at the plant.

Sweet Springs, Mo.—The Farmers' Association is suing the Mo. Pac. Ry. Co. for $50,000 damages for setting fire to and destroying the grain elevator here.

Poplar Bluff, Mo.—The Imperial Mill has been sold to J. Glendenning and W. A. Malugen of this city. J. Glendenning is now managing the mill. Arch Glendenning was the former owner.

Kirksville, Mo.—The Farmers' Co-operative Elevator & Shipping Association has been incorporated with a capital of $10,000. Incorporators: G. A. Leavitt, D. V. McClelland and E. A. Coghill.

Lancaster, Mo.—Fire Oct. 20 destroyed the poultry and seed house of J. C. Heckett, a building owned by Schuyler County Milling Co. and slightly damaged the city electric plant. Loss is estimated at $20,000.

Corsicana, Mo.—The mill at this place belonging to M. E. Miller burned recently. Between 700 and 1,000 bushels of wheat and a quantity of flour were burned. There was $5,000 insurance on building and machinery.

Kansas City, Mo.—Fire in coal pockets in the yards of the F. E. Ransom Coal & Grain Co. recently resulted in a loss estimated at from $75,000 to $100,000. Fire spread to a grain elevator containing 30,000 bushels of grain and virtually destroyed it

MONTANA.

Saco, Mont.—The elevator at this station owned by the St. Anthony & Dakota Elevator Co. is closed for the season.

NEBRASKA.

Merna, Nebr.—The new elevator at Merna is ready for operation.

Whitney, Nebr.—The Nye Schneider Fowler Co. is repairing its elevator at this place.

Clarkson, Nebr.—The Farmers' Union Elevator & Supply Co.'s elevator is completed.

Osmond, Nebr.—L. Husby has succeeded J. Dennis as manager of the Farmers Elevator Co.

Lodge Pole, Nebr.—A new elevator will be built by the Lodge Pole Lumber & Grain Co.

Wellsfleet, Nebr.—A 10,000-bushel elevator will be built by the Farmers Equity Exchange.

Gresham, Nebr.—R. L. Thompson has purchased the Updike Grain Co.'s elevator at this place.

Moorfield, Nebr.—The Middle Elevator at this place is being torn down for the lumber that is in it.

Cordova, Nebr.—The Octavia Lumber & Grain Co. has purchased the Updike Grain Co.'s elevator at this place.

Dixon, Nebr.—The Atlas Elevator Co. has sold its elevator here to Frank Hopkins who took charge Nov. 1.

Hastings, Nebr.—The Central Granaries Co. of Lincoln is constructing an elevator 74 feet high, entirely of cement.

Ulysses, Nebr.—J. L. Rogers has been appointed as manager of the Central Granaries elevator to succeed Hugh McCall who resigned.

Creston, Nebr.—The Farmers Grain & Stock Co. has been chartered with $50,000 capital by John S. Becher, Heinrich Meyer, Erick E. Luedtke, et al.

Talmage, Nebr.—The Farmers Union Co-operative Grain Co. will rebuild its elevator. Daily capacity 25,000 bushels. Tile will be used in construction.

Grand Island, Nebr.—Construction work

The Permit System.

[Concluded from page 17.]

te has been received and that cars n placed when permits have been t; in fact, there is such a wide e ncy in the comparison as be- he number of applications for i granted and the cars actually d to apply on such applications i is self-evident that there is in- ery and endless confusion under n vidual permit system.

COTTON CROP.

e ureau of Crop Estimates gives o ition of the cotton crop on Oct. llows (percentage of normal): d States 51.1, Virginia 63, North i 64, South Carolina 60, Georgia l da 33, Alabama 44, Mississippi siana 32, Texas 46, Arkansas 55, e 58, Missouri 70, Oklahoma 68, r a 92, Arizona 89.

s estimates above have been consequence of a resolution y Congress calling therefor. n as similar reports have not de regularly in the past, no on of the condition on Oct. 25 e can be made with condition on d e in past years; hence no basis r d for a forecast of production.

NATI GRAIN PERMITS.

S. Reeves, traffic manager of the rti Grain and Hay Exchange, s d a statement to shippers and e of grain from which the fol- s taken:

m aints from men desiring to gr n to the extent that they can- b in cars, railroad officials say, t ell founded, as a general prop- n. They admit that they are not h g cars to every man who is g ship grain; their declination, e is due, not to any inability or i ness to furnish cars but to the a the prospective shipper is not o how a permit from the Grain a on or from one of the grain t es at terminal markets, which dicate that there is elevator a ilable for what he is anxious w d at the destination to which i er desires to send his grain.

i shipments to the Cincinnati t ve been on the permit system . 1, and it is necessary under m that the shipper secure a r shipping to the Cincinnati A free movement has, there- e an unknown fact this grain n season.

evators at Cincinnati have e filled to their capacity at any t ng the wheat shipping sea- d he grain has been moved in t romptly and we feel that the e has been retarded on account o ugh understanding of some of i rs as to what requirements e ary under the grain shipping s tem."

INTERNATIONAL GRAIN AND HAY SHOW.

Supplementing the regular premiums offered in the International Grain and Hay Show at the Union Stock Yards, Chicago, on Nov. 29 to Dec. 6, the management has arranged for a single ear class in each of the six regions. Cash premiums will be offered and should bring out a large and attractive exhibit. A single ear class is provided in each of the six regions with premiums as follows: First premium, $15.00; second, $12.00; third, $10.00; fourth, $8.00; fifth, $5.00.

The individual ear class, says Prof. Christie, superintendent of the Show, permits a display of ears of the type and ideals of the corn growers. Every corn grower will have one ear that represents the ideal to which he is working in corn breeding and seed selection. This should be encouraged as the exhibits of individual animals are given prominence in the Live Stock Show. In corn, "Like produces like," just as it is found in breeding live stock.

Not Necessary to Build Elevator on Railroad Land.

It is hardly necessary to mention the exacting nature of railroad leases. Not only is the rental price increasing every year (in some cases amounting to as much as $200 a year) but the exemption clauses from damage claims and similar unfair exactions places an elevator man in a position where he never knows what to expect next. Some petty official is likely to come along any day and order the building moved back a foot or ten feet, as he may see fit.

To get away from such unfair leases, elevator men are putting their elevators back on their own land and yet they are able to load cars to full capacity without any expense for labor in the car and without building their elevator any special height. This is accomplished by using an Air Blast System of loading their grain. The grain is blown through two 8-in. round spouts (where the distance is from 20 to 100 feet) and into the cars, loading both ends at the same time, without anyone setting foot inside the car at any time. The spouts are even quicker to put in place than the ordinary gravity spout and need no shifting during the loading process. The center is loaded as well as the ends, without any labor in the car. The grain cannot be injured for it does not pass through the fan in the Boss Air Blast Car Loader, neither does it pass through any forced feed device. The grain, whether wheat, corn, oats, barley, simply slides into the blast of air, where it is picked up and carried to the ends of the longest cars. The elevator can be very low if desired, as height need not enter into the consideration.

Taking into consideration the life of the spouts and the cost of the loader, even at present prices, the cost for machinery for loading cars, based on handling 300,000 bus. a year, is not over eight cents a car. If less grain is handled the life of the machine is that much longer. A 7½-H. P. motor is usually employed to drive the loader direct or it can be connected up to your main shafting through a counter shaft to give proper speed.

Sketches of such installations and a large booklet, "$60 a Car Profit," will be mailed by the Maroa Manufacturing Co., Maroa, Ill., upon request. It may pay you to get it at once.

BROOM CORN.

Rainy weather in Oklahoma again retarded field operations in the broom corn districts but elsewhere the situation was favorable enough to increase deliveries and country buying. There does not appear to be any particular change in prices, the Lindsay district reporting $160@250, according to grade. The dwarf areas of Oklahoma reported some weather damage and prices at various markets rule from about $100 for the poor stock up to $200 and even above for the better qualities, the bulk ranging from $140@180. In the western part of Kansas and Oklahoma the spread is from $125@200, with the bulk at $135@175. The *Broom Corn Review* says that with improvement in the weather more activity is looked for in field work. The Wichita market reports additional buyers in the field during the past week but the market showed no material change as to prices, corn being valued from $110@115 for old stock and damaged, with new dwarf at $140@225; Lindsay stock $175@300, according to quality. Holders are generally more firm. In Central Illinois prices range from $150@350 for Illinois corn, with the top at $300@350. Warehouses are also handling corn from Western districts.

Field Seeds

A fire recently destroyed the poultry and seed house of J. C. Hockett at Lancaster, Mo.

Owing to shortage of bottoms a large surplus of linseed and rape seed has accumulated at Karachi, India.

Henry Lex, Ft. Dodge, Ia., has been re-elected president of the Blair-Harper Seed Co., of Ames, Ia., the manager of which is T. D. MacClanahan.

A large seed firm writes C. A. King & Co. that alsike looks very strong and "should, we believe, sell nearly as high if not as high as red clover during the season."

A Darmstadt firm writes C. A. King & Co. that red clover seed of Germany promises fair but even with a good crop they would not have enough seed for their own needs.

The Institute of Rome estimates the linseed crop of Italy, Canada, United States, India, Japan, Tunis, at 13,730,000 cwts., which is 35.4 per cent under the production of last year and 36.5 below the average of the 5 years 1913-17.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Nov. 1, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts—		Shipments—	
	1919.	1918.	1919.	1918.
Timothy, lbs..	2,500	70,000	60,000	34,608
Clover, lbs. ...	307,983	112,400	160,000	124,100

Toledo Seed Movement.

Following is a comparative statement of receipts and shipments in bags of forage grain seeds at Toledo:

Louisville Seed Market.

LOUISVILLE, KY., Nov. 1.—The seed situation shows very little change over the week, demand being dull, due to wet weather, and seedsmen reporting very little activity in any line. Redtop is showing some activity, as it has been generally ascertained that the crop is short and that practically all seed is out of the farmers' hands. Timothy is dull, due to the late season, while red clover is too high to move. Bluegrass is showing some activity, but orchard grass is dull. Onion set inquiry is somewhat better than it was.

The second crop of potatoes is still in the ground, as the weather has been too wet to permit digging. However, a fair seed crop is expected.

Toledo Seed Prices.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Nov. 1:

	Range for week,		Close	Close
Clover—	High.	Low.	Nov. 1.	Oct. 25.
Cash	$31.00	$30.00	$30 00	$31.25
Dec.	30.00	29.25	30.00	29.80
Jan.	30.10	29.30	30.10	30.00
Feb.	30.25	29.50	30.25	30.20
March	30.00	29.10	30.00	29.80
Alsike—				
Cash	29.50	29.30	29.50	29.45
Dec.	29.50	29.30	29.50	29.50
March	29.75	29.45	29.75	29.65
Timothy—				
Cash, old..	5.35	5.30	5.30	5.35
Cash, new.	5.60	5.55	5.55	5.60
Dec.	5.65	5.60	5.62	5 65
March	5.77½	5.75	5.75	5.77
April	5.75	5.75	5.75	5.75

Minneapolis Flaxseed Market.

MINNEAPOLIS, Nov. 1.—The greater portion of the flax receipts coming on the market here are taken on arrive contracts and spot offerings remain very light. There is a sharp local demand for seed and crushers in other markets are bidding prices up to get supplies. This outside demand is for full carlots in equipment that can be run out of town without transfer. It is hard to get seed in full carloads and the outside crushers pay up strong. Local crushers have been following closely with their bids and at present prices are well above the level of the futures. There is a good demand for flax to arrive too, but offerings are very light. Argentine seed ordered from New York has not arrived here yet, owing to the delay suffered because of the strike of the longshoremen. Local and Duluth stocks are extremely light and the crushers do not expect any deliveries on the October and November contracts they hold.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Ch for the months and weeks named in 1919 and 1918, in pounds (000 omitt

World's Linseed Market.

NEW YORK, Nov. 3.—*United Kingdom:* There has been a fair trade passing in linseed in the United Kingdom most of which has been in Plata grades for forward shipment. Linseed oil has ruled firm during the past week with a more active demand in evidence.

Linseed markets on the Continent also displayed a firmer tone. Oil, however, remained dull.

India: Continued good weather for seeding purposes has prevailed, a outlook for the new crop in this try can be considered quite fav Arrivals of old crop seed at the for shipment were small, and ances amounted to 106,000 bus.

Argentina: Light rains have in parts, but weather now is ge favorable, being clear and cool. ther rainfall would probably del ting to some extent, but the outl the new crop would not be ma impaired. It is quite evident An interests hold liberal quantities new crop options, and that local lators are heavily short the dist sitions. The inquiry for old cr appears to be falling off. Loadin dwindled and arrivals from the i have been on a smaller scale. T way situation in general is uns tory.

Duluth Flaxseed Market.

DULUTH, Nov. 1.—Trading in f was slow during the last wee clines came on Monday and T but strength was shown on We and Thursday, recoveries of 8@ being made. Quotations ran of on Friday and for the six days gain of 1 cent in November and of 2@3½ cents in the Decemb May futures were recorded.

The strong spells in the mark attributed mainly to covering tions and buying from the Correspondence received by showed that growers are genera ish, and that has led them to

erable proportion of their sales day to day. It was noted that rs were not in the market to any , and prior to the end of October, ppeared to be backing away from deliveries of seed under con- in that future. Two prominent rs were reported to have closed arly all their trades in October o the winding up of that option, showed weakness on Friday.

ialists in the flaxseed market generally inclined to be bearish ount of the liberal deliveries of ine seed being made at Atlantic and the large amount of it afloat s country. A development that ed attention was the purchase of of Argentine seed for shipment neapolis. That was an operation without precedent at this time year, and it was made possible the relatively higher price go- this market. It is intimated seed oil plants in the East have ted for sufficient Argentine seed y them through for some time, far as known no flaxseed from arket has as yet been sold for delivery prior to the close of e navigation season. In some s it is asserted that were it not pport coming through country the American markets would drop to a parity with the Aires level, making allowances ight rates and duty.

pts of flaxseed on this market ek were light, amounting to 60,- hels, as compared with 284,127 during the same period last Stocks in the elevators here at of the week were reported at ushels.

ansas City Seed Market.

AS CITY, Nov. 1.—Seed trade ex- no special features this week irmness in prices. The expected in offerings of millet failed to ize, owing to the lightness of situation and the indifference ers about selling on the present As kafir and milo were held the weather conditions and the cars, the few offerings of millet ood demand from poultry feed s. Prices were unchanged. There were moderate arrivals of sudan grass seed, which sold readily and some came in on purchases made in the country. Offerings of cane seed are not expected for some time. A good crop is believed to have been harvested. The marketing of alfalfa seed continues on a limited scale. Nearly all seed arriving was bought in advance by agents of the seed houses. Competition for the small amount of seed saved is keen and high prices are sure to continue. It is reported that one wagon load of seed sold at Emporia, Kans., for nearly $2,000. The late harvested seed shows inferior quality, due to the effects of rains, but seed saved early was fine. There is a plentiful supply of timothy seed from scattered sources in Missouri. Most of the houses here have some old seed, also. Clover seed offerings reflect a small crop in the Southwest. Prices are extremely high. Blue grass seed was practically all sold some time ago, and houses here have cleaned and disposed of most of their holdings.

Following are the Kansas City prices of seeds in carlots sacked, as from first hands:

Alfalfa—Per cwt., $25@30.
Timothy—Per cwt., $9.50@10.50.
Blue grass—Per cwt., rough. $10@15; cleaned, $17@27.
Clover—Per cwt., $35@45.
Millet—Per cwt., $2.25@3.25.
Sudan—Per cwt., $9@11.
Cane—No quotation.

SEED SITUATION.

KANSAS SEED CROP.

LAWRENCE, KANS.—We find the seed crops in Kansas about as follows:

MEADOW FESCUE.—The acreage was very small and the crop very short. All seed is out of growers' hands and most of it has been sold for export. Only a few cars remain in dealers' hands and this will probably be needed for home trade. Owing to continued rains during late spring and early summer, the color of the seed is rather dark and the germination is somewhat lower than usual. The prices are high.

ALFALFA.—Owing to the high price of alfalfa hay, all the first and second crops were cut for hay. Most of the third crop was also cut for hay, and it was only an occasional patch that was not yielding a good hay crop which was left for seed. The grasshoppers and the army worms destroyed many fields and reduced the seed crop still further. The seed crop is about the smallest on record, but the quality is somewhat better than last year. Owing to the short crop and the heavy demand which is expected in the spring, the prices are high.

THE FARMERS PLATTE VALLEY MILLING & ELEVATOR CO.
Buyers and Sellers of all kinds of Grain and Seeds. Colorado Hard Wheat Flour.
FORT MORGAN, COLORADO

TIMOTHY AND RED CLOVER.—Kansas does not produce much of either, but we expect to have enough for home consumption. In many years it is necessary to ship in both timothy and red clover.

SWEET CLOVER is about an average crop, but prices are somewhat higher than last year.

MILLET will make an average crop.

CANE, kafir and milo will yield a larger crop than last year, and since conditions were favorable this fall the seed should be of good germination.

SUDAN GRASS acreage has increased largely and we look for a seed crop that will be larger than last year.—*The Barteldes Seed Co.*

CLOVER SEED A FAIR CROP.

CHAMPAIGN, ILL.—Clover seed is yielding fairly well on small acreage, but there is a big waste in recleaning. More timothy seed is showing up than expected and quality is fair.

We have a fine corn crop with an abundance of good seed, and huskers are plentiful at 6c per bu.

Soybeans are coming in and are of good quality and are yielding well. There will be a larger acreage planted next year.—*Guy W. Stanner Seed House.*

CROPS LARGE—RAIN DELAYS HARVEST.

OKLAHOMA CITY.—The crops in our section of kafir, maize, cane, Sudan grass, millet, in fact, all other grain crops, are rather large. The question will be whether farmers will be able to harvest them in time before frost. It has been raining for practically four weeks in some sections of the state and farm operations have practically stopped. The labor situation is also very acute, and for these reasons harvest will be very late. The quality of seed also is very doubtful.—*The Barteldes Seed Co.*

Services of Seedsmen.

Some of the services rendered by field seedsmen stated briefly are as follows: (1) seedsmen offer a cash market for seeds at harvest time as well as at any other time; (2) they assume the risk of a declining market and absorb overhead expenses—storage, insurance, interest, etc.—incidental to carrying stocks of seed from harvest time to or beyond planting time; (3) they usually have better facilities for recleaning, sacking, storing, and testing seeds than farmers have, hence are able to offer purer and better-packed seeds; (4) they enable the seed consumer to delay purchases until he can determine more accurately from prices ruling on various agricultural products during the spring, together with soil and climatic conditions at that time, the kinds and quantities of seeds which are most likely to result in the greatest profit to him; (5) their warehouses serve as an emergency storehouse or seed-bank from which seeds of regular or catch crops may be obtained quickly for immediate planting; and (6) they frequently tide over current shortages of certain kinds of seeds by carrying over stocks from the preceding year or years. To these services might be added two more that are conducted, however, more by vegetable seedsmen than by field seedsmen, namely, (1) the dissemination in catalogues and circulars issued by them of valuable cultural and varietal information of various crops, and (2) the introduction and stimulation of the commercial production of new or little-tried kinds of varieties of seeds which have in the past proved to be of considerable value to the agriculture of this country.—*Geo C. Elder, in the Seed Reporter.*

Clover Seed Strong.

While clover seed favored the bears early last week, it came back strong the latter part, and the market absorbed a lot of selling, say J. F. Zahm & Co., Toledo. March sold down to $29.10, then turned, selling up to $30 on Friday, broke to $29.50, back to $30 on Saturday. Reports from Wisconsin are not so encouraging; it is understood that the bulk of their crop has been

marketed, and little more is available. If this be true, how can the central states' shortage be replenished?

Alsike showed little change for the week. It was easy early, then advanced a few points; sold even and above red clover at one time; then the latter shot up again. There has been little "dope" on alsike for a long time. Holders feel the crop is short and point to the light movement so far to bear them out. Price been attractive, but does not bring the goods here.

Toledo Timothy Seed.

Trade in timothy was light last week. Considerable was shipped in to apply on October contracts. Good receipts are expected to continue for some time, but most of the seed is in strong hands. It was marketed freely after harvest and farm reserves are not large. Good export demand is needed to maintain and advance prices.—*Southworth & Co.*

St. Louis Seed Market.

ST. LOUIS, Mo., Nov. 1.—The seed market is dull and slow with spot offerings light and consisting mostly of clover seed. The quality is running rather poor, and the bids submitted are unsatisfactory to the sellers. Offerings of redtop are scarce, timothy seed is dull and slow of sale. Prices per 100 lbs. are as follows: Clover, high grade, free from buckhorn, $45.50@48; average country lots, $31@40; buckhorn mixed, $23@30; poor and chaffy, $5@18; alsike, high grade, $40@45; choice average country lots, $35@40; poor, $15@30; timothy, choice, clean seed, $11@12; average country lots, $10@10.50; low-grade, $5@10; redtop, extra fancy, solid seed, $16@16.25; machine cleaned, $12.50@15; chaffy, $7@8; sunflower seed, $9.50@10; sorghum cane seed, orange, $3; millet, golden, $2.75@3.25; Siberian, $2.75@3; common and hog millet, $2.90@3; popcorn, white rice, on the cob, $6; pearl, on the cob, $4 per 100 lbs.; stock peas, new crop, whippoorwill, $5; new era, $4.50; mixed, $4.25.

Corn Situation.

Delivery day for December contracts is still 30 days distant. Nonetheless, the market is commencing to recognize the unwarranted discount still prevailing for the December delivery. Dissatisfaction of the producer with the prevailing prices, together with the transportation question, is the dominant factor in the situation. There is a possibility of a new motive in the way of an increased foreign demand. It is quite probable that all foreign powers will commence their recuperation by coming to the United States for financial assistance, immediately upon ratification of treaties. It goes without saying that the moral obligations following these loans necessitate the expenditure of a goodly proportion of the loans in this country, to the extent that relatively cheaper prices from other countries will be overridden. There was a very noticeable broadening of interest in Saturday's market because of the conditions. At the moment the situation in cash corn is the outstanding feature. There are no accumulations, no immediate prospect of any free movement and some indications of an improved shipping demand. The time for theorizing with relation to the size of the crop has gone by and the only things now to be considered are the persistent holding attitude of the producer, inadequate transportation facilities and possible revival of broad demand both for cash and the deferred deliveries. With this array confronting the market, there seems only one possible course for prices, and that is higher.—*Thomson & McKinnon, Chicago.*

Labor Saving on the Farm.

It is a comparative innovation for a farmer to allot himself a salary, or in fact to figure the labor of his family on a salary basis. However, in line with the times, the farmer nowadays has come to learn that in order to figure the cost of his products, and in order to arrive at a correct selling price and figure his profits, his own labor should be figured as well as any outside help he secures. Labor is and has been for the past few years a costly item on the farm. The "Ankhorite" Fence Posts therefore appeal to the average farmer, as he does not have to rely on help to drive his posts, There are no holes to be dug, nor heavy posts to handle; he can easily tackle the job alone.

The first cost of Ankorite Steel Drive Posts is sometimes a little more than that of ordinary wooden posts, but the economy of setting them wipes out the difference many times over. Farm labor should be put on exactly the same basis as factory labor, and if that is done, you'll have to figure the cost of setting wood or concrete posts at from 12 to 15 cents each, or more. You can set Ankorite Steel Drive Posts as fast as you can drive them, at a cost of two or three cents each, Figure the saving for yourself.

Even when putting a high price on his own labor he will save money on installing a fence line with "Ankorite" Posts.

Dealers will be furnished quotations upon addressing The Calumet Steel Co., Department 7, 208 South LaSalle St., Chicago.

CLIMAX SUPERFINE BRAND.

Readers of our recent advertisement, a little one act play, laid under the open sky, will recall that it repeated a dialogue between a farmer and his son.

In continuing the story, we offer another drawing showing two farms, one very prosperous looking, the other run down, and the owner of the former is tactfully but nevertheless seriously asking the other, "Bill, did you ever buy seeds, put out in convenient size bags by W. H. Small & Co.?"

The owner of the poor farm says, "Yes, one time, 17 years ago, and I guess I shall go back to their seeds and make some money."

The successful farmer replied, "Yes, Bill, you will have to if you expect to run with me in producing bumper crops. I buy all my seeds from them, six different brands, and their bushel bags make a hit with me, as there is no loss of time or seed in buying from my dealer."

Total lbs.	45,275,261	50,618,306	39,329,289
Total cuts	108,319,360	124,870,576	97,233,874

Nov.1,	Pork.	Lard.	Ribs.	Total.
1917 ..	26,537	20,011,671	1,179,570	62,362,592
1916 ..	23,462	39,422,087	4,720,041	81,503,145
1915 ..	64,474	64,314,840	13,342,512	63,557,694
1914 ..	63,864	8,410,150	3,910,984	62,517,610

Decreases during October in years named follow:

	1919.	1918.	1917.
All pork	14,309	365	11,968
P. S. lard	2,495,646	604,062	27,078,095
Short ribs	936,639	4,935,033	5,232,172
D. S. meats ...	11,207,471	12,411,804	17,015,111
Total cuts ...	16,551,216	11,773,046	30,943,340

Changes during the last half of October:

	1919.	1918.	1917.
Mess pork..	+ 591	— 342	— 3,575
All lard	—296,980	+5,459,069	—19,172,980
Short ribs .	—382,931	—1,058,589	— 2,616,317

Of the present stock of short ribs, 222,242 lbs. were made since October 1, and of these 56,000 lbs. manufactured since Oct. 15. In spite of practically no manufacture, the short rib stocks decrease very slowly. Abnormal lard production is again indicated.

Advertising men have changed the seasons—they sow in the fall and reap in the spring.

New York Oats Market.

The longshoremen's strike still continues, all efforts to end it having been unsuccessful to date. There is, however, a determined effort in progress on the part of steamship lines to release their steamers and once more make possible ocean transportation to and from this port.

The demand for spot oats has slowed down in consequence, and further business for export has been impossible. When a settlement of the present difficulty has been accomplished we look for an increased demand from dealers and a revival of export business in somewhat liberal volume. This should relieve the pressure caused by accumulations and restore premiums that existed prior to the labor trouble.—*L. W. Forbell & Co.*

Feedstuffs

Harry Webb has entered the wholesale flour and feed business at Springfield, Ill.

Fire damaged the feed business of Acklin & Sons at Cushing, Okla., to the extent of $5,000.

The Clinton Alfalfa Mill Co., Clinton, Okla., has increased its capital stock from $20,000 to $60,000.

The new plant of the Arcady Farms Milling Co. at Riverdale, Ill., just outside of Chicago, is progressing nicely. Early in November is the scheduled date for finishing the installation of machinery, and the mill will be running in full in January. Items regarding the brands and general business of this large feed manufacturer have frequently appeared in THE PRICE CURRENT-GRAIN REPORTER and the full operation of their mills not only provides another large buyer for grain and feed shipments to the Chicago market but makes available a considerably increased tonnage of feed for dairymen, hog producers and livestock feeders in Central and Eastern states.

Rice Bran Market Strong.

ST. LOUIS, MO.—Standard mill-run rice bran, in bags, guaranteed to analyze 24 per cent protein and fat or better, quoted Nov. 1 at $33@34 per ton, sacks included, f.o.b. southwestern Louisiana and interior Texas milling points. Sales have increased materially during the past week, the demand having been stimulated partly by the alarming reports of crop damages through excessive rainfall and partly through the advance in the prices of corn and oats and other feeding stuffs, through which the relative cheapness of rice bran has been enhanced.—*K. & E. Neumond, Inc.*

Increased Southern Distribution.

The Quaker Oats Co. has bought about 17½ acres in Memphis on which a feed mill will be erected to supply its Southeastern trade. George A. Chapman, manager of the feed department, is hopeful for good developments in such business, but states their present plans are very modest.

London Oil Cake Report.

A special report to the London *Grain, Seed and Oil Reporter*, Oct 16, says the matter of transport is still very bad, and continues to hamper business. A satisfactory feature is the continued improvement in demand, though it is yet considerably below the normal.

There are free sellers of home manufactured linseed cakes at fixed prices, and the trade is mainly confined to these owing to the scarcity of imported cakes. Cotton cakes are in much improved inquiry and there are eager buyers at the lower levels now ruling. Home-made cakes just about maintain fixed levels, but there are offers of Egyptians in bags from a vessel to arrive, at very attractive levels, providing buyers will purchase ex-ship. Rice bran is without change at around £19 landed, with some rice bran cake named at 10/ per ton less money. Feeding treacle is a good trade at £10 10s. London or Liverpool, and any tendency is towards higher figures. Semi-decorticated cotton cake, with an analysis of 40 per cent oil and albuminoids, are very cheaply offered at £20 ex-dock, and the demand is a fast one in view of this fact.

A. E. GUTTERIDGE & CO.
FEED BY PRODUCTS
ALL KINDS
909 Webster Building CHICAGO

Cottonseed Products.

A preliminary report of the Bureau of the Census gives the amount of cotton seed received at American mills during the past two months as 463,335 tons, against 944,055 tons during August and September, 1918. During the two months 254,600 tons of seed were crushed, against 340,325 in the like period of 1918; and on September 30, 1919, 232,460 tons were on hand at the mills, against 644,168 tons on the corresponding date of the previous year. Cottonseed products manufactured, shipped out, and on hand were as follows:

Items.	Year.	Produced, Aug. 1 to Sept. 30.	On hand, Sept. 30.
Crude oil, lbs....	1919	76,022,135	15,556,520
	1918	93,427,223	55,285,533
Cake and meal, tons	1919	117,048	61,391
	1918	166,070	68,312
Hulls, tons	1919	67,656	97,303
	1918	76,719	59,653

During August and September, 1919, 6,258,727 pounds of cottonseed oil were imported, as compared with 1,527,764 pounds for the corresponding period of 1918. Exports of cottonseed products were 14,726,638 pounds of oil, against 5,760,544 pounds in 1918; 38,787 tons of cake and meal, against 2 tons.

FEED SITUATION.

COTTONSEED PRODUCTS WILL BE HIGH.

SHREVEPORT, LA.—It is hard to give any estimate as to the feed situation in this section. We will have worlds of hay.

The excessive rains that we have had for the past month have damaged the grain crops some, but just how much we are not in a position at present to say.

The cotton crop is in a deplorable condition. Cottonseed products will sell higher than they have sold at any time in years.—*Fowler Commission Co., per W. B. Farrar.*

THE FEED MARKET.

MONTREAL.

Montreal, Oct. 31.—The market is steady under a good inquiry. Straight cars of bran are quoted at $45 per ton and shorts at $52@53. Buyers are expecting lower prices and are only buying from hand to mouth. Corn feed is steady and sales are reported at $70@73 per ton, moullie at $65@66 and pure barley feed at $65@66 and dairy feed $48@50 per ton including bags delivered.—Trade Bulletin.

DULUTH.

Duluth, Nov. 1.—Business was below par in the feeds market during the last week. Dealers bought only to cover current needs in view of the general unsettlement brought about in trade conditions on account of labor troubles. Prices per ton are unchanged as follows: Bran, $39.50; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2, $51.50; No. 3, $50.50; shorts, $44.50; flour middlings, $55; coarse corn meal, $55; red dog, $64; Boston mixed, $46; cracked corn, $55; rye feed, $40.

TOLEDO.

Toledo, Nov. 1.—No change was recorded in the mill feed market this week. With mills operating at about 60 per cent of capacity as result of the Grain Corporation being out of the market for flour, supplies of offal are just about sufficient to meet the demand. Bran is quoted at $38.50 bulk; $43.50 in 100-lb. sacks; middlings, $49.50 in bulk, and $54.50 in 100-lb. mags, f. o. b. Toledo.

Feeds of All Kinds
327 S. La Salle St., Chicago, Ill.

PITTSBURGH.

Pittsburgh, Nov. 1.—Nothing of special importance has developed in the local feed market. Demand is light and only certain classes of feeds are being moved at this time. Receipts have been fair in quantity, with white and rye middlings predominating. Four cars of bran were among late arrivals. There are no established quotations in this market.

NEW YORK.

New York, Nov. 1.—The volume of business in mill feed during the week was small but prices were firmer. Mill offers were materially reduced and apparently mill stocks have been decreasing.

Demand for feed was not active as consumers here were again disposed to pursue a conservative policy and the action of prices was more the result of the lack of pressure than of any material improvement in the demand.

City bran was quoted at $45; middlings, $54, and red dog, $69, while Western spring bran was $44.50@45; middlings, $49@50, and red dog, $68.50@69.50.

BALTIMORE.

Baltimore, Nov. 1.—The spot market for feedstuffs is rather firm as quoted with a fair jobbing demand for bran and middlings and first hand offerings not burdensome. Western advices more encouraging. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $44@45; Western middlings, per ton, in 100-lb. sacks, $50; city mills' winter bran, per ton, in 100-lb. sacks, $48; brown middlings, per ton, in 100-lb. sacks, $52; white middlings, per ton, in 100-lb. sacks, $65.

MEMPHIS.

Memphis, Nov. 1.—Firmness in cottonseed meal has been a feature here for the past few days and today cash 7 per cent was quoted at $71 a ton. On the daily call board of the exchange trading in meal has picked up and prices have advanced about $2 a ton. One cause is the great damage to the unpicked part of the cotton crop, continued rains having hurt the quality very much.

Mill feeds have held steady but busi has been small. Wheat bran is quote $41 a ton in carlots, while gray sh were offered at $54 and $53 bid. M feed manufacturers are doing fairly business but they are not buying great amount of supplies. However, will soon be in the market in a larger as the South is poorly supplied with f stuffs and when weather gets severe will have lots of business according indications.

LOUISVILLE, KY.

Louisville, Ky., Nov. 1.—The demand feed is fair but prices, especially of feed, are low due to competition and frost. Wheat is carrying a nine premium and indications are for feed advances.

Quotations are: Bran, $45 a ton; m feed, $56; middlings, $60; scratch feed, cracked yellow corn, $59.60; corn and feed, $58; corn and oat chop, $58; hor feed meal, $57, sacked and packed, lots, Louisville.

NASHVILLE.

Nashville, Tenn., Nov. 3.—Good dem was reported for wheat bran last w at firm prices while middlings were active. Other ground feed was in demand. Prices: Wheat bran, 10 bags, per ton, $41.70; middlings, $60 horse and mule feed, $44@54; dairy $55@64; hog feed, $62; poultry feed, @68.

BOSTON.

Boston, Nov. 1.—Wheat feeds quoted considerable lower during the week with offerings rather light and mand extremely quiet. Prices gene quoted as follows: Bran, spring, $44@ per ton; bran, winter, sacked, $45 middlings, sacked, $49@61; mixed sacked, $50@57; gluten feed, sacked, $7 red dog, sacked, $68; second clear, sa $63.50; stock feed, sacked, $59.50; oat reground, sacked, $27; hominy sacked, $60.40; cottonseed meal, sa $79@85. Receipts for the week en Nov. 1 were 63 tons; for the mont October, 1919, were 334 tons.

feeds at the local market has been air proportions. Deferred shipment is in considerable demand and in preferred to prompt, even to paying r prices. Bran and middlings are active although reported slightly r. Prices remain steady. Current ations are:
an, per ton, $40; standard middlings,)@45.50; flour middlings, $51@54; red $64@64.50; hominy feed, $55; rye $43@44; old-process oil meal, $76; nseed meal, $76@83; brewers' dried s, $60; gluten feed, $64.

MINNEAPOLIS.

nneapolis, Nov. 3.—The demand for feed is not as strong as it was and s reacted some, but the bulk of the it is taken care of in mixed cars or ontracts with jobbers. The jobbers feed accumulated in local warehouses also at other market centers. There me pressure on the spot and transit et and the demand for offerings is rate. There is a fairly active demand ate November and December ship- and as the mills do not expect to very freely a little later they are not ng very large quantities. November acts coming due will help to take of considerable feed and the under- of the market is expected to improve y. Shipping directions on maturing acts are fair to good. The car situa- s bad at times and prevents prompt ent.

PHILADELPHIA.

ladelphia, Nov. 1.—The market for uffs is generally quiet but with little e to note in prices. Offerings are ate but fully equal to the demand is limited. Quotations are for car- arrive, in 100-lb. sacks, at cost per Winter bran, $44@45; spring bran, @44.50; standard wheat middlings, 8; flour middlings, $57.50@58.50; red $68@69; shorts, $48@49; low grade $69@70; rye middlings, $47@48; fine hominy, $61@63; fine white hominy, 4; reground oats feed, $27.50@28.50; seed meal, 36% protein, $76@77; cot- d meal, 41% protein, $80.50@81.50; seed feed, 20% protein, $61@62.

ST. LOUIS.

Louis, Mo., November 1.—The feed t is dull and barely steady, with an e demand and offerings liberal. feeds are in best demand. There quiet demand for bran, but are very slow and other feeds are nominal. Alfalfa meal is stronger. tions are as follows: Bran, hard, .50; soft, $39.50@40; shorts, gray, rown, $47; mixed feed, nominal at hite hominy feed, $56@58; oat feed, 23; alfalfa meal, No. 1, $37.50@ . 2. $33.50@34.50 per ton in 100-lb.

GRAY SHORTS ARE NOT BROWN.

We sometimes feel guilty of over emphasizing the importance of continuing the better trade practice of mills, feed manufacturers and others of selling on sample—living up to sample in the actual carlot shipments. It is decidedly difficult in a chemical analysis of a feedstuff to accurately determine its ingredients; therefore a physical inspection, where the feel and looks of the goods are taken into consideration as tests of quality has always been and will continue to be the basis of acceptance or adjustment in case of refusal. It is being brought to our attention from many quarters that rejections on the fall movement of feedstuffs are getting to be much too numerous; and although it is so self-evident that it seems hardly necessary to consume space in repeating it, we should think, that as a continuance of their business in proper lines depends so much on exact deliveries of goods as sold all millers would exert extra care to make shipments as near to the type samples on which sales were arranged as possible. We venture, however, to guess, relying on instances reported, that it has been more than a mistake in some cases of flagrant abuse, to use the draft privilege against certain shipments, which has put the broker and the buyer in uncomfortable positions. Certainly such practice has not increased the goodwill status of the mills guilty thereof.

COTTONSEED MEAL.

The suggested decrease of nearly 16 per cent in the cottonseed crush as compared with last year is of course bullish and justified by milling reports from many Southern localities. However, these things are frequently overdone and sentiment in many quarters indicates that such possibility exists. The apparent lack of interest of feed mixers and other buyers, with declining cottonseed meal markets of last week, tends to bear out our suggestion that an over bullish attitude should be avoided. Feed mixers rather prefer chancing payment of several dollars per ton more in mid-winter purchases than contracting today for early 1920 requirements at prevailing high prices. Certain well-informed trade members believe that $67 to $71 will about represent the range of 36 per cent meal for several months, meaning delivered prices in the Chicago district for instance, around $71 to $75 per ton.

The Government set price for 1918 was about $53.50 Chicago basis, and many inquiries to THE PRICE CURRENT-GRAIN REPORTER now indicate the timeliness of facts and figures that are something more than prosy because an understanding of them, which, by the way, is the only sound basis for feed manufacturing operations, is doubly essential now as cottonseed meal purchases for the heavy mixing season are being considered. We have gathered these figures from a rather intimate knowledge of crushing operations in Mississippi, Alabama, Arkansas and Texas. They are based on the purchases of a ton of cottonseed not at today's market, but a fixed price of $74. The general average of manufacturing costs in cottonseed crushing must recognize some differences, due to the geographic purchase of seed and the distribution of cotton-seed meal and other by-products. There is a loss of 125 pounds in every ton of cottonseed that is crushed and the following four items therefore total 1,875 pounds, i. e.:

300 lbs. of oil at 19½c per lb	$58.50
1,000 lbs. 36% c.s.m at $68 per ton	34.00
500 lbs. hulls at $8 per ton	2.00
75 lbs. linters at 3c per lb	3.25
	$97.75
Manufacturing cost	17.50
Average freight on seed to mill	2.00
6% profit on $74 seed	4.50
	$24.00

Deducting the last item, $24, from the resale value of the products of a ton of cottonseed, $97.75, leaves a balance of $73.75.

This is how they do it, and interesting deductions may be drawn for your own information. The great Memphis cottonseed market, the clearing house for much of the mill news, is most bullish. Kansas City and other Northerly-Western markets are inclined to see lower values before long. Eastern feed manufacturing and consuming trade, a long way from Western sources of supply, with a serious car shortage facing them even before the first snows arrive, quite generally feel in their hearts that Memphis and Southwestern trade are right. They do not admit it freely, because it means the payment of higher prices than will possibly prevail, particularly if the already long period of good fall pasturage should continue. Many fields are now as green as in the spring time.

Dairy Feed Analyses.

The "Feeding Stuffs Report" (1918) of the Pa. Dept. of Agriculture, giving a detailed statement of the police work of the state Bureau of Chemistry says of Proprietary Dairy Feeds with Molasses: "The mixed feeds classified as proprietary dairy feeds with molasses are represented by 126 samples and 46 brands, the output of 32 companies. All but two were obtained from guaranteed shipments and four of the samples were branded with both minimum and maximum guarantees which, upon analysis, were not sustained. This class of feeds is of the more concentrated type with molasses forming one of the ingredients, largely used in dairy feeds. They were guaranteed to contain from 12.50 per cent to 25.00 per cent protein, and of the different brands included, one-third were guaranteed 16.00 per cent to 18.00 per cent protein and one-half contained the guarantee of 20.00 per cent or more protein. Six samples were found deficient in both protein and fat, five in protein alone and 20 in fat alone, showing that, as a class, the fat deficiencies were most numerous. There were four brands which were not registered, which included several samples containing oat hulls with an excessive amount of crude fiber and sold contrary to requirements.

"These feeds which were found to have incorrect compositions numbered 32 samples and included cases where ingredients claimed were not found and where other products not named were identified such as cocoa shell meal, ground buckwheat, hulls, velvet bean feed, brewers' dried grains and linseed oil meal. There were five samples in which oatmeal mill by-product had been substituted for clipped oat by-product, and 36 samples contained small amounts of small whole weed seeds. Fifteen samples, eight of which represented one brand, contained oat hulls in excess of the amount permitted and two samples of a brand were found to contain flax plant refuse in excessive amounts. One sample was claimed to contain molasses which was not detected and the product was identified as a cottonseed feed.

"This class of mixed feed varied considerably in their composition and ranged in protein from 9.02 per cent to 31.01 per cent, averaging 19.26 per cent, in fat from 1.39 per cent to 6.85 per cent averaging 4.46 per cent and in fiber from 7.15 per cent to 23.05 averaging 12.63 per cent. The prices also showed wide differences ranging from $43 to $75 and averaged $54.74 a ton."

An examination of the analyses shows that in most cases the deficiencies complained, or reported, were in fact nominal only—a fraction of a per cent. From all of which one may legitimately conclude that the furore about fraudulent feedstuffs is mainly gabble of cheap politicians and fault-finders; and that an established dealers' brand is ample for the buyer's protection against fraud.

Cottonseed Feed Trade Strong.

KANSAS CITY, Nov. 1. — Marked strength continued in the trade in cottonseed cake and meal in Kansas City this week. The amount of seed available in the cotton belt is extremely light, owing to wet weather and flood conditions in many sections. The bulk of the seed moving to crushing plants is high in moisture content, and because of the difficulty in handling the product many mills are reported out of the market. Prices for cake and meal were generally unchanged, except for an advance of 50c to $1 a ton in cold pressed cake in Kansas City. Purchases of cake and meal by mills to cover their short contracts were a bullish influence in the market.

Don't Delay Buying Feeds.

"Feeders should not delay too long the purchase of cottonseed cake and meal," declared A. J. Maurer, general manager of the Choctaw Sales Company, Kansas City. "Winter is approaching, and the transportation situation is very unsettled, owing to car shortage, strikes and similar difficulties confronting industries today. There is a tendency among many feeders to reduce the percentage of cake and meal in the ration for their stock, owing to the reduced level of prices for cattle, hogs and sheep. Cheaper commodities are being substituted in many instances. But this is not a profitable way of economizing in the feed ration. The addition of the high protein cake and meal stimulates the appetite of the stock and they will hustle for other feeds. This is not true of stock fed on corn as the only protein feed. Rangemen particularly should not attempt to economize in the purchases of cottonseed cake and meal.

"Fertilizer and mixed feed manufacturers have been large purchasers of cake recently, but they have narrowed their purchases within the past week or two in the hope of obtaining cheaper products later. Some sales have been made to exporters."

The Newsome Feed & Grain Co. of Pittsburgh, Pa., is enlarging its business, having established a branch office in Minneapolis. C. F. Cramp, Jr., and J. J. Blackman of Pittsburgh, prominently identified the past few years with the sale of the well-known "Palmo Midds" and "Palmo Meal," will be in charge of the company's Minneapolis business. They have secured quarters at 128 Corn Exchange, and will engage in the purchase and sale of wheat, rye and mill feeds.

The long distant future of corn has loomed up more in the foreground and may be a leading feature. There is already talk of winter corn shortage.—*Jos. Wild, for E. W. Wagner & Co.*

The first snow storms of the season in Minnesota were reported from half a dozen different points on Oct. 16.

Corn in Primary Markets.

Receipts of corn in eleven prima grain markets from Nov. 1, 1918, Nov. 1, with comparisons with 1917:

	1918-19.	1917-1

COTTON SEED PRODUCTS

(MONDAY WEEKLY LETTER AND BUYERS' GUIDE.)

MARKET: Flood conditions have again prevailed in the western Cotton Belt throughout the week. The market continues to be greatly disturbed from day to day mainly by mills buying cake and meal to protect orders booked which cannot now be readily filled on account of wet seed. Seed stocks at the mills are low and prospects for production poor. Country trade is moderate for the season. We are keeping some cars in transit to take care of quick requirements.

Our prices, subject to confirmation, strikes or shipping conditions beyond our control, immediate, prompt and November shipment car lots only, 20 to 30 tons, closed Saturday as follows:

	43%	41%	Cold-pressed	O. P. Linseed
Chicago	$81.00	$79.00	$63.00	$76.50
Indianapolis	81.50	79.50	64.00	78.50
Des Moines	80.50	78.50	62.75	76.75
Milwaukee, Wis.	81.00	79.00	64.00	78.50
St. Louis	79.50	77.00	62.00	77.50
K. C.	79.00	77.00	61.00	76.75

Let us bid on your wants—Write or Wire.

Mills at Hammond, Ind.

Alfalfa Department

heavy crop of alfalfa is reported Leavenworth County, Kans., most hich will be consumed by local interests. Very little other tame are found in that section.

good second crop of alfalfa is re- from Weld, Morgan and Adams ties, Colo., following a first cut- hat was of very high grade. In sections of the state, however, the er was unfavorable and there was vy loss on the third cutting with damage to the second cutting.

heavy crop of alfalfa is reported gh northwestern Oklahoma but rs report farmers are asking un- able prices for their holdings and quently very little of the crop has t reached the market. One big in that state has been compelled to Kansas City to get hay to sup- astern clients.

R. Warrick has resigned as sales- ger of the Carlisle Commission o become associated with the nal Grain Corporation, an organ- with a capital of $2,500,000 at City, Iowa. The hay and alfalfa rade learns with regret the re- nt of Mr. Warrick from the trade s re-entrance into the grain busi- He had developed a wide ac- anceship among members of the industry of the country, and the alfalfa millers and mixed anufacturers during his services s manager with the Carlisle or- ion. The Terminal Grain Corpo- now is erecting a 1,000,000-bushel r at Sioux City. Mr. Warrick's F. R. Warrick, is general man- f the company, having assumed ies a few months ago. Mr. War- ill give particular attention to pping department.

irm Tone in Alfalfa Meal.

AS CITY, Nov. 1.—Increased sales lfa meal were reported on the City market this week. Prices better grades displayed a firm ith some sales about $1 a ton higher, while No. 2 and brown meal closed with a net gain of 50c to $1.50 a ton. Mixers bought meal in larger quantities, shipments this week having been made to the Middle West, the East, the South and the Southeast. Inquiry for meal from the South and Southeast continues to improve, and with the stronger tone of the alfalfa hay market, buyers are less hesitant to make purchases. Most business was for prompt shipment, and comparatively few orders were booked for later delivery.

Choice alfalfa meal closed at $39@40 per ton, basis Kansas City, carlots, in new bags; No. 1, $36.50@38; No. 2, $32@33.50; brown, $30@31.

With the advance of the fall season, demand for alfalfa mixed feeds is improving. Country dealers are beginning to accumulate a stock of feed for winter requirements. Prices show little change for the week. A better inquiry was reported from buyers east of the Mississippi river. No. 1 alfalfa molasses feed closed at $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

Eastern vs. Western Alfalfa.

It has been claimed frequently that there is some variation between the feeding value of alfalfa grown in the East and that grown in the West. We have observed that Eastern growers believe their product to be worth more than that in the West and *vice versa*.

In our own experience we have failed to find enough difference in the plant grown in various parts of the country that the results from feeding it to dairy cows are noticeable. It is true that western grown alfalfa is usually cured in better condition, the curing being interfered with by rains to a less degree. This fact is so universally true that it is altogether possible that it will make the average of Western grown alfalfa worth a little more than the average of the alfalfa grown in the East.—*Hoard's Dairyman.*

Manufacturers, Dealers & Exporters of Feed.
New Orleans St. Louis

Copra and Palm-Kernel Products.

On petition of Southport Mill, Ltd., New Orleans, etc., the Commerce Commission has ruled that freight rates on these products from New Orleans and Baton Rouge to various destinations have been unreasonably high and have ordered the C. & N. W. Ry. Co. *et al.* on or before Jan. 1, 1920, shall make reparation of $5,229.05; the finding being that the rates on these products should not exceed rates contemporaneously applicable on similar cottonseed products.

Beet Pulp as Feed.

Dried beet pulp is properly classed as a concentrate. It is very high in its carbohydrate value, ranking close to such feeds as corn and barley in its feeding value. It gives its best results in the dairy ration when fed wet, in which condition it has an added value to that shown by chemical analysis in its succulence. It may be prepared for feeding by soaking twelve to twenty-four hours in three to four times its own weight of water. Where green feeds or the succulence of silage are not available, beet pulp is a highly valuable feed for the dairy cow both because of the actual nutrients supplied and because of the succulence.

Ruling on Telegraph Liability.

The Supreme Court of Illinois on Oct. 31 handed down an opinion holding void the provisions in the Postal and Western Union blanks which exempt the telegraph companies from liability for their errors unless the message is repeated or insured. The sender can therefore recover damage he sustains by errors made by the telegraph company.

From the vicinity of Wagoner, Okla., the best prairie hay crop in many years was said to be raised this season.

Hog Sense Makes Dollars For Dealers

No feed dealer can afford to be without a protein feed. Hog instinct demands it as part of the ration. Experienced breeders always feed it. It is in demand in every experimental station. Any hog knows that

Hay Department

Hay in Henry and Jefferson counties, Ia., is reported good. Considerable has been shipped to market but the bulk of the yield is now in the stack.

A shipper from Texas County, Okla., says the forage in that part of the country is very fine this year. Buffalo and gramma grass are plentiful everywhere but the tame grasses are scarce.

It is reported in Arkansas County, Ark., that plenty of late native grasses and rough forage is in that section but very little tame hay suitable for commercial purposes, owing to spoilage by rains.

The hay crop of Indiana was short this year and farmers are very reluctant to let go of their holdings. Most of the crop is timothy and the quality generally good where there is any hay at all. Clover varieties generally are scarce. Old hay also is scarce.

It has been charged by stockmen in South Dakota that hay profiteers are harming the live stock industry this year. Hay prices are reported ranging from $25@30 in the southwestern part of the state, and stockmen would rather ship their holdings than pay such prices. Such reports also come in from Wyoming and Idaho.

Very little hay has been shipped from the state of Montana and but a small surplus is available, for which it is said farmers are asking excessive prices. The timothy crop was somewhat less than in 1918 and acreage of alfalfa was reported as considerably curtailed. Quality of alfalfa was exceptionally good, however, and a small surplus is available for shipment.

Stuttsman County, N. D., reports a surplus of 50,000 tons of hay for sale and as other crops of the county have been poor, farmers are anxious to realize as much as possible on the crop and are talking of selling through a cooperative selling organization. Individual buyers have offered $15 a ton, but farmers are hoping to realize more, and the county agent is helping them to this end.

While there has been a large crop of hay in Ohio this season, the farmers are very reluctant to sell and are making mow prices altogether too high to move the crop at this time. The bulk of the crop of the state is timothy and clover and clover mixed are very scarce. Much of the crop is already baled and ready for market but farmers are holding for better prices.

A farmer in the vicinity of St. Marys, Kans., states that many producers in his section of the state found their profits from their prairie hay meadows greater than from their grain lands. In considering the fact that the crop does not have to be planted or cultivated, the saving in wages in the comparison of the crops is a considerable item during this period of high-priced labor.

At a meeting of the Southern Minnesota Mills Ass'n, 634 Security Bldg., Minneapolis, millers, bankers and grain dealers discussed measures for averting a threatened shortage of seed wheat in the Northwest next spring. It is said farmers are selling their choice wheat to obtain the high premiums, and this, coupled with the partial crop failure in that section of the country this season, is menacing the seed supply of 1920.

THE HAY SITUATION.

HAY FAIR CROP.

PERRYSBURG, N. Y. (2).—Hay is a fair crop here, but farmers are not satisfied with the price. There will not be much more to sell until the stock is wintered through.—*Burt H. Graves.*

HAY PRICES FIRMER.

GREENVILLE, OHIO.—While the demand for hay the past few days does not seem to be any better, prices are a little firmer. Farmers are very reluctant sellers at the decline in prices and receipts are light.

Weather conditions are decidedly unfavorable for shipments of new corn.—*The Greenville Feed Co.*

Hay Rate Not Unreasonable.

A recommendation that the complaint be dismissed has been made in No. 10636, A. J. MacIntyre vs. Chicago, St. Paul, Minneapolis & Omaha et al., by Examiner Thomas M. Woodward. His recommendation, in a tentative report, is that the Commission hold the rates on hay from Minnesota and Wisconsin points to stations in Montana had not been shown to be unreasonable in violation of section one of the act to regulate commerce or of section ten of the Federal control act.—*Traffic World*

U. S. FORAGE PURCHASES.

On the suggestion of numerous readers of THE PRICE CURRENT-GRAIN REPORTER, this office on Oct. 27 wrote Col. Patterson, Zone Supply Official of the Forage Division, War Department, at Chicago, Ill., as follows: "It is reported that unfavorable rulings on weights and grades of hay and oats shipped to the United States Army during the war may possibly with proper representations be reversed. It is our understanding that this procedure must be supported by certificates of recognized weighmasters whose scales have been tested or by certificates of tally sheets by official weights if such shipments were made from terminal markets."

Being naturally desirous of assisting our patrons where possible to secure adjustments of such claims this office said to Col. Patterson that, "We will appreciate a line from you for publication telling how this should be done." Col. Patterson replies as follows:

"Since the purchase of forage was placed under the Zone Supply Officer of this depot, two branches have been maintained; one, that which is now functioning, and the other an accounting section closing up all claims pertaining to business transacted under the former regime.

"It is rather difficult to answer your letter in a general statement because hay and straw were generally purchased f. o. b., subject to destination weight and grade, and grain, in many cases, was purchased on the Board of Trade weight and grade. I would suggest that in each case where a contractor feels that an unfavorable ruling was made, he inform this office by letter and in each concrete case substantiate his contention fully as possible. Each such case submitted will be acted upon and determined. The policy of this office is one of fairness both to Government and to the contractor.

"If this does not fully answer y question, this Branch will be glad furnish any additional informa which you may desire."

3, $9@10. Alfalfa—Choice, $31@32; No. 1. $29@30; standard, $26@28; No. 2, $23@24; No. 3, $18@20. Straw—Oat, $9@11; wheat, $8@11.

MILWAUKEE.

Nov. 1.—The local hay market has not shown any great activity during the past week. Shipments have been light as farmers seem to show tendency to hold off for better prices. Buying has been mainly for immediate needs. Prices are holding steady. Current quotations are: Choice timothy, $27.50@28; No. 1, $27@27.50; No. 2, $25@26; No. 1 clover, $22@23; light clover mixed, $24@24.50; red top and timothy mixed, $24@24.50; marsh feeding, $14@15; packing, $10.50@11; rye straw, $10.50@11; oat straw, $9.50@10.

DETROIT.

Nov. 1.—Consumers are taking all the hay that comes to this market and the tone is steady. Receipts are not enough to bring any pressure and there is not much coming from Canada. At present Detroit dealers are doing little or no shipping but some inquiry has recently been received from the South. This has resulted in no business so far owing to the low bids. Detroit prices are too high to meet the ideas of the Southerners. Quote: No. 1 timothy, $28.50@29; standard and light mixed, $27.50@28; No. 2 timothy, $26.50@27; No. 3 timothy, $22@23; No. 1 mixed, $24@24.50; No. 1 clover, $24@25 per ton.

DULUTH.

Nov. 1.—Quotations in timothy, mixed timothy and prairie hays are off $1. The market has become top heavy as a result of more liberal receipts recently and the fact that dealers have become filled up. The market is draggy and featureless at present. Quotations per ton follow: Timothy—No. 1, $24@25; No. 2, $22@23. Mixed timothy—No. 1, $23@24; No. 2, $16@20. Prairie—No. 1, $22@23; No. 2, $20@21; No. 3, $15@16. Midland—No. 1, $15@16; No. 2, $10@12. Straw—Rye, $9@10; oat, $9@10.

PHILADELPHIA.

Nov. 1.—The market for hay is fairly steady with a fair demand for desirable offerings but the lower grades move slowly at inside quotations. There is very little hay here that will grade above No. 2 and the bulk of the offerings will not grade that high. Straw is quiet and unchanged.

Timothy hay—No. 1, $32; No. 2, $28@30; No. 3, $24@27. Clover mixed hay—Light mixed, $28@30; No. 1 mixed, $26@27. Straw—No. 1 straight rye, $14.50; No. 2, $12.50@13; No. 1 tangled rye, $13; No. 2, $12@12.50; No. 1 wheat straw, $12.50@13; No. 2, $11.50@12; No. 1 oat straw, $12.50@13; No. 2, $11.50@12.

DES MOINES, IA.

Nov. 1.—Market continued steady with light receipts and generally showed a firmer tone with exceptionally good demand for timothy and alfalfa hay, although prices on medium and poor grades are still favoring the buyer. Oat and wheat straw in demand. Choice green alfalfa, $32@33; timothy, No. 1, 24@25; standard, $23@24; prairie, No. 1, $20@21; No. 2, $18@19; straw, $8@10.

ST. PAUL-MINNEAPOLIS.

BOSTON.

Nov. 1.—The unseasonable weather the past week has operated against any improvement in the local hay market. The rain and warm weather has caused pasturage conditions to improve to such an extent that no one in the trade outside the cities is buying baled hay. The demand is confined locally almost entirely to strictly No. 1 hay in large bales and large bales of good No. 2. Small bales offered on the market consist mostly of Canadian hay and are now in over supply. Much of this hay is arriving in bad shape, having previously been in a heated condition and afterwards cooling and becoming caked. This condition is causing considerable dissatisfaction among buyers and Canadian hay is being left alone. Eastern hay is practically out of the market there being none coming forward and prices are nominal. No. 1 timothy hay in large bales is quoted at $32@33 per ton, but only extra nice cars will bring the extreme quotation. Small bales range at $30@31. No. 2 timothy is quoted at $28@29 for large bales and $27@29 for small bales. No. 1 Eastern is nominally quoted at $29@30 and No. 2 Eastern at $26@27. No. 3 hay unchanged at $24@26. Clover mixed hay takes a wider range at $26@28 with finer hay held at $25@26. Swale a shade lower at $17@19. Receipts for the week ending Nov. 1 were: Local, 35 cars; for the month of October, 1919, were: Local, 502 cars.

The market for rye straw is dull and about $1 per ton lower. Choice is quoted at $16@17. Oat straw generally offered at $14. Receipts for the week ending Nov. 1 were: Local, 13 cars; for the month of October, 1919, were: Local, 126 cars.

ST. LOUIS.

Nov. 1.—Receipts of hay during the past week have been moderate in amount, retarded somewhat by the heavy rains. Quality mainly of medium and common timothy. Timothy hay market continues to rule

firm on the better grades of timothy, which are in active demand. There continues a fair shipping demand for the medium grades, but low grade hay, hay that is any way discolored or stained, is dull. We will undoubtedly have some rough weather soon, which will increase the feeding of hay. The feed dealers and large consumers here have little hay in stock and will be compelled to buy liberally. There is a good, healthy inquiry and receivers believe the market will maintain its strength.

Light clover mixed hay steady, offerings moderate and demand exceedingly good for the No. 1 and No. 2 grades.

Heavy clover mixed hay firm. Receipts are very light and demand continues urgent on local account. Anything offered is readily snapped up.

Pure clover scarce and wanted, with only an occasional car of clover among receipts and demand is urgent for good clover.

Alfalfa hay continues to rule firm with active local demand for good No. 1 to choice leafy alfalfa for dairy purposes, also good milling demand for the dry milling hay. Alfalfa situation is very strong with indications of higher prices.

Prairie hay market steady. Offerings of prairie liberal and demand fair for the better grades. Also a fair feeding inquiry for medium grades.

Straw scarce and wanted.

Track sales: Timothy—No. 1, $31@32 standard, $29@30; No. 2, $24@27; No. 3 $22@23; threshed timothy, $14@17; headed timothy, $21@23; light clover mixed, No. 1, $28@30; No. 2, $24@26. Heavy clover mixed—No. 1, $27@28; No. 2, $25@26. Clover hay—No. 1, $31@33; No. 2, $28@30. Alfalfa hay choice, $36@37; No. 1, $33@34; standard, $31@32; No. 2, $28@29. Prairie hay—Choice, $25@26; No. 1, $23@24; standard, $21@22; No. 2, $18@20. Straw—$9.50@10.

CINCINNATI.

Nov. 4.—The local hay market was considerably stronger with a rising tendency throughout the entire week. This was chiefly due to the movement, which was affected by the recent lowering of values but the demand also displayed more activity and practically everything offered sold readily at steady to higher prices. Timothy advanced from $1 to $1.50, and though no changes were recorded for mixed or clover, last week's quotations were fully maintained. Rains interfered with plugging operations on several days but this failed to affect the market as brisk buying later quickly absorbed the slight accumulation. No change of any consequence is anticipated for the next few days as the demand on the part of both Southern dealers and local feeders on the present basis of value remains active and increased receipts are not expected to adversely affect the situation.

Rains again interfered with trading Saturday. There were 22 cars in the yards and 18 in the terminals. Receipts for the week 121 cars.

Timothy—No. 1, $28.50@29; standard, $28@28.50; No. 2, $27@27.50; No. 3, $22.50@24.50; threshed, $14@16. Light clover mixed, $27.50@28.50. Clover mixed—No. 1, $27@28; No. 2, $25.50@26.50. Clover—No. 1, $30@31.50; No. 2, $28@30; sample, grassy, $18@22. Alfalfa—No. 1 western, $36@37; No. 1 local, $32@34; standard, $31@32; No. 2 local, $30@31. Straw—Wheat, $8@9; rye, $10@11; oat, $8@9.

KANSAS CITY.

Nov. 1.—A strong tone prevailed in the hay market in Kansas City this week. Alfalfa closed unchanged to $1.50 a ton higher, with sales up to $33.50, the high mark reached this season. The range of prices on choice prairie was reduced 50c a ton, though the cheaper quality offerings rose 50c to $1.50 a ton. Other varieties were unchanged, a comparatively weak tone being evident in the market for timothy and clover mixed. Receipts increased slightly, amounting to 851 cars, compared wfth 685 cars last week and 683 a year ago. Stock yards were heavy buyers of prairie, and some feeding demand was reported. The strike of coal miners and possibility of a walkout of other unions caused nervousness among some buyers, who accumulated stocks. There was a broad inquiry for alfalfa. Some tame hay is being used as a substitute for alfalfa in some sections, owing to the fancy premium commanded by the wonder plant. Straw was unchanged.

Prairie—Choice, $21 50@22; No. 1, $19.50@21; No 2, $17.50@19.50; No. 3, $12@17; packing hay, $9@10.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice $33@33.50; No 1, $31.50@32.50; standard, $29@31; No. 2, $24.50@28.50; No. 3, $20@24.

Timothy—No. 1, $25 50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

Clover mixed—Light, $25@26; No. 1, $23.50@24.50; No. 2, $17@23.

Clover—No. 1, $24@26; No. 2, $15@23.50. Straw, $10@10.50.

CHICAGO.

Nov. 3.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Nov. 1, also the total receipts and shipments of hay from Jan. 1, 1919:

	Nov. 1, 1919.	Oct. 25, 1919.	Nov. 2, 1918.
Total receipts.....	4,800	3,525	7,158
Total shipments....	412	1,069	1,504
Rcpts. since Jan. 1.	201,809	197,009	271,093
Shpts. since Jan. 1.	40,047	39,635	79,084

In spite of larger receipts last week there was an active demand for hay all last week, and even higher prices than quoted are anticipated in view of the uncertainty of the outcome of the coal strike. Clover hays are particularly in demand; prairie also is very scarce, this week opening with practically none offered or on hand. Quote as follows:

Timothy—Ch., $29@30; No. 1, $28@29; No. 2, $25@26; No. 3, $22@24; sample, $20@24; thresh., $12@15.

Clover—No. 1 light, $28@29; No. 1 mixed, $25@26.

Prairie—Kan., Okla. and Mo., ch., $20@21; No. 1, $17@18; No. 2, $12@13; No. 3, $10@11; Ill., Ind and Wis., $16@22; feeding, $12@14; packing, $10@11.

Marsh—Feeding, $15@18; packing, $12@14.

Straw—Rye, $13@14; oat, $13@13.50; wheat, $10@12.

SAN FRANCISCO.

Oct. 28.—The drop in receipts has been caused mostly by the lack of railroad transportation furnished for the shipment of hay. The fields are practically cleared and all hay from now on will probably come out of the warehouses, with the exception of small lots here and there, as well as the later cuttings of alfalfa, which will come from the fields. Naturally the hay drawn from warehouses will have to command a better price to cover expenses of storage and insurance, otherwise it will probably not be withdrawn at present. With the car situation as acute as it is, and without any hopes from the railroad officials as to its improvement in the near future, and with the hay on the water practically cleaned up or else in storage, very small receipts can be looked for and no doubt a firmer price for that hay which can be placed on the market will result.

Export trade is practically nominal, owing to the water front troubles and stevedores' strike, it being most difficult to make deliveries to any of the docks.

The alfalfa market remains about the same with light inquiry.

Straw is in large supply and light demand.

We quote: Fancy wheat hay (light 5-wire bales), $20@22; No. 1 wheat or wheat and oat hay, $17@21; No. 2, $16@18; choice tame oat hay, $19@22; other, $16@19; wild oat hay, $15@18; barley hay, $15@19; alfalfa, $17@22; stock hay, $12@15; No. 1 barley straw, 50@80c per bale.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Steps to revive the popularity of the horse were taken by a group of hay, feed, live stock and other trade interests at a meeting in the office of the secretary of the Kansas City Hay Dealers' Assn. early last week. Arrangements were made to form a permanent organization, and to this end, Robt. E. Huffine of Huffine & Co., was chosen temporary treasurer. With the return of George H. Forsee, president of the United States Feed Mills Co., who was chosen to represent Kansas City at the dinner given by the Horse Publicity Association in New York, definite steps will be taken for the organization of the branch here. That the horse is not receiving adequate consideration as a work animal and that there are many "jobs" which the animal can fill to greatest advantage in the transfer business in cities and in farming operations in rural districts were the points made at the meeting of the friends of "Old Dobbin." Hay dealers who attended the meeting include C. D. Carlisle of the Carlisle Commission Co., C. S. Scott of the Shofstall Hay & Grain Co., E. L. Barr of the Nelson Grain Co., and Robert Fitzgerald of the Drought Hay Co.

According to J. A. Brubaker of J. A. Brubaker & Co., who returned last week from an extended tour of the South and Southeast, that territory will not become an important buyer of hay before the opening of the new calendar year. "Considerable quantities of hay are available on farms of the South and Southeast," declared Mr. Brubaker, and while there is a moderate movement of alfalfa to feeders of the cotton belt, other varieties are not eagerly sought. Feeders of the cotton belt are utilizing their roughage and in this way are reducing their consumption of hay. "Present high prices for alfalfa make for dissatisfaction among the buyers of hay in the Southeast, and they are hesitant in making purchases, taking only sufficient for their current requirements."

An improved demand for timothy, clover and clover mixed is reported by C. F. Arnold of C. F. Arnold & Co. "Widening of the premium on alfalfa over timothy and clover mixed is resulting in many consuming interests substituting the tame hay for the higher-priced legume," he said. "We are making sales of timothy hay at the present time in territories where only alfalfa was previously sold."

The strike of coal miners has thus far had surprisingly little effect upon the market for hay in Kansas City and in surrounding territory. Some emergency buying, particularly by stock yards and other large consuming interests, was noted in the past week, this resulting from fear of a possible tie-up of transportation equipment. So far as the trend of prices is concerned, however, the strike was given little attention. In the event that railroads are able to obtain sufficient fuel for their requirements, hay dealers on the Kansas City market see the possibility of a slightly improved car situation. Many cars have recently been used for loading coal that could be utilized for shipping hay, and with the tie-up of coal mines, a considerable number of cars will therefore become available for the hay trade.

TRADE MENTION.

The Armour Fertilizer Works announce the removal of their general offices to 209 West Jackson boulevard, Chicago, Ill.

The Jefferson-Ratekin Seed Co., a firm in their thirty-fifth year, pointed with justifiable pride to the business they have built up, basing its success on the personnel of the firm. Their main office is at Jefferson, Ia., and they are now issuing catalogues for spring trade, a copy of which will be sent to all inquiring.

Wm. Watson, Chicago manager of the S. Howes Co. of Silver Creek, N. Y., believes the present winter will see the erection of important new plants in the grain, seed, bean and feed industries. His long service lends exceptional value to his suggestion, which is in line with advice to THE PRICE CURRENT-GRAIN REPORTER, particularly indicating the trade's desires to avoid high priced undependable labor through the installation of time and money saving machinery.

This month's *Class*, an issue devoted to the encouragement of trade papers, commends the special copy prepared by the General Electric Co. for the grain and milling field. "The extensive use of electric power equipment enabled American mills and elevators to relieve a world food shortage without delay or interruption," is the captain, while the copy continues: "You can save power cost by running feed sections separate from flour machinery, just as you can save power by operating your shovels separately and shutting them down between cars. Not only saving in power cost but maximum dependability of operation and minimum fire risk characterize the use of G-E electric power equipment in the leading mills of this country."

A Handy Fire Extinguisher.

The "Queen" Fire Extinguisher, exhibited during the Ohio state convention at Columbus and elsewhere in recent months, bears the approval of the Underwriters' laboratories and contains points of interest to elevator managers and those believing in the ounce of prevention. Beyond the ordinary common sense back of having a handy fire extinguisher around your plant is the consideration now being discussed among insurance companies and manufacturers of combination truck and wagon dumps of further need for protection against fire. Everyone recognizes the importance of the new type of dumps for trucks as well as wagons and that it is a coming standard feature of elevator equipment. It is not to be overlooked, however, that the motor truck dump is somewhat different from the wagon dump in the effect it may have on the fire hazard, but the fire extinguisher at the dump is certainly an all-sufficient safeguard and so recognized by the insurance companies. The Queen Extinguisher is produced in the plant of the Harker Mfg. Co., 410 East Pearl street, Cincinnati, O.

Bosworth Bag Co

The expansion of the Bosworth Bag Co.'s business recently mentioned in this column now finds a little different consideration in submitting for the approval of our readers their girls' baseball team, all good ball players. The various factories of Memphis organized an industrial league among the women employes last summer under the auspices of the Y. W. C. A., and the healthy looking specimens of the Bosworth plant were gathered together, we presume to support the usual morale and calibre of the Bosworth business. This work will be continued, by the way, through outdoor and indoor recreation facilities in the new Bosworth factory now being erected on a four-acre site in Memphis.

Metcalf Designed and Supervised St. John Elevator.

Through a regrettable oversight on our part, in a description of the Canadian government elevator at West St. John, N. B., on page 16 of the Oct. 29 issue of THE PRICE CURRENT-GRAIN REPORTER, we neglected to give credit where it is due, to the John S. Metcalf Co., Ltd., who designed the elevator, made all the plans and supervised the construction work. Certain unusual features of this house are worth the further consideration and another review by readers who may be making additions or building new elevators of their own.

Murphy Grain Changes.

M. F. Murphy of the Murphy Grain Co., Springfield and Peoria, has sold his interest in the firm to the other stockholders, "Sim" Fernandes, N. A. Midden and W. W. Hill. The business of the firm will be continued as it is. Mr. Murphy's plans are not announced, but it is understood that he will continue in active Central Illinois business, the location and style of firm name to be announced later.

Liverpool Grain Sampling.

The Liverpool Corn Trade Ass'n, Ltd., has provided for the grain trade an independent superintendence department and has notified shippers and buyers that they are now prepared to act as superintendents and samplers in the ports of Liverpool and Manchester at reasonable rates, which will be in accordance with services rendered. The Association trusts that this effort will be supported and that it will eventually justify the Association in extending its operation in other ports.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Nov. 3.—A better tone developed in the provision market and closing trades showed January pork $1.87½, lard 75 to 80c and short ribs 75 to 90c better than a week ago. October pork finished the month at $43, or $1.10 better than the previous week.

With a lighter run of hogs, higher corn prices and higher prices for hogs, combined with a liberal foreign demand for lard and meats there was less selling pressure at times and the market showed more disposition to respond to buying. The short interest was more uneasy and in reality were the best buyers. Lard was the most active and there was considerable changing between the near and the distant futures. One of the leading packers said that they had sold all their lard, and as they put it, they are having a wonderful trade scattered all over the world.

The make of lard is unusually heavy, as everything but lean meats has been tanked for some time past. Within a week a better call for bellies and fat backs at advanced prices induced packers to tank less of them and while the make of lard was cut down, it is still above the average. The monthly stock report given out after the close Saturday made total supplies of lard here 27,292,072 lbs., compared with 29,929,539 lbs. last month, and 28,411,631 lbs. last year. That stocks should decrease with the manufacture so large showed a good distribution. There were large sales of refined lard for export at good prices.

Business in short ribs increased toward the last and there was liberal buying against cash sales, which had a strengthening effect on values. Supplies made a small decrease last month, being 2,425,824 lbs., or less than half of last year's. Total supplies of dry salted meats are 63,044,099 lbs., a decrease of 12,207,471 lbs. last month, compared with 12,411,804 lbs. last year, and a loss of 17,015,111 lbs. two years ago. Pickled meats were in better request and total supplies are 45,275,261 lbs., a loss of over 5,000,000 lbs. for the month and an excess of 6,000,000 lbs., as compared with last year. Prices on green and pickled meats advanced ½ to ¾c during the week.

October pork showed congestion and while the volume of business is light, prices moved up $1.10 and closed at $43. Interest in January pork was not large with shorts the only buyers. Speculators who sell pork short on the price are liable to get caught, as supplies are controlled by one or two packers.

Range of prices in September and previous and for the week follow:

			Close

Kansas City Provision Review.

KANSAS CITY, Nov. 1.—A rebound in prices for provision products was witnessed on the Kansas City market this week, following a similar upturn in the hog trade. Demand for both fresh and cured products improved considerably, with a good volume of business in the East, the South and in local territory. Southern demand for dry salt and heavy smoked meats was restricted by excessive rains in the cotton belt and flood conditions in some sections, which hampered picking and harvesting activity. Dry salt and heavy smoked meats advanced ½c to 1c for the week. Fancy loins were up more than 1c, a rise of 1½c being recorded on extreme sales. The cheaper offerings of fresh pork showed a smaller advance, generally around ½c. Lard sold well with both lard and the substitutes rising sharply. Fancy hams and bacons were in fair to good demand, closing about ¾c higher. An improved export inquiry was reported.

Summary of Live Stock Markets.

Highest prices for hogs in leading markets last week, as compiled by the *Daily Drovers Journal*, were materially higher than the previous week and at Buffalo they were $15.50. Prices follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$13.70	$14.00	$14.15	$14.15	$14.20	$14.60

Oklahoma City	209,400	280,900
Above and all others.	18,971,000	19,246,000
For the week	501,000	603,000
Preceding week	546,000	571,000

Weights are reported as follows: 271, 248, 220, 208, 199, 235¼, 214, 191, 207, 220, 177, 263, 229. Reports of quality: Five "good," two "fair," one "good mixed."

Cash Meats.

Trade in mess pork was of moderate proportions on Monday, confined chiefly to the January contracts. This was true also of shortrib products and exports of the two products continued light. A firm tone characterized lard trading and the demand was reported good with offerings rather limited. Quotations Nov. 3 follow:

M. pork, new	$42.00	@.....
Lard, round lots	27.00	@.....

Canadian Fixed Pork Prices.

The Canadian Board of Commerce has ordered that, on and after Oct. 15, the prices of pork and pork products shall go back to the figures at which they stood on March 10, and that any firm or packing house exceeding these figures will be considered to be making an unjust profit. The present prices per pound of some of the more important products and the prices on March 10 are:

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Nov. 3.—Best prices of h last week were made on Satur $14.60, or 90c better than the high Monday and $1.25 better than a w ago. Eastern shippers were in market Saturday and were largely sponsible for the advance of 20 to for the day. There were only 8 fresh receipts Saturday and the t number on sale were less than 10, the market experiencing a pract cleanup for the first time in a w Saturday's average was $14.10, c pared with $12.80 a week ago. week's average was $15.55, aga $13.10 the previous week, $18 last y and $16.60 two years ago.

Packers who wanted hogs during closing days of the week had to bid for them owing to the small offeri which were due to recent free mar ing and a disinclination on the par country holders to sell freely. Arri for the week were 132,305, or 23 short of the previous week and 42 under last year's. The twenty mar had 473,000 for the week, of which 000 were at the seven points. The vious week's run was 617,300 and year's 660,400. Packers bought 127 hogs for the week, compared with 000 the previous week and 169,700 year.

The average weight for the week 229 lbs., against 223 lbs. the prev week and 229 lbs. last year.

Cattle prices advanced to the hig since last May, for fancy heavy fat yearlings, $19.50 being paid for kinds; the yearlings averaging than 1,000 lbs. The latter was the h price for animals of that weight paid by a local packer. Sales at and above were made on every during the week, except on Fr when no choice lots were offered majority of the general run of rec sold at 75c to $1 decline, the run t heavy and the quality varied. T were a great many cattle sold at to $18.50 that showed good qua while the bulk of the offerings we common to medium grades, som which were off $1.50 or more. C that buyers were not certain a their dressing qualities were slow and the widest spread of the seaso tween the common and medium gr and the choice steers was recorded. erage price of beef steers for the was $15.80, against $16.20 the pre week and $14.90 last year. The est steers ranged down to $8 with lots around $10 to $12.

The country west of the Mis river continues to market its c freely and some claim that the run keep up for 30 days more. Arr of Western range stock for the were 33,500, or 7,000 larger than previous week and 10,000 in exce last year.

Prices were 25 to 50c lower fo week, with quality below the stan with a good percentage of com The range was $9 to $12.50 with a heavy Montana steers sold at $13 above. Western cows sold aroun to $10. A good run of yearlings calves was noticeable, representing mature marketing to save the feed

Butchers' stock was in large s throughout the week with prices 7 $1 lower. The average for the of $8.45 was 40c lower than the vious week. The extreme range $5.50 to $13, the latter being pai good heifers, while choice sold t $15. The bulk of the sales of cow heifers mixed ranged from $7.1 $9.85. Bull prices were well maint until the last when some weakne veloped. The average was $7.40 all kinds with bolognas $7.05.

Feeders are buying freely, pa larly those in Illinois, Indiana and ward. A great many are also goi Iowa and the movement to the pri

s, as well as from them, is un- large. The percentage of com- vas above the average, which to keep down prices, the best g considerable weight sold up to but a great many were taken at $9.50 for animals showing 600 lbs., while some that averaged 1,100 lbs. sold at $13 to $13.50. s were in good demand and at the top of the week, with the $18.25, and an average of $17.60, igher than the previous week. and lambs were in large sup- West marketing freely and 20 had 569,600 for the week, of 370,000 were at the seven lead- rkets. The total supplies, how- ere 43,000 smaller than the pre- eek, and 77,000 in excess of last Quality of aged sheep was most- ior, with a scarcity of wethers. ces on sheep were $10.25, with e at $7.50 to $10.25 and an av- $7.65, the low figure being due scarcity of wethers. The pre- eek the average was $9.20 and r $10.55. Native lambs sold 50 ower with common showing the cline. The top was $15.50 on lay. Fed western lambs were in pply and largely common qual- range lambs sold up to $15.60 5.25 paid for Canadians. ha Live Stock Market.

McCullough, Correspondent.

Nov. 1.—Although there was less letup in cattle receipts this supply was still of liberal pro- and much heavier than at this year. Receipts for the week 0 head as against 40,000 head a and receipts for the month of otaled 285,000 head, the heaviest tory of the trade. 0 per cent of the week's receipts t-fed and warmed-up cattle and came in direct competition with d Western range offerings, the ffered a serious decline all along nd closing prices were anywhere 0$1.50 lower than a week ago. s $17 was paid for prime corn- ags while weighty fed cattle on sold around $13@15 and the and short-fed grades largely .0.50@12.50. Cows and heifers off 25@75c, best grades bringing h canners and cutters at $5@6. s held about steady at $9.25@ bulls, stags, etc., unevenly lower

as some activity in stockers and rly in the week but later the ll off sharply and at the close es showed declines of 50@75c. y feeders are selling at $12@14, good grades largely at $9@11.50, on to fair stuff at $7.50@9.50 vn. of hogs have been the lightest son, only 17,500 for the week, arket has recovered some of the vy declines. Shipping demand y limited but local packers have e of a disposition to buy and taking the offerings freely at figures. As usual the best light r weight loads sell at the top and rough packing grades at but the range of prices is now han it has been for several ompared with the low time at last week the market averages 0 higher and the general feel- trade is decidedly stronger. oday brought $14.30 as against ast Saturday and bulk of the day was at $13.85@14.15 as .25@12.75 one week ago. of sheep and lambs was only time of the year, about 75,000 ded almost equally between and corn fed. General demand and prices improved 25@50c week on killing stock. Best are quoted at $14.50@15, year- 0@11.50, wethers $9@10, and 08. Business in feeder grades ather quiet with no particular prices, feeder lambs going 12@12.50 and ewes around $6.25

ıoma Livestock Market.

a Haehnke, Correspondent.

City, Nov. 1.—Receipts of been very light but they are the week with $10.25 top for is of fair to good grades av- ınd 1,000 lbs., fair grades, 900 at from $9@9.75 showed a nce. We cannot account for receipts this week unless they by the rainy weather we have g. Our market is sadly in need of steers and those coming are mostly going to stocker and feeder buyers, the majority of our runs now consisting of jackpots, she-stuff or stockers. The week's market is closing about steady with Monday, or around 50c lower than the high time of last week.

The hog market looks more cheerful this week, with an advance of $1.25@1.50 above last week's low level. The top was $13.95 on some good quality hogs, and we are looking for a $14 basis to come soon. Compared to a year ago, current prices are $3.75 per cwt. lower. Stockers are steady for the week.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Nov. 1.—Our cattle supply this week was liberal and we had a fair proportion of both heavy beeves and yearlings that could be called strictly good. One load of heavy beeves sold at $18.50 and several loads of yearlings brought $17.85. These sales were the highest of the season. Early in the week the market showed strength and activity but the continued rains together with bearish reports from the Eastern beef market and rumors of strikes combined to break the market on all classes of cattle and we go out of the week around $1 lower than at the opening. In spots the decline is even greater than this, especially on the high priced grades. Westerns and Oklahomas are still coming in fair volume and they constitute a class which the buyers particularly want. The consequence is that the decline on them is not nearly as great as in other grades.

With a light supply and a good local demand the hog market has been a strong, active affair all week. It is a big $2 higher than the close of last week. The quality of the offerings is averaging fair. The week's closing quotations are: Mixed and butchers, $14.40@15; good heavys, $14.60@15; rough, $11.75@12.75; light, $14.50@15; pigs, $12.75@13.90; bulk, $14.50@14.95.

A slow and weakened trade is noted in the sheep house notwithstanding a light run. There is not much change in the price of aged offerings but lambs are 40@60c lower for the week. Strictly good lambs at this writing are worth around $15.

We do not often have occasion to mention the horse and mule market but this week there was an open market sale of a carload of mare mules consisting of 19 head at $375 around. This amounts to $7,125 for the car which we believe is a new world's record price for mules sold out of a commission barn.

Denver Cattle Market.

Denver, Oct. 31.—Receipts of cattle this week were liberal. The market opened draggy and about steady, with last week's mean close and has improved somewhat from day to day and is generally 25c higher than last week's close on killing steers, best feeders and good to best cows in any class. Medium steers and plain little light cattle are barely steady and hard to move. High priced feed makes the country ship them and discourages buyers from taking on that kind. Horned feeding cows and thin light cows, even where they are young, are not sought after. Bulls, veal calves and stock calves are ranging steady. Stock heifers continue in poor request, selling largely from 6½c for fairly good ones to a little above 7c for choice.

Canadian Livestock.

Winnipeg, Oct. 31.—On Monday of the week select hogs were quoted at $18 but prices slumped considerably so that at the close Friday selects brought only $15.50. Choice steers lost 25c on the week's trading quotations, ruling $9.75@10.75. Tuesday an embargo was placed against Winnipeg on account of the congestion prevailing in view of the remarkably heavy receipts during October. The embargo was also extended against stock on through billing and is still in force although the situation is clearing up nicely.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Nov. 1.—A reaction in hogs and a slump in cattle made this an unusually interesting week in the trade in live stock in Kansas City. The action of the cattle market was disappointing, while hogs furnished an agreeable surprise to producers. Sheep displayed a good tone.

A top of $14.25 was paid for hogs today, the best price of the week, the general market closing about $1.25 higher than a week ago. Packers were good buyers, bidding actively the latter part of the week in particular. There were rumors of improvement in the export demand, but in some quarters the opinion prevailed that the reaction was only temporary. The reduced receipts were attributed to the heavy losses experienced by professional shippers on last week's break. The shippers were inactive. Bad roads and lack of cars also restricted the movement. Pigs were in strong demand for feeding purposes, while packers were poor buyers. The average cost of droves for the week was figured at $13.55, a rise of 77 cents.

In the cattle market, receipts of 94,000 cattle and calves were about 10,000 lighter than for the preceding week. However, with the exception of the choicest fed cattle, a few head of which sold at $18.25, the market was weak to $2 lower. Feeding cattle suffered the worst break. Butcher cattle closed around 50 cents lower, and calves lost fully $1. The opinion was expressed that choice fed cattle are being maintained above $18 by packers to encourage feeding operations. The bulk of grass cattle sold at $10 to $14, the latter including some which had received cake. Strikes and weakness on short-feds at Chicago reduced sharply the demand for cattle to go on feed, the attendance of buyers from Iowa and Illinois decreasing. Many complaints were again heard of a lack of cars, especially in range districts, and larger supplies would have come if equipment had been available.

With a sharp decrease in receipts, the sheep market displayed an upward tendency and closed 25@75 cents higher. Lambs sold up to $15.60. Heavy buying of feeding lambs by Colorado at Denver checked the movement to Kansas City, and this was one of the influences in the reduced arrivals. Ewes ruled up to $7.50. Feeding lambs closed at $9.50 to $12.25.

Movement of Hogs.

Plenty of Hogs?

We think the hog receipts will be in excess of general anticipation and hogs will get another good break during November. The East is not taking our hogs now and will not come West until after Ohio and Indiana have marketed their hogs, which will be after the first of January and that will not add any strength to our market up to January. James Fraser, who has been traveling Iowa for the past twenty years, says he never saw so many hogs in Iowa in all his experience. This only confirms the many reports that come to us every day from shippers and hog raisers.—*W. E. Press & Co.*

President Wilson on Oct. 22 signed amendments, including the Ball rent measure to Food Control Act, providing penalties for hoarding and profiteering in food and clothing.

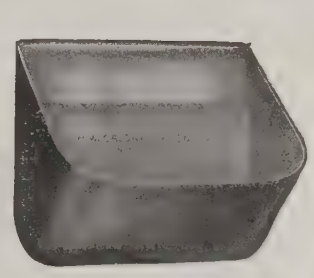
"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of iciency.

It is built with a daily capacity of from 25 to 50 barrels, and will allow any responsible party a reasonable time to try the ll, and if it is not perfectly satisfactory you may return it and money paid us will be gladly refunded. Here is your opportunity, ocking at the door.



Why not get into business for yourself? Here's a chance for a uggling head or second miller to own a business of his own. Our ms are liberal to responsible parties. For further information write

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

DOW WIRE AND IRON WORKS, INCORPORATED, LOUISVILLE, KY.

J. P. GRIFFIN NOW GENERAL PARTNER OF BACHE & CO.

J. P. Griffin, former president of the Board of Trade, heretofore doing business under the name of J. P. Griffin & Company, has been admitted as a general partner in the well-known New York firm of J. S. Bache & Co., a business established in 1869 and holding membership in all the leading stock and commodity exchanges in this country and Europe, with private wires to all exchanges.

The Bache concern is considered the largest and leading brokerage house in New York. They have opened an office in Chicago, occupying the entire bank floor at 108 South La Salle St., adjacent to the Board of Trade. Mr. Griffin will be the Chicago resident partner, in full charge of all branches of the business at this office.

They will continue in the grain commission business, and all of the J. P. Griffin & Company employes will be associated with Mr. Griffin in the new concern. J. S. Bache & Co. can be relied upon to furnish a service in all departments second to none.

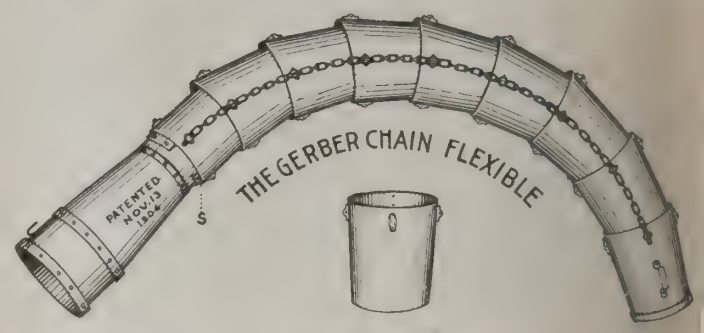
J. P. GRIFFIN, CHICAGO.

Associated with J. S. Bache & Co. are R. G. Freymark, married and with family, with eleven years' office, sixteen years' road experience, a Spanish war veteran; E. A. Prager, single, who began with Eschenburg & Dalton; he has had seven years' office and thirteen years' road experience through Iowa, Minnesota, South Dakota and Illinois; was recently with U. S. Marines. Both these gentlemen are posted on grain and railroad matters, and the trade can depend that with Freymark and Praeger on the job the company's patrons will receive a service second to none in Chicago.

Office—ideal location and one of the best furnished and equipped in Chicago, some fifty employes.

On Monday last the new office was opened to the public. The 50 employes in uniform paraded from the Board to 108 S. LaSalle, Woman's Temple Bldg., where the hospitalities of the office were extended to all visitors. The opening was a real function and Mr. Griffin's friends embraced the opportunity to congratulate him and his friends on this auspicious beginning.

THE WINTER HOG SUPPLY.



It is time that our hog supply should become generous and with a settled market we will have a steady flow of hogs to all markets. Radical breaks will check the supply as middlemen are unable to buy hogs under such conditions; but the hogs are in the country and must come sooner or later. When they get started the supply will tax the capacity of the packers to slaughter them. . . . There are a number of stockyards traders who disagree with us in this idea, but we must see a greater volume of business for hog products before we are convinced that hogs are worth what they are bringing at the present time. There is too much livestock coming to market at the present time other than hogs, which is selling cheap, to encourage any idea of high priced hogs, and the receipts will be double what they are now.—*W. G. Press & Co., Chicago.*

USINESS AND TRADE CONDITIONS

A week so crowded as last with events nothing
ands out in finer relief than the Massachusetts
ection and the overwhelming defeat of Mr. Long,
apologist and champion of the police who in
mber last violated their oaths and abandoned
ity of Boston to its fate at the hands of thieves
the scoundrelism of a great city. Rarely has a
so grossly and ignominiously demeaned himself
e effort to get office by appeals to social passion
lass demands; and today Gov. Coolidge is the
ient of congratulations from all parts of the
ry as the defender of law and order who has
signally endorsed as a fearless executive, while
ong finds himself forgotten even by his erst-
political friends, all but repudiated by Boston
which unhappily in recent years has largely
l to be an American city, except as it is over-
wed by the spirit of its noble traditions. But
chusetts, "There she stands." champion of
y and law and right as in the memorable past.
election gave new heart to those who still have
in the justice and the social efficiency of the
itution and the institutions which for over a
y have flourished under its protection. There
other features of the elections of Nov. 4
ghout the country which were not without sig-
ice, not the least of which was the appearance
s of possible presidential candidates of both
s, of whom, with perhaps two or three excep-
none rises above the level of country sheriff
ty.

coal strike has reached its crisis, and the
y is facing a condition similar to that which
nted the British government a few weeks ago
the miners proposed cashing in on Mr. Cham-
n's demagogic war promise to nationalize the
after the war had ended, and the later at-
of the railway employes to themselves direct
vernment. The pronunciamento of the Fed-
of Labor of Sunday, that in substance it pro-
o find out now whether its executives or the
ive at Washington is master of the Govern-
n this country at this time has joined the
quarely. It must be a fight to the finish—
00 vs. 110,000,000. No doubt one of the great
es to "Labor" in this contest has been the
e of the Government toward the strike, which
and before the war began as to us had yielded
h to the demands of the unions, with and
justification. But the latter have presumed
h. There was not a moment when the miners
ounce of sympathy from the public. The
recognized that the paramount issue is not
hether the miners themselves have been
right but whether they shall have all they
simply because they have said they will
without arbitration because they think they
ve the power to enforce those demands, with-
rd for the safety and necessity of the public.
miners have put themselves in the position of
glish railway employes. During the war all
n unions, like the English unions, were
asy bosses. The American Labor Board cared
for proper handling men as Lloyd George
f running railways, and the unions in both
s got what they wanted for the asking. Here,
, a contract has served as the basis of re-
to further demands by the miners, and as
t said, makes this American strike a crime.
d the challenge of Sunday of the Federation has forced upon the country a trial of strength between the unions and the Federal Government. Nothing else than a strike could have saved the face of Lewis and his Cleveland puppets, and the Government is forced to say "no" or yield itself up for good, its laws, its executive and judicial prestige and its power overwhelmed in a wave of universal contempt. It is unfortunate for labor that such a joining of issue should have been forced. It was not necessary; and it will be worse for the unions. They have abused their privileges and their power. By their greed they have lost the sympathy of the public, which has come now to believe that wage increases shall now stop until the unions force their men to produce enough to earn the wages they are now getting, by making goods plenty enough to reduce prices so that the incomes of other classes as expressed in goods shall be equal to those paid to labor.

The strike craze has for sometime more or less diverted public attention from the proceedings in the Senate in respect to the Peace Treaty and the reconstruction of Europe. From time to time the public has been led to expect that this great matter might be soon disposed of; but as fast as one proposal is gotten rid of another is brought forward and nothing definitive is done nor likely to be done. The performance is not edifying and has long since brought the Senate to low estimation as regards its sincerity and dignity.

The bearing of the Treaty and its ratification on American commerce cannot of course have escaped attention. Even so consistent a provincialist and protectionist as Mr. Lodge or Mr. Knox, to whom the export trade at least will be considered as of considerable moment, must recognize the fact that if American exports are to be paid for, since pay in gold cannot be expected and goods are not to be desired, the securities and commercial I. O. U.'s Europe has to offer must represent wealth and power to liquidate. But Paul M. Warburg, who returned last week from Europe, is anything but optimistic in his expression of views on the solvency of Europe unless radical changes are made at once in the fiscal policies of all European governments, including that of England, and unless industry can be revived on a broad scale. He warned exporters and financiers interested in foreign securities and exchange that "budgets must be readjusted before it will be possible to stabilize foreign exchange"; and he is confident that unless the wealth of the United States is used to assist other nations in recovering their industries, the securities will be valueless and the whole world, engulfing ourselves, will fall into bankruptcy. Those who on the other hand realize further that it is not what goes out of a country but what comes in which makes a people wealthy, may be concerned less about the character of the securities Europe has to offer, the first thought of the banker and the financier, than about the goods Europe may have to exchange for the goods of lesser value which American producers and merchants may send to Europe, are directly concerned in the revival of industry. In any event, whether our exports be paid in securities or goods, no payment representing value can be expected until Europe goes to work.

The first condition to such a consummation, Mr. Warburg said last week, is the ratification of the Peace Treaty by the American Senate. That would give a foundation, "even if a defective one," for the movement to combat the baneful influences at work throughout the world, which are drifting toward breaking down the present order of society. Then he said, quoting a British financier, the thing to do is to deflate our ideas. The world is living in a fool's paradise, based on fictitious wealth, rash promises, mad illusions. Everywhere in Europe bankruptcy stares the peoples in the face through the reckless expenditures of governments, their endless issues of paper money with nothing behind it, not even a working population with a disposition to work hard and to save. It is so very easy to earn the depreciated money that all respect for it is gone, as is also the noble spirit of self-sacrifice manifested during the war. In the place of thrift and self-sacrifice the world sees everywhere "an orgy of brazen self-indulgence at the very moment when the war bill is presented for payment." The store of wealth is being depleted through the extravagance and waste of governments and the non-production of workingmen, while the dependable middle class is being wiped out by the attrition of both.

The extent of the inflation in this country has been emphasized during the past fortnight, when the credit resources of the Federal Reserve System (thought to be practically inexhaustible) actually reached a stopping place for a brief moment. The calls on the System had become enormous, owing to the vast speculation in all sorts of property values now going on. In the review for October by the Board, published last week, it was said that:

> There has been an increasing demand for funds from private business, both in commodities and securities. Speculation is attaining an unprecedented activity, and is embracing not only corporation issues of all kinds, but also real estate and many classes of commodities. Prices both of farm lands, staple commodities such as cotton, securities and other properties continued to rise, notwithstanding the reduction of Government purchases and the fact that the Government has itself released to consumers large quantities of goods purchased for Army use. Two factors have clearly developed themselves during the month as dominant in the whole financial situation—the problem of domestic speculation and the policy to be pursued with respect to the demands on credit resulting from it.

The policy referred to was announced on Nov. 4 with reference to rediscount rates, which are advanced, it being the evident intention of the Board to do what the Bank of England had always done with great success in the past, regulate both the general money market and the use of banking credit, and by changes in the discount rate encourage or discourage the use of money or liquidation to meet the prudence of the moment. The stock market was at first disposed to ignore the advance in the discount rate; but the saner men on 'change accepted the hint, although the actual advance in the rediscount rate (¼@¾ of 1%) was not itself extensive, applying moreover only to loans on Government obligations and 15-day paper however secured. The immediate effect was slight, but it is at least a warning that further inflation and speculation are to be discouraged.

There has been no visible change in general business conditions, except the reflections of the coal strike, which in its earlier stages gives warning that fuel will be a factor of production in the immediate future. All goods continue scarce and will be until labor regains its senses and resumes production on a broader scale or consumes less. Conservative men are becoming more and more cautious, and this characteristic will take a wider sweep, since many sound business thinkers are privately convinced that, what with the financial condition of Europe, the recklessness of governments and the folly of labor everywhere, the world is being driven into a period of industrial depression whose extent

and painfulness and duration no man now can prophesy.

THE CORN CROP

THE November showing of the Bureau of Crop Estimates is a corn crop for 1919 of 2,910,000,000 bushels, being an increase in the estimates since the October 1 report. The estimate is now based on husking returns. Only in 1917 (3,065,233,000 bus.), 1915 (2,994,793,000 bus.) and 1912 (3,124,746,000) has the total yield of 1919 been exceeded, making it the fourth largest crop on record.

The corn is needed, for the estimates of reserves show only 72,263,000 bushels on the farms at Nov. 1. With three exceptions, 1902 (29,000,000), 1907 (71,124,000) and 1917 (34,745,000) this is the smallest absolute total of reserves on record since 1900, while the relative amount, 2.8% of the crop of 1918, is the lowest on record since 1900, 1902 (1.9%) and 1910 (1.3%) only excepted.

There is another feature of this crop that is of interest. The amount grown in the surplus states is 1,433,751,000 bushels or only 49.2% of the crop as estimated at Nov. 1. This amount is not absolutely the smallest in recent years in those states. Indeed only four times since 1912 has the yield in those states been less. Relatively, however, the yield is less than in any year since 1912 (49%), showing that the production is more evenly distributed over the belt than usual. Kansas has ceased to be a shipper, but South Dakota and Minnesota are in surplus, while the East, South and Texas are approaching that status. The effect of this condition of things on the distribution commercially of the corn crop will be better shown when the complete report for all the states appears and may be compared with the farm animal census also to appear later on.

FARMERS' ORGANIZATIONS

THE disposition to some farmers' organizations to run amuck is seen in the announcement from Washington of a "conference" to be held at Chicago on Nov. 21 and 22, just in advance of another "labor conference" to be held at Washington in December. At the bottom of this latest piece of farmer radicalism is the Farmers' National Council, composed in part of Nonpartisan Leaguers, whom farmers ought to shun as a veritable plague and pest. Manifestly, some of the social dope peddled in the past by the Curtis and the Capper publications, East and West, is sprouting like dragon's teeth to annoy the country and to blight the really sane associated farmer activities.

WHAT CITIES DON'T TACKLE

THE Bureau of Markets has issued a statement entitled "How Cities Tackle Food Problems." We have not seen this statement, which may or may not be as lucid and academically valuable as most of the similar Bureau's "statements." But the title in any event is misleading. "Cities" do not "tackle food problems"; and it is mighty lucky for most cities that they do not, for in such cases most of their people would suffer great inconvenience.

Private purveyors and distributors of foods in cities do tackle these problems; and somehow it does happen and through all ages it has happened that except in case of famine or siege the people have been regularly fed, sometimes at a high cost indeed, more often at a low cost; but at least they have been fed. And aside from the men engaged in the work of providing food and distributing it no one who has "the price" in his pocket even now in this country goes to his bed at night worried about where his breakfast next morning is to come from.

Now, of course, most of the Bureau's clerks who have studied this phenomenon as a college classroom exercise may be puzzled by this result and of course can readily demonstrate how it can be reached better and at a lower cost; and no doubt they can demonstrate, that such results cannot obtain from the system in vogue, using the logic by which Archbishop Whately demonstrated a generation ago that there could have been no such man as Napoleon Bonaparte, and that if there had been, he could not have done what he did do; and assuredly they can demonstrate in the same way that at least all cities can be provisioned very much better and more cheaply (on paper); but if any one of them can demonstrate in practice as a business proposition how this can be done so as to reduce the cost of distribution a fraction of one per cent, he wo'n't have to worry about his own financial future—like the man with the perfect mousetrap, the world would beat a path to his cabin door; a thousand firms in any big town would be found ready to take him in and pay him a big salary just to have him show them how to do it—that is the secret of all great fortunes made in trade!

DECIMAL WEIGHT BILL

THE Cairo Elevator and Mill Co. in the "Letter Box" makes a well-taken point on the "Decimal Weight Bill," from the standpoint of the corn miller. The condition the writer points out is of course intolerable, but it is one which peculiarly affects the corn miller rather than the wheat miller and other package packers. It is a condition which is not, however, without a remedy at law if not in custom; and to that remedy, as expressed in English or American pounds no objection has been offered by this paper nor will be.

What has been here objected to is that the designation, "Decimal Weight bill," has been disingenuously used by proponents of the metric system to conceal the fact that the metric and not the central system is the object of at least one bill now before Congress, which has already been reported favorably to the House. There is a vast difference between the two ideas, which should not be overlooked and which is not pointed out as forcibly as it should in all fairness be by the "World Trade Club" (?) which is the real push behind the metric system propaganda in Congress and not the "decimal weight" or central system.

A DULL WEEK

ASIDE from twenty-eight regularly paid correspondents' reports, reviews and other articles in last week's PRICE CURRENT-GRAIN REPORTER, there were also forty-three signed contributions by special writers and readers on a wide sweep of trade topics. But this happened to be hardly up to the average number of writers weekly for these columns. No trade paper in this line can equal this breadth of view of market conditions as expressed by men actively engaged in trade. And by no means a remarkable coincidence, not one writer of the entire bunch felt compelled to spread the Capital I all over the page in order to express himself. They take their business seriously and use these columns to give out information rather than just to preen.

EDITORIALETTES

IT has been hinted that an appeal will be taken from the Bureau of Chemistry's ruling that reground bran and low grade flour are not "shorts." Perhaps they are not; but why does not the Bureau say what it would do were this product marketed on its merits. The product is a useful one; why should the mills making it be wiped out by inability to market their product?

THE virtual suspension of the export wheat embargo suggests two things, the clearing up of credit uncertainties and the relief of sluggish business conditions which were the natural result of the longshoremen's strike in New York. There is, however, a dearth of actual data as to the full needs and probable demand of foreign wheat importers, except in the cranium of Mr. Gronna of North Dakota who

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures rep senting the past week, the preceding week and cor sponding time last year, here assembled for ready ref ence:

	Nov. 8.	Nov. 1.	Nov. 9,
Wheat—

*Fort Worth missing. **Government withheld dat this time.

lays all the hesitancy of the outward flow of g to the deadly machinations of Mr. Barnes.

ATTORNEY GENERAL PALMER is still keen on program to restrain price advance by the strong method, our Washington correspondent says. results of his campaign hardly justify his faith the public, however, who fail to see results that r anything.

THE Corn Products Co. is running to capacit all its plants and grinding about 1,000,000 of Argentine corn monthly. It has been frequ mentioned herein that an exceptionally large plus of Argentine corn is available but that official records of imports into the United S did not show substantial purchases. The Products Co. quite openly states, however, th expects to continue the present basis of opera with Argentine corn for some time to come, that the settlement of the longshoremen's New strike has permitted the return of its Ea grinding mills to full capacity. This compar grinding most of the corn imported, which fo first eight months of 1919 amounted to 6,092,738 of which 5,521,997 bus. came from Argentina 393,140 from Japan.

THE brief reference to Lloyd George's policy" in another column suggests that Mr. G might reread with great profit to the agricultu his country, as American farmer reformers might also, the history of that industry durin post-Napoleonic era, covering three decades. George has become a confirmed paternalist, ou ing all English traditions since English agricu and commerce broke the bonds of paternalis the remote past. Is Mr. George now about to r the weary, dreary round of misery which the lish farmers endured between 1815 and 1846 looks like it. So much for the slop of sentimen as a motif in government of which we are h a large overdose in this country also.

ncerned.

ers showed a decided dispo-
sell corn on the bulge of last
ecially where $1.25 was offered
g stations. This has been the
hich many have been hold-
ing for, but judging from the hedging business the amount of grain contracted for was not as large as would be expected. The upturn was due primarily to the technical situation, and the reaction was not surprising. The shorts in December, however, are not out of the woods as it takes cash grain to fill contracts. How much grain for December shipment has been sold to the East remains somewhat of a mystery, but is generally believed to be large. It is as much a matter of transportation and storage room as it is of the producer selling. Unless every effort is made to move wheat from terminal markets to the seaboard and export it, there will be no great accumulation of corn on the crop on account of the lack of room.

A large crop of excellent quality corn has been raised this year. The quality is probably the best known. Very little of the new grain is grading sample, but it has commenced to move so early that the crop may be forced to last 13 or more months instead of 12. It is abnormal for a run of new corn to be anywhere near as heavy as at the present time. It may be that there will be no big December movement in consequence, although the last two weeks of December are generally a period of large receipts. Last year the movement was over before the trade realized it, and it was of very short duration. Scientific marketing would solve one of the greatest problems of the grain trade in respect to corn. Spreading the movement over the entire year would result in stabilizing values within comparatively narrow ranges as there would be no periods of scarcity or of excessive supplies. It will take some years for this condition to develop to any great extent, although the producer has repeatedly been able to force advances in prices in the past few years by holding his grain. This condition will in all probability be practiced this season.

Heavy weight oats are wanted for export, while light weight are selling at a good discount under the December and have been acting as a weight on the latter. The domestic demand has been holding up remarkably well, perhaps as the result of talk of a railroad strike. The Eastern crop this season was also light so that the demand may continue to some time to come. The signing of the peace treaty is expected shortly, and after it is out of the way commercial credits may be granted to Europe and considerable oats, rye and barley as well as hog products might be taken.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Nov. 8, 1919.	Nov. 1, 1919.	Nov. 9, 1918.
Wheat	8,135,000	9,485,000	9,980,000
Corn	2,164,000	2,799,000	4,411,000
Oats	4,383,000	4,982,000	6,133,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	14,682,000	20,524,000
Preceding week	17,266,000	22,139,000
Since July 1	381,807,000	472,329,000

Corn prices fluctuated rapidly within a wide range. Short covering as the result of the order which swept western roads bare of empty cars and prevented shippers and industries from drawing grain from store. This caused a big upturn in the cash which jumped around 20c over the outside figure of the previous week, and futures followed. December at the top showed 15⅜c over the inside figure of the previous week, but lost the greater part of the bulge later on general selling and a break in the cash and closed 1⅜c higher, while the May was ⅝c lower. Sentiment is decidedly mixed, and rapid price changes are generally expected.

Oats advanced with corn early, but the bulge led many longs to sell freely, and prices reacted sharply, the close being 1 @ 1½c lower, the latter on December which is feeling the weight of the low grade grain delivered on September contracts. There was also free selling of oats against purchases of corn to close spreads. Receipts were not large and the eastern and seaboard demand fairly active.

Cash wheat was in keen demand and sharply higher early the past week with hard winter and springs at new high levels for the season dark No. 1 northern at Chicago and Minneapolis selling at $3 per bu. while hard winter advanced to above $2.40. The persistent upturn resulted in the announcement that the Grain Corporation was considering a plan to resell of its holdings, and a sharp decline followed. As far as known the Government has no great quantity of good spring wheats to release. Range of prices for the week follows:

			Close		
	High.	Low.	Nov. 8, 1919.	Nov. 1, 1919.	Nov. 9, 1918.
Corn—					
Dec.	$1.41	$1.32⅜	$1.32⅝	$1.31¼	$1.17⅞
May	1.33	1.25⅞	1.26¼	1.26⅞	.....
July	1.31¾	1.25	1.25⅛	.....	.....
Oats—					
Dec.	.74⅛	.70½	.70⅝	.72⅛	.69⅞
May	.77¼	.73¾	.74⅛	.75⅛	.....

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the Geo. Broomhall service and forwarded to this paper:

	Nov. 8, 1919.	Nov. 1, 1919.	Nov. 9, 1918.
American	16,000	16,000	54,000
Argentine	1,282,000	3,429,000	636,000
African	.....	84,000	94,000
Total	1,298,000	3,529,000	784,000

Exports of corn since Nov. 1, 1919, compared with last year and year before:

	1919.	1918-19.	1917-18.
American	16,000	90,000	928,000

WASHINGTON DOINGS

The Edge Bill Working Along—What It Means to Agriculture—Gronna Still Harping on Barnes—Radical Farmers' Movement.

WASHINGTON, Nov. 8.—The Edge bill in which exporters of all sorts of commodities have been keenly interested, has been passed by the House. Conference committees expect to iron out the differences between the Senate and House bills and the bill may become law by Dec. 1. In brief the bill authorizes the formation of banking corporations under the supervision of the Federal Reserve Board, which shall have authority to issue debentures based on foreign securities, to constitute a medium for the payment of indebtedness to American industries and exporters in this country.

An illustration of the contemplated effect of the bill upon the foreign purchases of American wheat was given by Representative Stevenson of South Carolina. Being a Southerner he coupled it with a hypothetical cotton transaction. "A man in London or in Liverpool who wants to buy cotton today goes to his bank, for instance, and borrows £10,000 sterling," said Mr. Stevenson. "He comes to America or sends his agents here to buy cotton with that money. If he can get the gold and send it over here and draw exchange in pounds, shillings, and pence, as he will have to do, that amount of money will net him in dollars $41,500. If, instead of that, he could go to a bank of the character the Edge bill proposes to establish, or its branch in London, and arrange to put up the same securities there, and get his loans in dollars at the home bank in New York, his £10,000 would be worth to him $48,600, and he could buy with that 138,857 pounds of cotton at 35 cents a pound; but if he would have to draw exchange and get only $41,500 for his £10,000 he could buy exactly 20,286 pounds less of cotton. In other words, he loses 40 bales of cotton in the transaction. That is the difference and it amounts to 6 cents a pound.

"If we have these institutions so that he could come here and get his money, by putting up the same securities that he puts up in England, he could pay 6 cents a pound more for his cotton than he can under the present arrangement, and on the 11,000,000 bales of cotton in the United States that would mean $330,000,000 to the people of America who market the cotton.

"The same thing is true with respect to the wheat market. If he could use the foreign exchange institutions that we propose to build up and could come here and borrow his money and have it in dollars, his money would buy 19,440 bushels of wheat, while if he had to come here and draw exchange he could only buy 16,000 bushels of wheat, fixing the price of the wheat at $2.50 a bushel. In other words, if he could get his money in dollars, he would be able to pay 42 cents more a bushel for wheat and get the same amount of wheat that he gets at $2.50 now, drawing exchange."

GRONNA STILL FIGHTING BARNES.

Senator Gronna of the Senate committee on Agriculture threw out a hint of his attitude toward Julius H. Barnes, Wheat Director, as developed from the committee's investigation of the wheat situation, during the discussion of the peace treaty. "Before the Senator from Illinois leaves the discussion of agricultural products I want to suggest that a new policy has been instituted in our country which was developed during the hearings before the Agricultural Committee the other day," said Senator Gronna, alluding to remarks made by Senator McCormick on the failure of the framers of the labor sections of the peace treaty to give proper consideration to agriculture. "It seems that this country had from 300,000,000 to 350,000,000 bushels of wheat to export, but in the face of that an embargo was placed upon those products, and when the neutral nations of the world applied to us for our products they were told that no permit would be issued to them; so they were sent to Argentina and other places. When the man in charge of this tremendous business was asked why these orders were not filled and why this product was not sold, he made the excuse that he thought the Allies were entitled to first consideration. The facts are, however, that we had at least 300,000,000 bushels to spare besides what we might furnish to the Allies."

FAVORING FARMERS AS A CLASS.

Following the signing of the general deficiency appropriation bill by the President, Senator Edge of New Jersey introduced a bill in the Senate to repeal the provision in the measure prohibiting the use of funds by the Department of Justice for the prosecution of farm organizations for violation of anti-trust laws. Officers of the National Board of Farm Organizations immediately were up in arms, and renewed their efforts in behalf of the Capper-Hersman bill legalizing collective bargaining by farmers. The House Judiciary Committee, before whom the Capper-Hersman bill is pending, may take action upon it before the recess which Congress plans for the near future. The committee is expected to act favorably but passage of the bill will not be an easy task.

GENERAL PALMER SEEING THINGS.

Attorney General Palmer, in asking the House Agriculture Committee to extend the food and fuel control act for six months after the proclamation of peace, was questioned about his intentions with respect to the provisions for the control of grain exchanges. "I have no intention of exercising that authority," replied Mr. Palmer.

The Attorney General, however, was unwilling to consent to the elimination from the act when extended into peace time such sections as are unnecessary. He said it was impossible to tell when there might be occasion for the exercise of a war power and that he believed it was as essential to maintain a control over the situation during the months following the war as during the war. He stated frankly that before the six months were up he might come back and request a further extension. The committee does not seem to be enthusiastic over the proposition.

RADICAL FARMERS MOVEMENT.

An attempt to unite the radical agricultural element and organized labor is to be made in a conference to be held at the Morrison Hotel, Chicago, on Nov. 21 and 22. The call for the conference has been issued from Washington, signed by Herbert F. Baker, president of the Farmers' National Council, and Dalton T. Clarke, president of the National Coöperative Association. The call frankly states that the meeting is purposely held in advance of the labor conference scheduled for Dec. 8 at Washington in order that plans for coöperation may be proposed and submitted to the labor gathering.

The attitude of the Farmers' National Council, which is the most radical of the agricultural organizations, including in its membership some of the supporters of the Nonpartisan League in the Northwest, is in contrast with that of other similar bodies. During the Capper-Hersman bill hearings before the House Judiciary Committee the representative of the National Board of Farm Organizations stated that the leaders of that organization had refused to join in a conference with organized labor. The Farmers' National Council is an advocate of government ownership of the railroads and the merchant marine.

The call for the conference states that the subjects to be considered will include the Kenyon-Anderson bill "to control the packers' monopoly, and to clear the way for free marketing" and other means to reduce the high cost of living and promote "a closer union between farmers and wage earners for nonpartisan political and industrial ends."

BRITISH CEREAL RESTRICTION

Larger Importations of Corn Permitted by the British Wheat Commission—The Cereal Restriction Order and How It Affects Prices and Trade.

By JACK BROOKS.

LONDON, Oct. 5.—[Special Correspondence.]—In order to relieve the shortage of feeding stuffs in this country the Ministry of Food has arranged with the Wheat Commission for corn to be imported into this country at a greater rate during the remainder of the year.* The maize imports during the current year have been very low. This concession comes practically hand-in-hand with the Cereals Restriction Order of 1919, which limits the use and sale by weight of wheat except for seed and flour purposes and prevents the sale of damaged wheat or tailings, or screenings, unfit for use in the manufacture of human food at a price exceeding $18 per quarter of 504 pounds.

The order affects not only the grain dealer and miller here but also the importer, in the case of imported wheat. Its purpose, apparently, is to prevent waste; to confine wheat, and cereals generally that are in good condition to the manufacture of human food; and to allocate damaged and unfit cereals to those especial purposes for which they are best suited. The order prevents the use of wheaten flour, rice or rice flour, or of any article containing these cereals, for any other purpose than that of human food. It prevents, or is intended to prevent, persons from damaging wheat, wheaten flour, rice or rice flour so as to render the same less fit for purposes of seed or the manufacture of human food. It gives the Food Controller power to authorize any individual to take samples of the cereals mentioned at any time when there is reason to suspect such cereals are being damaged for ulterior purposes.

The sale of wheat or wheat tailings and screenings is now unlawful if made to persons other than millers buying for purposes of manufacture of flour, persons who in the ordinary way of business deal in wheat for a livelihood, persons requiring and holding a license to use wheat or tailings and screenings of wheat in his manufacturing business, and persons buying wheat specifically for seed purposes. An exception to this clause is made in the case of damaged wheat and tailings and screenings unfit for manufacture into human food.

No wheat, barley or oats, either imported or home-grown, or whether or not mechanically treated, may now be sold other than by weight. As regards the maximum price of $18 for damaged or unfit grain, where the purchase is made from persons other than the producer or the importer of the grain concerned, the maximum price shall be ascertained by adding 25 cents per quarter to the price otherwise applicable. If the total quantity purchased by one buyer from one seller does not in seven consecutive days exceed 7½ quarters (60 bus.), the maximum price in respect of each quarter so purchased is to be ascertained by adding $1.25 per quarter to the price otherwise applicable. Where such total quantity does not in that period amount to half a quarter (4 bus.), the maximum price must be ascertained by adding $2.25 per quarter to the price otherwise applicable. Where the total quantity sold does not in the seven days exceed 28 pounds the maximum price will be the actual cost to the seller plus 1 cent per pound.

Regarding trading terms, the authors of the order have fixed the maximum price of $18 per quarter in conjunction with a number of conditions as part of the transaction. For instance:

Payment must be net cash within seven days of completion of delivery; money unpaid thereafter to carry interest not exceeding 5 per cent per annum or bank rate, whichever is the higher.

*The maximum price is 105s. ($25.5 per 480 lbs. "With maize in New Yor well above £15 per quarter, free Amer does not seem to have much ch against South African and Plate at ($15.79½). However, there are ce manufacturing processes for which A ican is worth considerably more than o sorts."—London Grain Reporter.

Grain purchased under the order to be delivered free by the produce rail or by barge to the mill or s and any freightage, haulage, porte or cartage incurred after deliver paid for by the purchaser. All hire up to the time of actual deli is to be borne by the producer, subsequent sack charges by the chaser.

The order provides for grain other than those already referre The producer can charge an extr cents a ton per mile for delive grain greater distances than the eral custom of the particular dis calls for. Where grain is delivere the producer at his premises 18 per mile per ton may be deducted the maximum price.

The sale of wheat and wheat tai and screenings (imported) and for use in human food must con to the following terms and conditi

Sales by importers to be ex- store or granary, and grain shippe bags to be sold gross weight, inclu bags, no charge being made for the ter. All storage, transport and charges incurred after sale by the porter to be met by the purchas

Where sales by importers are payments are to be in net cash ag bill of lading warrant or approve livery order. On all other sales ment is to be net cash within s days of completion of delivery. Mo unpaid thereafter will carry intere 5 per cent or bank rate, whichev the higher. Where the sale is ma wheat or tailings or screenings wheat, that have been mechani treated by the various processes, as torrefying, bleaching, gristing, c ing, bruising, kibbling, splitting kiln-dried, the maximum price is ascertained by adding the cost of treatment not exceeding "a usual reasonable charge."

Dealers handling grain unfit fo man food are required to keep acc records containing such particula are necessary to show whether b complying with the provisions of order. All these records and docun are open at all times to inspectio the Food Controller or his autho representatives.

The Food Controller says that by expression, "unfit for use in the ufacture of human food," is meant so damaged or so inferior in qu that any flour or meal which coul milled therefrom would be unfit fo in human food. He says further the expression, "importer," shall the person sighting the shipper's but that this shall not be construe as to limit the general interpret of that expression.

Owing to alleged speculation in tle cakes and meals the Food troller also announces that from on licenses will be necessary for sons dealing in cakes and meals copra, cotton seed, peanuts, lin palm kernels, rape seed, rice bran, meal, sesame seed, or soya beans. ufacturers of such cattle cakes meals also are to be licensed u their total manufacture is less tha tons per month.

It is proposed to issue five class licenses, viz: Manufacturers', im ers', wholesale dealers', brokers' distributing dealers' licenses.

Dealers not affected by this o will be those who entered into tracts before the middle of Septe or those whose purchases from or to in any one calendar month do exceed 4 tons of cake or meal. sons purchasing for consumption their own cattle also are exempt.

Lawrence Farlow has been appoi secretary of the Farmers Grain ers' Ass'n of Illinois, succeeding Steinhart.

NTRAL MILL AND ELEVATOR CO., TOPEKA, KANS.

ny business to be conducted profit-y with as small a margin as possible over-head must run in continuous ration every day. This is being mplified more and more as time goes in the country elevator business, ere many of the grain men now are ipping their plants so that besides ing and shipping grain in carlots, y are able not only to clean it and it in a merchantable condition, so t it will grade right, but are in a ition to use the screenings, etc., in ufacturing feed. They are also ipping their plants so that they can into custom feed grinding. Others are handling other side lines ch enable them to keep a good king crew the year around, having open market every day for their ner patrons as they have hereto-, and yet having all the men's time itably employed.

e take pleasure in illustrating with the plant of the Central Mill levator Co. of Topeka, Kans., owned

Besides owning and operating in connection with their grain business the Central Elevator of North Topeka, the company operates some country stations.

GRADE CERTIFICATE IN APPEAL CASES.

Offices of Federal grain supervision began on Nov. 1 to issue "Federal Appeal Grade Certificates" in lieu of the old form of "Grade Memorandum," in cases where appeals are taken from the determination of licensed grain inspectors. The Federal Appeal Grade Certificates are issued by grain supervisors as soon as the appeal is filed by any interested party who contests the grade assigned the grain by the licensed inspector. This certificate is ordinarily used in settling a controversy as to grade between the buyer and seller. Copies are furnished by the supervisor to all interested parties. Coincident with the change in the form of the "Appeal Grade Certificate," the formal findings of the Secretary of Agriculture in appeal cases will be retained with the appeal record and furnished to interested parties only upon request instead of being forwarded to the parties in all cases. The findings of the Secretary of Agriculture, reciting the grade determined in the appeal, are issued from Washington, and have the value of *prima facie* evidence as to the true grade of the grain in all United States courts.

The above-mentioned changes in connection with appeal cases are provided for in Amendment No. 12 of the Rules and Regulations of the Secretary of Agriculture under the Grain Standards Act. The same changes are made effective with regard to the handling of dispute cases as in connection with appeal cases, but in other respects the procedure with regard to appeals and disputes filed under this act remain as heretofore.

A HANDSOME TROPHY.

A handsome trophy, costing $250, will be offered by the American Association of Manufacturers of Corn Products for the best sample of corn exhibited at the International Grain and Hay Show at Chicago on Nov. 29th to Dec. 6th. This trophy will be awarded annually and the name of the winner will be engraved on the trophy.

The trophy as decided upon will be a large golden ear of corn, set with a silver sheath and mounted on a mahogany base. This will be beautiful and attractive in design and one which merits the strongest competition. Already much rivalry has been exhibited among the corn growers of the various states. Iowa, Illinois, Missouri and Ohio are challenging Indiana, which state carried off the grand championship in past national shows. The best corn produced in the whole country will be entered in this contest.

Visitors at the Livestock Exposition will have a chance to see not only the best livestock but the best corn, wheat, oats, rye, barley and hay produced in the United States and Canada.

WEEVIL IN WHEAT AND GRADING.

"One live weevil or four 'confused flour,' 'rust red,' or 'imported flour' beetles or so-called bran bugs in a representative sample of wheat approximately two quarts—that is, representative of the entire car lot—is not enough to warrant grading that parcel of wheat 'sample grade,'" is the ruling of the Chicago Board of Review, Federal Grain Supervision, in response to requests that a definite ruling be made in view of many recent arrivals of wheat containing weevils at Chicago and Kansas City.

In the case of grain in which live weevils are found, the Board believes that one weevil in a representative sample of a car of sound, clean wheat is not conclusive evidence that the grain is infested, and may, therefore, be disregarded unless there is some further evidence of infestation. If, however, but a single live weevil is present in a representative sample of a car, and additional indications of infestation, such as weevil-cut, or weevil-bored kernels, weevil odor or weevil refuse, are discovered, it is the Board's opinion that there is clear evidence of infestation, and the grade "sample grade" should be assigned.

Insects injurious to stored grain, other than live weevils, are not considered by the Board of Review as sufficient reason to grade wheat "sample grade," except when found in numbers. Such insects are more often found in oatmeal, corn meal, prepared wheat products and flour, or other milled products, than in wheat.

Cleaners in North Dakota.

The North Dakota grain inspection office says that only 63 per cent of the grain elevators in that state have any grain cleaning equipment, although all elevators are required by law to be equipped to clean grain. The report covers 1,612 elevators. Of the so-called "line" elevators, 41 per cent are equipped to clean grain, while 86 per cent of the independent houses have cleaning equipment. The farmers' elevators, on the other hand, have the proper equipment in 93 per cent of their houses. Under the state law elevators are required to clean grain and return the dockage to the seller.

NEW MINIMUM WEIGHTS.

All carriers throughout the United States will publish, on five days' notice, the minimum weights on grain and grain products given below, as anticipated in these columns last week (see p. 7 (1075). A uniform date of effectiveness has not been set for the publication by the carriers of these new minimum weights, so that they will be made effective on various dates, on or about Nov. 15, 1919. The new minimums follow:

On grain, all kinds, the minimum weight will be the marked capacity of the car, except that where the marked capacity is less than 40,000 lbs. the minimum weight will be 40,000 lbs. per car. The actual weight will apply when grain is loaded to within 24 inches of the roof at the side walls of the car for the purpose of Federal or state inspection by grain exchange at points where Federal inspection is maintained (notation to that effect being inserted in the bill of lading by shippers), or when grain is loaded to proper grain line of cars so marked.

On grain products the minimum weight will be 60,000 lbs. per car; provided, that when the marked capacity of the car is less, the marked capacity, but not less than 40,000 lbs. per car, will apply; and provided further, that when a car is loaded to full space capacity the actual weight will apply.

MR. SHANAHAN GOES TO THE NIAGARA MILLING CO.

John D. Shanahan has resigned his position as member of the headquarters staff United States Grain Corporation at New York to accept a position with the Niagara Falls Milling Company, with offices in the Chamber of Commerce at Buffalo, N. Y.

For more than two years Mr. Shanahan has been general field representative of Julius H. Barnes, president of the Food Administration Grain Corporation and United States Wheat Director, and had charge of a party sent by the Wheat Director to Europe last May to make a field survey of the growing food grain crops in that part of the world. The personnel of this party included two experts from the Federal Department of Agriculture. The survey was made entirely in automobiles because of the confused state of railway transportation. The countries surveyed included France, Italy, Jugo-Slavia, old Hungary, Roumania, Bukowina, Poland (including Galicia), Czecho-Slovakia, Austria, Germany, Holland and Belgium. The survey involved a journey of more than 5,200 miles in autos alone. The object of the survey was to furnish the Wheat Director with information which would enable him to determine the World value of wheat.

Mr. Shanahan's friends will congratulate him on this new connection, which will be equally advantageous to the Milling Company, to whose service Mr. Shanahan brings a thorough knowledge of wheat as wheat and a broad knowledge of trade matters in both sides of the world, over the greater part of which he has traveled in the past ten years.

The prairie hay crop was not a good one in Randolph County, Mo., as many of the meadows had been plowed up and sown to corn and wheat. The timothy and clover crop, however, was a bountiful one.

VOILA, LE CHEVAL.

The horse since the earliest ages has, like the dog, been the companion and the helpmate of man in war and in peace; but in this swift and extravagant age, in America more especially, even the farmer has relegated the horse to the rear. The farmer drives his motor to town and on all pleasure journeys, and the great pleasure drives of the cities know him no more. Only now and then, at such a summer land of homes as Lenox and other show places of the Berkshires, will one see the turnout *de luxe* of the ancient time before the motor was, the aristocratic sharp-eared high-steppers who seemed to understand they were there to parade their owners' wealth, at least. In the towns such animals are as rare now as pretty girls in Patagonia.

Even as a servant and help-mate in town, the horse has been so neglected of late that a fine team of draft horses is not a common sight and it has actually become necessary to come to the defense of the horse as an economical machine for the distribution of commodities. Wherefore, as the reader hereof by this time knows, the Horse Publicity Association, organized in New York, has been formed to take up his cause with the purpose to show the people of this Nation that as a working machine for town haulage the horse must be counted on in the race for economy and efficiency.

The extent of this sentiment (not in the least "sentimental") in favor of the horse was seen in the unusual spectacle of more than 600 businesses taking part in a banquet program at the great Pennsylvania Hotel on Oct. 30 to launch the association named. "Tired of hearing and reading reckless claims made by automobile manufacturers and salesmen in their efforts to supplant the horse," says the New York *Herald*, "these men having business interests allied with his use have united for his defense in the great case of *Horse* vs. *Motor Truck* which is being fought out on the streets of New York and other cities of the United States. They expect to convince the jury that for short hauls, and not so short as that, the horse can beat the new fangled substitutes all to smithereens for real efficiency and economy; and having proved it by first hand facts and figures they are going to demand that suitable highways for horses as well as for motor trucks be constructed throughout the country.

"Comparatively small bodies of horsemen, each body representing a single interest, have been working to this end for several years, but without accomplishing much. It remained for Fred M. Williams, president of the New York State Hay and Grain Dealers' Association and vice-president of the National Hay Association, to conceive the idea of uniting all interests allied with the horse in one big association, and he it was who took the lead in bringing together the surprising assemblage at the Pennsylvania Hotel. He was the logical man for president when it came to the election of officers and was unanimously chosen generalissimo to command the allied forces in defense of the horse."

William A. Hoovey, president of the International Bank, of Kansas City, Mo., was chosen treasurer of the new associations. The secretary will be elected by the board of directors, but the only man talked about so far is Leonard Gibson, of New York, who acted as secretary of the temporary organization with signal success. There are 24 directors, as follows, representing the organization named:

Horseshoe Manufacturers' Association, by William J. McCurdy, of Bryden Horseshoe Works, New Brunswick, N. J.; National Hay Association, by Phil Young, Lansing, Mich.; American Feed Manufacturers' Association, by H. A. Abbott, of Abbott & Dickinson Company, Chicago; National Feed Association, by F. B. Ezell, of Southwest Feed and Flour Company, El Paso, Texas; California Grain Association, by Albert E. Nicholls, of Nicholls, Loomis & Co., Los Angeles; Associated Manufacturers of Saddlery Accessories, by M. B. Ketchan, Kenosha, Wis.; Wholesale Saddlery Association, by John W. Garver, St. Paul, Minn.; National Saddlery Manufacturers' Association, by F. R. Elliott, Racine, Wis.; Master Horseshoers, by W. E. Murphy, No. 317 North Seventeenth St., Philadelphia; Horseshoe Nail Manufacturers' Association, by Mr. McCoombs, of Capewell Horseshoe Nail Company, New York; Heavy Hardware Organizations, by Irving E. Shadbolt, of Milwaukee; Wagon and Implement Manufacturers, by Marcel Theriault, of Abbott-Downing Company, Concord, N. H.; Wire and Iron Manufacturers, by H. S. Lockwood, American Steel and Wire Company, New York; Live Stock Interests, by George Lane, Calgary, Alberta; Percheron Society of America, by E. B. White, Leesburg, Va.; Truck and Transfer Associations, by Mr. Forbes, Forbes Cartage Company, Chicago; Shire Horse Association, by J. G. Truman, Bushnell, Ill.; Belgian Horse Breeders' Association, by Henry Lefebre's Son, Fairfax, Iowa; Horse Market Interests, by W. H. Weeks, President Kansas City Stock Yards, Kansas City; Veterinary Interests, by Dr. William W. Yard, Denver; Horse Aid and Humane Associations, by Mrs. James Speyer, New York; Cavalry Interests, by A. W. Harris, Harris Trust and Savings Bank, Chicago; Race Horse Interests, by Thomas Clay McDowell, of Thoroughbred Horse Association, Lexington, Ky.; Farming Interests, by Charles Riegel, Illinois.

LICENSE REVOKED.

The Wheat Director announced Nov. 6 that a Wheat Director License has been refused to the Becker Milling Co., of Red Bud, Ill., and that the license issued to the Griggs Elevator Co., of Griggs., Ill., has been revoked, effectiv Nov. 1 until further notice. The latte company consisted of officers and ow ers of the Becker Milling Co. and i license covered operations at Grigg Ill. The Food Administration license i sued to the Becker Milling Co., hov ever, covered those activities at Griggs and the application of the Becker Mil ing Co. for a Food Administration l cense indicated that the elevator Griggs was owned by the Becker Millin Co., which reported no transfer of th property as required by the Food A ministration regulations, if any transf had been made.

Both companies were summoned a hearing to give full information in r gard to the alleged transfer, but neith company appeared or furnished the i formation required, although both co panies were informed that the hearin would be adjourned upon their reque for adequate cause. Another ground f the decisions stated above was that th Food Administration license of th Becker Milling Co. had been revok for taking excessive profits and failin to keep accurate records and render a curate reports, as a result of which was unlawful by the provisions of Se tion 5 of the Food Control Act for th Becker Milling Co. to engage in licens business whether or not it had Wheat Director License.

The Wheat Director has revoked th license of C. G. Snyder Roller Mil Gunter, Tex., on the ground that th mill failed to pay its 1 per cent admi istration fee in accordance with i agreement with the Grain Corporatio and its representatives failed to appe for a hearing when summoned.

Geo. S. Colby, grain inspector at Ne Orleans, reports wheat exports duri October 67,200 bus., against 1,616,6 bus. a year ago. There were also 76,4 bus. of corn exported, all to the We Indies and Central America. Lond took 350,000 bus. of corn and the We Indies and Central America 167,000 bu

BANQUET HORSE PUBLICITY ASSN. AT NEW YORK CITY.

RSONAL DISTRIBUTION OF CARS.

ıe Car Service Section of the U. S. .. Administration has issued the fol- ng instructions as to proper method tistribution of cars between ship- of grain:

. Each shipper of grain will ad- the carrier's agent each Saturday ıe total quantity of grain on hand ered for rail shipment. The ratio he quantity so reported by each per to the total quantity reported ll shippers shall be the percentage s for the distribution of available at that station during the ensuing for grain loading.

Each shipper of grain shall e written order on the carrier's t for cars wanted for grain load- showing the following information:

. Date of order.

. Number of cars wanted (in units)-ton cars) and whether for sacked ılk grain.

. Destinations.

. Date wanted to load.

. Quantity of each kind of grain ıand and conveniently located for pt loading tendered for rail ship- .

. Name of shipper.

opies of orders by a shipper lo- on more than one carrier (steam, ric or water) shall be filed with ıgent of each carrier. Such com- l orders must not exceed the total conveniently located for prompt ng tendered for shipment.

Cars will not be furnished in s of a shipper's ability to load and promptly.

When a shipper's pro rata share ıe available car supply is a fraction car, the fraction will be carried is credit, and he will be entitled r supply on the basis of the aggre- of such fractional credits.

The term 'Prompt loading' as in these rules, is intended to mean a car placed for loading not later 10 a. m. must be loaded and bill- instructions tendered before the of the day on which it is placed, g which, such car will be charged st the shipper's allotment as an ional empty for each succeeding ıeld for loading, or for billing in- tions."

PORATION SELLS WHEAT.

wheat market is having a repe- of what happened last year. The Corporation owns most of the t which they were holding in store arket centers and not offering to stic mills. The light movement l the mills to bid up the price also to advance their prices on The situation was becoming so that the announcement on y, that the Corporation will sell t at the basic price plus storage es, was a decided surprise. It ed premiums on hard winter fully er bushel, about 2c on red and 5 on spring; but spring will not fected as much as winter. The is to prevent profiteering and to e the cost of flour to the con- . It has not been decided as yet what the storage charge will be, robably about 8c for wheat sold nonth, so we can expect premiums m 5 to 8c over basic for hard and hing less than this for red. The Corporation will probably an- e their selling price from month nth. This will undoubtedly pre- any opportunity of securing an onal profit in carrying wheat in ry elevators or on the farm, so it bly will be wise to market wheat t as bought, as the Government is to have a considerable surplus pring to carry into the 1920 crop. *H. Perrine & Co., Chicago.*

N CONSIGNMENT CHARGE.

urgent representation from a Na- Industrial Traffic League com- , reinforced by suggestions from issioner Eastman, Director Chambers has issued freight rate authority No. 16659, which cancels No. 16072 and establishes $2 as the charge on grain, hay or straw reconsigned after inspection, no matter whether the new destination is inside or outside of the switching limits of the original billed destination. The authority that is being canceled proposed a charge of $5 if the reconsigned destination was beyond the switching limits of the original destination. Commissioner Eastman said the Commission did not, in its reconsignment case decision, authorize a difference in charges dependent on destination.—*The Traffic World.*

PERMIT SYSTEM CANCELED.

The individual permit system against the several important markets in the Middle West has been canceled, effective Monday, Nov. 10, by order of the Railroad Administration. "The larger exchanges and farmers' organizations representing coöperative interests made most strenuous protests against the system before and since the former order became effective on Oct. 25," say the Pope & Eckhardt Co., "because their interests and their business were so vitally affected. There was a measure of discrimination in the former order, which should by all reasonable means have been avoided. Most of us believe that there was no real reason then for its promulgation."

CORN ON SATURDAY.

It was a foregone conclusion that with the December and May corn shorts liquidated, the cash market would show the white feather, which it did on Saturday with a cent decline in some grades, as compared with Friday's high, and it would have been even more but for the rain and snow predicted for over Sunday. The weakness in stocks and cotton was not without its sentimentat effect, and frankly the outlook for lower grain prices seems logical and conclusive, the only uncertain element being time. Give us good weather and a respectably decent car service and the receipts of corn and oats will flood out the cash demand except at reduced levels.—*Thomson & McKinnon, Chicago.*

PROBABLE DAIRY EXPORTS.

H. S. Arkell, livestock commissioner of Canada, who recently returned from England, says the shortage of milk and dairy products in Great Britain is unprecedented as it is in other European countries; and the deficiency will not be easily or quickly removed. English butter is very high in price, and therefore the outlook for North American exports of dairy products would seem to be excellent. The scarcity and high price of concentrated feed are to some extent responsible for the dearth of dairy products in Europe.

EXCESS OF RAIN IN SOUTH.

The weather in the South has been very unseasonable for all kinds of farm work, there being a very great excess of rains which hindered both the movement and the gathering of crops. In Louisiana and other parts of the cotton belt there are many complaints of rotting bolls and sprouting seeds. Texas reports cotton deteriorating in all sections, bolls decaying and seeds sprouting. Oklahoma reports further damage to cotton on account of continued wet weather, but no frost injury. Arkansas reports corn rotting, but cotton bolls green and in good condition yet. Wheat seeding is badly delayed.

According to a census made on June 4, 1919, there were in England and Wales cows and heifers in milk 1,943,660, compared with 1,858,200 the previous year. The total number of cattle was 6,194,590, compared with 6,200,000 in 1918; sheep 15,123,220, compared with 16,475,180 previous year; pigs 1,799,560, compared with 1,697,070 the previous year.

GRAIN DUST EXPLOSIONS.

Dr. Brown of the Bureau of Chemistry will give a dust explosion lecture under the auspices of the United States Grain Corporation and the United States Department of Agriculture, on Nov. 12, at three o'clock, in the Board of Trade smoking room, Chicago. On Nov. 17 Dr. Brown will speak at three o'clock in the directors' room of the Chamber of Commerce, Milwaukee.

This lecture is very instructive and entertaining. Moving pictures of unusual character and small explosions will be featured. This subject is vitally important to elevator proprietors and millers and all should make an extra effort to attend one or the other of his lectures.

The engraving is a reproduction of a poster which will be used by field engineers of the Department of Agriculture in the Grain Dust Explosion Prevention Campaign now being conducted in coöperation with the United States Grain Corporation.

This poster is intended to impress upon the workmen in the grain mills and elevators throughout the country the results of carelessness around grain elevators, etc., which includes the use of matches, and open flames, and which allows dangerous dust conditions to exist. It impresses on them the importance of cleanliness which includes the removal of dust, thereby eliminating the explosion danger and protecting lives, property and food.

The first cut on the poster shows a large grain elevator in the East being destroyed by explosion and fire. As a result of this explosion almost $1,000,000 of grain was lost and extensive damage was done. The other cut shows a large modern elevator located in one of our Western cities.

Copies of this poster may be secured from the Bureau of Chemistry, Department of Agriculture, upon request, and we would take the liberty of suggesting to every owner to post one or more on his premises.

THE VERDICT UPHELD.

The Supreme Court of Minnesota has affirmed the judgment of the County Court of Hennepin County in favor of Wm. Dalrymple *vs.* Randall Gee *et al.* It appears that Dalrymple sold a car of grain on the floor of the Minneapolis Chamber of Commerce to R. H. Johnstone, who immediately resold to a third party, by whom it was again resold. The car was switched to an elevator, weighed and unloaded and mixed with other grain. Johnstone failed to pay, and Dalyrmple immediately notified his vendee, who then had the proceeds of the grain, that the grain had not been paid for and that the money belonged to him. The court ruled that under the circumstances the delivery was held conditional only, and the right of the vendor to reclaim his goods if payment were not made is upheld, the principle being that sales made on the floor of the Minneapolis Chamber of Commerce are for cash and that delivery of the grain is conditional upon payment therefor.

FOREIGN

ROUMANIAN CORN CROP.

The fall weather in Roumania was not favorable to winter wheat on account of drought, which at Oct. 1 was quite serious. The corn crop, however, which was then being harvested, as a correspondent of the London *Grain and Seed Reporter* writes, "shows a yield such as has not been seen for the last 15 years. The Maize crop is so large that if exportation is not permitted there will be sufficient food assured for the population for three years; that is, up to October, 1922. The large crop of Maize is due to the fact that the expropriation of land being made in February, 1919, that is to say, immediately after the German retreat from this country, peasants have only been able, owing to the advanced season, to plant maize, the staple food. Regions which were sown by the German troops during their occupation of the country in the autumn of 1918, under sequestration from the owners who had left or taken refuge in Moldavia, Russia or France, were all put under wheat, which provided a good crop, and which is now in warehouses or railway depots, and will be sufficient to assure the feeding of the population." The crops of barley and oats have also given a good yield, and there are available for export 20,000 wagons of barley and 15,000 wagons of oats (1 "wagon" = 10,000 kilos, 22,046 lbs.).

LLOYD GEORGE'S FARM POLICY.

Mr. Lloyd George, the British premier, delivered himself of what *The Times* calls "an approximation to an agricultural policy," but which in the dialect of B. L. T., might be called a "wheeze." He "allowed," says the London *Grain and Seed Reporter*, "that we had only feebly imitated other countries in assisting agriculture, and he cited the successful experience of Germany and Denmark. Our only remedy for the adverse balance of trade is greater production, and agriculture must have the greatest share in the increase, as imports must be diminished. The farmer must have a guarantee which must have reference to the increased cost of production and security of tenure. All classes must co-operate—farmer, landowner, labor and the state. Transport development and state scientific aid are also necessary. Efforts must be made to lure the population by a revival of rural industries."

AUSTRALIAN WHEAT BOARD.

The Australian Wheat Board, created to purchase from the farmers and to market the wheat of the entire Commonwealth during the war, has handled 469,724,000 bushels of which 161,407,000 was shipped as flour, 126,231,000 sold domestically, and the following stocks were held in sight on Aug. 4: As flour, 5,046,000 bus.; by shippers, 126,536,000 bus.; by millers, 8,034,000. The Board's debit on wheat account on Aug. 4 was as follows (£s reduced to $s): Victoria owes $29,374,200; New South Wales, $9,484,000; South Australia, $564,500; West Australia, $5,966,300, a total of $84,292,650. The total debt on all accounts of the Commonwealth is $3,690,058,845, or approximately $730 per capita.

Financing of Exports.

We are hearing a good deal about the great risk that exporters of all products are running in accepting foreign securities in payment for their merchandise, that a great deal of this paper may be worthless. Already in Argentina gold will buy an article much cheaper than currency or any security. Can we not expect such a situation in this country as our exports far exceed that of other countries and is it not a decided bearish factor in anticipation of future values? The financing of our exports is one of the big problems confronting us.—*W. H. Perrine & Company.*

Argentine Export Duties.

Commercial Attache Klein, Buenos Aires, under date Oct. 29, gives the following changes in the export duties in gold pesos (96.5c) per long ton to be collected in Argentina during the month of November: Salt hides, 53.40; linseed in bags, 7.10; in bulk, 5.55; wheat flour, 1.45; tallow, 29.30; and greasy wool skins, 32.77. The other duties are unchanged from those in force during October.

Quality of Canadian Grain.

The quality of Canadian wheat and corn this year is good, as shown by the following estimates at Sept. 30 (100 = average weight per measured bushel):

	1919.	1918.	1917.	1916.
Fall wheat	96	89	76	78
Corn for husking	94	89	88	67
Spring wheat	91	99	89	68
Rye	92	92	96	84
Oats	90	94	90	75
Mixed grain	94	98	92	74

JUTE CONSUMPTION.

Consul H. Albert Johnson writes from Dundee, Scotland, as follows:

"The final official forecast of India's jute crop for the current season places the yield at 8,486,200 bales of 400 pounds each, or 896,000 bales more than were grown last season. Despite this favorable crop report, however, high prices in Calcutta are said to be maintained.

"W. F. Soutar & Co. estimate the consumption of jute by the various countries this season as follows:

Countries.	Bales.
United Kingdom:	
Scotland	1,050,000
England	20,000
Ireland	25,000
Total	1,095,000
France (75% of pre-war)	496,000
Belgium (50% of pre-war)	75,000
Germany (50% of pre-war)	400,000
Austria and Bohemia (50% of pre-war)	160,000
Norway and Sweden	60,000
Russia (50% of pre-war)	115,000
Holland	60,000
Spain	250,000
Italy	300,000
Total, Continental Europe	1,916,000
India:	
Mills	5,000,000
Local	500,000
Total	5,500,000
America and other countries	750,000
Grand total	9,261,000

"In 1914, when conditions were normal, the world's consumption of jute was 10,005,000 bales, while in 1918 it was 7,948,000.

"There has been demand for first marks on spot in Dundee, but consumers are endeavoring to purchase below £74. Jute yarns are inactive, but there is considerable inquiry for Hessian cops and spools; 200-pound rove made £55 and 1-lea could be had at £78. The spinners' price for 8-pound cops is 7s 10d; three-ply 8-pound twist sold at 12¾d.

"Hessians, 10-ounce 40-inch, were again in request for the River Plate and the quotation is 10¼d packed, plus sewing, November and December delivery. More business is pending. The quotation for 10½-ounce 40-inch was 10½d."

PRICE OF WHEAT IN FRANCE.

It was recently announced by the Minister of Agriculture of France that an appeal would be published shortly which would fix the minimum price of wheat in that country for three years. The present legal price is 73 francs per metric quintal. Farmers claim that this sum is not equal to the expense of production. The exact fixed price has not yet been named but it is anticipated that it will be in the neighborhood of 80 francs. The public, with the exception of the producers, characterize the announcement as both "sensational and monstrous." The program is that if the market price does not reach the fixed minimum the government will make good the difference to the farmer and it is anticipated that a credit of 1,000,000,000 francs will be required to make good. A pertinent question put by the tax payers, in view of the fact that the finances of France are really in a most desperate condition is, Where is the money to come from? Apparently France is infested with the American type of farmer demagogues even more badly than is the United States.

MANCHURIAN CORN.

There are rumors to the effect that there are increased offerings of Manchurian corn to the Pacific coast, with "more of the grain afloat." So far this year there has been practically no corn from Manchuria. Some has come in from Japan but the usual shipments from Asia to our Pacific coast have n as yet materialized, at least not up Sept. 1, which is the latest date which the Government report of ports has been published.

A Swedish seed dealer writes C. King & Co., Toledo: "It seems th red clover crop is not quite as good h as last season. Judging by repo from America, England, France a Italy, there is a scarcity. On the oth hand, the outlook for timothy is better and prices have already declin considerably, as they probably will America in the near future."

The new packing rules of the Ra way American Express Co. will beco effective Dec. 10. These rules prohi the use of paper wrappings and ordina paper boxes for packages weighing o 25 lbs. Wooden containers or fi board or corrugated straw of spec test strength must be used.

Foreign Importers, Manufacturers and Dealers

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

Ohio Corn.

e Current-Grain Reporter: Our rop is probably an average crop. rable season did wonders to our especially the late seeding. Our corn is fine and the late seeding . We are inclined to think our s will be slow sellers after the un; most of it will be held for markets.—*Sneath & Cunning- Tiffin, Ohio.*

tern Terminal Co., Sioux City.

e Current-Grain Reporter: We his means of announcing to our that the business of the King or Co. has been taken over by Western Terminal Elevator Co. rsonnel of the new company will the same as in the old com- with M. King as president and manager.—*Western Terminal or Co., Sioux City, Ia.*

New Era as to Corn.

Current-Grain Reporter: The can remember when shucking as a winter's job on the farm, w the one sure sign that either ant or the owner has joined the s' aristocracy is that he lets out o to the professionals who come 7 the hundreds from the South m to complete it and go back y Thanksgiving.

ers are taking membership in m Bureau and Agricultural As- ns freely this year, which gives nfidence in their ability to sus- od prices; and offers of $1.25 is week on the bulge market th very light acceptance. It is however, that such a price would ut a good movement of corn in er, or possibly late in this month her was favorable and roads hich is not the case today.— *ldwin & Co., Decatur, Ill.*

ne Decimal Weight Bill.

Current-Grain Reporter: Your d in the issue of the fifth about imal weights bill, in so far as ins to the desires of the major- rn millers, is rather broad.

e of the corn millers, we are that a uniform package may ible. As it is now a "barrel" may be 190, 192, 196 or 200 and under the proposed bill a ill be 200 pounds. Where corn heretofore (and even now) d to carry bags in sizes of 10's, , 24's, 21's, 25's, 38's, 48's, 50's, 's, 96's and 100's, depending locality served, under the pro- ll, 5's, 25's, 50's and 100's will The new plan is especially con- when it comes to figuring and the whole thing seems to e direction of simplicity.

Douglas W. Lackey, of the American Corn Millers' Federation, to whom I am sending a copy of this letter, will be able to tell you how earnestly the corn millers desire it.—*Cairo Elevator and Mill Co., Cairo, Ill.*

Name Changed.

Price Current-Grain Reporter: The Newman Grain Co. will hereafter be known as the Elvis Weathers Grain Co., assuming all assets and liabilities. The business will be conducted by the same management in the future as in the past.—*Elvis Weathers Grain Co., by Elvis Weathers and Frank Jones, Newman, Ill.*

The needs of merchants have guided National Cash Register improvements

"WHAT the merchant needs" always has been—and always will be—our basic idea in making cash registers.

This business, as it stands today, is the result of constant study of merchants' needs.

Every suggestion that we receive is investigated. The practical ones are adopted and given very exacting mechanical tests before they are manufactured.

During the past 10 years we have made 6,508 improvements in our product.

These improvements were added so that National Cash Register users could be supplied with machines that would give them the utmost possible service.

Modern National Cash Registers are practical, useful, accurate, and durable—the best we can make.

Nationals are now used in 296 lines of business

The National Cash Register Company, Dayton, Ohio
Offices in all the principal cities of the world

Toledo Clover Seed.

Clover seed was very erratic last week at Toledo. The close for the March delivery on Nov. 1 was $30; $30.85 on Tuesday; dropped down to $30.15 during the week and was up to $30.50 on Friday. Light stocks and current crop receipts are given as the reason for this erratic behavior of the market. Alsike showed no changes in price or sentiment and there was very little doing during the week, closing, however, 10c up compared with the previous week. Most of the trade was in the December future. A fair trade in timothy was reported without much change in prices. Friends of this seed think the crop will reach a higher level but just now the seed is in a rut. Perhaps if the Peace Treaty were ratified some time during this era there might be some shipments to Germany which needs a lot of timothy provided their purchases can be financed. At any rate some inquiries were reported from Hamburg during the week.—*Extracts Weekly Letter of J. F. Zahm & Co.*

Colorado reports heavy shipment of live stock on account of short grass and poor prospects of winter feeding.

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

The heavy rains of the past ten days have caused the Ohio River to rise and forty feet is now predicted. This will reach some of the low land in this vicinity but not much damage is looked for.

The receipts the past week have increased. Shipments have been increasing and dealers report a good demand. There has been no relief in the car situation, empty cars for loading being scarce, with no relief in sight.

The members of the Cairo Board of Trade have taken steps toward the erection of a permanent home. President Rust has appointed a committee for the purpose of purchasing a building or property on which to erect a building with space for a trading floor, office rooms for all the grain firms and the inspection and weighing departments.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

R. C. Wright, grain supervisor of the U. S. Department of Agriculture, opened offices on the third floor of the Grain Exchange November 1st.

C. G. Morris, of Lincoln, Nebr., opened offices on the fourth floor of the Grain Exchange on November 1st. Mr. Morris will do a general grain business.

The Martens & Ketels Elevator is now being operated. This is the first of the new elevators to be running, and will be used to handle wheat for their mill.

New corn is moving as freely as could be expected owing to the car situation and permit system. Twenty-four cars of corn were received; nearly all was new corn.

D. S. Warwick, of Denver, Colo., has made application for membership to the Sioux City Board of Trade. Mr. Warwick has offices at Wichita, Kans., and Denver, Colo., and contemplates opening an office here.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

The weather is very much cooler and early frost reported in some sections.

The ground is in good condition for cultivation and many farmers are sowing rye for early grazing at this time.

C. C. McCracken, of the Early & Daniels Co., Cincinnati, O., is visiting in Richmond this week. This Cincinnati concern does a big business throughout Virginia on Quality Molasses Feed.

We are glad to report that millers all over the state are finding ready sale for cornmeal. However, the offerings of old white corn have been very limited during the past week.

The trade has switched to some extent this week from feeds to grain, corn and oats, although we are still having a fair demand for middlings and reddog, with excellent demand for white milling corn and fair demand for oats.

William King, of the United States Department of Agriculture, paid our market a visit last week. We understand the Department of Agriculture is trying to work out a plan for grading hay according to some federal standard. Mr. King formerly lived in Richmond and many of his old friends were glad to see him.

Prices quoted here, basis close of the market on the 7th, were as follows: Wheat—No. 2, red, $2.34@2.35. Corn—No. 2 white, $1.77@1.78. Oats—No. 2 white, 80@81c; No. 3 white, 79@@80c. Hay—No. 1 timothy, $31@32; No. 1 mixed, $32@33; No. 1 clover, $34@35. Feeds—Standard middlings, $48@49; reddog, $66@67; bran, $43@44.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts, 11 cars, demand limited, and market ½c lower; No. 2 white, 71@71½c; No. 3 white, 70½@71c.

With the removal of the permit system increased receipts are expected at this market. Although husking has been set back considerable account bad weather the shellers are busy in many places.

Peoria hog receipts were 1,000 head, with market 10@15c higher. Bulk of sales ranged from $15.25@15.35. A top of $15.40 was made during the morning market when active trading cleared practically all of the receipts. Cattle receipts were light with few arrivals taken at steady prices. Good to choice butcher steers sold at $11@15.

Saturday's receipts of corn were 48 cars, including 24 cars of new corn. Old corn was 2 to 2½c lower with fair demand at the decline. New corn was badly demoralized. With the car situation uncertain the shippers were practically out of the market and the coal shortage curtailed buying by dryers. The local industries bought the old corn and best grades of new corn and the result was a decline of 7@9c on new 4 and 5 corn with demand very slow at the enormous decline. Sales: No. 1 white, $1.57½; No. 1 yellow, $1.57½; No. 2 yellow, $1.57½; No. 3 yellow, $1.57; No. 5 yellow, $1.56; No. 1 mixed, $1.57½; No. 2 mixed, $1.57½; No. 4 mixed, $1.56½. New corn—No. 5 white, 2 cars test 20 and 20.1, $1.36; No. 3 yellow, 16.6, part old, $1.52; No. 4 yellow, 14 cars, test 18.6 to 19.5, at $1.38; No. 5 yellow, 6 cars, 20.3 and 21.4, at $1.36; No. 4 mixed, 19.2, at $1.37½.

NEW ORLEANS, LA.

NASHVILLE.

John Leiper, Correspondent.

Commissioner of Agriculture F. M. McRae of Tennessee states that rains in October stopped wheat sowing in the state, and reports indicate greatly reduced acreage.

The old Thomas flour mill, near Glendale, Maury county, Tenn., has been purchased from Cothern Ray by C. I. Godwin and D. A. Oliver, who will improve and enlarge the plant.

Receipts of grain at Nashville last week were 185 cars. Stocks at the close of the week were: Flour, 51,000 bbls., increase of 11,000; wheat, 757,000 bus., increase of 46,000; corn, 15,700 bus., decrease of 3,500; oats, 377,500 bus., decrease of 99,500.

Southeastern corn mills report improvement in sales last week of corn meal for later shipment. Southeastern corn mills, with capacity of 126,000 bus., had output last week of 17,162 bus., or 13.62 per cent of capacity, which compared with 12.47 per cent the preceding week. Prices: Plain meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.10@3.20.

Wheat continues very strong with upward tendency. Mills are receiving fair supplies from the west. Corn was sharply higher last week, with light supplies, and new crop movement retarded by rains. Oats were steady, and in fair demand. Some complaint is heard of car shortage. Prices: Wheat—No. 2 red, $2.35@2.37. Corn—No. 2 white, $1.65@1.70; No. 3 white, $1.63@1.68; No. 3 mixed, $1.60@1.65. Oats—No. 3 white, 78½@79½c; No. 3 mixed, 77@78c; No. 3 red, 79@80c.

CLEVELAND.

F. R. Sowers, Correspondent.

Last week the Cleveland Grain Co. unloaded and stored another boat load of wheat for the United States Grain Corporation.

On Saturday, November 1st, J. E. Heniken, Chief Inspector of the Grain and Hay Exchange, made a trip to Cortland, Ohio, to inspect a car of bran for a member of the Exchange and report its contents.

Friday, October 24th, and Saturday, October 25th, the secretary of the Grain and Hay Exchange spent at Marshallville and Millersburg, Ohio, investigating a car of ground barley, as there was some dissatisfaction with the quality involved.

The grain movement both in and out of this market has been rather light for the past week. Number 3 white oats are quoted on November 6th at 75½c per bushel. No. 2 white oats at 77c, and at these prices the tendency seems to be towards a light movement.

In the corn market, No. 3 yellow corn is quoted on November 6th at $1.65 per bushel. This is an advance of on an average of about 10c per bushel over last week. A light movement of new corn has been experienced. The tendency seems to be in both corn and oats for the farmers to hold back for better prices.

As a means of further stimulating agricultural activity in the neighborhood of Cleveland, the Cleveland Chamber of Commerce on Tuesday noon, October 28th, listened to an address by Dean Alfred Vivian, College of Agriculture, Ohio State University. All members of the Grain and Hay Exchange in Cleveland were especially invited to be present at that meeting, as the subject was one in which every agriculturist is vitally interested.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

Thousands of bushels of corn in the bottom lands near Lawrenceburg, Ind., were lost on account of the raise in the Ohio and Miami rivers.

The annual State Corn Show and meeting of the Indiana Corn Growers' Association will be held at Purdue University on January 12. The show will last one week.

The Grocers Quality Baking Company, of Evansville, Ind., incorporated with a capital stock of $150,000. The incorporators are Benjamin Bosse, Lowrey Bertelsen and Jacob L. Weiss. The company will take over the building formerly occupied by Bosse Bros.' retail grocery and will be managed by Mr. Weiss, a master baker.

The Valier & Spies Milling Company, of St. Louis, Mo., is having a new one-story flour warehouse built at the corner of Oriental street and the Pennsylvania railroad in Indianapolis. The building will be seventy-eight feet wide and one hundred feet long.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Shelled corn arrivals are light but there is enough to satisfy all demands. Prices have been advanced slightly in sympathy with the western market. Spot cars of old yellow are being moved at prices around $1.68@1.69 a bushel. Total arrivals of corn for the last period amounted to 42,900 bushels, as compared with 19,600 bushels for the same period a year ago.

Conditions in the ear corn market are little, if any, better. The demand is so light that even the small quantity of ear corn arriving is more than enough to fill all needs at this time. It is difficult to care for corn on the ear owing to lack of facilities for shelling and drying. Elevator accommodations are now very limited. Firm prices cannot be named and no regular quotations are offered by local dealers.

The local market for oats is very sluggish and conditions have been anything but satisfactory for several weeks. There is little improvement in sight, according to local dealers, unless there should be a sudden change in the weather or the supply of oats coming into the market should be curtailed. During the last period a total of 154,000 bushels have been bulletined here, and while this is a large decrease over the same period a year ago the supply is still greater than the demand. Shipments amounted to 88,000 bushels. Quotations have advanced fractionally but it is difficult to effect sales. No. 1 white oats are being marketed at 78@78½c a bushel.

DETROIT.

John Barr, Correspondent.

Barley is inactive and nominal at $2.70@2.80 per cwt. for cash No. 3.

Robert L. Hughes, of Dumont, Roberts & Co., represented the Detroit Board of Trade at the meeting of grain dealers and members of the Interstate Commerce Commission at New York to look into X-lake and reshipping rates on grain.

The shipping of rye has been active here all week. Competition between shippers and local millers brought an advance of 4c early in the week, but part of this was lost later and the close was at a gain of 1½c. Receipts were not large. Cash No. 2 $1.38.

Demand for beans increased and the market is up 25c. Farmers quit marketing beans owing to the bad roads, but a large part of the crop is already in the hands of country elevators. The market is quoted firm at $7 per cwt. for immediate and prompt shipment.

Oats were scarce and firm until Friday, when there was an increase in offerings and a weaker market. The market lost 1¾c but closed ¼c higher than a week ago. While there was some eastern demand, most of the trade was for local consumption. Quote: No. 2 white, 76¼c; No. 3 white, 74¾@75c; No. 4 white, 73¾@74c.

Corn gained 11c and later lost 5c. The market was strong up to Friday, when it weakened along with other markets. Trade was slow all week and there was no improvement in local conditions; that is, stocks remain too small to admit of any activity and receipts from day to day amounted to little. Quote: No. 3 mixed, $1.58; No. 2 and No. 3 yellow, $1.60; No. 4 yellow, $1.58; No. 5 yellow, $1.57; No. 6 yellow, $1.56.

TOLEDO.

Carl Bryant, Correspondent.

Henry Raddatz, of H. D. Raddatz & Co., grain dealers, spent part of last week on the Chicago Board of Trade.

Charles Franks, of Samuel Franks & Son, Millersburg, O., and a member of Toledo Produce Exchange, was a business visitor on the floor last week.

Norman Bunte, formerly manager of the elevator at Curtice, O., has gone with the Perrysburg Grain & Seed Co., operating elevators at Perrysburg and Lima City, O.

Visitors at the offices of J. F. Zahm & Co. last week were Earl Keeler, new manager of the Haskins Farmers Elevator, Haskins, O., and A. Ringline, Carey, O., operator of four country elevators.

Red Cross workers invaded 'Change Saturday and emerged with 100 per cent membership. Girls were hurriedly dispatched for more "buttons" as a result of the wholehearted enthusiasm of Produce Exchange members.

"Lots of husked corn in water soaked fields in central Ohio," says Bill Cummings, of J. F. Zahm & Co., returning to the floor from a week's trip over the state. "Condition in northwestern Ohio is much better, corn averaging 20 to 26 per cent moisture. Elevators are paying $1.40 to $1.55 per hundred pounds and corn is moving freely."

New corn was the center of attraction in Toledo market last week. Cash premiums have advanced sharply and demand from feeding interests is active. Eleven cars of the new were received during the week, grading No. 6 or better. Dealers are urging consignments right at this time and the short haul market should appeal to shippers. No. 5 yellow, moisture 20.2 per cent, sold Saturday at $1.37¼; No. 4 yellow, 19.5 per cent moisture, $1.38¾. Old No. 2 yellow brought $1.54. Oats held comparatively steady considering late weakness in tures. No. 2 white sold Saturday at 7 No. 2 white testing 35½ lbs. sold at 7 Friday, a premium of about 2½c. Rece for the week: Wheat, 102 cars; corn, oats, 32; rye, 27; barley, 1.

In keeping with its reputation as leading seed market and the progres policy of dealers here, the Toledo Prod Exchange gained still further prestige the seed world with the completion of rangements for the installation of an to-date seed laboratory for the diagnosi all kinds of seed. Germination and pu tests will be made and official certifica issued. Formal announcement of the op ing will be made shortly with J. E. Be dict, expert, formerly with the Commer Seed Laboratory at Washington, D. C. charge. Ideal quarters for the laborat have been leased on the twenty-first f of the Second National Bank Building dealers in surrounding territory will be vited to share in the benefits.

President Fred. Mayer, of Toledo Prod Exchange, addressed a large meeting managers and directors of the Farm Grain Dealers' Association of Ohio, at ney, O., Monday evening, on the subj "Why Is Toledo the Leading Seed M ket?" Backed by facts gained from years of experience and close relation affairs concerning the Toledo market, Mayer was a convincing speaker. Twe five new companies have recently been ganized in central Ohio, and the invita to Toledo dealers was part of Secre Charlie Latchaw's scheme to install "p and closer co-operation between the v ous companies. Raymond P. Lipe, popular acclaim, repeated the "Battle the Marne," which made him famous night at the meeting of the associatio Toledo a few months ago. One w never dream that such power of impers tion and original humor lay back of dignified person; but then who, we would believe that a dealer in large qu tities of hay and grain would possess keenness of palate and crafty mind as t the originator of the well known "Be Nut Delicacies" which grace the tabl half the nation? Others attending meeting from Toledo were: Joe Doe and Siva Bender, of Southworth & Co.; Cummings, of J. F. Zahm & Co.; Ge Woodman, of the Rice Grain Co.; C. Schaaf, of H. W. De Vore & Co.; John ler, of the Lake Erie Milling Co., and pr dent of the Ohio association, and Ol Randolph, of the Randolph Grain Drier

intendent of the Central Elevator & Warehouse Co.'s elevators "D" and "E," Stuyesant Docks. Mr. Prudot had been with the Central Elevator & Warehouse Co. for the past twenty-three years and was held in the highest esteem by his employers and co-workers, and our sympathy, as well as that of the entire grain trade, goes out to his family in their bereavement. Al. Prudot, of Kansas City, Mo., and Harry Prudot, of St. Louis, Mo., were called to New Orleans on account of their brother's death.

The unlooked for and rapid advance in the corn market caused a decided flurry among buyers and sellers, but, at the same time, this decided advance had very little effect on the buying and selling end. Our port has been tied up on account of the longshoremen's strike and export business is at a standstill. On the other hand, sellers have very little old corn to sell, and the car shortage also militates against any free movement that would happen were the corn available. Quote old No. 3 yellow corn at $1.64, delivered New Orleans; new No. 3 yellow at $1.50 delivered New Orleans, New Orleans weights and grades to govern, shipment within a week.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain for the week ending November 8th were: Wheat, 27,000 bushels; oatmeal, 1,000 sacks.

Stocks of grain in regular elevators November 3rd were as follows: Wheat, 1,426,560 bushels; oats, 120,611 bushels; rye, 233,091 bushels; barley, 13,578 bushels.

The following were visitors on 'Change during the past week: O. W. Stevens, Hartford, Conn.; John Kellogg, Chicago, Ill.; P. Craham and F. Craham, New Glasgow, N. S.; M. E. Grant and G. F. Ewe, Minneapolis, Minn.

A good demand was noted for corn during the past week and prices were quoted higher. The following prices being quoted at the close: For shipment, old No. 2 yellow corn, $1.68@1.70 per bushel; old No. 3 yellow corn, $1.66@1.68 per bushel. Receipts for the week ending November 8th were 1,800 bushels.

A fairly good demand was reported for nearby oats last week. Prices ranged as follows: New fancy, 38-40 lbs., clipped white oats, 86½c per bushel; new, 38-40, regular clipped white oats, 85½@86c; new 36-38 regular clipped white oats, 84½@85c per bushel. Receipts for the week ending November 8th were 49,355 bushels.

NEW YORK.

J. M. Nugent, Correspondent.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: Geo. S. Carkener, of Kansas City; Louis A. Stopp, of Boston; E. T. Boland, of Toronto; W. A. Cookes, of Montreal; H. L. Webb, of London; J. H. Fryer, of Galt, Ontario, and F. M. Rogers, of Chicago, and Arthur S. Jackson, of Chicago.

Some export business was worked during the week for Continental account. Prices toward the close of the week, however, were inclined lower in sympathy with the weakness in the West. Domestic buyers absorbed fair quantities earlier in the period, but the demand fell off somewhat at the end of the week. No. 1 white was quoted at 81¼c; No. 2 white, 81c; No. 3 white, 80¼c; No. 4 white, 79½c.

Firmness characterized trading in cash corn during the early part of the week, but toward the close of the week the market for the spot article developed a very weak tone and prices were marked sharply lower. Increased offerings were the main influence. Sympathy with the declining future markets was also not without effect upon cash values and buyers appeared to feel that lower prices will prevail. No. 2 yellow, $1.71¼; No. 3 yellow, $1.70¾; No. 2 white, $1.71¼; No. 3 white, $1.70¾; No. 2 mixed, $1.70¾, and Mo. 3 mixed, $1.70¼.

MEMPHIS.

George Williamson, Correspondent.

Continued wet weather and absence of frost has kept pastures in excellent shape and delayed improvement in demand for grains. Reports from all directions say that never in the history of this section was there so much late forage for live stock.

Receipts continue light and there is little inquiry for either corn or oats. The latter are selling occasionally at 76c for 3 white, a shade off for the past day or so. On call Friday cash 2 red was 78 bid and 83 asked, while 75 was bid for 2 mixed. For cash corn 2 white $1.50 was bid, with nothing offering. Two yellow is higher than white and 2 grade was $1.55 bid on the same day.

John B. Edgar, of Edgar-Morgan Co., manufacturers and dealers of mixed feeds, is now vice-mayor-elect of Memphis and after January will be in charge of the police department. He was elected Thursday with his entire ticket, in which women voted for their first time here. Showing his popularity not only with the grain trade, but with the public generally, Edgar ran second on his ticket.

Business continues slow and draggy, but there is confidence in improvement in a few more weeks. The country is buying but little, but is gradually feeding its home supplies, which assures good demand here after winter sets in. The abundant prosperity resulting from cotton selling at the highest prices since immediately after the Civil war, some extra fine quality having sold in this territory as high as 91 cents a pound during the past few days, means that business will be good once it gets started.

DULUTH.

S. J. Schulte, Correspondent.

Business in rye was on a fairly broad scale on this market during the last week. After selling up to $1.39 on Monday, the spot market in No. 2 rye weakened to a close of $1.36⅝ on Saturday.

Shipments from the elevators here during October came to only 2,240,797 bus., against 21,230,332 bus. during October last year. Stocks of all grains in the elevators at the Head of the Lakes now aggregate approximately 9,500,000 bushels, as compared with 25,450,000 bushels at this time last fall.

W. H. Kiichli, operating as the Standard Grain Co., was forced to suspend business at the end of last week as a result of being caught heavily short of flaxseed. He was one of the most active traders in the pit on this market, and he had been operator on the Board of Trade floor for more than 15 years. He has a wide circle of friends who are sanguine that he will be in position to resume business within a short time.

David S. Stocking, of the Tomlinson Company, vessel agents, has returned from a trip to Buffalo and New York with discouraging news regarding the outlook for shipments bracing up to any extent prior to the close of the lake navigation season. He found the elevator facilities at Buffalo to have become fairly plugged up, and the movement to the seaboard curtailed owing to limited exports and the backing up of cars far into the interior through the longshoremen's strike at New York.

Duluth elevator men experienced one of the dullest months in their experiences during October. Receipts of all grains at the elevators in the month aggregated only 6,656,529 bus., against 29,241,353 bus. during the same period last year. Arrivals of wheat came to just 3,903,903 bus., against 24,036,550 bus. last year. Barley receipts were 483,695 bus., against 633,037 bus. last year; rye, 1,994,740 bus., against 2,833,291 bus. last year; oats, only 58,869 bus., against 641,979 bus. last year, and flax, 313,522 bus., against 1,096,506 bushels last year.

B. Stockman, president of the Board of Trade, Earl M. White and M. L. Jenks have returned from Chicago, where they attended a hearing before the Interstate Commerce Commission in a protest entered by Duluth and Minneapolis operators that the present structure of freight rates favors the Chicago market and that the northwestern markets are consequently deprived of grain shipments from territories that rightly belong to them. At the conclusion of the hearing in Chicago, Charles F. Macdonald, secretary of the Duluth Board of Trade, and D. T. Helm, went on to New York to attend the hearing in the eastern end of the rate structure.

SPOKANE, WASH.

J. B. Jones, Correspondent.

Preliminary steps looking toward the construction of a large new flour mill and elevator in the industrial district in the vicinity of the Spokane fair grounds are being taken by the Centennial Mill Co. The Centennial Company, is it is reported, plans to build on a scale rivaling that of the Sperry Flour Co., whose plant on East Sprague, one of the finest in the Pacific Northwest, cost approximately $500,000.

Wheat growers of the Inland Empire are receiving thousands of dollars in premiums for their wheat crops this fall, due to a competitive element which has entered the wheat industry this year. The Government fixed price is no longer the maximum which the farmer may expect for his product, and some who have held their crop are receiving as much as 25 and 30 cents more per bushel than they received last year.

The campaign for pure seed wheat in Idaho, started by the experiment station of the University of Idaho through the farm bureaus, is already bearing fruit. A carload of "certified" pure seed wheat has been sold to farmers of Kittitas Co., Wash. The wheat sold is of the Dicklow variety, which has done remarkably well in the irrigated sections of Idaho. It will be shipped by the farm bureau of Twin Falls County through W. L. Davis, county agent. A part of the wheat to go to Kittitas Co., Wash., comes from a field of 15 measured acres in Twin Falls County, which yielded 97 bushels per acre. It was raised under conditions similar to those prevailing in the Kittitas Valley. Reports from the extension workers and farm bureaus working under the direction of the experiment station are coming in from all parts of the state and are regarded as encouraging and showing good results. In Oneida County, where sugar beets are extensively grown, a campaign to get the best farmers to use beet tops for silage is being conducted.

O. V. Patton, county agricultural agent, stated that 50 per cent of wheat grown in Walla Walla County in the last two years consists of hybrid varieties developed by the Washington State College Experiment Station. These hybrids have netted at least a bushel more per acre than varieties previously grown and at present prices of wheat mean a profit of $500,000 to Walla Walla farmers due entirely to the fact that these varieties were available, said Mr. Patton. The principal varieties are hybrid 128 and hybrid 63.

OMAHA.

Leigh Leslie, Correspondent.

Edward P. Peck, vice-president and general manager of the Omaha Elevator Co., returned home last week from Tarrytown, N. Y., where with Mrs. Peck he spent a month with friends.

Reports received here indicate that farmers in this territory are not much inclined to sell new corn at present prices. A few cars of new corn arrived here during the week. Most of it was of the lower grades.

The Adams-Whyte Grain Co. has been dissolved, Joseph Whyte retiring, and the Adams-Reitz Grain Co. has taken over its business. The officers of the new company are: John M. Adams, president and treasurer; A. E. Priest, vice-president; G. R. Reitz, secretary and manager, and D. C. Reitz, terminal elevator superintendent.

At a caucus of members of the Omaha Grain Exchange Wednesday these five men were nominated for directors: H. K. Schafer of the Maney Mills and the Maney Grain Co.; S. P. Mason of the Nye-Schneider-Fowler Grain Co., E. E. Huntley of the J. Rosenbaum Grain Co., S. S. Carlisle of the S. S. Carlisle Grain Co. and W. T. Burns of the M. C. Peters Mill Co.

Directors of the Omaha Grain Exchange made a strenuous fight for the discontinuance of the permit system as applied to this market. Henry T. Clarke, Attorney and Traffic Manager of the Exchange, was sent on to Washington to protest against the system, and the directors sent a number of telegrams and letters pointing out the absurdity of continuing the system under existing circumstances.

The announcement Friday that the government would probably resell some of the wheat it has in store, together with the fact that the permit system as applied to the movement of grain from country points to terminal markets has been discontinued, had a very unsettling effect not only on the spot wheat market but also on the corn market, Saturday. Wheat sold off five to ten cents, while new corn of the lower grades declined as much as eight cents.

BUFFALO.

E. Bangasser, Correspondent.

Rye in light supply and some inquiry around $1.40 for No. 2 on track, through billed.

The receipts of spring wheat are increasing, but there was an active inquiry and prices very irregular. Winter wheat was mostly No. 3 red, a good deal of which was smutty and the lower grades were plentiful and also either smutty or musty to a considerable extent. It all sold and sellers seem to have been very well satisfied with the prices received. Chicken feed mixers were fairly good buyers.

Corn opened up strong, 7c higher than last week, and later sold at $1.65 for No. 2 yellow. There was another advance yesterday, the same grade selling at $1.70, which was 15c higher than the close last week. This, however, at the close of the day was considered too high, still there was not offerings of consequence and some inquiry. Today's market was unsettled, No. 1 or No. 2 yellow old being quoted at $1.67 and no buyers. There were quite a few cars of new and old No. 1 and No. 2 yellow received, but the receipts were not as heavy as expected.

There was a strong market for oats, light receipts and a good demand. Th were days when the option cut but l figure. Sales were made at 79¾c for N white, 2¾c over last week's price, but market finally weakened at the close buyers seemed to be filled up with l priced oats. Closing: No. 1 white, 78 No. 2 white, 77¾c; No. 3 white, 76¾c; 4 white, 75¾c. There was a heavy su of mill oats here which could not be at 1c under the market.

Inspection track receipts for the w Wheat—No. 2 red, 4 cars; No. 3 re 2 cars; No. 4 red, 14 cars; No. 5 red, 5 c sample, 2 cars; No. 1 mixed, 2 cars; N mixed, 5 cars; No. 3 mixed, 24 cars; N mixed, 3 cars; No. 1 soft white, 2 c No. 3 soft white, 2 cars; No. 1 hard wi 2 cars; No. 2 hard winter, 14 cars; N hard winter, 18 cars; No. 4 hard winte cars; No. 5 hard winter, 11 cars; sam 3 cars; No. 2 dark hard, 2 cars; No. 3 d hard, 3 cars; sample, 2 cars; No. 1 north 2 cars; No. 2 northern, 10 cars; No. 3 noh ern, 16 cars; No. 4 northern, 15 cars; N northern, 1 car; No. 1 dark northe cars; No. 2 dark northern, 7 cars; N dark northern, 3 cars; No. 4 dark north 9 cars; No. 5 dark northern, 2 cars. Co No. 1 yellow, 39 cars; No. 2 yellow, 2 cars; No. 3 yellow, 12 cars; No. 4 yello cars; No. 6 yellow, 1 car; sample, 6 c No. 2 mixed, 1 car; No. 6 mixed, 1 Oats—No. 1 white, 8 cars; No. 2 white cars; No. 3 white, 61 cars; No. 4 whit cars; sample, 2 cars. Rye—No. 2, 2 c No. 3, 1 car.

BALTIMORE.

Robert C. New, Correspondent.

The rooms of the Baltimore Chambe Commerce were closed on Tuesday, vember 4, gubernatorial election day.

The receipts of water-borne wheat in Baltimore market so far this season am to 1,355,000 bushels, compared with 1,15 bushels arrived up to the same time year.

Exports of wheat from Baltimore in ten months of the calendar year tot 20,140,992 bushels, compared with 12,i 755 bushels shipped in the correspon time last year.

J. Edgar Ball, grain inspector of the timore Chamber of Commerce, is rec ing the congratulations of his friends the arrival at the Ball home of an 8-po baby girl on November 2.

The committee on "hay and straw q tations" of the Baltimore Chamber Commerce for the month of November sists of Messrs. Robert D. Sinton, Cla A. Euler and M. R. Schermerhorn.

Edward T. Shiel, Jr., a member of Executive Committee of the Baltim Chamber of Commerce, is recovering f the effects of an infected foot, his co tion for several days having given friends considerable anxiety.

BALTIMORE
Grain — HAY — Feeds
Export and Domestic

eceipts of baled hay in the Baltimore rket during the month of October, owi to the permit system in vogue, were 2,762 tons, although considerable loose by farmers' wagons found its way to timore from nearby country points.

he Baltimore Steamship Company, Inc., offices in the American Building, this announces the establishment of a regsteamer service between Baltimore Avonmouth, the first steamer to sail in November or early in December.

Stewart Henderson, traffic manager of Baltimore Chamber of Commerce, will resent this organization at the forthing annual meeting of the National Inrial Traffic League, to be held at the el Sherman, Chicago, Ill., on November and 14.

harles A. Ruth, superintendent of the itime Department of the Baltimore mber of Commerce, celebrated the 25th versary of his connection with that dement on November 5th and in honor he occasion was presented with a purse is friends in maritime circles.

he many friends in the grain and hay re of Mr. Clarence A. Euler, of C. A. r & Co., of this city, will be saddened ear of the death of his only child, a 17 years old, on the morning of Novem4. The young man was a student at Baltimore City College and was beloved is classmates generally.

FORT WILLIAMS, ONT.

ring the month of October the move- of grain from the farms to the marhas not proceeded as briskly as had hoped in view of the urgent demand id for Canadian grain. Possibly the her has proved a hindrance to deliv- , just as it has had its effect upon the ty of the grain. The percentage of grading contract grades was considy reduced by the quantity of no grade marketed.

he movement to the lakes from the has been fully taken care of by the ge provided to convey it to eastern s, so that no accumulation is taking anywhere. Some 32,000,000 bushels heat, 3,306,000 bushels of oats and 000 bushels of barley were shipped by lls in September and October, as st 14,000,000 bushels of wheat, no oats 176,500 bushels of barley in the same last year. The increased movement ts is particularly noticeable in view e urgent demand from Europe for this

he following figures show comparisons en the inspections and movement of 919 crop as compared with that of to the end of October.

al quantities inspected in the Western ction Division:

	Wheat. Bus.	Oats. Bus.

LOUISVILLE.

A. W. Williams, Correspondent.

Wilmore, Ky., the Glass Milling Co. ect a new office and warehouse.

Louisville Milling Co. has secured it for additional warehouse space at of about $5,000.

y Buckley, of Buckley Brothers, ille, has been elected vice-president Louisville Council, Boy Scouts of a.

rovements costing $25,000 are being at the plant of the Ballard & Balo., which was down a few days last for repairs.

light acreage of wheat has been so far in Kentucky, due to steady nd wet fields. Indications are for a crop next year.

at is in excellent demand, while reare off, and movement is light. The arket is quoted at $2.30 a bushel, a m of about 8c over government

age of nearly $1,000,000 to corn in ky bottom lands is reported as a of the heavy rains and high waters eek. Greensburg, Ky., reports a loss in the Green River bottoms.

ms & Monroe—"The House of Good Service"
MEMBERS—Chicago Board of Trade
29 So. Fifth Street, LOUISVILLE
570 Private Wires Main 2670

Thieves recently ransacked the offices of the LaGrange Milling Co. and LaGrange Feed Co., at LaGrange, Ky., but only secured a small lot of postage stamps and a few personal articles belonging to the office force.

S. Thurston Ballard, president of the Ballard & Ballard Co., was elected Lieutenant Governor of Kentucky on the Republican ticket on Nov. 4, the ticket carrying the state by a 35,000 majority, the highest ever rolled up in the state.

The corn market slumped about 9 cents within the past three days, but is believed to be on a firmer basis now. Local dealers are quoting corn in car lots as follows: No. 2 mixed, $1.57; white, $1.59; yellow, $1.58; No. 3 grades, 1½c a bushel under No. 2. Oats are quoted at 75c for No. 2 white; 74c for No. 3 white, and 73c for No. 2 mixed.

There has been very little activity in the grain market during the past ten days, due to the permit system, but with the lifting of permits on cars it is believed that things will be more active next week. New corn is ready to move, and while there is very little demand for any grain movement is expected to pick up. Oats are in fair demand, while receipts are light.

WESTERN CANADA.

A. Caldwell, Correspondent.

The early setting in of winter is a bullish factor of more importance than many in the trade seem to appreciate. For the present receipts of coarse grains show no falling off, but an extra month of heavy feeding means an addition of many millions of oats and barley to the home consumption and a corresponding loss in export surplus; farmers will be very watchful of reserves from now on.

The reticence of the Canadian wheat board as to the prices being obtained for Canadian wheat exported is not very comprehensible and is beginning to arouse discontent. The known fact that hard spring wheat similar to our No. 1 northern is bringing $3 at Minneapolis naturally leads to the question as to what our hard spring is really selling for. It is assumed, and with a reason, that the United States is not exporting hard spring, having none to spare. The only news that has leaked out as regards Liverpool wheat prices for many weeks was an unofficial statement that American wheat was selling at 110 shillings a quarter. Just what that would mean to the farmer here in view of complicated exchange and high freights is somewhat difficult to figure out.

The past week has been one of exceedingly firm markets in oats and barley. The advance, while not at all conspicuous, was not generally expected. As the October delivery matured it was considered that short interest had been somewhat the cause of the strength and premiums in that delivery and at the expiration the November basis, if anything, would be lower rather than higher. Flax started to run wild on Friday, advancing 35c a bushel and there was another big boost in the price on Saturday when the November option sold up to $4.98. Covering by shorts was undoubtedly largely behind the advance but there are real elements of strength in flax. It is reported that a large percentage of the Western Canadian crop is under the snow and may be a total loss. When flax the world over is by no means abundant the loss of a million or two bushels becomes important.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The steamer Edwin L. Booth took 60,000 bu. rye to Buffalo.

The Milwaukee Chamber of Commerce was closed on Nov. 11 in commemoration of the signing of the armistice a year ago.

Receipts of grain at Milwaukee for the week ending Nov. 8 were: 131 cars barley, 40 cars corn, 351 cars oats, 85 cars wheat, 46 cars rye, 9 cars flax; total, 662 cars, against 819 cars the week before, 854 cars a year ago and 1,374 cars in 1917.

Shipments of grain from Milwaukee for the week ending Nov. 8 were: 436,300 bu. oats, 92,700 bu. corn, 54,670 bu. barley, 55,016 bu. wheat, 69,500 bu. rye; total, 707,186 bu., against 828,193 bu. the preceding week and 1,947,553 bu. a year ago.

In Milwaukee cash grain markets for the week ruled irregular, barley being unchanged, rye ½c higher, oats 1c lower, while wheat is 10@15c higher, and corn rose 12@15c, but fell back later with the cancellation of the permit system. Offerings are moderate and the demand fair.

The first shipments of new corn arrived in Milwaukee on Nov. 3, and sold at 6@7c under old, depending on the moisture content. New No. 5 yellow weighing 54 lbs. and testing 20.2 per cent moisture sold at $1.42. No. 4 white new weighing 55 lbs. and testing 19 per cent moisture sold at $1.41.

The Hadden Grain Co. has been incorporated with ample capital to conduct the business on safe, conservative lines. The firm will do a general commission business, giving special attention to orders for future delivery in corn and oats and in wheat when trade starts. E. G. Hadden is president of the company.

Dr. Brown, a national authority, addressed the Milwaukee grain men on Nov. 12, his topic being "Grain Dust Explosions and Their Prevention." The lecture was of special interest and was well illustrated with stereopticon slides. Mr. Brown is traveling over the country for the bureau of chemistry, Department of Agriculture, Washington.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: H. A. Mulholland, Minneapolis, Minn.; A. C. Lau, Klemme, Iowa; J. Seidel, Sherwood, Wis.; C. Peterson, A. O. Mason, Chicago, Ill.; W. K. Schaefer, Omaha, Nebr.; G. R. Baumbach, Peoria, Ill.; L. P. Stadler, Pioneer, Iowa; K. Huebner, Forest, Jct., Wis.; Wm. Froehlich, H. Liesner, Jackson, Wis.; A. J. Pick, West Bend, A. A. Fritchen, Union Grove, J. Stumpf, Menasha, O. W. Timme, Plymouth, Wis.; H. L. Thomas, Chicago, Ill.; F. Frohman, Oconomowoc, W. B. Escher, La Crosse, Wis.

George A. Schroeder, traffic manager of the Milwaukee Chamber of Commerce, received the following communication from Washington, D. C., relative to the individual permit system: "In view of the fact that we have been able to secure some relief, with considerable additional relief in sight in the immediate future at the terminals that provoked the installation of the individual permit system, we have decided that, effective Monday, November 10, we will temporarily suspend the operaton of the permit system at all interior markets where today obtains in so far as grain from country markets to these markets is concerned, with the understanding that individual permits will be continued on grain moving between primary markets the same as at present." Immediately upon receipt of notification the Milwaukee Grain Control Committee notified all terminal markets that they may not send applications to this committee for permits on all grain to come to this market where grain is actually sold or consigned on sale to millers or maltsters.

ST. LOUIS.

E. E. Reeves, Correspondent.

"Ikey" Weinberg, who has joined the ranks of the benedicts, was receiving the congratulations and the jibes of his associates in the "Pit."

Thomas Akin, the well known grain speculator, who has been spending several months at his old home, at New Bedford, Mass., has returned to St. Louis, and was on 'Change Friday.

Alex. Harsh and J. Sidney Smith, of the Veninga-Smith Grain Company, who went duck hunting in Illinois last week, are not bragging of their bag, but it is said that they "got their money's worth."

First Vice-president Charles L. Niemeier, of the Merchants Exchange, who represented the exchange at the International Trade Conference, at Atlantic City, returned from New York last Monday, and reported that he had a very enjoyable and instructive trip.

Louis H. Hart, of The Midwest Consumers Grain Co., of Des Moines, Ia., has purchased the membership of Fred. Heger, former president of the St. Louis Butter, Egg and Poultry Exchange, and has made application for membership in the Merchants Exchange.

On Friday Bert H. Lang, second vice-president of the U. S. Grain Corporation, announced that, "effective Monday, November 10, the individual permit system will be temporarily suspended, in so far as grain from country stations is concerned. The system will be continued, however, on grain moving between primary markets."

St. Louis grain men are expecting a great improvement in the grain business as the result of the action of the Railroad Administration in turning over a large number of cars to the western rail lines, for loading with grain, and that of the Grain Corporation, in suspending the individual permit system, which has been such a clog on the grain business here.

A conference between wheat handlers and millers and Bert Lang, of the U. S. Grain Corporation, was held in the directors' room of the Merchants Exchange Friday morning, to get the ideas of the grain men and millers, in regard to what they consider a fair "resale price" for wheat held by the Government. It was intimated that a "resale" price will be announced by the Grain Corporation within the next few days.

The United States Grain Corporation last week announced that, "effective at noon, November 1, the licenses of five grain dealers were revoked." The licenses were taken away for failure to file reports and disregarding official communications. The concerns affected are the following: Oktaha & Co., Oktaha, Okla.; C. F. Lair, Watova, Okla.; H. A. Wolfkuhl, Lenexa, Kas.; American Coal & Grain Co., Amarillo, Tex., and Blackstock, Allen & Clark, Temple, Oklahoma.

Mason H. Hawpe, of the Mason Hawpe Grain Co., who is a member of the board of directors of the Merchants Exchange, has retired, and the Mason Hawpe Grain Co. has been consolidated with and absorbed by the Veninga-Smith Grain Company. The consolidated company will have the same personnel as in the past, with the exception of the retirement of Mr. Hawpe. The new organization will handle all branches of the grain business, and its officers have the reputation of giving "Service."

The funeral services of Gilbert Sears, vice-president of the C. H. Albers Commission Co., who died Sunday, November 2, were held Tuesday afternoon, and were attended by many members of the Merchants Exchange. He was 60 years old at the time of his death, and had been associated with the C. H. Albers Commission Company ever since the "great tornado" in 1896. He had been identified with the grain trade of St. Louis for 49 years, as he went to work in an elevator when a boy eleven years old.

The black curtain which was used to darken the north end of the hall of the Merchants Exchange during the lecture on "Grain Dust Explosion" caused many questions to be asked, and allowed some of the members to display their wit. One excited member who inquired, "Who is dead," was told by a clever wag that "John Messmore, who runs the Merchants Exchange, had that drapery put up because he heard that the custom of having toastmasters at banquets was to be abolished, as had the custom of allowing windy speeches." This caused a laugh, but John was not there to enjoy the joke.

The first of a series of illustrated lectures on "Grain Dust Explosions and Fire Losses," to be given by the United States Grain Corporation, in conjunction with the Bureau of Chemistry of the United States Department of Agriculture, in an effort to reduce the many disasters, explosions and fires in mills and elevators, was given at the Merchants Exchange Friday afternoon to a large and interested audience. The lecture was given by Dr. H. H. Brown, of the Bureau of Chemistry, who was thoroughly conversant with his subject, and invited questions from his hearers. The illustrations were thrown on a large screen by a moving-picture machine. The gist of the lecture was "Cleanliness." Similar lectures will be given in each of the principal grain markets of the United States.

CINCINNATI.

George Mosbacker, Correspondent.

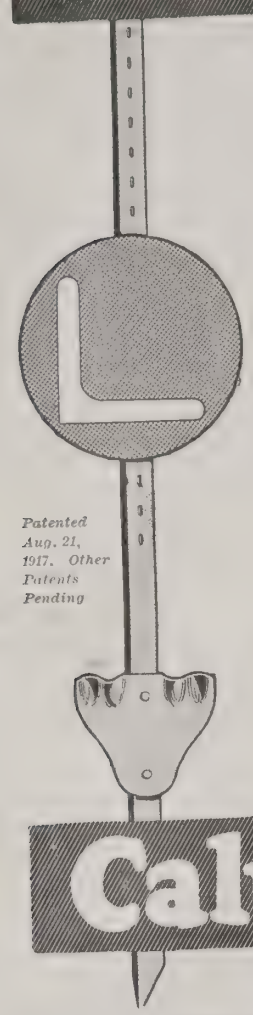
A. L. Hess, secretary and treasurer of the Gale-McMillen Hay Co., will travel through Ohio and Indiana in the interests of the firm's hay business.

O. J. Phillips, formerly connected with the Federal Grain Inspection Department at Cincinnati and now located in Chicago, was a visitor on the floor of the exchange this week.

New white ear corn sold at a premium of 7c to 10c per bushel over yellow and mixed in this market the past week. New shelled corn was discounted from 5c to 7c from old crop as to grade.

Charles B. Hill, in charge of the grain and hay consignment business of Ralph Gray & Co., and Harry Hill, of the Bunting & Hill Co., will spend Thanksgiving day with their parents in northern Ohio.

In a report to the House of Representatives on the development of unused land Secretary of the Interior Franklin K. Lane tells of the possibility of reclaiming about 200,000 acres of now unused and uncultivated land in the state of Ohio.



Wm. R. McQuillan, of McQuillan & Currus, will be one of the principal speakers at the Tri-state Farm Products Show to be held in the Music Hall at Cincinnati, Nov. 29 to Oct. 6. Mr. McQuillan will explain to the uninitiated the mysteries of the hay plugging system and the importance and popularity it has gained among buyers and shippers of forage crops.

Earl Skidmore, of the Brouse-Skidmore Grain Co., who is making a ten-day business trip throughout Ohio, Indiana and Illinois, will address the convention of the Ohio Co-operative Grain Elevator Association at Sydney, Ohio, before his return. Mr. Skidmore is a pleasing and effective speaker and thoroughly familiar with every phase and angle of the grain and hay business.

More than 100,000 bushels of corn, it is estimated, have been damaged by the sudden rise in the Ohio River and tributaries through the inundation of the low lands in the Big and Little Miami and Whitewater valleys. Thousands of acres are under water, and the greatest loss is expected in the vicinity of Elizabethtown and Homestead, in the Big Miami Valley, near Cleves, and in the Union Levee and Turkey Bottoms' sections in the Little Miami Valley. The rapid rise of the Scioto River, near Portsmouth, Ohio, also caught many farmers who were unable to obtain help to cut and haul their corn crop and who are facing an estimated loss of 400,000 bushels, as either damaged or swept away by the flood.

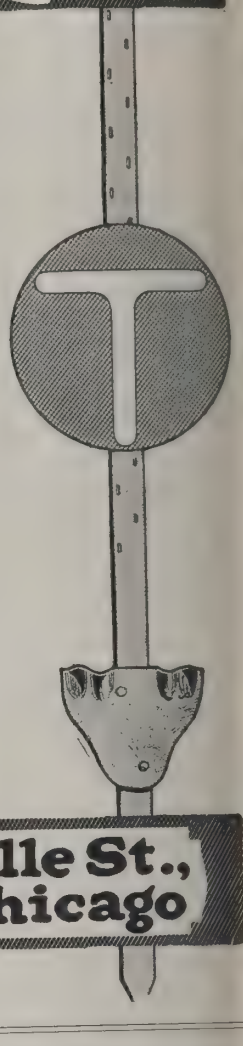
Announcement was made late Saturday by the local railroad terminal manager, John A. Morris, that the blanket system of permits, which has been in effect here since early last summer, and which controlled shipments of grain from the interior to this market, has been temporarily suspended, and that it will not hereafter be necessary for shippers to secure permits or make application to agent at point of origin to ship grain at Cincinnati. Mr. Morris said the effect of the cancellation would be to relieve farmers and other country shippers of the necessity of get-

Now 2 Sturdy Ankorite Types

TO the popular angle steel post, which has proved to be a wonderful money-maker for Ankorite dealers, we've now added another type that gives them one more tremendous advantage in shutting out competition—the Ankorite "T" post.

It is of the same sturdy construction as the angle post; flexible under strain, but always springs back into place. It has the famous Patented Crimped Anchor that makes the Ankorite the choice of every fence post buyer who has an opportunity to compare it with other steel posts.

No special fasteners to bother with—Ankorite Posts are provided with slots for fastening the wire with ORDINARY STAPLES.



Show your prospects these springy, rail steel Ankorite Posts and let them take their choice. Get in your order now for a shipment of each—THIS IS THE TIME TO HAVE THEM WORKING FOR YOU.

Get The Facts About This Hard-Hitting Sales Plan

It's a plan by which we'll go after your prospects from every conceivable angle with a series of straight-from-the-shoulder order-clinching letters, folders, farm paper and local newspaper ads. We'll guarantee to get customers into your store if you'll sell them the posts!

The plan is costing us thousands of dollars—it's free to you if you'll use it.

Want the new price list? A postcard or letter will bring it by return mail.

Calumet Steel Co. 208 So. La Salle St., Dept.-7 -Chicago

ting permits. He said the machinery of the control would be preserved so that, did occasion warrant, it would be able to function immediately.

Cash Markets.

Wheat—Wheat trading as compared with other grains was of liberal volume the past week, with millers more eager for good heavy grain, but freely absorbing the lighter weight offerings. The movement, however, was inadequate for the trade needs, and No. 2 red advanced ½c and No. 3 and lower grades a cent. Smutty and weevily quality also showed a slight gain. Receipts for the week, 90 cars. No. 1 red winter, track, $2.29½@2.30½; No. 2 red winter, track, $2.28½@2.29½; No. 3 red

A book for the use of country grain buyers in keeping a record of grain received from farmers. Its columns are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents, and The book, 9¼x12 inches, 160 pages, records 3,200 loads, is printed on Linen Ledger Paper and is well bour back and corners. Order form 80. Price $1.75. Price Current-Grain Reporter, 327 So. LaSalle St., Chi

nter, track, $2.23@2.25; No. 4 red winter, ck, $2.16@2.18; No. 5 red winter, track, 13@2.15; sample, as to quality, $2@2.20. utty wheat discounted from 2c to 4c bushel as to grade.

Corn—Old crop corn was in better de- nd, and prices nearly 10c per bushel her than a week ago, but inability to ure cars and inclement weather con- ion held receipts to small proportions. ite grades especially were scarce and nmanded a premium of 4c to 5c over low and mixed. Offerings showed a few s of new shelled corn of fair quality, heavy moisture content, which sold at iscount of 5c to 7c from old as to grade. w ear was also in good demand and m 10c to 15c per bushel higher than a k ago. The trade generally expects a er movement next week. No. 1 white, 9@1.60; No. 2 white, $1.58@1.59; No. 3 ite, $1.57@1.58; No. 4 white, $1.55@1.57; 5 white, $1.53@1.55; No. 6 white, $1.51 53; No. 1 yellow, $1.55@1.56; No. 2 yel- , $1.53@1.55; No. 3 yellow, $1.51@1.53; 4 yellow, $1.49@1.51; No. 5 yellow, $1.47 49; No. 6 yellow, $1.45@1.47; No. 1 ed, $1.53@1.54; No. 2 mixed, $1.51@ ; No. 3 mixed, $1.49@1.51; No. 4 mixed, 7@1.49; No. 5 mixed, $1.45@1.47; No. 6 ed, $1.43@1.45. New Ear Corn—New low ear corn, $1.32@1.35; white ear, 5@1.40; mixed ear, $1.32@1.35. Ear n, old, sound. white ear, $1.45@1.50; ow ear, $1.45@1.50; mixed ear, $1.45@ .

Oats—The demand for oats was only derately active the past week, and es were governed almost entirely by n fluctuations. The range, however, s narrow, and closing quotations were ut the same as a week ago. Receipts tinued disappointingly small, though tly of top grades of white. No. 2 white, 75½c; No. 3. white, 74½@75c; No. 4 te, 74@74½c; No. 2 mixed, 74@74½c; 3 mixed, 73@74c; No. 4 mixed, 72@73c.

PHILADELPHIA.

leaks in cars, condition of door seals and other details which at present, it is said, cannot be fully cared for by the existing force of inspectors.

ST. JOSEPH.

W. H. Moore, Correspondent.

The first car of new shelled corn of the season was received on contract today by the Marshall Hall Grain Co. The car was graded No. 4 and was shipped from Southern Iowa.

C. E. Addington, of the Addington Grain Co., left for Fort Worth Saturday to attend the suits against the old Walker Grain Co. Mr. Addington will attend in the interests of the Elwood Grain Co., with which firm he was formerly associated.

The construction of a strictly modern immunization plant for the vaccination and spraying of hogs has been started at the So. St. Joseph yards and will probably be completed within six or seven weeks. It will be operated by the Stock Yards Company under the supervision of government officials.

W. H. Baker, assistant county farm agent leader, of Columbia, Mo., was in St. Joseph lately and says there will be a considerable falling off in wheat acreage in Missouri next year. The farmers are putting in nothing like last year's acreage, and some counties may go below the prewar acreage. In a general way, corn will take the place of wheat where wheat acreage is reduced.

The following were registered on the Grain Exchange floor during the week: J. W. Brewer, Bolckow, Mo.; R. B. Ferrell, Robinson, Kans.; H. Bunton, Robinson, Kans.; A. D. Pendleton, Indianapolis; W. E. Kellogg, McFall, Mo.; F. H. Babcock, Chicago; H. Bullerdick, Westboro, Mo.; H. L. Bayne, Kansas City; H. W. Aurdin, Hiawatha, Kans.; C. E. Dundan, Greenville, Texas; W. S. Potts, Pawnee City, Neb.; A. P. Maupin, King City, Mo. and B. A. Garnett, Fairbury, Neb.

Illustrating the growth of St. Joseph as a primary market, the receipts during the month of July, August, September and October this year amounted to 7,607,000 bushels, compared to 4,881,200 bus. during the corresponding period of 1918. At an average price of $2.25 per bushel, the volume of business on wheat receipts alone aggregates $17,117,000. Receipts of corn and oats for the four month period were: 1919, corn, 1,080,000, and oats, 442,000; 1918, corn, 2,220,400 and oats, 956,000 bus. The enormous wheat acreage of the 1919 crop is responsible for lighter receipts of corn and oats, this being particularly applicable to the territory from which St. Joseph draws.

Representatives of farmers' co-operative unions from seven mid-Western states met in St. Joseph last week in a conference to plan closer co-operation between the state unions of the corn belt in their various activities. The local branch of the Farmers' Union of Nebraska is the Farmers' Union Cooperative Live Stock Association Co., of which C. F. Emmert is local manager. The following men were in attendance at the conference: Nebraska—G. H. Gustafson, Omaha; J. O. Shroyer, Humboldt; H. G. Kenney, Cowles, and A. K. Frost, Plainview. Iowa—O. E. Wilson, Morning Sun; T. O. Hougas, Macedonia; Will Anderson, Clarinda, and J F.. Garber, Weldon. South Dakota—J. W. Batcheller, Mission Hill. Colorado—W. R. Callicotte, Carbondale, and J. M. Collins, Eaton. Kansas—John Trumbull, Beloit. Missouri—D. T. Maddux, Richmond.

Cash Markets.

Wheat—Receipts for the week, 195 cars, against 280 a week ago and 75 a year ago. Choice offerings were in good demand and ordinary quality samples found a fairly ready outlet. Prices on hard wheat advanced approximately 3@6c during the week, the maximum being on semi-dark samples. Red wheat was selling Thursday 5@6c over last Saturday on No. 2. Rumors of the Grain Corporation offering for resale stocks of wheat of milling quality were announced Friday, having a very dampening effect on trading. Ordinary quality wheat sold Saturday at 7c under the day before, but just what the result of the action of the Grain Corporation will have on wheat prices remains to be seen, trading having been of too narrow a scope to determine the extent of any actual change in values. Cash wheat follows: No. 1 dark hard, $2.42@2.60; No. 2 dark hard, $2.39@2.58; No. 3 dark hard, $2.35@2.54; No. 4 dark hard, $2.30@2.47; No. 5 dark hard, $2.24@2.38; No. 1 hard, $2.35@2.50; No. 2 hard, $2.32@2.45; No. 3 hard, $2.25@2.40; No. 4 hard, $2.18@2.33; No. 5 hard, $2.10@2.22; No. 1 yellow hard, $2.30@2.31; No. 2 yellow hard, $2.25@2.27; No. 3 yellow hard, $2.22@2.24; No. 4 yellow hard, $2.15@2.21; No. 5 yellow hard, $2.08@2.12; No. 1 red, $2.28@2.29; No. 2 red, $2.25@2.27; No. 3 red, $2.22@2.23; No. 4 red, $2.17@2.20; No. 5 red, $2.12@2.15.

Corn—Receipts for the week, 44 cars, against 39 a week ago and 48 a year
Until Friday the cash market had been
tured daily by strong upturns, all vari
reaching a high point of 13@15c over
Saturday's prices. Owing to shortage
offerings Friday and Saturday, the
status of values is indefinite, but the
is undoubtedly lower, in sympathy to
wheat situation. Cash corn follows: N
yellow, $1.54@1.56; No. 3 yellow, $1.51@
No. 4 yellow, $1.49@1.50; No. 5 yellow,
@1.48; No. 2 white, $1.52@1.54; No. 3 w
$1.50@1.51; No. 4 white, $1.48@1.49; N

KANSAS CITY.

T. J. Tanner, Correspondent.

Alfred Weston, one of the older mem
of the Board of Trade and head of Al
Weston & Co., flour and feed dealers, K
sas City, Kans., was married early
week.

P. J. Matthews, former traveling
for Dilts & Morgan, Kansas City grain
ceivers and shippers, has opened a bra
office of the firm in Wichita, Kans.
Thompson & McKinnon wire service
been installed.

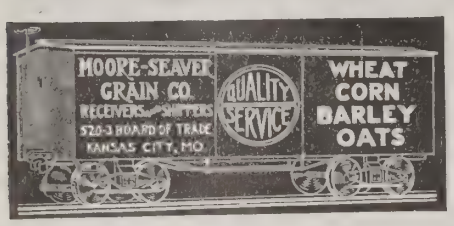
The visit to Kansas City of the Inte
tional Trade Conference delegates Fr
and Saturday was made almost a histo
event. Every effort was made to enter
the delegates and to convince them
Kansas City's ability as a food produ
The delegates manifested great interes
the meat packing houses and the
mills.

While the coal strike is having no ef
in Kansas City, there are several po
in Kansas where shortage of fuel is
coming serious. Bankers at Hill
Kans., have asked Governor Allen to
cure coal for threshing machines, wh
were stopped for lack of fuel. It is
that about 50 per cent of the wheat
there remains to be threshed.

Inefficiency of present day labor is
illustrated in the building of a 1,000,
bushel addition to the Norris Grain
elevator, in Kansas City. This work
gan in July and should have been c
pleted by October 1, according to contr
F. C. Hoose, manager of the house,
Saturday that he would regard himsel
fortunate if the job were finished by
cember 1.

William G. Waggoner, head of the W
goner-Gates Milling Co., Independe
Mo., and a member of the Kansas
Board of Trade, will celebrate his eight
birthday November 15. For many y
Mr. Waggoner has superintended the l
ing of wheat on the exchange floor for
mill. The Waggoner-Gates mill gr
soft wheat exclusively, selling the pro
locally and in the South.

The announcement of Wheat Dire
Barnes' intention to resell wheat f
grain corporation stocks was well rece
by millers in Kansas City. However,
said that little of the 3,000,000 bus. of h
wheat held here by the corporation i
high grade. The remaining 5,000,000
includes a large percentage of good
wheat. Texas mills have lately end
ored to buy corporation wheat in Ka
City, but were refused.



The Moore-Seaver Grain Co. received
vices this week indicating that Texas
be a buyer of white corn by December
H. C. Gamage, treasurer of the comp
said he had sold corn recently to Louisi
which was good evidence that Texas
unable to ship. The rain damage of
last few weeks in Texas has altered
views of the Kansas City dealers, who
not expected to ship corn to that state
for January or February.

Hearings and revocations of license
the cases of grain firms and millers
Oklahoma, Texas and Kansas are of
most daily occurrence in the office of
F. Piazzek, second vice-president of
United States Grain Corporation and K
sas City zone agent. Mr. Piazzek had
fore him one day this week a grain de
from Frederick, Okla., who had arbitra
set up two new wheat grades, "No. 6"
"No. 7," and bought on them. The r
lost his license.

E. O. Moffatt, of the Moffatt Grain Co
hopeful that the kafir and milo movem
will begin to make a volume by Decem
1. He has received reports that Texas
Oklahoma, after an improvement in
weather situation, are ready to ship fre
as soon as cars can be provided. E
Kansas is inquiring for bids. As the c
of all three states is large, with dam
thus far limited to some unshocked c
in Texas, Mr. Moffatt expects to see v
liberal offerings. He also looks for a
duction from present high prices, but
not extremely bearish.

An attendance of 75 men, including e
ployes of elevators and mills and seve
city firemen, attended the lecture of
H. H. Brown, of the Bureau of Chemist
Department of Agriculture, on "Dust E
plosion and Fire Prevention." The lectu
accompanied by a physical demonstrat
and motion pictures, was delivered in
rooms of the United States Grain Corp
tion November 8 at 3 p. m. Dr. Br

introduced by D. F. Piazzek, zone . Dr. Brown's ambition, proving the y that resides in dust, was received deep interest by all present. He ad- ed suction blowers at the elevator to clean grain before it enters the or mill. In Missouri the cleaning of before weighing is prohibited by law. rown advocated abolition of the law interest of life saving. He said the ollections from the unloading chute average about 30 pounds to a car. g the pictures shown were views of furray elevator explosion and fire, cost 14 lives and large property e September 13.

Cash Grain Markets.

at—Receipts for the week, 895 cars, t 974 a week ago and 898 a year ago. wheat advanced to $2.63 for the best No. 1 hard by Friday, owing to inade- offerings and a good milling and g demand, but the market broke osed dull Saturday. The weak close ue to the abolition of shipping per- nd the likelihood of larger receipts; he prospective resale of federal wheat. Red wheat also had a rise 7 and a setback. The closing hard quotations were 1c to 5c higher than ago, except on No. 3, which was 1c lower. Red wheat ended unchanged higher. Final prices were: No. 1 2.40@2.58; No. 2, $2.35@2.56; No. 3, 2.54; No. 1 red, $2.30@2.31; No. 2, 2.28; No. 3, $2.24@2.25. Local wheat decreased 210,000 bus. as a result of g sales. Stocks here include about 0 bus. owned by the grain corpora- about 3,000,000 bus. of this is hard but mainly medium and low grades. ther 5,000,000 bus. is chiefly red of good quality, durum and mixed

—Receipts, 63 cars, against 124 a go and 232 a year ago. A very situation existed through most of ek, due to light offerings and a urgent demand for local account ipment to feeders. However, the the week was characterized by ss and dullness, due to prospective receipts and the chance for lower of wheat. At the close corn was higher than a week ago. Stocks ecreased 3,000 bus., to 40,000 bus. advices confirmed a great reduction crop of that state, due to the dis- rains last month. Dealers here y had inquiries from Louisiana and d Texas to be a buyer of northern fore the end of the calendar year. losed nominally as follows: No. 2 $1.53@1.55; No. 3, $1.50@1.52; No. 2 white, $1.53@1.55; No. 3, $1.50@1.52; No. 2 yellow, $1.53@1.55; No. 3, $1.50@1.52.

Oats—Receipts, 58 cars, against 65 a week ago and 177 a year ago. Prices advanced in sympathy with corn, closing 2½c to 5c higher, but the demand was mainly local. Final quotations were: No. 2 white, 75@75½c; No. 3, 74c; No. 2 mixed, 72@73c; No. 3, 71@72c; No. 2 red, 72@74c; No. 3, 72@73c. Stocks decreased 64,000 bus., to 1,112,000 bus.

Kafir and Milo—Receipts, 11 cars, against 1 a week ago and 2 a year ago. The market held firm and closed the same as a week ago, with No. 2 white kafir and No. 2 milo at $2.60@2.70 per cwt. and No. 3 at $2.50@2.60. A fair scattered demand existed, but big buyers held off and awaited larger receipts, which are likely within the next two weeks. If the offerings increase as expected, present fancy prices can not hold. Stocks here decreased 4,000 bus., to 6,000 bus.

CHICAGO.

On Thursday last a record sale was made when a Board of Trade membership sold at $10,850 net to the buyer.

W. H. Perrine & Co. have moved their offices to rooms 915-916 Postal Telegraph Bldg., from their present quarters in the same building, the firm's business requiring more office space, making the move necessary.

Effective Nov. 10 there will be a temporary suspension of the permit system controlling shipments of grain from interior to primary markets. Individual permits, however, will continue to be required on shipments of grain moving between primary markets.

Logan & Bryan through their Winnipeg representatives have applied for $25,000 of Victory Land Bonds. In all this firm has subscribed to $250,000 worth of the Victory Bonds allocating various amounts to their Canadian branch offices.

The Chicago Board of Trade did not close on Armistice Day although taking a recess of a minute at 11 o'clock when all turned to the East in memory of the boys who gave up their lives on Flanders Field. The

CHICAGO

Exchanges at Minneapolis and Milwaukee were closed throughout the day.

Keelin Bros. & Co., 4553 Lexington St., Chicago, are considerably increasing the size of their plant, just having completed additional concrete storage, giving them at present 150,000 bus. capacity. A new warehouse to hold 200 cars will be completed about the first of March.

Among visitors to the Chicago floor last week were W. M. and R. Bell of Milwaukee; C. E. Griffith, St. Paul; J. H. Mosher, Prophetstown, Ill.; Carl Gragg, Lowell, Ind.; John D. Lynch, Lockport, Ill.; Harry Stockfleth, Davenport, Ia.; E. A. Benecke, Palmer, Ia.; W. Pontius, Knox, Ind.; A. L. De Boer, Cornell, Ill.; H. M. Taggart, Wenona, Ill., and H. A. Paulin, Sioux City, Ia.

Some very large yields of alfalfa seed are reported from the Northwest which are interesting. In Fall River County, S. D., where the hulling of seed has been practically completed, farmers report an income as high as $66 per acre from the seed in addition to $20 per acre for the hay of the first cutting and $5 for the straw from the threshed alfalfa. Another farmer in the same neighborhood reports an income of $78 from seed and hay. The seed is bringing 29c at the station.

Field Agent Bryant of Indiana reports that clover seed in that state averaged only one bu. per acre, which is half a bushel under the 10-year average. As only 55 per cent of the usual acreage is harvested, the total crop is only approximately 75,000 bus., an amount which will not supply the home demands of the state.

The shortage of rice in Hongkong has become so critical that the local government has taken over all stocks of rice and has fixed the retail price at 12, 6.9 and 7½c.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

Dutch importers have asked permission of their government to import American rye flour, which they say is superior in quality and 25 per cent cheaper than the home product.

The Canadian Wheat Board last week purchased 500,000 bbls. of spring wheat flour at $10.65 per barrel, the orders for which will be distributed evenly among the mills. This makes the total purchases 1,700,000 barrels.

Italian Product Monopoly.

Commercial Attache Dennis at Rome states that the Italian Government continues to control the importation of commodities that are under government monopoly. This monopoly covers among other things, cereals, including rice, dried vegetables and their flours, meat, frozen, salted and in tins, bacon, condensed milk, oats and oil seed.

Flour Trade.

While the mills are generally running full time flour, particularly in the East, seems to have fallen into a rut, all grades selling only in quite a moderate way. The mills generally, however, are reported still sold up to the 60-day limit and in spite of the dullness, generally expressed by the jobbers and large handlers, the market continues very strong, particularly on spring patents and hard winters which are actually higher and firmer. Perhaps, the dullness complained of is due largely to the fact that buyers are slow to meet the advances.

The principal factor in the New York market is the announcement that the Grain Corporation has worked out a plan to resell wheat from its stock to millers, which was depressing. Flour is still obtainable in the New York market on resale terms even at some concessions, but the chief activity in the market was on the part of jobbers.

Kansas mills reporting to the representative of the *Northwestern Miller* state that the crop year ending June 30 last showed a production nearly 2,500,000 bbls. in excess of the previous crop year and by nearly 6,750,000 bbls. in excess of the high record on the crop of 1914-15. The total production is placed at 13,271,193 bbls. of wheat flour in 203 mills. Corn products and oatmeals continue generally unchanged.

FLOUR MARKET.

KANSAS CITY.

Kansas City, Nov. 8.—Further advances in wheat were reflected in the flour market this week. Hard wheat flour was quoted 50c a bbl. higher on the better grades. Soft wheat flour rose 10@30c. Demand was limited and much of the flour made was applied on old orders. A weak feeling developed late in the week, due to the probable reselling of wheat by the United States Grain Corporation. Mills here are anxious to see a resumption of flour purchases by the Government for export, which would absorb accumulations of the lower grades and prevent possible sacrifices. Flour production for the week was 83,500 bbls.

Following are the Kansas City prices of flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Nov. 8.	Nov. 1.
Short patent	$12.00@12.50	$11.50@12.40
Long patent	11.50@12.00	11.10@11.60
Straight	10.90@11.40	10.60@11.25
1st clear	10.00@10.50	9.60@10.60
2nd clear	7.50@ 8.50	7.50@ 8.50
Low grade	6.00@ 6.50	6.50@ 7.50
Soft wheat—		
Fancy patent	11.00@11.20	10.80@11.10
Standard patent	10.60@11.00	10.40@10.70
Straight	10.10@10.40	9.80@10.00
Clear	9.40@ 9.70	9.20@ 9.40
Low grade	6.50@ 7.50	6.50@ 7.50

BALTIMORE.

Baltimore, Nov. 8.—There is a firmer feeling in spring wheat grades of flour, but soft winters are dull and easy, with offerings of the latter more than ample for trade wants. Western advices on springs are higher. Rye flour is very dull. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $12.50@13; straight, $11.75@12.25; winter patent, $10.50@10.75; straight, $9.75@10; rye flour, pure to blended, $7@8.

PHILADELPHIA.

Philadelphia, Nov. 8.—Flour receipts for the week ending Nov. 8 were 800 bbls. and 12,959,110 lbs. in sacks. The market continues dull and without important change. As noted in our last report transactions are mostly in second hand stock which is available below mill limits.

We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, Western, $10@10.25; do., nearby, $9.75@10; hard winter straight, $11.35@11.55; do., short patent, $11.75@12.25; spring, first clear, $9.25@9.75; do., patent, $12.10@12.35; do., short patent, $12.50@12.75; fancy spring and city mills patent, family brands, $12.75@13.25; rye flour, $7@7.35 per bbl. in sacks, as to quality.

NEW YORK.

New York, Nov. 8.—Steadily advancing prices of high grade hard wheat flour were again the feature in the local flour market during the past week. Quotations were raised on both springs and winters, and mills took a very strong view of the situation. The volume of business was not large, as quotations were generally above buyers' views, although the action of the market did serve to stimulate a little demand in some directions, as buyers were nervous lest prices develop additional strength.

Toward the close of the week there was a noticeable halt in business owing to the offer on the part of Julius Barnes, president of the Grain Corporation, to sell wheat out of the Corporation's stocks in order that there be no scarcity of supplies for the mills. It was the prevailing opinion here that the effect of this offer will depend largely on whether or not the Corporation has any large quantities of hard wheat in its stores.

It was also rumored that President Wilson will shortly remove the import and export restrictions on wheat and a noticeable declining tendency in cash wheat on Friday and Saturday strengthened the belief that cash premiums are to be lowered. Prices for the week ruled strong with spring wheat patents quoted at $12.25@13; Kansas straights, $11.50@12; soft winter wheat straights, $10@10.30.

CINCINNATI.

Cincinnati, Nov. 8.—Satisfactory conditions prevailed in the flour market here during the week and prices ruled firm and higher until near the close when rumors that the food administration was discussing plans to place wheat on the market under the basis price created a rather unsettled market and an indifferent demand. Winter patents were in excellent demand early at the slight advance. Quotations represent prices in wood. Wood basis is 45c over jute. Winter patent, per bbl., $10.75@11; hard patent, bbl., $12.30@12.80; bakers' Kansas patent, 140 jute, $10.85@11; corn flour, 100 sacks inc., $3.35.

DETROIT.

Detroit, Nov. 8.—Buying of wheat on the part of the local mills has not been active. The market was firm most of the time but unsettled late in the week owing to rumors of an intention on the part of the Government to sell holdings of wheat at the basic price plus carrying charges. This gave the market an easy tone for both wheat and flour. The flour market is quoted dull and prices show no change. Feeds of all kinds show greater activity. Quote: No. 1 red wheat, $2.27; No. 1 mixed wheat, $2.25; No. 1 white wheat, $2.25; No. 2 red, 3c and No. 3 red 6c under No. 1 red. Fancy spring wheat patent, $13.50@13.75; fancy winter wheat patent, $12.75; second winter wheat patent, $12; winter straight, $11@11.25 per bbl. Bran, $46; standard middlings, $51@51.50; fine middlings, $61@61.50; cracked corn, $66; coarse cornmeal, $60@62; chop feed, $53@55 per ton, in 100-lb. sacks.

DULUTH.

Duluth, Nov. 8.—Millers have been in receipt of good inquiry for flour for some time back and they are prepared to make heavy shipments to Eastern points before the closing down of the lake navigation season. Stiff premiums were paid for spring wheat during the last week with the result that flour prices on this market have been advanced 40@50c all around. Prices of flour per bbl., in carlots, are as follows: Family patents, jute, $12.50@13; bakers' patents, jute, $12.25@12.75; first clears, $9.50@9.75; second clears, $6.75@7.

MILWAUKEE.

Milwaukee, Nov. 8.—There has been a keen demand for wheat flour in the local market during the past week while production is holding fairly steady to the pace established for the past several weeks. However the car shortage is proving a very hindering factor inasmuch as shipments cannot be made and stocks are accumulating, in spite of the fact that good orders are on hand and mills generally far oversold. The embargo on shipments to Eastern points is also regarded as a serious factor. Rye flour has shown slightly increased activity, while greater improvement is looked for with the oncoming cold weather. Spring wheat patent has shown an increase of 40c on inside and 15c on outside prices.

The Milwaukee mills produced a total of 20,800 bbls. of flour during the past week, of which 15,600 bbls. were wheat flour, or approximately 65 per cent of capacity, and 5,200 bbls. were rye flour. Current quotations, in carlots, per bbl., in cotton, are:

Spring wheat patent, $13@13.15; straight, $11.95@12.25; first clear, $9@9.80; rye flour, pure white, $7.60@7.80; rye flour, straight, $7@7.10; rye flour, dark, $6.10@6.50. [illegible] flour is nominally quoted at $3.85; [illegible] meal, white, $3.75, and corn grits, $[illegible] all in 100-lb. sacks.

Milwaukee flour stocks: Nov. 1, 48,125 bbls.; Oct. 1, 1919, 60,480; No[illegible] 1918, 50,550; Nov. 1, 1917, 9,860; Nov[illegible] 1916, 39,910; Nov. 1, 1915, 135,035; No[illegible] 1914, 70,910; Nov. 1, 1913, 52,770; No[illegible] 1912, 87,768; Nov. 1, 1911, 101,710; No[illegible] 1910, 79,030; Nov. 1, 1909, 116,907; No[illegible] 1908, 100,000.

NASHVILLE.

Nashville, Tenn., Nov. 10.—Soft wi[illegible] wheat flour mills in the Southeast cont[illegible] to report fair volume of current busi[illegible] Some complaint of falling off in ship[illegible] instructions is mentioned.

Nashville and Southeastern mills, [illegible] capacity of 221,490 bbls., had output [illegible] week of 148,904 bbls., or 67.2 per cen[illegible] capacity, which compared with 76.6 [illegible] cent of capacity of mills reporting [illegible] preceding week and 51.5 per cent the s[illegible] week in 1918.

Prices: High grade soft winter w[illegible] patents, 98 lbs. cotton, f. o. b. Ohio [illegible] points, $11.50@11.75; standard pat[illegible] $10.40@10.70; 100% flour, $10.10@10.25.

BOSTON.

Boston, Nov. 8.—In spite of the [illegible] trade, the local flour market is very st[illegible] and spring patents and hard winter [illegible] ents are actually higher than they we[illegible] week ago. Easier mill feed markets [illegible] continued high premiums for spot w[illegible] are the most active bullish factors at [illegible] moment. Buyers are slow to meet t[illegible] advances and continue to place orders [illegible] for such flour as appears to be actu[illegible] needed in the near future. Current [illegible] tations on wheat flour are 10@60c hi[illegible] on spring patents and 10@50c higher [illegible] hard winter patents. These quotati[illegible] f. o. b. Boston, in carload lots, mill s[illegible] ment, for 196 lbs., in 98-lb. sacks, [illegible] $12.25@13.25 for standard spring pat[illegible] $13.25@14 for special short patents, $9.[illegible] 10 for spring clears, $11.60@13 for [illegible] winter patents, $11@11.50 for soft wi[illegible] patents, $10.25@10.75 for soft wi[illegible] straights, and $10@10.50 for soft wi[illegible] clears. Rye flour is unchanged at $8@[illegible] for fine white patents. Receipts for [illegible] week ending Nov. 8 were 47,185 bbls.

Wheat Moved—Flour Productio[illegible]

The Grain Corporation report co[illegible] ing the wheat and wheat flour m[illegible] ment throughout the United States [illegible] the week ending Oct. 24, in compar[illegible] with the figures for the same pe[illegible] a year ago was as follows:

	1919.	191[illegible]
Wheat receipts—		
From farms, bu	20,774,000	20,35[illegible]
Previous week	19,398,000	27,88[illegible]
June 27 to Oct. 24	535,003,000	515,30[illegible]
Flour produced—		
During week, bbls	3,350,000	3,53[illegible]
Previous week	3,394,000	2,66[illegible]
June 27 to Oct. 24	45,884,000	38,68[illegible]
Wheat stocks—		
All elevators and mills, bu	292,167,000	277,65[illegible]
Previous week	288,504,000	271,37[illegible]
Change for week	+3,663,000	+6,28[illegible]

EXPORTS OF WHEAT AND FLOUR.

Exports of wheat and flour, Jul[illegible] to Oct. 24, 52,901,000 bus. of wheat [illegible] 5,900,000 bbls. of flour, making a t[illegible] equal to 79,451,000 bus., compared [illegible] 58,705,000 bus. of wheat and 5,492[illegible] bbls. of flour last year, October fig[illegible] last year being pro rated to Oct. [illegible] making a total equal to 83,419,000 [illegible]

THE BAG SITUATION.

Actual value conditions in the [illegible] market have been obscure for some[illegible] tle time, primarily on account of [illegible] dock strike in New York. This si[illegible] tion, however, is rapidly clearing [illegible] and opinion as to future values mus[illegible] based upon one or two considerati[illegible]

Actual goods in the hands of [illegible] manufacturers and other usage of y[illegible] age goods has run very low on acco[illegible] of the strike; and as nearly as we [illegible] learn, practically every bag house[illegible] way oversold on goods actually on h[illegible] and the orders they now have will [illegible] sume a very large proportion of [illegible] yardage now in New York harbor w[illegible] ing to be unloaded.

Many buyers feel that when the go[illegible] now in New York are unloaded, pr[illegible] are bound to decline to a certain [illegible] tent. On the other hand, our New Y[illegible] representative is unable to find any [illegible] willing to sell goods at even a slight[illegible] cession, and I would say that 90 [illegible] cent of all importers of goods feel t[illegible] prices will be firmly maintained up [illegible] til the end of the year.—*Missouri l[illegible] Company, St. Louis.*

TRADE MENTION

rtlett-Frazier Co. announce the ng of a branch office in the Bremer t, 221½ Mill St., Pontiac, Ill., with . J. Rose as manager.

e National Cash Register Co. of on, O., has an exceedingly fine list izes that are offered to the win- of a four-months' contest ending nber 31. Every salesman and who rolls up 400 per cent of his g quota for the four-months' pe- has his choice of a most expensive of gifts, such as a chest of solid , bedroom suite, dining room set, nd the men with 300 per cent, 250 ent, 200 per cent or 175 per cent ir quotas for the same period are se in line for presents that are worth the effort involved.

Horse Publicity Association, which considerable deserved has been, and is this week de- by THE PRICE CURRENT-GRAIN RE- is quite properly handling all ations on broad lines and cover- ery allied phase of the business, hoes, feed, grain, saddlery, hard- wagons, implements, livestock, he individual interests of which ndled by a representative asso- , firm or society, as for instance, Lockwood, American Steel & o., 30 Church street, New York, A. W. Harris, of the Harris & Savings Bank, Chicago; the ron Society of America and two of similar nature wherein the of influence is broad; and the nt assurances are that the Horse ty Association will at least have nsideration and the country shall whether "old Dobbin" shall e to be with us.

UITY" HOG FATTENER.

he result of many years of ob- n, study and practical experi- the livestock and feeding trade ders' Supply Co. of Kansas City, e justly proud of their product "Equity Brand Hog Fattener." ed comprises many ingredients perly proportioned and blended re a feed which is highly nutri- The ingredients listed on each as follows: Linseed meal (old , peanut meal, corn oil cake luten feed, hominy feed, corn eal, ground screenings, cotton- ll bran, molasses, wheat mid- ground barley, tankage and one- 1 per cent salt. This combina- ults in a ration which has the amount of protein as well as drates and fat. A strictly corn contains the two latter; but tests have proven corn to be in protein and mineral, so that hogs on corn alone is really a pensive and wasteful method. cord better gains when fed just t combination than when fed too little or too much of the same thing, no matter how fine the grain in itself may be. Therefore, it is obvious that feed manufacturers are in a position to provide balanced rations, their laboratories furnishing them with correct data and their large experience proving also valuable to individual feeders. A long list of feeders stand ready to swell the list of "Equity Brand" users by their hearty endorsement of the feed that fattens hogs at the rate of approximately two pounds per day.

THE BENSON COMBINATION DUMP.

Ten seconds is conceded to be a very short time even in this day of speed mania. But this covers the entire time necessary to dump a truck or wagon over the Benson Combination Truck and Wagon Dump. This dump is unique in that it operates by hand or power, the latter not being really advocated by the manufacturer as the operation by hand power is very easily accomplished and understood by any elevator operator. Just the movement of one hand is required to operate a hand wheel which in turn connects with a shaft controlling the jack-screw. The jack-screw principle is extremely simple and efficient. The dump holds at just the desired point and is absolutely accident proof. The manufacturers guarantee their product to dump at any desired angle and also further guarantee that their dumps are free from all defective materials. The Edward R. Benson Co., 204 Andrus Bldg., Minneapolis, although manufacturing a combination truck and wagon dump, also furnish the wagon

dump alone; and those elevator men who are so remote in their location that they do not yet have to cater to the auto truck nevertheless have the advantage, when ordering the Benson Wagon Dump, of having included with the order a foundation which merely needs the building of an extension platform when the time comes that autos must be accommodated. Price, which is such a considerable factor in these post-war days, is said to be another attractive feature of the Benson Dump; and the manufacturers will upon application furnish complete descriptive matter with prices, etc., to all interested in a safe, efficient and simple installation.

Dependable Feed Brokers.

A friend recently stated that there were more than 25 new brokers and middlemen in Minneapolis alone handling feed materials, flour, bran, shorts and feed by-products; and we do not doubt it. This has been a most peculiar year, placing exceptional opportunities before young fellows who know the feed game to act as brokers and distributors for the big mills and to secure dependable supplies for feed manufacturers, wholesale grocers and the great distributing and manufacturing trade in the Central, Eastern and Southern states. A concern of this kind, the American Millers & Manufacturers Trading Co., 159 N. State St., Chicago, the members of which are particularly posted on import business, with a good working knowledge of domestic trade as well, is handling trade in copra, linseed, cottonseed and the full line of feed materials above mentioned. They have foreign connections with access to large supplies of such feedstuffs in South America, the Orient and other countries. Their business with millers in the United States is rounding out nicely and those not receiving a volume of business in Chicago territory will be justified addressing the American Millers & Manufacturing Trading Co. about it.

Catalogue Off the Press.

The grain trade generally, and millers and feed manufacturers in particular, will be very much interested in Catalogue No. 103 entitled "Scientific" Ball Bearing, Crushing, Grinding and Separating Machinery. This catalogue, issued by The Bauer Bros. Co., Springfield, Ohio, is printed on fine enamel stock and liberally illustrated with very fine half-tones of the Bauer "Scientific" Attrition Mills, various close-ups detailing the superior construction of the parts comprising their manufacture, suggestive installations of mills showing different means of transmitting power to them, and half-tone engravings of the Bauer Corn Crushers, Crackers, Grinders, Cake Breakers, Mill Reels, Shakers, etc.

The Catalogue is altogether a most attractive one and the type matter is such that it is a pleasure to peruse its pages, no effort being necessary for the entire layout is satisfying to the eye. A page of special interest lists the products which can be handled by the "Scientific" machines and the compilation of the list proves that The Bauer Bros. Co. manufactures machinery operating on the most delicate and difficult materials as satisfactorily as it handles the heaviest and coarsest products. Write for No. 103, for you will find it worth having.

Farm Production and Fencing.

The United States Agricultural Department, through its county agents, experiment stations, etc., is spreading the propaganda of better crops. Bulletins are issued frequently of great help to the farmer and abundant literature has been circulated this fall urging the farmer to burn his fence lines where weed pests thrive.

On the average farm the fence lines raise enough noxious weeds to seed the entire farm, and breed multitudes of crop-destroying insects. With a Calumet Steel Post Fence the fence lines may be safely burned without injury to the posts, not only destroying weeds and pests but greatly improving the appearance of the farm.

Dealers find that this advantage of the Ankorite Post makes a strong appeal to the progressive farmer. The Calumet Steel Co., Department 7, 208 South La Salle St., Chicago, will outline a most attractive selling plan to dealers upon inquiry.

A Factory Library.

Many business institutions now maintain libraries of publications pertaining to trade topics for the use of employes as well as the managers. Notable among these is Wilson & Co., meat packers of Chicago, whose catalogue has just reached us. In addition to a very comprehensive list of books on the shelves of the company's library, there are in this collection some 4,000 pamphlets and bulletins on every phase of the meat packing business. The books have been purchased by the company for the use of their employes who are under no obligation whatever for their use, being privileged to take books home as well as to use them for reference while at the library. A very complete library index makes it possible to locate books on almost any subject and librarians are ever ready to help the searcher for trade or general knowledge or for books or articles on particular subjects.

Testing and Sampling Apparatus.

A new booklet just off the press is one being distributed by the Hess Warming & Ventilating Co., 5 North La Salle street, Chicago. This edition, entitled "Grain Testing and Sampling Apparatus," is liberally illustrated with fine half-tone engravings, and all those in the grain and seed trade will find much of interest within its pages. Full directions governing the setting up and testing of the Brown-Duvel Moisture Tester are given, the Torsion Balance is described and illustrated as well as the Boerner Sample Mixer or Splitter, Dockage Sieves, etc., etc.

SOME OCTOBER RECORDS.

Three new receipt records were made at the Omaha market during October: The arrival of 32,579 cattle on Oct. 13 was the largest receipts for one day; 75,933 cattle arriving during the week ending October 18 was the largest weekly record, while the total receipts for the month, 285,270, was a new record in the history of this market.

The total receipts of livestock at the Denver market on Oct. 20 were heaviest for a single day in the hi of the yards, amounting to 536 The previous record day was Ja 21, 1918, when 517 cars of stock received.

Receipts of calves at Kansas Cit the first three months of 1919 to 320,268 head are largest on recor a similar period at that market. shows an increase of 23.6% ove receipts of the corresponding p last year. Incidentally the ten m offerings this year are only 5,467 of the total calf receipts of the year 1918. This indicates that ca ceipts for the year will be larger ever before by 75,000 head.

recorded. The property includes mills and elevators of the Bozeman Milling Co. located in Bozeman and Belgrade.

NEBRASKA.

Stuart, Nebr.—A new elevator will be built by Wm. Krotter in the spring.

Loup City, Nebr.—The Farmers Union is considering the erection of an elevator.

Hardy, Nebr.—The new elevator at this place is completed and ready for business.

Sholes, Nebr.—Mr. Peck is in possession of the elevator of the Wm. Slaughter Grain Co.

Osmond, Nebr.—Oscar Trotter, formerly agent for the Atlantic Elevator Co., has purchased and is operating the elevator.

Howe, Nebr.—R. E. McTaggert has resigned as manager of the Farmers Union Elevator Co. Frank McCoy succeeds him.

Grand Island, Nebr.—The Henry Glade Milling Co.'s elevator has been taken over by the Nebraska Consolidated Mills Co. of Omaha.

West Point, Nebr.—The new 50,000-bu. elevator of the Farmers Elevator Co. has been completed. The house is of cement concrete tank construction and cost $50,000.

Superior, Nebr.—The Superior Terminal Elevator Co. has organized and elected officers as follows: F. L. Myers, president; P. Johnson, vice-president; C. E. Shaw, secretary and general manager.

Hebron, Nebr.—Ralph E. Butler has been succeeded by Frank Baand of Strang as manager of the Hebron Elevator & Shipping Co. Mr. Butler has purchased an elevator at Powel from A. M. Strawhacker.

Sidney, Nebr.—Contract has been let for the new 100-bbl. mill and 15,000-bu. elevator to be erected by Jos. Nau and J. L. Zwieble, who are interested in the new company. It is expected that the plant will be ready by Jan. 1.

Kearney, Nebr.—The Gibbons Grain & Elevator Co. has let the contract to the Burrell Engineering & Construction Co. of Chicago for a reinforced concrete mill, 5 stories high, to be built next to the elevator. It will cost $100,000.

Hastings, Nebr.—The Hastings Milling Co., with plants of similar character at Grand Island, Ravenna, St. Edwards and Millright, have been consolidated under the corporate name of Nebraska Consolidated Flour Mills Co., with main offices in Omaha, Nebr. A. R. Kinner is president of the company. The corporation has an authorized capital of $2,500,000.

NEW MEXICO.

Roy, N. Mex.—Plans have been prepared for the Standard Elevator which is to be built as soon as men and material can get here. It is to be 30,000 bushels capacity and will load out six cars a day.

NEW YORK.

Seneca Castle, N. Y.—Pennington Black Co. owns the new elevator at this place.

New York, N. Y.—Thos. Lenane, prominent grain dealer and a member of the New York Produce Exchange, died recently at the age of 70 years.

Auburn, N. Y.—E. P. Cady will leave the Merchants Grain Co. and has accepted a position as manager of the Elbridge Grain & Produce Corp., Skaneateles Junction, N. Y.

New York, N. Y.—The Unity Mills, Inc. has been organized with a capital of $100,000 to manufacture flour, meal, etc. Incorporators: L. H. Moos, A. B. Silverman and C. L. Gonnet, 19 Cedar street, New York City.

NEW JERSEY.

Edgewater, N. J.—The Corn Products Refining Co. expects to spend about $7,500,000 on improvements and extensions at its plants at Edgewater, N. J., and Pekin, Ill., so that the total refining capacity will be approximately 150,000 bushels a day.

NORTH DAKOTA.

Melville, N. D.—F. R. Knittle of Anamoosa has been engaged as grain buyer at the Star Elevator.

Blaisdell, N. D.—A. M. Enney is the new manager of the Farmers Co-operative Elevator Co. at this place.

Forbes, N. D.—The Forbes Farmers Equity Co. is finishing a 50,000-bu. elevator. It will be operated by electricity.

Divide (Sheyenne p. o.), N. D.—The Equity Elevator Co-operative Exchange has purchased the elevator of the Occident Elevator Co.

Osnabrock, N. D.—A. P. Kezma has opened up the elevator formerly owned and known as the Independent Elevator and is ready for business.

Bowden, N. D.—F. D. Johnson has succeeded H. E. Showers as manager for the Equity Co-operative Co. He was formerly manager for the Andrews Grain Co. here.

Petersburg, N. D.—Harry E. Clark is out of the grain business. The International Elevator Co. has purchased the elevator of B. C. Crangle of which he was formerly agent.

Mantador, N. D.—The Farmers Grain & Seed Co., recently destroyed by fire, has started work on a new $35,000 elevator with a concrete foundation. A Minneapolis firm has the contract.

NORTH CAROLINA.

Sanford, N. C.—The Sanford Milling Co. has been incorporated with a capital of $100,000.

OHIO

Weight per measured bushel: Wheat—56.3 pounds, against 58.8 last year and 58.2 the ten-year average. Oats—31.1 pounds, against 33.2 last year and 32.4 the ten-year average. Barley—45.2 pounds, against 46.9 last year and 46.5 the nine-year average.

Corn—Stocks of old corn on farms Nov. 1 estimated at 72,263,000 bushels (2.8 per cent of 1918 crop), compared with 114,678,000 bushels a year ago and 87,277,000 bushels, average of preceding five years.

PRIVATE CROP REPORTS.

Goodman's estimates on corn published Nov. 4 made the crop 2,896,000,000 bus., a yield of 28.1 bu. per acre; quality 94.6, against the Government's 2,749,000,000 on Nov. 1, 1918, and quality of 86.5 in 1918 and a 10-year average of 82. Best previous quality report was 89.9 in 1906. Winter wheat seeding below average of recent years, or about 38,300,000, lowest since 1914 (37,128,000).

The Snow-Barlett-Frazier crop report makes the final average yield of corn per acre 28.3 bushels, or practically unchanged from the Oct. 1 indication. This makes a total crop of 2,855,000,000 bus. using Mr. Snow's acreage, or Government acreage, 2,935,000,000 bus. The quality is the highest reported for a long series of years. Farm stocks of old corn are reported at 2.5 per cent, or a total of 64,000,000 bushels. With the single exception of 1917, this is the smallest carry-over ever reported. The acreage seeded to winter wheat shows a very heavy reduction and seeding very late.

O'BANNON COMPANY BUYS ELEVATOR.

The O'Bannon Company of Claremore, with plants at that point, Wagoner, Oklahoma, and Vinita, Oklahoma, has recently acquired, alongside its plant at Vinita, Okla., an elevator long owned and operated by The Oswego Seed and Grain Company of Oswego, Kansas, and will begin improvements to bring this plant up to the standard which conforms to that of the other O'Bannon properties in northeastern Oklahoma, these properties now representing six different units. This concern has done much to stabilize trade affairs in the Southwest through the representation of its interests in local and national activities, not only in their regular business of merchandising grain and seeds, but on the side issues, keeping a watchful eye on tariffs, legislative changes which so frequently operate against the best interests of the trade but are discovered by them only when the damage has been done.

Field Seeds

Minneapolis dealers have been paying $21 and upwards per cwt. for sweet clover seed grown in South Dakota.

Prices paid this year for Montana alfalfa seed are said to be the highest on record, and still have a rising tendency.

A midwinter contest of the North Dakota Improved Seed Growers' Ass'n will be held this year as usual in Fargo in January and the State Fair Association will contribute to the prizes.

Michigan dealers writing C. A. King & Co., Toledo, indicate generally a poor crop of grass seeds. Central Michigan seems to be doing better than other parts of the state. An Indiana dealer also writes that there is a very poor crop as to size and quality.

Louisville Seed Market.

LOUISVILLE, KY., Nov. 8.—The seed market as a whole is quiet, due to adverse weather, which has resulted in light planting. Bluegrass is very strong, and there is a good demand. It is reported that practically all of the 1919 bluegrass crop has been bought up by the cleaners, and that prices are advancing rapidly. Farmers held their seed for prices ranging around $2 a bushel, and finally got it, some seed selling as high as $2.25 and better, while what seed remains in farmers' hands is held at $2.50@$2.75 for stripped seed. Recleaned seed in carlots is quoted at around $3.60@3.65 a bushel for 21 lb. seed in carlots, with 19 lb. seed at $3.45@3.50. Orchard grass, recleaned, is quoted at around $3.50@3.60 a bushel.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Nov. 8, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce:

	Receipts		Shipments	
	1919.	1918.	1919.	1918.
Timothy, lbs..	30,500	30,000	128,936	338,400
Clover, lbs. ...	210,768	73,015	122,682	262,330

Duluth Flaxseed Market.

DULUTH, Nov. 8.—Operators on the long side held the whiphand in the flaxseed market during the last week. Receipts were small and free supplies in the elevators limited. Prices advanced persistently from the beginning of the week, culminating in a bulge extending to 31 cents in the November future on Friday. As a result of that development, an operator caught with a long line of short contracts found himself unable to meet the clearing house call for margins, and he was forced to suspend. In view of the limited movement of seed from the farms to the markets and the small quantities of free supplies in the elevators, notice was later issued by B. Stockman, president of the board of trade, to the effect that the board of directors contemplates making deliveries of Canadian, Southwestern and Argentine seed regular under new contracts, the discount, if any, to be arranged at the actual difference in crushing values. That and the notice that 20 cents margin must be deposited each morning on all contracts, either long or short, credit being given for the amount called in the afternoon settlement, led to weakness in Saturdays' market, and drops of 10@12 cents were set during the session. The net changes for the week showed advances of 20½@35 cents.

Strength at Winnipeg also aided bulls on this market. It was intimat deliveries of seed from the Ca West at the markets have be tremely limited, and that the t to come out is much smaller th been estimated by experts. Th ers' strike hindering the moven grain from country points, and from Buenos Aires to the effe labor unrest is growing in Ar and that another dockworkers' may be precipitated will res checking up exports of grain. sequence of that development t ket at Buenos Aires was irre

Receipts at the elevators he small during the week, amoun 26,218 bus., compared with 247,9 during the same period last ye with moderate shipments to crushing plants, stocks on han reduced to 113,000 bus.

Closing prices of flaxseed on luth market on Saturday as co with the previous Saturday a year were:

	Saturday.	Week ago.	Ya
On track	$4.69-75	$4.34-41	$
To arrive	4.67	4.32	
November	4.65	4.30	
December	4.55	4.26	
May	4.39	4.18½

St. Louis Seed Market.

Louis, Mo., Nov. 8.—The seed et is quiet, with offerings light, consisting mostly of clover seed. quality of the receipts, as a rule, rly good, but some of the offerings over seed contain a heavy per- ge of buckhorn seed. Timothy is dull, and millet is offered more . Red top is strong and in good nd. Quotations are as follows: , high grade seed, free from buck- $45 to $49 per 100 lbs., good av- country lots, $37 to $44; buck- mixed, $23 to $30; poor and , $5 to $20; alsike, high grade, $40 to $46; choice, $35 to $39, poor and trashy, less according to quality; timothy, choice clean seed, $11 to $11.25; average country lots, $10 to $10.50; low grade, $5.50 to $8; alfalfa, $20 to $35; red top, choice machine cleaned, $12.50 to $15.50; fancy solid seed, $16 to $16.50; chaffy, $7 to $11; sunflower seed, $9.50 to $10, per 100 lbs.; pop corn, on the cob, white rice, $5 to $6 per 100 lbs.; stock peas, whipporwills, $5; new era, $4.50; mixed, $4.25; millet, golden, $2.75 to $3.25; Siberian, $2.50 to $2.75; hog millet and common millet, $2.60 to $2.70.

Chicago Seed Market.

The timothy market was without particular feature during the past week and price changes ruled within narrow limits. Clover opened the six-day period weaker in tone, but was sharply firmer the next day, losing most of the gain, however, before Saturday. Range of prices for the week follow:

Timothy—	Year. B.	Year. A.	March. B.	March. A.
Nov. 3	$.....	$12.50	$12.65	$13.00
Nov. 4	.....	12.50	12.75	13.00
Nov. 5	.....	12.50	12.75	12.85
Nov. 6	.....	.....	12.75	12.85
Nov. 7	.....	.....	12.75	12.85
Nov. 8	.....	.....	12.75	.....

Cash seed range for week, $8@11.

Country lots—Poor to fancy, $8@11.25; fair to good, $9.75@10.75; choice, $11.

Clover, contract prime—

Nov. 3	$50.00	Nov. 6	$50.10
Nov. 4	51.00	Nov. 7	50.60
Nov. 5	50.40	Nov. 8	50.40

Clover, country lots—

	Poor to choice.	Fair to good.
Nov. 3	$30.00@48.00	$43.00@46.00
Nov. 4	30.00@48.00	43.00@46.00
Nov. 5	30.00@48.00	43.00@46.00
Nov. 6	30.00@48.00	43.00@46.00
Nov. 7	30.00@48.00	43.00@46.00
Nov. 8	30.00@48.00	43.00@46.00

Other seeds — Buckwheat, $2.60@2.80; Hungarian millet, $2.75@3.15.

Toledo Seed Prices.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending Nov. 8:

	Rng. for week. High.	Rng. for week. Low.	Close Nov. 8.	Close Nov. 1.
Clover—				
Dec.	$30.80	$30.00	$30.35	$30.00
Jan.	30.85	30.20	30.45	30.10
Feb.	31.00	30.30	30.60	30.25
March	30.85	30.15	30.35	30.00
Alsike—				
Cash	29.60	29.50	29.60	29.50

March	29.87	29.75	29.87	29.75
Timothy—				
Cash, old.	5.40	5.30	5.40	5.30
Cash, new	5.60	5.55	5.57	5.55
Dec.	5.65	5.60	5.62	5.62
March	5.77½	5.75	5.75	5.75
April	5.80	5.75	5.77	5.75

Kansas City Seed Market.

Kansas City, Nov. 8.—Private estimates on the Kansas alfalfa seed crop range from 25 per cent of normal down to 10 per cent. Small production was due to unfavorable weather conditions at different stages of the season and to the grasshopper invasion of the southwestern counties. Seed from the early cuttings was fine, but the later harvest shows stain and damage, resulting from rains. There is an urgent demand which cannot be satisfied. Prices continue strong, but without recent change.

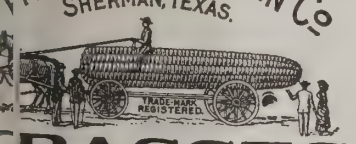
New crop millet seed is slow in moving. Some Colorado hog millet is coming to market, but dealers deny handling the choicer varieties thus far. Seed arriving was readily saleable to poultry feed manufacturers.

Interest in new crop cane seed is increasing, though no important movement is likely before December. A tentative price of $2 per cwt. was set this week.

Dealers say the offerings and supply of timothy seed are ample, and prices are about 50c lower. Clover seed is extremely scarce and very strong. Blue grass seed trade is over, except in a distributing way.

Following are the prices quoted for seeds arriving in Kansas City:

Alfalfa—Per cwt., $25@30.
Timothy—Per cwt., $9@10.
Blue grass—Per cwt., rough, $10@15; cleaned, $17@27.
Clover—per cwt., $35@45.
Millet—Per cwt., $2.25@3.25.
Sudan—Per cwt., $9@11.
Cane—Per cwt., nominally $2.



Weekly Linseed Review.

New York, Nov. 10.—*United Kingdom.*—There has been a fair trade in Plate seed in the United Kingdom during the past week, but the market is now easing slightly as buyers show a disposition to hold back. Demand from Continental sources has ruled fairly active.

Indian seed is practically unoffered in the United Kingdom market. Arrivals of seed at shipping ports in India were very small during the week, and shipments amount to only 48,000 bushels. Outlook for the new crop is

favorably maintained, as beneficial rains have been experienced in parts. However, more precipitation would not be unwelcome.

Trade in linseed oil in England during the week was rather quiet, but prices were heavy and a shilling lower on the week.

Argentine.—Recent heavy rains in sections will tend to delay cutting operations in the North to some extent, but new crop indications point to a liberal outturn. Markets have been advancing with shorts covering on the unfavorable weather and also stimulated by active buying by American and Continental interests.

The freight situation in the Argentine is very firm and boats are now scarce and rates high, especially for the distant positions. Cif offerings of both nearby and forward shipment to America are sharply higher.

GRASS SEED IMPORTS.

The following table prepared in the seed laboratory of the Bureau of Plant Industry shows the amount of the various kinds of forage plant seeds subject to the seed importation act permitted entry into the United States during the month of October, 1919, and during the four months ending Oct. 31, 1919, as compared with the corresponding periods in the previous year:

Kind of seed.	Oct., 1919. Lbs.	Oct., 1918. Lbs.	4 mos., 1919. Lbs.	4 mos., 1918. Lbs.
Alfalfa	1,092,700	54,700	4,003,700	76,700
Blue grass:				
Canada	25,200	7,800	219,100	56,500
Clover:				
Alsike	1,337,400	1,293,400	2,446,200	2,343,600
Crimson	478,000	66,000	4,550,200	220,100
Red	510,400	200	3,008,300	43,800
White	11,200	.....	11,200	.....
Clover mixtures:				
White and alsike	6,300	7,500	6,300	37,500
Red and alsike:	700	.....	700	.....
Millet: Broom corn	.....	.....	225,400	.....
Mixtures: Grass	.....	100	.....	100

Rye grass:				
English	47,400	115,300	181,800	305,900
Italian	26,400	2,600	104,800	18,300
Timothy	.....	1,100	3,200	41,500
Vetch:				
Hairy	26,300	20,300	76,300	187,400
Spring	4,300	21,400	149,100	21,400

SEED SITUATION.

NO ALFALFA SEED.

LOGAN, KAN.—There is an abundance of milo, millet and seed corn here, but the alfalfa seed crop was a failure, not a field of it in our territory.—*J. H. Bowman.*

ALSIKE NORMAL—TIMOTHY SHORT.

AURORA, ILL. (7).—There is no Medium Red Cloverseed in this vicinity. Alsike, although poor in quality, is about normal in quantity. Timothy is below normal by at least 35% in both quality and quantity.

We have had unprecedented receipts of sweet cloverseed—at least three times any previous year, the quality of which is excellent.

Demand for grass seed is only fair, due probably to high prices.

We look, however, for decided improvement in 30 days.—*Blair & Co.*

WELD CO., COLO., SEEDS CROPS.

GREELEY, COLO.—The crop of commercial beans in this county is very much reduced owing to short planting and a very dry summer. It will not be over 10 per cent of last season's.

Of the seed beans the acreage was likewise reduced, owing to drouth; so that the crop will not be over one-third of the estimated amount.

In other seeds, the acreage was practically nothing, except onion sets, which while grown in reduced amount are of the most excellent quality.

Our prospects for next season are good as we have had heavy fall rains and the mountains are white with snow, thus insuring water for irrigating.

We are now making contracts for next season for seed beans and expect to produce about 2,000,000 pounds, as this is the quantity which we can mill and handpick during the fall season, our plant having a capacity of 30,000 lbs. of handpicked beans per day.—*The Balcom Seed Co.*

NOW!! ARE YOU PREPARED?

To Meet This Man's Demand for Seed

Fall seeding is still going on and the wise seedsmen or seed dealer is now planning for spring trade. Tell us your requirements for spot or future delivery.

Small's Brands Sell Big

You have seen our former advertising and may have considered getting in touch with us before next season. Good! But next season's business is starting now—seed supplies and values are being determined; so, if you are to be the dealer in Small's seeds in your territory, make inquiries now.

Beans and Potatoes

It is reported from Boise, Idaho, that any potatoes remain undug in that ate and are probably frozen.

The state report of Michigan gives e average yield of beans as around . bus. per acre, compared with nine s. last year. Some early threshing turns show a yield as high as 15 bus. e crop matured early and a large rtion was gathered without rain, so at the quality is excellent.

The Michigan potato crop according the state coöperative reporting serv- showed some improvement during tober, but only 66 per cent of a full ld is expected representing a total oduction of 28,571,000 bus., which, wever, is a little better than a year o. The quality of the crop is gen- lly good and digging has begun in ne sections.

The merchantable crop of potatoes in nnesota this year is considerably be- v that of 1918, the crop in the south- and southwestern parts of the state ing been damaged by wet weather. e preliminary estimate of produc- is 26,883,000 bus., or about 6,000,000 . under a year ago. The quality of crop, however, is very good. The ld of field peas in the same state is er cent less than a year ago, while acreage is 13 per cent less.

he potato crop in Indiana, accord- to Field Agent Bryant, is very ir- ular. In many localities the crop a failure and the production of the e is only a little more than 4,000,000 , which is under the home consump- , so that many farmers will have buy potatoes for home use. The et potato crop was very good, but production light. Whites averaged 44 bus. this year, 33 bus. under the ear average. Sweet potatoes aver- l 105 bus. to the acre or six bus. e the 10-year average; total crop, 00 bus.

San Francisco—Salinas, $3; river, fcy., $2.25@2.85; rivers, ch., $2@2.25.

DELIBERATE DECEPTION.

Mr. Townley of the North Dakota Nonpartisan League is "wise as a serpent." He understands the political value of deception—a lie well stuck to. It is well illustrated in the case of the state-owned flour mill, recently put into operation under a law passed by the League. The state auditor reporting in October on the operation of the mill during the first month (26 days' work) shows a loss of $7,440, the expense being $39,512.52, including wages and salaries of the Industrial Commission, general managers, and income $23,079.32.

A newspaper at Valley City, N. D., perhaps one of those subsidized by license to print state, county and court advertising, says the mill was a "great success" in its first month: it paid the farmers a higher price for wheat, sold flour at a lower cost, and "made a profit that would amount to 150% per year on the investment, according to the report of Manager J. A. McGovern."

Now who is deceiving the people, the manager, the Valley City paper or the state auditor?

BARLEY MARKETS.

MILWAUKEE.—The local barley market ruled dull and easy throughout the week. Receipts are moderate with a fair demand for choice from industries and shippers, which is in light supply. Poorer qualities are quiet and slow, with an easy feeling. Receipts for the week were 131 cars, against 142 cars a week ago and 157 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.39@1.40; bright, $1.41@1.42; fair to good, 45 to 47 lb. test, $1.32@1.38; low, 41 to 44 lb. test, $1.28@1.36; 36@40 lbs., $1.22@1.28; feed, $1.20@1.28. Iowa quoted $1.25@1.39; for light to fancy: Wisconsin, $1.30@1.42; Minnesota, $1.25@1.38; Dakota, $1.25@1.38; feed and rejected, $1.20@1.28.

DULUTH.—More interest was shown in the barley market during the last week, but trading was on a small scale, as receipts were light, amounting to only 6 cars against 123 last year. As a result of broader Eastern inquiry, quotations were marked up 11c to 2 off, making the range stand at from $1.08 to $1.33.

BUFFALO.—Barley dealers are feeling much encouraged owing to some inquiry from maltsters. As a rule bids were 3c under asking prices. Maltsters talked bullish on the situation but appeared to be mainly interested in spot stuff. Hopes are entertained that malting was held at $1.46@1.54; new, $1.40@1.45. Feed barley, $1.30 to $1.38 something will develop next week. Old on track or in store.

KANSAS CITY.—The barley market held firm during most of the week, but showed some weakness late in sympathy with the easier tone of other grains. Barley has been relatively higher here than elsewhere, but, with the permit system of shipping off, receipts are likely to increase and a lower market is looked for. Buying here was on feeding orders and by local manufacturers of feed. No. 3 closed nominally at $1.25@1.26; No. 4 at $1.20@1.25. The week's receipts were 15 cars, against 19 a week ago and 47 a year ago. Stocks are 122,000 bus., against 128,000 last year.

PORTLAND.—The barley market is somewhat firmer and buyers and sellers seem to be getting together. The demand, however, is only fair and only small lots have been reported sold. However, the undertone is decidedly better, especially for the good qualities, and the *Commerial Review* says the dealers seem to have confidence in the future and are holding on to prices. Values of No. 3 blue quoted $65.50@66 and for feed $65@65.50.

SAN FRANCISCO.—Barley options are active and higher with the spot firmer. However, every advance in price seems to bring out an unexpectedly large supply of grain. It was supposed that about 90 per cent of the crop had already been sold, nevertheless, on every advance sellers are freeer than the offerings. The *Commercial Review* says the spot market is firming up and with quotations ranging from $3.07½@3.15 per cental.

CHICAGO.—The barley market was quiet and lifeless all week. After a Monday with a strong undertone, the market eased off materially and was very quiet during the rest of the week until Saturday, when there seemed to be some recovery. Receipts and offerings generally were light and both domestic and export demand very quiet. In fact, the export demand was almost nil and offerings received practically no attention whatever. On Saturday, however, the demand, especially for the malting varieties, was very much better than it had been for some time and the week closed strong. This condition was repeated on Monday when there was a good demand for all of the offerings which were light for the first day of the week and prices held firm. For the first time in some days there was a decidedly broader demand for the feed descriptions although the break in corn prevented any stiffening of prices on these varieties. Maltsters were fairly good buyers of desirable grain. Some exporters were also in the market but as their bids wer der the cheapest offerings for don consumption very little was sold. reported during the day were 15 malting barley at a range of $ 1.39 with the feed at $1.20@1.31 tures closed firmer. Decembe $1.36½; May at $1.33¼, which wa top. Exports for the week were 000 bus., compared with 41,000 b year ago.

RECEIPTS AND PRICES OF

Receipts of rye at the principa mary markets of the Central Wes the week ended Nov. 7, and fo corresponding week last year, as piled by the Minneapolis *Market ord* were:

Feedstuffs

The *Commercial Review* of Portland ports a better feeling in the mill feed arket on the Coast and a number of aders have modified their bearish ews. The demand, however, is not t either broad or active and the pres- re is not very strong but the under- ne is decidedly more encouraging.

Indiana Corn as Feed.

The feeding value of the corn crop Indiana this year is much greater an any produced in recent years, and of it matured without frost damage. n per cent of the crop was cut for ilage and there are about 7,000,000 shels of the 1918 crop still in the mers' hands.—*Field Agent Bryant.*

Rice Bran Steady.

T. Louis, Nov. 8.—There has been change in the rice bran situation ing this past week. The demand is adening as the relative cheapness of article is more and more recog- ed. Extensive sales for November oment were made on basis of $33 ton, sacks included, f. o. b. South- tern milling points. Contracts for erred shipment command a premium. *. & E. Neumond, Inc.*

New Alabama Millfeed Standards.

ASHVILLE, Tenn., Nov. 10.—Millfeed rests in the Southeast are greatly erned with regard to new stand- s that have just been promulgated the division of Food, Feed and gs of the Department of Agricul- of Alabama. These regulations me effective on November 1, and ers had no previous advices of r provisions. Millers who have shown these standards state that cannot comply with them, and they will have to retire from busi- in Alabama. The standards are follows (see Henry & Morrison's and Feeding, Seventeenth Edition, 643.):

	Water	Ash.	Crude protein.	Fiber.	Carnohydrates N-Free extracts.	Fat.	No. of analyses.
wheat midds	10.7	3.7	17.8	4.7	58.1	5.0	470
ard wheat midds. (shorts)	10.5	4.4	17.4	6.0	56.8	4.9	4,641

SHANTUNG PEANUT CROP

e to the lack of rains, the 1919 ut crop in the Shantung Province, a, is far below the average and predict the yield will be as low as 00 tons. In 1918 the production about 600,000 tons, while in 1917, o floods, the crop was but 200,000 Practically all shipments are from Tientsin, Shanghai, or tau.

Demand for Cottonseed Feed.

NSAS City, Nov. 8.—Feeders of as, Missouri, Nebraska and sur- ling states of the Middle West good buyers of cottonseed cake meal in Kansas City this week. offerings continued light, owing scarcity of seed stocks at crushing s in the cottton belts. Fertilizer facturers and export handlers dis- d a lack of interest in the market. s were little changed, with the 43 ent protein cake and meal around ton, Kansas City.

HOG FEEDING GAME.

In October at the meeting at Ames, Iowa, to hear the partial results of feeding experiments with hogs, conducted by John M. Evvard, President Pearson among other things said: "Don't be misled by the signs of the moment. I don't believe that the farmers who run precipitably because the market is down will benefit themselves or the industry as a whole. The raising of hogs must be placed on a business basis and conducted as such for a period of years."

Dean C. F. Curtiss, of the agricultural division, on the subject, "Looking Ahead," in part said: "If I could predict the future of the swine industry, I could make a million dollars. The men who are engineering the swine industry are patriotic. When the call came for greater pork production during the war, there was a greater response than anticipated.

"We are now going through the period of reconstruction. The price of agricultural products must decline before the cost of production will decline. What the causes are for the present decline in hog prices cannot be fully explained, but I believe the farmers are going to continue to raise hogs. Farmers represent the only industry that met the full requirements of the Government during the war period. We have produced a surplus number of hogs that have been marketed during the past six weeks at a loss. If the war had continued, as we had reason to believe that it would, there would have been a demand for pork products.

"The farmer will not curtail production to lower the prices of food. The small crop of pigs at the present time, with the possibilities of a reduced number marketed this winter and spring, will cause a curtailment during the transition period, but I do not believe that we are going to change our feeding plans. If cattle and hogs were not at the top of farm products Iowa would not hold her present time position in the agricultural world.

"We are living on $300 and $400 land. Such high-priced land years ago seemed visionary. If you want a home on a farm keep your land in the face of present prices. The more it advances the more you can afford to keep it. We must put our profit back into the land. The man on $500 land is much different from the man who farmed $100 land. He must use better methods and better machinery and introduce more economical standards into his rations.

"Pork products are staple products and we can demand a reasonably good market as long as there is a market for anything."

C. I. Newlin of the Clinton Sugar Refining Co. of Clinton, Iowa, read a paper, in which he told how the germ of corn is removed in the making of starch. This germ is then ground, the oil pressed out and the cake is ground into feed. It is a fine flavored product of high feeding value. Before the war it was exported, as the livestock men of the old countries would pay $5 to $10 more per ton than could be gotten here.

R. W. Chapin, president of Chapin & Co., Chicago, said he was present to learn, so that any changes necessary in the feeds could be made.

J. W. Anderson of the Corn Products Refining Co. of Chicago said he was pleased with the results of the test, and told how his line of feeds are made. One of the problems, he said, in feeding was to get at the real facts, as the physical unfitness of the hogs often upset the "dope."

C. M. Hidding of the Quaker Oats Co. of Cedar Rapids, Iowa, told how Schumacker feeders were made. The germ of grains is used extensively, as it cannot be left in cereals for human foods, as it will make them rancid. These germs are the richest part of the feed and make ideal animal feeds. He called attention to the fact that the

"dope" in these tests was made at a time when hogs were low-priced and grains were high.

The test is only partially run through, the hogs being held to reach 235 lbs. average.

Broomhall cabled Nov. 8 that offerings of Plate corn in the United Kingdom are being made at 65 shillings per quarter, which is the maximum price; demand from feeders continues active. American mixed meeting with improved inquiry with prices generally considered too high.

FEED SITUATION.

FEED DEMAND LIMITED.

BUTLER, PA. (1).—The demand for feeding stuffs has been very limited in this section, due to the fact that the pastures are still in fairly good condition and farmers are not stocking up on account of the high prices of Western feeds. Large corn and buckwheat crops were raised in this neighborhood, but unfortunately much of this grain is still in the fields because of unfavorable weather for harvesting during the past several weeks. Much of the buckwheat is very damp and in some cases has sprouted. This grain will be fit to feed on the farms only and will not be in a condition for shipping. It is reported that some of the corn is sprouting in the shocks, due to the excessive wet weather.

Dealers seem to be well supplied with feeds and hesitate to make other purchases until they can reduce their present stocks. Bran is very plentiful, due to the light demand.—*H. J. Klingler & Co., per Paul E. Eisler, Mgr.*

THE FEED MARKET.

BALTIMORE.

Baltimore, Nov. 8.—The tone of the spot feed situation is firm with a fair demand in a jobbing way for bran and middlings, and first hand offerings not burdensome. Quotations follow: Western middlings, per ton, in 100 lb. sacks, $48@49; Western spring wheat bran, per ton, in 100 lb. sacks, $43.50@44; city mills' winter bran, per ton, in 100 lb. sacks, $48; brown middlings, per ton, in 100 lb. sacks, $52; white middlings, per ton, in 100 lb. sacks, $65.
FEED

BUFFALO.

Buffalo, Nov. 8.—The feed situation here is very quiet. Pasturage good and the first fall of snow this week did not keep the cattle in.

PHILADELPHIA.

Philadelphia, Nov. 8.—The market for feedstuffs is strong under a better demand and moderate offerings, with prices mostly a shade higher, except middlings, which are dull but firmly held. There are also numerous inquiries for feedstuffs for future shipment. Quotations are for carlots in 100 lb. sacks to arrive at cost per ton: Winter bran, $44.50@45.50; spring bran, $44.50@45.50; standard wheat middlings, $48@49; flour middlings, $57.50@58.50; red dog, $68@69; shorts, $48@49; low grade flour, $67@68; rye middlings, $49@50; fine yellow hominy, $62@63; fine white hominy, $64@65; reground oats feed, $27.50@28.50; cotton seed meal, 36% protein, $79@80; cotton seed meal, 41% protein, $82@83; cotton seed feed, 20% protein, $64@65.

BOSTON

Boston, Nov. 8.—Wheat feeds were quoted generally lower than last week with the exception of oat hulls and second clear. The following prices were quoted at the closing: Bran, spring, sacked, $43.75@44.75 per ton; bran, winter, sacked, $44@46; middlings, sacked, $49@60; mixed feed, sacked, $49.50@56; gluten feed, sacked, $70.12; red dog, sacked, $69.50; second clear, sacked, $69.50; stock feed, sacked, $59; oat hulls, reground, sacked, $28.50; hominy feed, sacked, $60.90; cottonseed meal, sacked, $79.50@84. Receipts for the week ending Nov. 8 were 55 tons.

LOUISVILLE, KY.

Louisville, Ky., Nov. 8.—The feed demand is excellent, there being a steady call for millfeed as well as manufactured feeds, while prices are being well maintained.

Principal quotations are: Bran, carlots, sacked and packed, Louisville, $42.50 a ton; middlings, brown, $51; gray, $55; mixed feed, $48.

NASHVILLE.

Nashville, Tenn., Nov. 10.—Wheat bran was a shade stronger last week with fair demand. Middlings and shorts continued quiet. Other feeds were in fair demand. Prices: Soft wheat bran, 100-lb. bags, per ton, $43.70; standard middlings, $58.50; horse and mule feed, $45@59; dairy feed, $56@67; hog feed, $62; poultry feed, $65@70.

MONTREAL.

Montreal, Nov. 7.—The market is steady under a good inquiry. Straight cars of bran are quoted at $45 per ton, and shorts at $52, including bags. Buyers are expecting lower prices and are only buying from hand to mouth. Corn feed is steady and sales are reported at $70@73 per ton, moullie at $65@66, and pure barley feed at $65@66, and dairy feed $48@50 per ton including bags delivered. It has just been reported that a car of bran was sold at $50.—Trade Bulletin.

CINCINNATI.

Cincinnati, Nov. 8.—The feed market was fairly active during the past week and prices for most kinds well maintained to an advance of $1 per ton for bran, $1.50 for standard middlings, and $2 for hominy feed in 100-lb. sacks. Closing quotations, representing 100-lb. sacks, were: Bran, $42@42.50; mixed feed, soft, $47@47.50; mixed feed, hard, $46.50@47; brown shorts, $48@48.50; gray middlings, $52.50@53; standard fine middlings, $48@48.50; hominy feed, $58@59.

CLEVELAND.

Cleveland, O., Nov. 8.—In the feed market we find an increase in prices along almost the entire line in comparing quotations of this week with those of ten days ago. Flour middlings on Nov. 6, carlots, f. o. b. Cleveland, in sacks, $75.50 per ton; standard middlings, $74.75; winter bran, $44; spring bran, $43; mixed feed, $48; hominy, $61; oil meal, $80; 36% cottonseed meal, $78.50; gluten, $68.68; hog meal, $71.68.

DES MOINES, IA.

Des Moines, Nov. 8.—The feed market is steadier but the demand still limited, however, it is showing some improvement and cold weather will start a better movement. Bran quoted at $35; middlings, $41@42. The feeders are going very slow in stocking oil meal and cottonseed meal on account of present advances.

ST. LOUIS.

St. Louis, Mo., Nov. 8.—The feed market is firmer and more active with a good demand for bran and an improved demand for shorts. Quotations are as follows: Bran, hard, $39.50; soft, $40@41; middlings, gray, $52@54; brown, $48@49; mixed feed, $44@45; red dog, $63@64; white hominy feed, $56@57; barley feed, $53@54; whole ground, $57@58; oat feed, $22.50@23; alfalfa meal, choice, $39@40; No. 1, $38@39; No. 2, $33@34 per ton, in 100-lb. sacks.

NEW ORLEANS, LA.

New Orleans, La., Nov. 8.—Bran offerings have been freely absorbed, and while mills are not offering resellers throughout the country are able and willing to discount millers' prices. Quote bran at $2.15 per hundred, tagged, delivered New Orleans; brown shorts at $2.90, and gray at $3. Some mills asking more money.

MILWAUKEE.

Milwaukee, Wis., Nov. 8.—The local mill feed market displayed a slight weakness the early part of the week and prices showed a small drop, but values were quickly regained and established a firmer tone. The shortage of shipping facilities is greatly handicapping the mill feed market inasmuch as little stock can be moved. Business generally is of fair proportions. Middlings are firm and prices unchanged. Bran is selling well. Current quotations are: Bran, per ton, $40; standard middlings, $44.50@45; flour middlings, $52@53; red dog, $63.50@64.50; hominy feed, $57; rye feed, $42.50@43; old process oil meal, $76.50; cottonseed meal, $76@83; brewers' dried grains, $60; gluten feed, $66, all in 100-lb. sacks.

TOLEDO.

Toledo, Nov. 8.—Demand for bra middlings has subsided, millers say the recent soft weather making goo ture. A cold spell is needed now t out the demand. Flour output has s decreased, with mills working only cent of capacity at present. Bran, in 100-lb. bags $38.50 bulk; mid $54.50, in 100-lb. bags; $49.50 bulk; feed, best grades, $68.50; corn an chop, $58.50; cracked yellow cor dairy feed, $66 per ton, carlots, f Toledo.

DULUTH.

Duluth, Nov. 8.—Quotations in fee unchanged and the market was du ing the week. Dealers are apprel on the score of declines coming abo they are buying from hand to Stocks in the hands of the mills an ers are limited. Prices per ton follows: Bran, $39.50; ground oats, No. 1 ground feed, $52.50; No. 2,

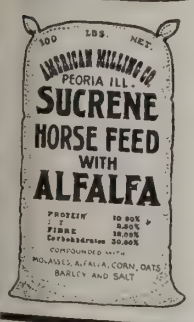
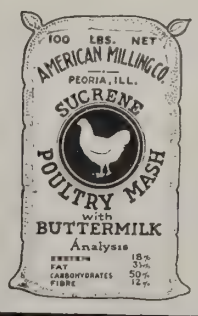
Above All Others

Hold your leadership in the feed business with the recognized Standard Sucrene Line. The long standing reputation of these feeds for result producing quality is firmly established. Feeders of live stock and poultry will not be satisfied with "substitutes."

Co-operation Gets the Business Sucrene Quality Holds It



With the completion of our new mill in the near future—the greatest and most modern exclusive feed mill in America—we will be able to take better care of the trade than ever before, with quality feeds at money making prices.

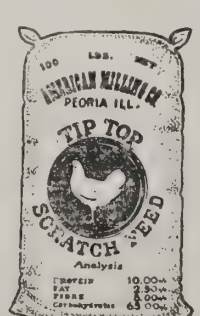


Orders for the complete line of Sucrene Poultry Scratch Feeds are solicited and will be promptly filled. Address main office.

AMERICAN MILLING COMPANY

MAIN OFFICE AND MILLS: PEORIA, ILLINOIS

SOUTHERN MILL: OWENSBORO, KY.



No. 3, $50.50; shorts, $44.50; flour middlings, $55; coarse corn meal, $55; red dog, $64; Boston mixed, $46; cracked corn, $55; rye feed, $40.

NEW YORK.

New York, Nov. 8.—The feed market throughout the week presented a firmer tone owing largely to smaller offerings through second hands. The demand was not active, however, and buyers seemed disposed to limit operations to their actual needs, as they appeared to have little faith in prevailing quotations.

City bran was quoted at $40@44; middlings, $54, and red dog, $69, while Western spring bran was quoted $44.50; middlings $50, and red dog $69.

MEMPHIS, TENN.

Memphis, Nov. 8.—Activity in mill feeds continues light, for demand is scattered and only for immediate requirements. The mixed feed manufacturers are getting only limited demand now but are counting on it being heavy later so they are buying all they can now for future delivery. Alfalfa meal is reported in good demand but offerings very light. Wheat bran jumped a couple of dollars a ton during the past two or three days and delivery first half this month was offered at $44 today. For cash gray shorts $54.25 was asked, while November delivery was $51.50 bid and $53 asked.

Trading in cottonseed meal has picked up a little and prices have advanced some. Spot meal today was quoted at $71.50. The holders are still very independent about selling and future deliveries are higher than immediate, reflecting the expected scarcity of good quality seed, the result of so much bad weather.

PITTSBURGH.

Pittsburgh, Nov. 8.—There has been very little change in the local feed situation during the last week, with a total of 540 tons being received as compared with 180 tons a years ago. Prices are still high and demand is light. About 10 cars of middlings and 2 cars of bran were included in last week's shipments. Mixed feeds and special brands are more popular with the local trade and the range of price is between $35 and $60 a ton.

Beet Pulp Feed.

Dried beet pulp as a feed has received deserved attention in this paper, noting its physical properties and the good results in stock feeding. Special interest this year centers on the possible increased production of dried beet pulp in view of the high price of sugar and the consequent refining of every pound of beets that it is possible to produce in our Western States. It has impressed us as one of the most interesting details of feed manufacture to consider the increasing attention given the by-products of the sugar refineries and of the starch mills, the canneries and allied industries in human foods for the stock feeding values. It is no longer permissible to discard by-products and commercial feed manufacturers are credited with work of much importance in the preliminary tests and commercial application of these by-products to a long list of stock feeds that are now proving their value without question to dairymen, hog, sheep, horse and mule feeders.

An Edinburgh seed firm writes C. A. King & Co. that the British crop of red clover is below normal and that very little has been so far threshed. It will probably not come on the market before January or February. The same authority reports that France and Italy have small crops and Chile only an average crop which has already been sold. Russia, a former large producer, is of course out of the market.

Rice Bean Prices.

The New Orleans market on rice bran was quoted Nov. 8 at $36.50 per ton f. o. b. that market. There was a fair demand reported for prompt shipments and good demand for last of November shipments, with still a heavier demand for December and forward. The big feeders evidently realize that at the present day prices rice bran if it can be secured for shipment 30, 60 or 90 days would be a safe buy as this bran should command because of its higher content of protein and fat a really better price than wheat bran and it is not going far amiss to say that rice bran at this moment is the cheapest buy on the market per unit of protein and fat considered.

In this connection it might be useful for buyers to note that rice bran quotations wherever made are on the basis of f. o. b. New Orleans. To obtain the price at any other point it is simply necessary to add the freight differential between the point of quotation and New Orleans. For instance southwestern Louisiana brand quoted at $34 means the equivalent of $37 New Orleans.

New York Oats Market.

The strike of the bituminous coal miners is being felt to the extent that the coaling of foreign steamers at New York is prohibited, and if continued will work hardships not only here but abroad also. There was a renewed demand for export oats and a liberal quantity sold for loading during the current month. The effect on the spot market, so far, has been negligible. Its influence, though, may be felt at a later date when the sellers are called upon to fill their contracts. Local trade was unusually dull, and the prevailing weakness of corn has, no doubt, deterred dealers from entering the market. There should be an improvement in the consumptive demand shortly, sufficient to remove surplus offerings, as stocks in dealers' hands are not believed to be large. The immediate action of the market, however, will doubtless be governed by that of corn.—*L. W. Forbell & Co., New York.*

Buckwheat.

Indiana buckwheat shows a total production of about 264,000 bus., which is about an average yield. The state, however, is not noted especially as a buckwheat state.

Field Agent Kirk of Minnesota reports the yield of buckwheat in that state as 19 bus. per acre, the approximate total being 209,000 bus., against 255,000 bus. a year ago.

NO CORN BORER IN OHIO.

The state entomologist of the Ohio Experiment Station at Wooster reports that so far as known the European corn borer has not yet been found in Ohio. Some specimens of an insect found in July near Ravenna thought to be the European borer have since been identified as a relative of that beast, but a comparatively harmless insect.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Nov. 8:

DRAVER BROS.

RICHMOND - - - INDIA

Alfalfa Department

Four crops of alfalfa are reported t certain farms near East Leavenworth, Mo.

The Clinton Alfalfa Mill Co. of Clinon, Okla., has increased its capital to 60,000.

Daily requirements of butter in Paris re said to be 80,000 lbs., which in norıal times has come in part from Siəria and in part from Normandy.

The importation of condensed milk ıto Italy is still under control of the ɔvernment and may not be handled ırough private firms. The annual ɔrmal import by Italy is 1,000,000 lbs., ostly from Switzerland.

The American Consul at London reɔrts that evaporated milk is not in ırticular favor in the United Kingdom ving to its lack of keeping qualities ter the container has been opened. owever, owing to the very serious ortage of natural milk in the Kingm, a good trade may be expected for me time yet. The retail price of new lk has been fixed by the Food Conɔller at 24c a quart for the winter nths.

ronger Demand for Alfalfa Meal.

KANSAS CITY, Nov. 8.—A moderate to ɔd demand prevailed for alfalfa meal Kansas City this week. Inquiries re numerous, doubtless the result of advancing tendency of the hay rket, but it was particularly noticee that only few inquiries resulted in ual business. Orders came from the ıtral States, the South and South-t, with the East still lagging. Busis was mostly for November shipat. Only one important sale for de-ed shipment was reported, that of arge lot of Colorado No. 1 at $38 a in old bags, basis Kansas City, shipment up to March, 1920.

espite the advance in alfalfa, prices e unchanged, though firm. Choice t around $39@40, sacked, per ton, s Kansas City; No. 1, $36.50@38; 2, $32@32.50; brown, $30@31.

ixed feed manufacturers shared a erate trade in alfalfa mixed feeds. siderable mixed feed is reported g sold to hog producers, even in ions where large crops of corn e produced. Little demand prevailed n the East. Strength and advancprices for other feeds was a stimuig influence. The market was unged, as follows: No. 1 alfalfa moıs feed, $40@42; No. 2, $37@39; n, $35@37; alfalfa grain molasses $42@52.

Alfalfa Buyers Cautious.

onsumers of alfalfa are not buyin large lots," emphasized C. D. sle of the Carlisle Commission Co., as City. "Often at this period of year buyers accumulate stocks of a not alone for their current rements but generally for their contive needs for the entire winter ell. This might be expected again season, owing to the serious shortof cars in the country, generally orable transportation situation nrest of labor. Instead of taking lots, buyers are allowing their s to reach a low point before reing the market for supplies. The et for alfalfa is at a high level, eeders, as well as the large mixnterests, are more or less unwillo accumulate hay for their later ements, being more inclined to a cautious buying policy. Of , some large lots of hay are beold to individual consuming in-, but this is unusual on the whole. g in small lots is true of practiall feed markets at the present which may be attributed to the that values must work down as lt of the changed position of liveprices."

Alfalfa Is Substitute for Grain.

The true value of alfalfa as a substitute for grains was very strongly brought out by the cow-testing association records obtained by the Dairy Division of the United States Department of Agriculture. The records from six associations where alfalfa formed a large part of the dairy ration were compared with the records from eight associations where alfalfa was fed sparingly.

In the alfalfa district the cost of grain was 16 per cent of the total feed cost, and in the other district the cost of grain was 41 per cent of the total feed cost. The average milk yield of the alfalfa-fed cows was 6,805 pounds and the average yield of butter fat was 281 pounds. In the other district the average milk yield was 5,234 pounds and the average yield of butter fat was 238 pounds. For the alfalfa-fed cows the average income over cost of feed was $73 and for the grain-fed cows the average income over cost of feed was approximately $37.—*Mealology.*

Contracting Alfalfa Meal.

Mealology, published by the Denver Alfalfa Milling & Products Co., Lamar, Colo., says: "Regarding grades, our contention is that alfalfa millers should never use the trade term 'Bright Green,' as during the greater part of the milling season it is impossible to produce a bright green meal. Meal should be described as Choice Green Alfalfa Meal; Good No. 1 Meal; Good Colorado No. 2; or Good Kansas No. 2, and thus avoid a great deal of misunderstanding and trouble between miller and mixer. We have no patience with the miller who is so far out of touch with his field, or else so eager for speculative profits, that he contracts to deliver a certain tonnage of No. 1, only to discover later that his available hay tonnage is of a lower grade. The safe and sane alfalfa miller contracts a certain per cent of his output of each of the different grades, Choice, No. 1 and No. 2. If the alfalfa miller tells the mixer that he does not manufacture any No. 2, it does not indicate that his hay is all green, but it is a clear admission that he is throwing all of his No. 2 and off-grade hay into his No. 1 product, which is a very dangerous practice, both from the standpoint of the miller as well as the mixer."

THE KAFIR CROP.

The Government preliminary report Nov. 1, on kafir 123,343 bus., compared to 6,396 bus. Dec., 1918, estimate sets at rest all doubt regarding the enormity of the crop, at least as far as official figures may go and objectors to them have but small backing in such opinion. As a matter of fact and because the trade to which THE PRICE CURRENT-GRAIN REPORTER appeals is much interested as handlers and manufacturers of kafirs, we give special attention to reports on the growing crop. In the very start this year we published "No doubt exists that the yield in Kansas, Oklahoma and Texas will make a record aggregate, and that very little is subject to frost damage." As the weeks progress we reiterated such statements, calling our trade's attention to the fact that the terminal market receipts were not a criterion of the actual kafir business being transacted because liberal quantities were sold direct on through shipments to Central and Eastern poultry feed trade.

We offer the suggestion that the dependable character of our news and the manner in which PRICE CURRENT-GRAIN REPORTER correspondence is secured is proving more and more to be a safe line on production, marketing and manufacturing business in feedstuffs.

BROOM CORN.

The field situation nas snown a decided improvement during the past week, owing to better weather, which afforded growers an opportunity to get the corn baled as well as to harvest their kafir and milo. Reports from western Colorado to the *Broom Corn Review* state that only about one quarter of the crop has been baled owing to attention given to other crops. In southern Oklahoma and Lindsay districts, however, the buyers think that only a small percentage of the crops still remain in producers' hands. Prices do not show any material change, ranging from $100 to $200 according to district and quality. The Wichita market has been rather quiet. The undertone generally, however, is firm. Prices show a range from $130@300 with some damaged stock as low as $110@120. In central Illinois the crop is estimated to be 80@85 per cent bought and quality of corn still left is rather below the average of the season's offerings. A few sales were made last week at around $300 for the bulk but a few sales ran as high as $320@325. It is difficult, however, to get anything worth while at less than $300.

Algerian farmers are complaining that France is importing wheat of poor quality from Argentina and leaving enormous quantities of better wheat in store at Algeria, where, in fact, the wheat is going to waste. A local authority in Algeria says: "We could revictual France cheaper and in one-third of the time. If boats can be found to go to Argentina, why can't they be found to cross the Mediterranean? is the question sensible people ask themselves."

Hog Sense Makes Dollars For Dealers

No feed dealer can afford to be without a protein feed. Hog instinct demands it as part of the ration. Experienced breeders always feed it. It is in demand in every experimental station. Any hog knows that

Standard Digester Tankage

Ask Your County Agent

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Live Stock Exchange Bldg., Louisville, Ky.

Hay Department

Montana stockmen are buying hay in North Dakota at $23 per ton on board.

Pastures in Macon and adjacent counties in Missouri are reported as never better at this season.

Beaver County, Okla., is reported to have plenty of good hay and straw. Very little, however, has been put into shape for shipment thus far.

Morgan County, Mo., reports plenty of hay, but not of very good quality, owing to admixture of weeds. Very little hay will be shipped out of that county.

Wheat fields in the Missouri River Valley are reported green, making good pasture; in addition to which there has been until at least very recently ample bluegrass pasture.

Shelby County, Ia., reports a wonderful crop of hay this season, but farmers are rather indifferent as to making sales. It has also been found difficult to get cars for shipments.

Toberman, Mackey & Co. report a strong demand in the St. Louis market for high-grade timothy and clover mixed and strongly advise shippers to keep the low-grade stuff at home.

The prairie hay crop in Okmulgee County, Okla., is reported very heavy last season and harvested in fine shape. There is plenty of other rough feed, so that considerable shipments may be expected.

Clover hay is reported almost a failure in Warren County, Ill., and only a fair crop of other qualities. There is some high-grade timothy to be found in that neighborhood, but prevailing prices are pretty high on the farms.

Hay barns of S. A. Scott at West Point, Miss., were recently burned at a loss of $9,000, with insurance of $5,000. Plans have been made already for the erection of a modern warehouse to take its place. Two units of the plant will be completed for handling next season's crop.

The British Board of Trade intimates the possibilities of a serious shortage of hay in the Kingdom and orders have been issued for monthly returns to be made by persons buying hay from British farmers and by importers except that hay fed to work horses on the farms need not be reported.

Stockmen from Bucklin, Kans., in the western part of the state, report volunteer wheat as plentiful and supplying a fine pasturage at $2.50 per head per month. Much the same report comes from the neighborhood of Liberal. Fields are reported generally as green in the Republican Valley in the western part of Nebraska.

Kansas City hay buyers traveling through Kansas report farmers as extravagant as to their notions of hay values, stock being held at prices almost impossible for dealers to look at, and little of it can be bought at a price that makes it safe to ship in.. The hay, however, is generally of a high grade and very desirable if it could be handled.

The state agent in marketing work in the Nebraska College of Agriculture reports plenty of hay in the stack in Nebraska. He has already listed between 25,000 and 30,000 tons ready for market. Most of this hay is quoted at less than $10 a ton in the stack. Some Holt County hay is offered as low as $6. A great many cattle have been shipped in from New Mexico and Arizona for winter feeding.

SHORTAGE IN HAY WEIGHTS.

Q.: About July 1 we shipped a car of hay from Kansas City, Mo., to Atlanta, Ga. The car arrived at that point and the official unloading certificate which consignee surrendered us with his account sales shows that the car arrived there with only one seal on one side and we figure the shortage about 5,600 lbs. of hay from this car. We immediately filed claim with the carrier and they contend the consignee advised them that this car was full to the roof with hay when it was opened for unloading. We furnished the railroads with a sworn itemized statement of the loading weight and also the official unloading certificate which we received from the consignee. Is there some Interstate Commerce Commission ruling to the effect that the railroads shall show the discrepancy in the loading or unloading affidavits or that the car traveled from origin to destination under continous seal before declining claim?

Answer: In General Order No. 57A, the United States Railroad Administration promulgated certain rules governing the disposition of claims for loss and damage of grain, and Rule 8(a) provides that "if, after thorough investigation by the carrier, no defect in equipment of seal record is discovered, such record shall be accepted as prima facie evidence that the carrier has delivered all of the grain that was loaded into the car." At common law, the carrier is liable for any actual loss of goods caused by it while in transit. If a difference in weight results from actual loss of the goods so caused by it, the carrier must pay the claim for such loss. The Interstate Commerce Commission said, "In the Matter of Bills of Lading," 52 I. C. C. 694, that "the burden of proof to show what is the correct weight should depend, in a measure at least, upon which of the parties, carrier or shipper, is responsible for the accuracy of the weights. Section 21 of the Pomerene Bill of Lading Act in part provides that "where the shipper of bulk freight installs and maintains adequate facilities for weighing such freight, and the same are available to the carrier, then the carrier upon written request of such shipper and when given a reasonable opportunity so to do, shall ascertain the kind and quantity of bulk freight within a reasonable time after such written request, and the carrier shall not in such cases insert in the bill of lading the words "shipper's weight" or other words of like purport, and if so inserted contrary to the provisions of this section said words shall be treated as null and void and as if not inserted therein."—*Traffic World.*

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

C. P. Martin, formerly in charge of the Kansas City office of the hay and feed reporting service of the Bureau of Markets, has joined Toberman, Mackey & Co. here, as manager of the shipping department. Until recently the organization has specialized in receiving and handling consignments of hay, but under Mr. Martin's management the company will develop a shipping trade. Mr. Martin is widely known in the forage industry of the United States, not particularly by his work in connection with the hay and feed reporting service of the Department of Agriculture, but in his former private connections with the hay trade. He has devoted the past fourteen years to various branches of the forage business, mostly in the Southwest and West. He entered the Government work at the time the hay and feed service was started, first being in charge of an office at Denver and later in Kansas City. He made a good record in this work.

"Tame hay is selling at a wide and abnormal discount under alfalfa," declared J. C. Glover of J. C. Glover & Co., in discussing the comparative position of hay prices on the Kansas City market. "Best alfalfa is selling as much as $10 a ton over the best g of timothy, while normally the mium on alfalfa is about $6 a Despite the wide premium preva timothy hay still is compara weak, and while some students trade have anticipated a deman timothy as a substitute for alfalfa is not developing. An importan tor in the weakness of the tam market in Kansas City is the la good quality offerings. The ti produced in the Central States much higher average quality tha of the territory contributing t Kansas City supply. Also, the C States, which produced a compara large crop of timothy, can unde Kansas City, thus restricting, ten rily at least, a demand for the tam harvested in the districts near market. Some demand prevail timothy from the Southeast, but is moving directly eastward."

Whether the action of the grai trol committee of Kansas City moving all restrictions agains movement of grain to this marke affect the hay trade remains to be For many weeks the volume of loadings for Kansas City has bee ited. Now, with no limitations, dealers wonder if railroads wil criminate more against hay. The been an inadequate supply of ca both wheat and hay, as well as fo er commodities, but it is believe the restrictions on wheat shipme Kansas City have helped some sh to obtain cars for hay. Another esting feature of the car situat the fact that bankers of the Sout who are seriously affected by th ure of the Railroad Administrat supply sufficient equipment, are esting themselves in railroad tions. Millions of dollars of loan been made by the Southwest bec has been unable to sell wheat a intended for markets many week Bankers, however, have thus far no concerted action to improve t situation. Their influence, ho should be helpful.

A new record price, $1,500, wa the past week for a membership Kansas City Hay Dealers' Asso by the Fitzgerald Hay Co., whi been admitted to membership in ganization. The Fitzgerald Hay cludes S. B. and E. A. Fitzgeral is located at 202 Boston Bldg purchase of the membership at t record figure certainly attests growth and position of the Kans hay market. Charter members association recall when the m ships were sold at considerab than $100. The fact that they a at a record figure is evidence o

dence in the future of the hay business and in the volume of trade to be handled by Kansas City in particular.

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

Receipts light, market firm, steady on all grades of hay and alfalfa.

Big trouble nowadays in car shortage. Railroads say no relief for some time.

Corn is certainly selling strong now, but hog prices have worked up to profitable feeding standpoint.

Dyer & Co. are apparently working the alfalfa territory hard. They are all "go-getters" all the time.

F. P. Brown of the E. A. Knapp Co. back at his desk. He has been suffering with tonsilitis for several days.

The Omaha Hay Co. has two new and salesmen out now. Their warehouse stocks are not surpassed in this vicinity.

Lots of sheep and catttle going to the feeders this week. Nebraska and the feeders bringing in Wyoming and Montana sheep.

Demand for hay, particularly alfalfa, broadening. Tremendous crops to be, but cars and labor prevent shipping in quantity enough to break the market.

THE HAY SITUATION.

LOCAL HAY—WOULD BUY ALFALFA.

ENDOVAL, ILL. (6).—There is more good and bad, in our vicinity than year and more stock to consume than last year. There is some No. 1 good No. 2 timothy to go to market but the farmers are holding for high a price on it for the buyer to at the present time market prices. would like to buy a few cars of clover or alfalfa hay for dairy use, but do not know where to to sell at a price to meet their tations as to prices; so you can here is a difference in selling and g.—*H. R. Hall, Inc.*

SHIPPER OF HAY NOW A BUYER.

ESTO, CALIF.—The hay situation ry unusual in the San Joaquin . We are usually large shippers h grain and alfalfa hay, but this we are shipping in from other to supply our local demands. have no grain hay because the d wheat crops were all cut for We have not enough alfalfa hay e the irrigation water was short r crop is therefore light. This, r with the tremendous increase dairy stock, makes it necessary to ship in this year.—*The Grange ny, by Henry G. Turner, Pres.*

HAY MOVEMENT SLOW.

N, NEBR. (7).—The hay crop in inity last season was about the s the year before; that is, we out two-thirds of a crop. But miles west of us they had a full has not been a great deal of ved out of this section so far ar on account of the car situa- the price. Cars have not been entiful this year and there has great deal of delay in the move- the hay on account of the rail- The farmers are not willing to ir hay for less than $15 net to d most of them are holding for prices.—*Watson Hay Co., per I. on.*

PLUGGING HAY AT CHICAGO.

It is an old story which nevertheless bears repetition in the hay department of THE PRICE CURRENT-GRAIN REPORTER—the advantages of the plugging system for hay inspection. This paper has approved it for years and in the departmental service and through the coöperation of our paid correspondents in markets where the plugging system is used, we have urged its advantages continuously. The details of the plugging system with its favorable impression on country hay shippers, hay buyers and feed dealers is the prime reason for now reviving any further discussion of its necessity and importance in the great hay consuming and distributing market of Chicago.

About a year ago discussion relative to the adoption of the hay plugging system came to focus; and the Chicago Board of Trade, which had never failed to recognize its advantages but had been up against serious obstacles in applying the plugging system, thought they had it well started. The railroads were at that time, however, not prepared to carry out the necessary plans incident to the brick paving of plugging yards and the installation of sufficient scales in the various hay receiving points in the Chicago district; and the plan fell through. Now, however, the Chicago hay receivers are determined to let nothing prevent its adoption; and to that end have appointed a committee, with John H. Devlin as chairman, assisted by Geo. A. Bridge and C. F. Van Wie, to conduct the preliminary investigations, and to carry through the plan in its entirety. This contemplates discontinuing the sampling and selling of hay in downtown yards, centralizing such work in outlying yards, expediting the unloading of cars of hay, thus releasing such equipment a week or more earlier than possible under the present system.

Every metropolitan city, with hundreds of feed dealers, has the same need of the hay plugging system as Chicago, in order to show the commission house receiving the hay and making the sale to the feed dealer exactly what is in the car, the number of bales of particularly good hay, the number of medium and those of perhaps very little value. Feed dealers who must travel long distances for their hay quite naturally are pleased to know whether it will need one or several weeks to find what they want and just what they want; and this is only possible under the plugging system of inspection. Similar advantages apply in the sale of hay in carlots to outside buyers, for under the plugging system the Chicago shipper knows exactly the value of the contents and is thus able to fill the buyer's orders exactly, shipping only high-class dairy hay when such is demanded or more definitely furnishing the character of hay desired than was ever possible under the old-style systems of inspection.

We have detailed this most important step in the progress of the Chicago hay trade somewhat at length, although it repeats much that our readers are entirely acquainted with. It is the opinion of THE PRICE CURRENT-GRAIN REPORTER that the present move is unquestionably the most important ever undertaken in the annals of the history of the Chicago hay business.

Hay Markets

MONTREAL.

Nov. 7.—The local market remains quiet but firm. No. 2 timothy is quoted at $23@24, at which figures some business has been put through, and No. 3 timothy and clover mixed have changed hands at $21@22 per ton on track. No. 2 hay has been shipped across the line, costing $21 per ton f. o. b. country points. Inquiries are still received from England, but dealers say the freight rate is too high to admit of any extensive shipments. Only one small lot has been shipped from this port and only one or two lots from Boston and New York.—Trade Bulletin.

NASHVILLE.

Nov. 10.—Hay is quiet. Prices: No. 1 timothy, $33; No. 2 timothy, $31; No. 1 clover, $32; No. 2 clover, $30; alfalfa, $36@38. Receipts of hay at Nashville last week totaled 19 cars.

LOUISVILLE, KY.

Nov. 8.—The hay market is not especially active at the present time, as out of town buyers are fairly well loaded up, and continued open weather is resulting in light feeding. Receipts are fair but demand is light as a whole. Straw is in fair demand with receipts light, due to low prices, which are not attracting the farmer.

Quotations are: No. 1 timothy, baled, carlots, $29.50 a ton; No. 2, $28; No. 1 mixed, $28; No. 2, $26.50; No. 1 clover, $32; No. 2, $30. Straw—$10 for wheat and oat, $13 for rye.

MEMPHIS.

Nov. 8.—Hay is very scarce and firm and both buyer and seller disposed to sit by and wait. There is almost no demand and will not be until pastures are gone. Alfalfa offers are lighter than other varieties and prices are practically nominal. No. 3 alfalfa sold Friday at $30 a ton, while $31 was bid for No. 2 today, $34 for standard and $37 for No. 1, without any offers. No. 1 clover mixed sold at $30. For No. 2 and no grade timothy $27 was asked. Car scarcity is believed to be one cause for the light movement but it makes little difference now to the local trade as they have small storage space and demand is poor.

BUFFALO.

Nov. 8.—The market seems to be quite firm under continued light offerings and a fair trade. No. 1 is quoted at $27@28; No. 2, $25@26 on track. Straw $13 per ton baled on track and little obtainable.

CLEVELAND.

Nov. 8.—Very little change in hay prices recently. There is a good demand in this market for good quality hay and considering the season of the year a reasonable movement has been experienced. No. 1 timothy, carlots, f. o. b. Cleveland, on Nov. 6 was quoted at $28; standard timothy, $27@27.50; No. 2 timothy, $26; No. 1 mixed, $27.50; No. 1 rye straw, $11.50; No. 1 oat and wheat straw, $11. These straw prices are a half dollar higher than at any previous time this summer or fall.

ST. PAUL-MINNEAPOLIS.

Nov. 7.—Quote hay prices for the Twin Cities as follows:

	St. Paul.	Minneapolis.
No. 1 timothy	$24.00	$24.50@25.00
No. 2	23.00	23.00@24.00
No. 3	18.00	18.00@20.00
No. 1 clover mixed	22.50	20.00@21.00
No. 2	20.00	17.00@19.00
No. 1 clover	21.00	22.00@23.00
No. 2	19.00	21.00@22.00
No. 1 mixed, different grasses	23.00	22.00@24.00
No. 2	21.00	19.50@21.50
No. 3	15.00	16.00@19.00
No. 1 mixed, timothy and wild	22.50	22.00@24.00
No. 2	21.00	19.50@21.50
No. 3	17.00	16.00@19.00
No. 1 upland	24.00	23.00@24.00
No. 2	23.50	22.00@23.00
No. 3	18.00	18.00@20.00
Sample prairie	12.00	.....
No. 1 midland	18.00	17.00@19.50
No. 2	15.00	14.50@16.00
Sample midland	12.00	.....
Packing	11.00	9.50@11.50
No. 1 rye straw	11.00	10.50@11.00
No. 1 oat straw	12.00	11.00@11.50
No. 1 wheat straw	10.00	10.00@11.00
No. 1 alfalfa	32.00	.....
Standard alfalfa	31.00	.....
No. 2 alfalfa	30.00	.....
No. 3 alfalfa	22.00	.....

ST. JOSEPH, MO.

Nov. 8.—Hay receipts for the past week have been very light with urgent demand for alfalfa, prairie and clover hay. The market is strong on good grades with an advance of $1 on both alfalfa and prairie and $2 on clover. With grain prices on a lower level, it seems that these hay prices should appeal to shippers as there is no apparent indication that would warrant a stronger market in the near future. Railroads advise that more cars will be available from now on and taking this and other conditions into consideration lower prices ought to prevail soon. Probably the most important influence in the present strong tone of the hay market is principally due to the acute car shortage. Nominal quotations follow: Prairie—Choice, $21.50@22; No. 1, $20@21; No. 2, $18.50@19.50; No. 3, $15@17. Midland—No. 1, $14@15; No. 2, $12@13. Alfalfa—Choice, $33@33.50; No. 1, $31.50@32.50; standard, $29@31; No. 2, $24.50@28; No. 3, $20@24. Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23. Clover light mixed—No. 1, $25@26; No. 2, $20@22. Clover—No. 1, $25@26; No. 2, $20@23. Straw, $9.50@10.

BALTIMORE.

Nov. 8.—There is a firm tone to the market for the better grades of timothy mixed and No. 1 clover hay and no surplus of such grades in the receipts from day to day, but of common, low grade, and sample hay there is an ample quantity on sale

and the movement of the poorer grades is very sluggish.

Straw of all descriptions is in ample supply and selling sparingly. Prices unchanged on straw from last report. We quote, per ton: Timothy—No. 1, $31.50; standard, $30.50@31; No. 2, $30@30.50; No. 3, $25@27. Light clover mixed—No. 1, $29.50@30.50. No. 2, $27@28. Clover mixed—No. 1, $27.50@28; No. 2, $25@27. Clover, nominal—No. 1, $27; No. 2, $25; sample hay, $20@22. Straw—No. 1 straight rye, $17@18; No. 1 tangled rye, $14@14.50; No. 1 wheat, $12@13; No. 1 oat, $14@15.

PHILADELPHIA.

Nov. 10.—Hay is in fair request and desirable qualities are firm under light supplies. There is so little No. 1 timothy here that offerings of this description would command a premium of one to two dollars per ton over quotations. Straw is in fair demand and the market is firm and higher under light receipts.

Timothy hay—No. 1, $32; No. 2, $28@30; No. 3, $24@27. Clover mixed hay—Light mixed, $28@30; No. 1 mixed, $26@27. Straw—No. 1 straight rye, $14.50@15; No. 2, $13@13.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat straw, $13.50@14; No. 2, $12.50@13; No. 1 oat straw, $14.50@15; No. 2, $12.50@13.

NEW YORK.

Nov. 7.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	3,953	520
Receipts last week	3,840	390
Receipts Sept. 1 to date	41,210	3,230
Receipts same time last year	54,041	3,030

Market has moved along in about the same general position with very little change in values. There is no snap to the demand though hay has moved out about as fast as unloaded at steady prices, and at the close the general tone is about steady on most grades inclining a little in buyers' favor on the small baled hay. The lifting of the N. Y. C. embargo caused some increase in loadings though new invoices are generally running light and will show further decrease soon, as the embargo is again in effect. Country prices continue relatively high, shippers finding little profit at current quotations here, and the whole future course of the market is very uncertain. One river barge arrived last Monday and another boat is due on Saturday. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$35.00@36.00	$34.00@
No. 2 hay	32.00@34.00	31.00@32.00
No. 3 hay	29.00@31.00	28.00@30.00
Shipping hay	27.00@29.00	26.00@28.00
Fancy light clover mixed hay	33.00@34.00	32.00@33.00
No. 1 clover mixed	30.00@32.00	29.00@31.00
No. 2 clover mixed	27.00@29.00	25.00@27.00
No. 1 rye straw	14.50@15.00	.....
No. 1 oat straw	@15.00	.....

Effective Nov. 4, the Lehigh Valley Ry. removed embargo from their Pier 66, N. Y station.

Effective Nov. 5, the N. Y. C. placed an embargo on hay intended for delivery at 33rd St., 36th St., 60th St., 130th St., Melrose Junction, Port Morris, Claremont Park and Inwood stations.

KANSAS CITY.

Nov. 8.—Sales of alfalfa hay up to $36 a ton established a new record for the crop year on the Kansas City market this week. Advances on the better grades of alfalfa amounted to $1 a ton, though some sales are doubtless $2 to $3 a ton higher than the figures paid for corresponding grades last week. The cheaper grades of prairie advanced 50c to $2 a ton, while unchanged prices were paid for better quality offerings. Tame hay continued easy, which dealers ascribe to the poor quality of timothy produced in surrounding territory compared with the yields of the central states. That section also is underquoting Kansas City prices, thus restricting the demand here. Stock yards were good buyers of prairie and some feeding demand has developed. Straw was unchanged. Receipts amounted to 859 cars, compared with 851 last week and 652 a year ago.

Prairie—Choice, $21.50@22; No. 1, $20@21; No. 2, $18@19.50; No. 3, $14@17.50; packing hay, $9@10.

Midland prairie—No. 1, $13.50@15; No. 2, $8.50@13.

Alfalfa—Choice, $34@34.50; No. 1, $32.50@33.50; standard, $29@32; No. 2, $24.50@28.50; No. 3, $20@24.

Timothy—No. 1, $25.50@26; standard, $23@25; No. 2, $21@23; No. 3, $16@20.50.

Clover mixed—Light, $25@26; No. 1, $23.50@24.50; No. 2, $17@23.

Clover—No. 1, $24@26; No. 2, $15@23.50.

Straw, $10@10.50.

CINCINNATI.

Nov. 11.—Local hay trading was only moderately active the past week, but prices held steady for timothy to a shade higher for mixed and clover mainly due to the lighter movement. The demand was almost entirely of a local character as the shipping business was unimproved and continued to show the effects of the relatively higher prices prevailing here, which are likely to be further enhanced by the holding attitude of farmers for higher prices. Complaints of shippers to make purchases on a profitable basis are becoming more frequent. More favorable weather conditions than experienced last week will, however, probably increase the movement, and lower temperatures the demand.

Saturday the market ruled firmer and higher. Only 23 cars were offered on the plug tracks, and 18 cars reported in the terminals at the close of trading. Total for the week, 121 cars.

Timothy—No. 1, $29.25@29.75; standard, $28.75@29.25; No. 2, $28@28.50; No. 3, $24@27; threshed, $15@17.50. Light clover mixed, $28.75@29.25. Clover mixed—No. 1, $28@28.50; No. 2, $25.50@27.50. Clover—No. 1, $32@32.50; No. 2, $28@30; sample, grassy, $19@22. Alfalfa—No. 1 Western, $36@37; No. 1 local, $32@34; standard, $31@32; No. 2, $30@31. Straw—Wheat, $11@12; rye, $12@13; oat, $11@12.

NEW ORLEANS.

Nov. 8.—Hay receipts light and demand fair. Quote No. 1 from $33@34, No. 2 from $31@32, and No. 3 at $30.

TOLEDO.

Nov. 8.—The coal miners' strike, resulting in a shortage of cars, and feeling on the part of buyers that they will be unable to get supplies later on, has brought about an excellent demand for hay of all grades. Wet weather and bad roads has hampered movement and receipts are light. Dealers say a continued scarcity of cars will mean still higher prices. All grades were up $2 this week. No. 1 timothy, $27; No. 2, $25.50; No. 1 light mixed, $26; No. 1 clover, $28.50, basis Toledo rate point.

DULUTH.

Nov. 8.—The market in hay may be described as steady. While demand has picked up recently on account of dairymen being compelled to take in cattle from pasturages owing to colder weather and snow, receipts were on a more liberal scale during the week. Supplies in dealers' hands are consequently ample to cover all requirements. The hay being marketed from the country is of good quality on the average. Quotations per ton follow: Timothy—No. 1, $24@25; No. 2, $22@23. Mixed timothy—No. 1, $23@24; No. 2, $16@20. Prairie—No. 1, $22@23; No. 2, $20@21; No. 3, $15@16. Midland—No. 1, $15@16; No. 2, $10@12. Straw—Rye, $9@10; oat, $9@10.

DETROIT.

Nov. 8.—Receipts of timothy have been running fairly liberal but consumers are able to take care of all offerings and a steady market is quoted. There is not much doing in the shipping line as Detroit prices are pretty high. The market is not well supplied with clover and higher prices are bid in order to attract offerings. Quote: No. 1 timothy, $58.50@59; light mixed and standard, $57.50@58; No. 2 timothy, $56.50@57; No. 3 timothy, $23@25; No. 1 mixed, $26.50@27; No. 1 clover, $26.50@27.

MILWAUKEE.

Nov. 8.—Although receipts of hay at the local market have been exceptionally light for this period of the year, they have been sufficient to fill the comparatively moderate demand. The prolonged advantages of out-of-door feeding kept the local hay market quite inactive. No. 2 timothy is quoted $1 lower on inside price, while other prices are holding steady. Current quotations are: Choice timothy, $27.50@28; No. 1, $27@27.50; No. 2, $24@26; No. 1 clover, $22@23; light clover mixed, $24@24.50; red top and timothy mixed, $2[illegible]24.50; marsh feeding, $14@15; packing, $10.50@11.50; rye straw, $10.50@11; oat straw, $10@11.

DES MOINES, IA.

Nov. 8.—Receipts of hay during the last few days have been light, especially on choice alfalfa and the better grades of timothy with an excellent demand. Quotations unchanged as follows: Choice green alfalfa, $32@33; timothy, No. 1, $24@25; standard, $23@24; prairie, No. 1, $20@21; No. 2, $18@19; straw, $8@9.

ST. LOUIS.

Nov. 8.—The receipts of hay are light and consist mainly of common and clover mixed hay.

Timothy hay continues to rule firm with an active local demand for the better grades, also a good shipping demand for the medium grades. The market is well cleaned up of all desirable hay and a healthy condition exists. The prospects are that with the approach of colder weather the demand will increase and with no prospect of any increase in receipts higher prices will undoubtedly rule. Hay that is weedy, stained or damaged is neglected as the trade wants a good straight clean hay.

Light clover mixed hay continues to rule firm with an active local and shipping inquiry for all sound grades. Conditions warrant steady if not higher prices.

Heavy clover mixed hay continues to rule scarce and wanted. There is an unsupplied demand for good heavy clover mixed containing at least one-half clover, which is readily snapped up on arrival.

Pure clover hay continues in scant offerings and excellent local demand. Owing to the scarcity of alfalfa, the trade is anxiously looking for clover hay and all sound grades are readily salable.

Alfalfa hay continues scarce and wanted, receipts are exceedingly light and demand urgent for the offerings which are readily taken on arrival at outside figures.

Prairie hay market steady, offerings of prairie light and demand right good for the better grades. Medium grades steady.

Straw scare and wanted.

Track sales: Timothy—No. 1, $31@33; standard, $29@30; No. 2, $24@28; No. 3, $22@23; threshed, $14@16. Light clover mixed—No. 1, $28@29; No. 2, $24@27. Heavy clover mixed—No. 1, $27@28; No. 2, $25@26. Clover hay—No. 1, $31@32; No. 2, $29@30. Alfalfa hay—Choice, $36@37; No. 1, $34@35; standard, $32@33; No. 2, $30@31. Prairie hay—Choice, $26@27; No. 1, $24@25; standard, $22@23; No. 2, $19@20. Straw, $9.50@10.

OMAHA.

Nov. 7.—Receipts light on both prairie hay and alfalfa, while the demand continues good, causing the market to remain firm and steady with no change in prices. Oat and wheat straw steady.

Upland prairie—No. 1, $22@23; No. 2, $17@20; No. 3, $13@16. Midland prairie—No. 1, $21@22; No. 2, $17@20. Lowland prairie—No. 1, $16@17; No. 2, $12@14; No. 3, $9@10. Alfalfa—Choice, $31@32; No. 1, $29@30; standard, $26@28; No. 2, $23@24; No. 3, $18@20. Straw—Oat, $9@11; wheat, $8@10.

BOSTON.

Nov. 8.—Moderate receipts of hay during the past week causes the market to hold firm. While there is no great activity reported in the demand, receivers state that there is a better feeling apparent towards the best grades with the result that receivers generally are holding at $1@2 per ton advance over last week. Offerings of top grades are very light and the market is especially firm on these grades. Bad roads at shipping points and a comparatively low market in this city has tended to shorten shipments to this market and receivers report less invoices of hay to arrive. Considerable hay from Canada is still arriving out of condition, being more or less caked on account of having been previously heated and afterwards

is unchanged.

We quote wholesale prices in carload lots: Fancy wheat hay (light 5-wire bales), $21@23; No. 1 wheat or wheat and oat hay, $18@22; No. 2 wheat or wheat and oat hay, $17@19; choice tame oat hay, $20 @23; other tame oat hay, $17@20; wild oat hay, $16@19; barley hay, $16@20; alfalfa hay, $18@23; stock hay, $13@16; No. 1 barley straw, 50@80c bale.

PITTSBURGH, PA.

Nov. 8.—Receipts of hay were somewhat in excess of the last previous period with a total for the week of 2,652 tons. A year ago receipts were 2,738 tons. Some concern was felt here as to what the strike might do in connection with deliveries but so far the railroads have not fallen down in that respect. Farmers are not free sellers at this time and cars are hard to get. For that reason arrivals are hardly up to normal. Demand, however, is light and No. 1 timothy has been dull and neglected. Enough good clover mixed is coming into market to bring No. 1 timothy and No. 1 clover mixed together as to value per net ton. Good green clover is still wanted and No. 2 timothy is not hard to place, while the poorer sorts of hay are not accepted except at some concessions in price. Quotations follow: No. 1 timothy, $28.50@29; standard, $27.50@28; No. 2 timothy, $26.50@27; No. 1 light clover mixed, $27.50@28; No. 1 clover mixed, $29@29.50. No. 2 clover mixed, $25@26; No. 1 clover, $30@31.50; No. 2 clover, $25@28.

HAY CROP LIGHT

EVANSVILLE, IND.—The hay crop in this locality was rather light. During the time of cutting clover we had too much rain and consequently is of a very poor quality. No. 1 timothy is selling at $30, but the farmers are holding in the anticipation that prices will be higher later on.

Clover and alfalfa are scarce, but the demand is light.

The extreme high water has covered the bottom lands along the Ohio and Wabash Rivers and thousands of acres of corn will be lost.—*John A. Hartman.*

The State Live Stock Commission of Montana says there were 1,200,000 cattle on the farms this year of which only about 200,000 have been shipped up to the middle of October.

The first car of new corn this season arrived in Minneapolis on Oct. 25 from Clara City, Minn., and was sold to Albert Dickinson & Co., at $1.35 per bu. The corn graded No. 4 yellow.

France during the seven months, January-July, imported 5,484,000 qrs. of wheat, compared with 5,317,239 the previous year. The French harvest this year is considerably below that of a year ago and very much below that of 1914.

LEAKING CARS AT MILWAUKEE.

Statistics compiled by the weighing department of the Chamber of Commerce show that during the first three weeks of October 24 per cent of all grain cars received at Milwaukee were found to be in a leaking condition on arrival. This is the same percentage as were found leaking during the months of August and September, but is an increase of 5 per cent over the four previous months.—*Doings in Grain in Milwaukee.*

Visible Supply of Wheat.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Nov. 10.—Prices moved within a fair range and closing trades were at losses of 17½c on pork, 10c on October lard, while January gained 3½c and January ribs lost 7½c for the week. In the same time hogs were up 85c to $1.

Trading in provisions was of fair volume from a speculative standpoint with a good advance, followed by a reaction. The strength in hog and corn values was the basis for considerable buying, mainly by shorts and on the bulge realizing sales by speculators, combined with liberal sales by local and western packers, carried prices down, the close being well toward the inside of the week. Cash trade on the whole was better for meats, particularly short ribs 50 and 60 lb. averages being taken toward the last at better prices. There was also more business in bellies and fat backs and shipments for the week made a good showing of lard and meats aggregating over 40,000,000 lbs., exceeding last year's. Of lard, however, there was a decrease of nearly 3,000,000 lbs. from last year. Germany wants lard and meats, as also do a number of the other countries, and they are willing to pay high prices for delivery running from 30 to 90 days and beyond. This is a speculative class of buying and the sellers are taking great chances regarding the high prices offered as commensurate for them. The more conservative operators say they would prefer to sell January delivery rather than the foreigners, as they know exactly what their position will be all the time, while with the uncertainty regarding foreign exchange and other conditions they do not know what to do at times.

Packers were good sellers of lard on all the hard spots. The make, while large, is not up to that of a few weeks ago, as then the backs and bellies were being tanked, which is unusual at this time of the year, and it has been the theory of some of the oldest and most successful packers that under such conditions lard values are out of line and it is generally profitable to make sales of futures until there is better alignment. An improved demand for backs and bellies has prevented less tanking, but there is plenty of lard being made. Shipments last week were 12,513,000 lbs., compared with 15,358,000 lbs. last year.

Supplies of hogs were larger, owing to the advanced price, the top being $15.45 made Saturday, and indications are that the advance will increase the movement from the country. With the strike of laborers at the seaboard well toward adjustment and foreign traffic getting into near normal channels, prospects are of a liberal export movement. The strike of the soft coal miners is a depressing factor in consumption in case it lasts any length of time, but the indications are that the shutdown will be brief. There is a movement under way in the Board of Trade directory to prevent trading in mess pork for future delivery. Very little pork of the speculative grade is being made and stocks are small, which makes the market easily manipulated by the packers, and the action of the October in the closing days of the month showed how easy it is for any of the large packers to control it and squeeze the shorts at the end of a delivery. Many years ago pork was an active speculative commodity, the public selling it short and buying it at times on a large scale, but of late years interest in it has been small and most of those who have sold it short have lost heavily.

Kansas City Provision Review.

KANSAS CITY, Nov. 8.—Further advances in hog prices stimulated the market for provision products in Kansas City this week. Domestic demand improved considerably, packers reporting a liberal movement of fresh pork to the East. Prices advanced again, closing as much as 1½c higher for the week. Fancy loins were up about 1¼c, with other better grades of fresh pork about 1c higher and the cheaper grades generally ¾c up. Local demand for fresh pork was good. A moderate demand prevailed from the South for dry salt and heavy smoked meats, with prices up about 1c to 1½c compared with the close last week. Demand continued strong for lard and lard products. Fancy hams and bacons also shared in the improved tone of the market, closing with gains of more than 1c. A better export trade was reported.

Stocks of provision products in Kansas City amount to 44,494,700 lbs., compared with 53,930,100 lbs. on October 1, and 46,101,400 on November 1, a year ago.

Summary of Live Stock Markets.

Hogs advanced and closed at the best of the week the two at twelve leading markets was $16.35, Wednesday at Buffalo. Highest prices in leading markets for the week as compiled by the *Daily Drovers Journal*, follow:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.

Live Stock Marke

CHICAGO LIVE STOC

CHICAGO, Nov. 10.—Hog price on the up-grade last week and at the highest since Oct. 13. A $16.45 was made for choic butchers that day, showing an a of 85c for the week. The avera urday was $15.10, or $1.00 high a week ago and for the week o was $1.40 over the previous week pared with $17.85 last year and two years ago.

The upturn on prices was due recent sharp decline and shutt in receipts and a disposition part of packers to take hold mo ly, and the top showed an adv almost $2.50 from the low point t dle of October. The advance the week indicated that farme be more disposed to sell again other drop of fair proportions sult. Light hogs were in better at the close and roasting pigs $17, the offerings of the latte light. Bulk of sales at the clo $14.85 to $15.30, with few packi selling under $15. Quality of t was good with a moderate pr of packing hogs in the daily Average weight for the week lbs., against 230 the previous w 231 last year, while the nine erage was 209 lbs.

Packers' purchases of hogs week were 147,000, against 127,0 the previous week and 195,000 l Armour interest took 30,900; S 100; Morris, 12,000, and Wilson

Arrivals at Chicago for th were 163,499 hogs against 130 previous week and 205,458 la At the twenty markets the 608,500, against 471,000 the week and 808,700 last year.

A feature of the hog market West was that they have more proportionately of late th the Eastern, and while the Ea mand here early in the week w it became small later, and th between poor and best hogs he last had narrowed to $1.05.

Cattle prices did better la with all kinds selling higher plies lighter. Fancy heavy s which the supply was light an tition from Eastern buyers k up to $19.80, the highest si May. Fat yearlings also bro same price, a new record f Sales of steers above $19 were every day of the week. Price better grades were 25 to 50c l the last, with others better week's low time, short fed ste up 75c. Average of beef steer week, $15.50, against $15.80 vious week and $14.40 last ye mon and medium grades were lower for the week. The r $8 to $17 except for the fanc many fair killing steers brir to $15. Most of the short grassers sold at the last arou $15.50 for 950 to 1,200 lb. weig

Western cattle were mostly er for the week with 1,200 to averages; $12.50 to $13 and $11.50 for the greater part of There were 300 car loads c Canadian steers here that sold to $10.00, with poor, thin st able for canning that brought $7.00. Arrivals of Westerns 000, against 33,500 the previ and 21,000 last year, and th them are now said to be in.

Butchers' stock average low for the best. Few cows w enough to do better than many fleshy grass stock at $8.50. Fat heavy heifers sc $13. Veal calves closed at t the week at $18 to $18.50 for

Feeders east of Chicago v buyers of feeds, bringing $1 erage for the week was $9.5 $9.65 the previous week and

August. Arrivals here, 92,068, gainst 103,437 the previous week and ,559 last year.

Fat lambs closed 25c lower with bulk native best natives $14 to $14.75. ost of western fed lots were common. verage for the week $14.40 against 4.60 the previous week and $15.36 st year. Sheep prices were little anged with an average of $7.60, or 5c der the previous weeks and compared th $10 last year.

Estimated arrivals at Chicago this ek: Cattle, 85,000; hogs, 180,000; eep, 130,000. Arrivals last year: Cat- 76,255; hogs, 210,202; sheep, 120,-

Heavy horses are selling well, but hter grades are slow sale. Good les sold readily, the best bringing 0; drafters, $225 to $300; farm nks, $100 to $125. General purpose ses, $100 to $125.

Kansas City Livestock Market.

Sanders Sosland, Correspondent.

ansas City, Nov. 8.—Somewhat more fidence as to the position of the hog rket developed in Kansas City this k as a result of another sharp upturn quotations. Sales were made today up 15.60, a rise of as much as $1.45 per dredweight over a week ago and as h as $3.20 over the low point of the month. Cattle, on the other hand, e irregular and uncertain this week so as the market action is concerned, e sheep and lambs were mostly lower. tive competition between order buy- and packers resulted in a bullish mar- for hogs in the face of an increase in pts. There was still evidence of the of cars and nervousness among ship- in the action of hogs. Packers were e buyers, but the trade was not with- rratic price changes. Average cost of es for the week was figured at $14.86, st $13.55 the preceding week. Iowa Illinois continued heavy buyers of hogs, and sales were made up to 5.

ile the receipts of hogs showed an ase, the run of cattle fell off. How- it was plain that as many cattle l have arrived as in the preceding if cars had been available. New o, usually a heavy shipper at this n, complained bitterly of a lack of and equipment was short elsewhere e Southwest. The best load of cattle ed brought $17.40. General quality plain. The best fed cattle were un- ed, while other classes were weak to wer. Kansas grassers sold largely at 2. Some cake-fed steers from grass ht $14.75. Choice range cows were d up to $10.75, while canners were to $5. There was complaint of a tion in the demand for stockers and s on account of industrial unrest and n account of the tightness of money e Southwest. It is said this has ed buying by some farmers who d to obtain credit in financing their ions.

he sheep trade the market was weak. s closed with a top of $14.25 after early up to $15.15. Lambs closed $1 lower for the week, and sheep 25c down. Receipts increased. ruled between $6 and $8. Feeding were in good demand, closing at 13.

Omaha Livestock Market.

uce McCullough, Correspondent.

ha, Nov. 8.—The run of cattle held ly well this week, totaling 56,000, as 61,000 last week and 51,000 a year Belated Western grass cattle made big bulk of the receipts and the tion of corn-fed steers was much than for the week previous as well h poorer in point of quality. Trend es inclined downward from start sh, the short fed and warmed up showing a 50@75c decline and n rangers selling off 25@40c. No long fed steers are coming but ould sell readily at $15@17 or better. good short fed steers are selling $12@13, with common to fair kinds 0@11.50 and on down. Choice to Western range beeves sold this t $12@14, the fair to good grades rgely at $10.50@11.50 and the com- kinds including Mexicans and Tex- $7.50@9.50.

ess in stockers and feeders has seasonably liberal proportions and he best grades selling up around 12.50 have held steady the fair to nds at $9.50@11.50 show about a line for the week with commoner at $7.50@9 showing a 25@50c de- Stock cows and heifers as well as alves have sold off more or less for k but demand is still broad, cows fers going at $5.50@8, and calves @10.

the influence of continued mod- upply of hogs the demand has d and prices have advanced an- t or more. The shipping outlet to be improving while local pack- taking hold more freely than for he past so that supplies have been ned up every day at the advanc- res. Choice butcher weight and gs sell at the top of the list and eavy packers at the bottom but the spread in values appears to be steadily narrowing down. With only about 3,500 hogs Saturday and market was 10@15c higher, tops going at $15.25 as against $14.30 on last Saturday and the bulk at $14.75@15.25 as against $13.85@14.15 one week ago.

With very moderate supply of sheep and lambs the market has held substantially steady throughout the week, the advances and declines being within very narrow ranges. Values at the close are in much the same notch as they were a week ago.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Nov. 8.—Our cattle this week was not quite as heavy as the previous week but was little above the corresponding week of last year. The market opened on a strong active basis and on really good cattle maintained this tone for the entire week. Nothing choice or prime was offered for sale but we had one string of three cars of heavy Missouri fed beeves which were good enough to bring $18.50, the week's top. Medium cattle of which there was a superabundance and common and light cattle were not much sought after and the trade in these grades was slow and unevenly lower. There is a good demand for feeders and some of the best ones went to scale this week as high as $12.60. They of course carried considerable weight.

The hog market was characterized by active trading and higher prices. We are receiving a great many medium weight and light hogs but as the supply is not over-abundant they have all been taken at good prices. The market is 60@75c higher than the close of last week. The week's closing quotations are: Mixed and butchers, $15@15.60; good heavys, $15.40@15.60; rough, $12@13.25; light, $15.25@15.60; pigs, $14.50@15.50; bulk, $15.25@15.55.

The sheep and lamb market was more or less slow and draggy all week. This is a sort of in-between season for lambs and the consequence is we are not receiving enough of them that could be called good to choice. There are too many of the warmed-up kind. The market is right at 50c lower for the week. The one class of bovine stock which seems to hold to a steady basis is fat mutton sheep. There are not enough of them coming in and they find prompt sale at fully steady prices.

Oklahoma Livestock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Nov. 8.—Cattle receipts so far this week have been very light, in fact, too light to run the packing houses full time and they were compelled to draw supplies from other markets. Not our market alone, but the majority of other markets are also showing a decline in receipts of cattle and hogs. The few steers that came at the fore part of the week sold from $8.60@10.50, which was pretty steady. The few receipts do not seem reasonable to cattlemen here, considering the good prices and fills cattle are carrying here at our market. The few sales of steers offered this week met with a ready sale and are considered strong and as much as 25c higher. Common to fair grades, 900 to 950 lbs., sold from $9.25@9.50. The close of the market shows packers more anxious to get cattle and the market is closing from 25@40c higher.

The beginning of the week she-stuff consisted largely of jackpots, which sold with a lot of snap. Receipts on calves have been light and many more could be used at these prevailing strong prices. They are considered stronger. Stockers and feeders have also been scarce and good quality threes averaging around 825 lbs. are selling at $9.10.

Hogs are coming back to a better level in price, $15.20 was paid for top which price has not been seen here in several weeks. Compared to last week's prices they are $1.50 a cwt. higher.

Denver Cattle Market.

Denver, Colo., Nov. 7.—Receipts of cattle Monday of this week reached the grand total of 12,000 head, and the gratifying feature was that the market for all desirable grades held active and strong. More good cattle in fat and stock and feeding classes could be used. Plain and common classes are hard to sell, but only slightly lower. Range of prices: Feeders, $7@11.30; stockers, $6.75@9; killers, $7@9.10.

Canadian Livestock.

Montreal, Nov. 8.—The embargo which was in order the previous week was lifted on the sixth day, Saturday, so that last week's receipts of livestock came in with good volume. With the removal of restrictions, however, warning was sent out to shippers to hold back shipments to some degree at first for it had been rumored that very heavy shipments were awaiting transportation. Selects ruled $15.50 for hogs that were fed and watered and no change in price was noted throughout the week. Choice butcher steers were quotable $10@11.25 although one sale was recorded at $12. There was one lot of heavy steers at this market which will be exported to Belgium.

The directors of the Farmers Grain Dealers' Ass'n of Illinois have selected Peoria as the place for the national meeting which will be held on Feb. 10, 11 and 12.

Movement of Hogs.

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at your command at most reasonable rates.

Hotel La Salle

Chicago s Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person — *Per day*
Room with detached bath, $2, $2.50 and $3
Room with private bath, $3, $3.50, $4 and $5

Two persons — *Per day*
Room with detached bath, $3, $3.50 and $4
Room with private bath—
Double room — $5 to $8
Single room with double bed, $4, $4.50 and $5

Two Connecting Rooms with Bath
Two persons — $5 to $8
Three persons — $6 to $9
Four persons — $7 to $12

1026 rooms—834 with private bath

—Well, the only reason we know there is a typesetter (or lino-erator) who insists on putting "s" on every word that ought have one; and no proofreader of uaintance has the nerve to stop urselves have tried to do it so e are beginning to get too fa- to keep up a hopeless struggle uracy with a man determined illy to pluralize everything—even the Almighty.—EDITOR.

n Webster County, Nebr.

Current-Grain Reporter: I have elevator here and all that is as we hardly ever ship any corn is all fed here and more. It gone over last spring at an ex- f $1,700 and is in good condi-

wheat here made about 15 bus. d 3 grades and about 80% has market with very little yet to hed. Corn is a light crop, about but of good quality. I am $1.15 at present. I have been ess here thirty-two years but do k I will stay that much longer. *s Hunter, Inavale, Nebr.*

Foreign Department.

Current-Grain Reporter: I do l to inform you that I consider per the best posted on American , and no other papers covering in field come up to it in this

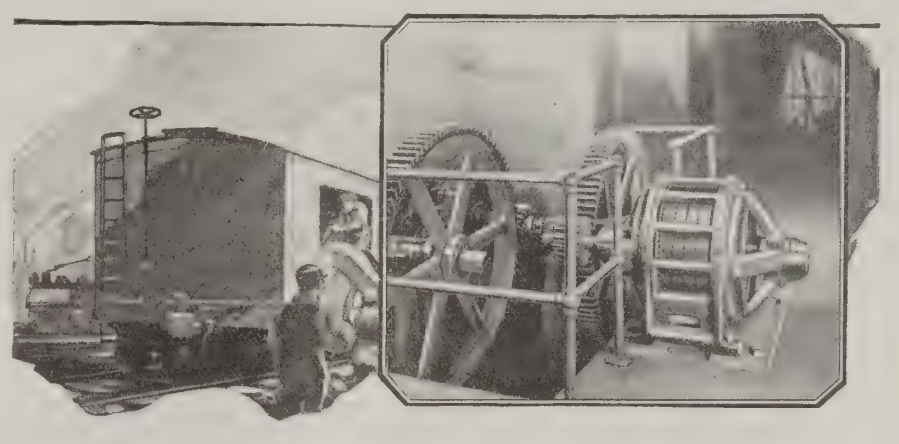
ver, I think you could make a provement by creating a "For- partment," under which all for- p reports and live stock news e gathered, as I think the for- in and live stock situation will considerable bearing upon the n markets in future and to be ted in this respect will be nec- f one is to make a correct fore- future prices. rain crop of this country, which ently been harvested, is some- ove the average; and inasmuch number of farm animals, and especially swine, has been greatly reduced during the war, owing to the impossibility of securing any coarse grains and oil cakes from abroad, the amount of corn, oats and oil cakes that will be imported into this country for the coming year is likely to be very small—*Aksel Vang, "Bella-Vista," Kolding, Denmark.*

THE WEATHER REPORTS.

The *National Weather and Crop Bulletin* for the week Nov. 11 says the work of husking corn was delayed by frequent rains in most Central Valley districts and there was also some damage to corn as well as to fodder. In the South continued wet weather has interfered with the picking of cotton and cotton in the fields suffered further damage by rains in most sections from Tennessee and Alabama westward. In the soft wheat belt the weather generally was favorable for germination and growth of fall grains in practically all sections of the country, although a little too wet in some districts, notably in Kentucky and southern Indiana and Illinois, while in California the drought has delayed seeding.

For potatoes and truck crops the temperature was too high for best growth of winter truck. The pastures and ranges were snow covered at the end of the week from northern Minnesota westward to Wyoming and Montana and there was much snow on the mountains of Idaho, so that feeding operations have begun. Clover hulling was under way in Wisconsin with good results.

In New England there was a severe storm at the beginning of the week, causing heavy rainfall on the coast and snow in the interior northern portions, more than 12 inches falling in some localities. In Indiana and Illinois Hessian fly is reported in several localities, in Indiana quite bad in some places. Kansas reports more corn gathered up to Nov. 10 than usual at this season. New Mexico reports moisture needed in some stock districts but generally the stock is in fine condition. In Nevada cattle and sheep are on the winter ranges at the feeding stations. Oregon reports the pasturage improved.



CANADIAN FEEDER CATTLE.

SOUTH ST. PAUL, Nov. 12.—During the past week cattle men from Winnipeg have been on this market endeavoring to place a number of good feed steers which are arriving at these yards and will continue to arrive during the next four to six weeks. They report an extraordinarily heavy movement of feeder cattle from western Canada due largely to the drought in southern Alberta and southwestern Saskatchewan. The drought the past summer greatly reduced the winter feeds and this, with early snow cutting short the grazing period, has speeded up the marketward movement, thus resulting in the congestion at the Winnipeg and Calgary yards.

These feeders are coming from a strictly range country, where the ranch men have made breeding the paramount issue. The cattle are mostly one- and two-year-old steers with Hereford and Shorthorn breeding. The cattle are shipped in from the ranches to either of the above named markets, there sorted and only the top cattle are reshipped to this country. The first shipments of these cattle were a selected lot varying in weight from 700 to 800 pounds for yearlings, going to the country at about $7@9 per cwt., to 900 to 1,000 pounds for two-year-olds selling at around $9 @10.50. While no definite figures can be given as to the number that will reach here it is the opinion of the local trade that last month's receipts of 49,442 head will be greatly surpassed.

Sec'y Dorsey of Texas says the Galveston export embargo situation seems to be clearing up somewhat. At any rate there is less demand made at his office for applications for permits, but the chief difficulty now seems to be to get cars after permits are secured.

Help release cars for moving our great crops by quick unloading

Quickly Spotting Cars With G-E Motor-driven Pullers

DEMURRAGE need never be feared by mills using pullers and grain shovels operated by G-E Motors.

Remarkable unloading and grinding records have been made at prominent G-E motor-operated mills throughout this country.

These mills are producing highest grade flour at lowest power costs per barrel—in some cases half that of their competitors.

The motors have been in use for many years, in some cases well over a quarter of a century, and the upkeep cost has been negligible.

NEW ERA IN GEORGIA.

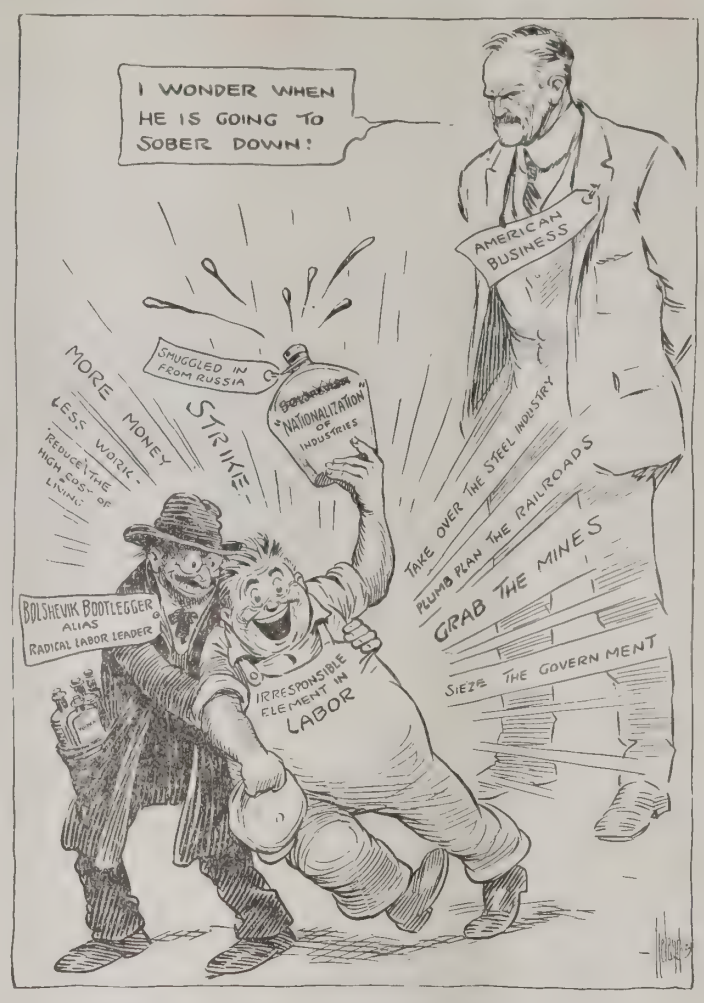
Only a few years ago Middle and South Georgia were firmly in the clutches of the all-cotton regime. As indicative of the new order of things, significant news items are coming from these sections—annual sales of pure-bred hogs, the erection of packing plants in all the important centers, the importation of high-grade cattle, the building of tobacco warehouses, pecan shelling and cleaning plants, grain elevators, peanut crushing plants, fruit and vegetable canning establishments, the demonstrations of tractor plowing. These movements are ushering in a new era.

Georgia raisers of pure-bred animals for breeding purposes are finding a ready sale for their stock. Average prices have run from $250 to $300, with individual hogs bringing as high as $1,000. On the whole, it has been an unfortunate year in the hog raising business. Only ten states in the Union show an increase in hogs for slaughtering purposes. The swine business has been at practically a standstill in Georgia this year, though the state now ranks sixth in the United States and has for slaughtering 2,682,000 hogs. The failure to show any striking increase is attributed to the high price and short supply of feed, and the prevalence of hog diseases, particularly hog cholera.

Laurens County has an active association of farmers. The association is working along the right lines to meet the boll weevil, which did enormous damage in the county this year. A contract has recently been awarded for the erection of a grain elevator to cost $15,000. This is said to be the first elevator to be erected in Georgia on the co-operative plan.—*The Fourth National Review, Macon, Ga.*

How To Be Careful.

Look over the elevators and conveyors often; report at once any rubbing, slipping, friction, or other trouble, no matter how slight. Observe also carefully these four important "Don'ts":



Never smoke in or near the mill or elevator.

Never strike a match anywhere on the premises.

Never use open flames, torches, candles, lanterns, or unprotected light bulbs in dusty air or when examining bins or elevator legs.

Never let dust accumulate on beams, machines, pulleys, or floors.—*Grain Corporation.*

The Maine crop of potatoes this year on the basis of Nov. 1 estimate will be 22,950,000 bus., compared with an average for 1913-17 of 27,678,000 bus. The quality, the field agent at Wakefield, Mass., reports, is generally good except for some little rot over the entire state. The Aroostook yields show a small increase on the estimates of Oct. 1. The average for the entire state is 225 bus. per acre. Rot is more general over New Hampshire and Vermont than in Maine and has seriously reduced the crop of those states, where the yields are only 120 to 110 bus. respectively. In Massachusetts, Rhode Island and Connecticut the rot was unusually destructive, taking approximately one half of the crop and in some sections even more. Barring the rot the quality is good.

Nationalization and Socialization Not Made In U. S. A., But Imported from Russia.—Retail Coalman.

Movement of Corn.

Following is a statement of receipts and shipments of corn primary markets of the West weeks named:

PAMPHLETS RECEIVED.

"Swift & Company's analyses and criticism of Part II of the Report of the Federal Trade Commission on the

"The High Cost of Living," by Otto H. Kahn. This is a reprint of a memorandum as to certain aspects of this subject by the well known banker and one of the notable business economists of New York City. Like everything put out by Mr. Kahn the memorandum is excedingly valuable. It relates chiefly to Federal taxation.

"France: Her Problems,—How She is Handling Them," by Baron Jacques de Neuflize. This is a reprint of an address by the author, a member of the banking firm of de Neuflize & Co., Paris, and war representative of the Bank of the United States, given on July 16, 1919, and reprinted from *La France*, the *Franco-American Magazine* of New York City. It is an answer to the frequent question, what France is doing for herself since the Armistice, and incidentally an answer to the further question whether France will be able to pay the interest and principal of her enormous debt; and the answers are most encouraging.

Reports from the grain shipping country indicate that the car shortage crisis is not so severe as it has been.

Grain Weight.

Following is the Bureau of Crop Estimates' estimate of weight per ton of 1919 grains in pounds:

State.	Wheat. 1919.	Wheat. 1918.	Wheat. 10-year average.	Oats. 1919.	Oats. 1918.	Oats. 10-year average.	Barley. 1919.	Barley. 1918.	Barley. 9-year average.

Grain Credits in Argentina.

The Chamber of Commerce of Rosario has represented to the president of Argentina that the present stores of Argentine grain would not be sold unless the Government acceded to the request of France and Italy for a credit of $200,000,000 with which to purchase cereals. President Irigoyen indicated he would endeavor to convene Congress as early as possible and would recommend the loan as business of first importance.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

GRAIN SCALE BOOK

Form 223 is an indexed receiving book designed to meet the requirements of the grain dealer who wants something a little better than the ordinary. Separate pages are given to each farmer, and all are indexed so that their accounts may be instantly located. If so desired, it can be used as a grain journal, the two L. F. columns allowing a posting of both debits and credits and entering the numbers of the ledger pages. The book contains 240 numbered pages of high grade heavy linen ledger paper, each page ruled for 41 wagon loads, and a 28 page alphabetical index in front. Size 10¼x15¾. This book is bound in heavy red leather back and corners with black cloth sides and its name, "Grain Scale Book," is stamped in gold leaf on the front cover. Order Form 223. Price $2.75. Book weighs 4½ pounds.

BUSINESS AND TRADE CONDITIONS

THERE is at least one commendable thing in connection with the Senate's action upon the treaty during the past week; it has given a that the matter may some day finally be disposed ome way. The reader will of course hold to his view of the wisdom of the Senate's "reserva-s," but perhaps the majority of men in business not disagree with the Simmons Hardware Co., recently wrote its 40,000 customers: "This letter siness, not politics. The one important question re the people of the United States is, when will action on the treaty be taken? There can be no t that this delay is affecting unfavorably the situation and the industrial situation both here in Europe." The John V. Farwell Company about ame time wrote its patrons: "American business, and small, is being handicapped by the delay. time has come for ninety-six senators to act—to he treaty out of the way," etc. The world is ng for senators to stop talking.

is perhaps time for the press also to do the ; but one cannot avoid the feeling the Senate's ior illustrates how fallacious is the oft-repeated n that a new era has come out of the war. The is indeed different from the immediate past, t brings nothing essentially new in politics. rn politics, which mark the successive stages of organization for the preservation of life and rty and freedom of thought, speech and action, been but a repetition of trials, even within a ry. Since 1789-1915, in 1832, 1848, 1861, 1871-3 rance), the Western man has been threshing raw, sometimes getting good grain, as in 1861-5, often not. Even this matter of the League is a original concept. Passing over the efforts of nall nations of antiquity, as in Greece, to fed- our own Constitution has been characterized most perfect instrument ever devised to weld ip of independent colonies into a federal repre-ive government; and while it has by no means this country a perfect government (because, as Sloane has said, "while emancipating the noble es of its citizens it also liberates ignoble im- of designing self-seekers"), it has been so far sful that many "wise and good men believe it le to so expand the idea as to create a federal ic of many nations and nationalities in order re and enforce a world peace, sufficiently en- to be considered perpetual." This undoubted- Mr. Taft's, President Lowell's, President Wil- dea, which the latter was able to consummate is, insofar as the Conference there could con- te it. That the idea has been practically into the scrap heap of history without giving ial may be proof of the sublimated wisdom of son, a Borah, a Reed, a Knox and a Lodge, to this the reader may think for himself. the days of Thucydides to Wilson there have nen who have taught that "the relations of peoples and nations are not necessarily those lity"; but so long as men otherwise democratic e of commerce and trade in terms of racial tional hostility, instead of in terms of human-nd ameliorating intercourse, no doubt the e of the endless succession of writers who nd still describe the morality of mankind as ry, "that of the wolf," will prevail; Hobbes inoza will still triumph philosophically over re amiable Locke and Montesquieu, and the ristole, Grotius, and later English and American liberals. Apparently the "Great War" is going to be as barren of results as were its great or lesser predecessors, our own Civil War alone excepted.

The collapse of the steel strike and the unmistakable lack of sympathy of the public with the coal strikers had their effect on Mr. Lewis and his immediate colleagues of the miners, who so far ignored the defiant action of Mr. Gompers and the Federation as to concede the supremacy of the authority of the Government, and after the injunction ruling of Nov. 8 called the strike off. There are scores of minor officers of the miners' unions, however, who still imitate Mr. Gompers's defiant attitude of his pronunciamento of Nov. 7 and refuse to bow to the orders of the Court and of Mr. Lewis; and their men not only refuse to work but will not permit union men or others to run the drainage pumps or otherwise prevent the disintegration of the properties. Some prosecutions for contempt of court and possibly further judgments similar to that in the Danbury hatters' case, making the conspirators personally and jointly liable for damages so caused, might bring these men to their senses. On Friday last the leaders and operators met at Washington to "adjust" relations and wages. The conference was met at the very outset with the miners' premier demand for a 30-hour week, which Secretary Wilson, presiding, with rare wisdom at once brushed aside as impossible. This conference is still in progress. Another, with the railroad brotherhoods, ended on Saturday, the men being sent home with the injunction to "think over" another proposed boost in wages that will cost the railroads $36,000,000 annually with not a penny to show for it in increased efficiency in the operation of the roads. There is now only one way to get efficient work out of this type of men—stop adding more money to their pay to be spent in idleness.

Meantime Congress has made a beginning on railway legislation preparatory to the return of the roads to their owners on January 1 next. As the Esch bill in the House is radically different from the Cummins or other Senate bills, the settlement of the problem before New Year's is quite an impossible contingency. One thing at least the proceedings in the House on the Esch bill have done: the committee in charge has made public a statement of the muddle into which past legislation, the *ex parte* bias of the Commerce Commission, and the present Government operation have placed the roads. The latter now owe the Government $898,138,261, but the Government owes the roads, as compensation $885,395,851, a sum which on open accounts is raised to $1,224,680,154, making a balance due the roads of at least $326,541,893 at Dec. 31, when the Government lets go. As an adventure in Government ownership this account may be regarded as having some salvage in the form of the disillusionment of all minds capable of disillusionment, as to the value of bureaucratic rule and classroom schemes of social reform.

The affair at Centralia, Wash., was almost inconcievably stupid—even worse than the murders of the preparedness parade in San Francisco in 1917: but it has done more than did the San Francisco outrage to awaken the people to the menaces which on many sides threaten the peace and dignity of this country and sanctity of property and human life. There will be more laws made against alien immigration; but until there is an end to such performances as the release of Haywood from prison, to which he was sent on sentence of a court of record, on the bail of a rich idler and dilettante socialist, to carry on his destructive propaganda while the Supreme Court moves with majestic solemnity to reach his appeal on a crowded docket, alien cranks already here are not likely to have an overweening awe of the law, not even one to punish the advocacy of force as a means to overthrow the Government itself. Much has been heard of deportations, but the steerage space for the deported is never crowded. Berger was denied a seat in Congress from Milwaukee, but he has his high-brow apologists, and the printers' strike in New York has been peculiarly distressing no doubt to the publishers of certain intellectual weeklies, radical sheets, living on book publishers' announcements, which doubtless are very restive because they cannot rush to Berger's defense and have for a month been unable to continue their laudations of the greatness and purity of Trotsky, Lenine and the rest. And yet the Government does nothing to check or to discourage these rich amateur underwriters of revolution.

The speculative fever which has characterized the Stock Exchange for several months came to a climax on Wednesday last when the sharp warnings of the Federal Reserve Board hit a market "overcrowded with accounts." The demand for bigger margins sent call money up to 30% and many conspicuously active industrial stocks went temporarily "to smash." The usual rally took place, of course; it always does; and there was the familiar criticism of the bankers and the Board by speculators who had no sympathy from saner bankers and the men in the market who held their speculations within rational limits. Most of the declines—not yet entirely recovered—were in the industrials; but it will be remembered that their productiveness has not been impaired by that fact. There is no limit to the call for goods; profits are still assured; sales are easy to make, and collections are good, doctors and some other professionals alone complaining in that respect. The trouble is the world has too much money and too many men who do not know how to use that which they have which is real money, like the money of the United States. The only doubt now as to the general situation is whether the Reserve Board has pushed its rediscount rates high enough and made its regulations strong enough to check the plungers who depend on bank funds to carry them through.

MORE REGULATION OF PRICES

THE limits to which the Department of Agriculture is willing to go in its purpose to control prices for the benefit of the class or work to which each particular bureau caters, without reference to existing business conditions, is well shown by the action of the Bureau of Soils of the Agricultural Department. This Bureau is interested in soils and fertilizer. Naturally, like the mole, it cannot see far above ground while its interests are below the surface. Therefore after its recent hearings on the prices of ingredients which go into fertilizer but which are also component parts of feedstuffs, it announced its conclusion that "prices in effect on Oct. 7 were unjustifiably high." The Bureau thereupon, through the Department head, has given notice to holders that "any sale hereafter made by you of sulphate of ammonia, dried blood, tankage, fish scrap, cottonseed meal, etc., at prices higher than those prevailing on Oct. 7 (which must not be construed as approved of) will be considered *prima facie* evidence of profiteering," and you will be referred to the Department of Justice for prosecution under the act making the offender liable to a fine of $5,000 and imprisonment for two years.

It is with some difficulty one can calmly speak of

such an order. Take the single item of cottonseed, a product now notoriously scarce and growing scarcer day by day from natural causes. In view of the scarcity of concentrates caused by the summary suppression by Congress and the President of both the distilleries and the breweries, to say nothing of the high prices of millfeeds caused by the operations of the Food Administration and the scarcity of linseed meal, it is not far short of a crime to use sound cottonseed or meal as fertilizer at all; it should first be run through a cow. There is otherwise a positive waste of indispensable feeding values without corresponding benefit to the soil.

Then there is the gross injustice to those who have on hand or contracted for meal that cost more than Oct. 7 prices, and none of which can be replaced at Oct. 7 values. On all of this holders by this order stand to lose from $10 a ton upwards in addition to losing the use of the meal in feed products. Such orders can have only the effect to reduce the production of the high-priced commodities.

But after all is said, what can be thought of bureaucratic tyranny that compels losses simply because certain soil professionals who may or may not know enough of active business conditions to avoid such injustice, simply because they assume that Southern planters will be pleased and benefited by such autocratic procedure. Department "shame has been relegated to the rummage chamber of discarded antiquities; emotionalism knows no shame."

PLAN ELEVATOR WORK NOW

THE elevator operator whose house is not up to the full efficiency point should get busy and study his needs. Although the Government will sooner or later let go of the grain business *in toto*, the farmer is going through a course of agitation just now which makes it necessary to keep down costs of handling grain to the bottom; and that can't be done without having proper machinery and using it. It is true repair and renewal prices are somewhat high, but there is no immediate likelihood that they will be any lower and they may be still higher and the goods harder to get. Don't wait therefore until spring for overhauling plants; do it as you can through the winter, even if it be sometimes inconvenient, owing to the movement of grain. The thing is to get your house into condition and to do at least your planning and contract making as early as possible.

CORN AS SILAGE

THE question of the amount of corn acreage going into the silo and the effect of cutting corn for that purpose on the total bushelage is interesting. The practice of the Bureau of Crop Estimates is to express the total yield of the corn acreage in bushels. This estimate, therefore, includes corn at the average on all acreage cut green for feed as well as for silage and the amount also of corn grown for canning. This total estimate is the "final," published in December. In 1913 an estimate was made to show "how the corn crop is harvested"; and it then appeared that 8.1% was cut green for the silo and 10.9% green for feed, so that only 81% was matured for grain. The same treatment was made of the acreages of wheat, oats, barley and rye, the amount of wheat left to mature and harvest being 97.5%; of oats, 88.1%; of barley, 91.9%, and of rye, 86.6%. No similar estimate has since been made that we are aware of.

Most likely since 1913 there has been a material increase in the cutting of corn for silage. This year both the Ohio and the Illinois field agents report larger amounts going into silos than usual. Mr. Fessenden of Illinois thinks so; and in Ohio the increase is specifically estimated at 2.6%, bringing the total acreage so cut in that state up to 11% of the total, as against 10% in 1913 and 9% in Illinois. If the rate of 1913 for the entire country is carried through this year, the acreage left to mature as grain is only 83,411,000 vs. 102,977,000, the estimated total corn acreage of 1919, while the yield at 28.3 bus. per acre, as estimated at Nov. 1, will be only 2,360,542,000 bus. of matured grain instead of 2,910,250,000 as estimated with all acreage included. The difference is an apparent shrinkage of 549,708,000 bus. But as this unmatured corn goes into feed, the actual shrinkage of total crop in bushels is rather nominal than real, except in this respect, that *Hoard's Dairyman* some time ago estimated the cash value of corn silage as only about one-fifth that of the matured grain.

A BLIND GUIDE

THE aims and purposes of the American Federation of Farm Bureaus, organized at Chicago last week, are not specifically understood by the public. It may be assumed, however, that the Federation intends to influence prices of farm products, if it can. Mr. Eckhardt, a well-known Illinois member, calling attention to the recent fluctuations of corn and hog prices, said that they were not explicable on the score of cost of production, which had not changed during the time prices were changing; therefore it was evident that the law of supply and demand no longer operated.

Mr. Eckhardt may be a good advisor as to practical farm science; but if the ecstatic *Prairie Farmer* daily correctly quoted him as above, in substance, then Mr. Eckhardt may safely be dismissed as a worthless guide to the business end of farming. In the first place, it is apparent he had given no real study to the causes of the fluctuations complained of. He assumed them to be purely arbitrary. Without, however, going into these, Mr. E. and his disciples should be reminded that cost of production has no more relation to the prices of farm products than the ebb and flow of the tides. The price of a diamond may be affected by the cost of cutting the stone, and the cost of production no doubt affects the price of articles of personal jewelry or decoration, but the cost of producing a hog or a bushel of wheat has absolutely no relation whatever to or effect on the price in the markets, which is made by demand alone. If the farmer does not fully understand this he is living in a fool's paradise; and he has no guide to his planting or feeding operations as long as he imagines with Mr. E. that his cost of production can at any time or place be directly reflected in the price paid to him. Price may and does affect the volume of production, and the volume of production in turn is undoubtedly reflected in the price, but neither are in any way affected by the cost of production. And this is true of almost all commodities, barring some few articles of virtu, in common use.

So far as has appeared therefore the conspicuous farm bureau leaders, Eckhardt and Thompson in Illinois and the hysterical Taylor in Indiana, seem to know absolutely nothing of the fundamentals of farm marketing economics. They talk just like overheated school boys and cheap politicians; and insofar as the state and national Federations lean on them as guides in marketing operations they are pretty sure to get into dangerous waters.

EDITORIALETTES

A NEW Mann, from South Carolina, has brought forward a bill for a commercial feed law which he thinks is "easy." It may be; but our Washington correspondent's brief of its provisions doesn't read that way. It comes from a buyer state, not a seller.

THE A. F. F. B. will do well to employ an economist before it undertakes to put some of the members' marketing schemes into practice. Cutting down the yields of farm stuff should always be left to the other fellow if you want any income yourself.

H. B. 10130 introduced by Willis J. Hulings of Pennsylvania "by request," is another of those wild and wobbly paper schemes to "aid in the production" of live stock by doing what it can to kill the industry on the farms.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

*Fort Worth missing. **Government withheld da this time.

WE HAVE kept continually before our trad importance of the coming Livestock Exposition the International Grain and Hay Show on No to Dec. 6 in Chicago. The latest news is tha National Hay Association has offered a val silver cup for the best timothy exhibit. The cultural Department will have a large exhibit there are more than 1,000 others and every ava inch of wall space has been assigned.

IT IS an old story here and elsewhere to read the extravagance of the working man, but a re tion of this to a considerable extent explains present enormous demand for loins and side m This is the poultry season, but the laboring mar fers solid meat, a fact clearly indicated in the ness of the packers and interesting in conne with the present over production of lard whi at least double the normal amount which at season of the year is about 13 per cent. Today backs, plates," etc., are producing a big tonna lard.

A TENTATIVE report has been made by Atto Examiner Gerry of the Commerce Commissio Docket No. 10261, entitled *Armour Grain Co.* vs *nois Central Ry.*, and 10543, *Minneapolis Traffic* vs. *Ann Arbor R. R.* and other cases, the subs of which is that the demurrage incurred on accumulated at Chicago, Minneapolis and other p during the war congestion of 1916-17 because o inability of the carriers to furnish cars for outb shipments cannot be recovered by the shippers. Gerry thinks, the *Traffic World* reports, that "the plainants did not prove the demurrage to be u sonable even under the conditions disclosed by testimony"; and he recommends dismissal of all complaints because "the carriers were unabl empty the elevators because they were unable t rid of the congestion at the port, caused by su rine warfare."

cost of a bushel of corn; and
ie Grain Corporation has offered
ll some of the former grain,
prices are around the best figures of the season on winters and in new ground for springs. The advance is based on the law of supply and demand, and is taken as indicating that drastic measures will be necessary to prevent higher prices for flour.

The distribution of the corn crop this season would seem to indicate that some terminal markets are going to be more favored than others. Part of the Iowa grain will move *via* Chicago, taking the place of the Illinois. The two states, with around 25 per cent of the world's total yield, have 20,000,000 bus. less grain than last year, the big shortage being in Illinois. Southern Illinois is very short and will have to draw on the central part of the state, which has the best crop, while there are some sections in Illinois where the yield was curtailed by unfavorable weather at the critical time. The South has less grain than last year. In fact, a good part of the excess in the crop, as compared with 1918, is in Texas and the Southwest; and the November estimate of 2,910,000,000 bus. is subject to revision in the final returns in December. Judging from the reports received from several states regarding the number of acres that were cut for silage, there might be a reduction of around 100,000,000 bus. from the estimated November returns. This would materially change the complexion of things, especially as the reductions would in all probability come out of the states of largest production.

A shortage in the Eastern oat crop has had a great influence on the domestic demand for that grain, and liberal quantities have been sold of late. These sales, combined with the takings by Seaboard exporters and light receipts, would suggest that the visible supply is about due to decrease rather rapidly, especially if cars can be secured to make shipments. The producer continues to hold for higher prices. Heavy oats are scarce and sell at big premiums over the December, while the foreign demand is for heavy grain. Light weights, however, have been moving a little faster than of late. It may be several months before the situation develops any great strength, much depending on the action of corn. Argentine oats in the United Kingdom went to a premium over American the past week. There is a prospect that, if the Peace Treaty is signed shortly, after the turn of the year foreign demand might improve materially, especially if commercial credits are granted.

An increasing shortage in supplies of choice spring wheats is noticeable, and prices have advanced very rapidly. In less than 5 months after harvest it is rather surprising to see sales at 82c over the guaranteed figure, especially in the face of the Grain Corporation's offer to resell red and hard winters at cost plus carrying charge. The car situation is rather unfavorable, but as yet the grain has not started to come forward which was supposed to be on the ground in some sections of the West. The suspension of the permit system was announced as temporary and it may be that steps will be taken to rush forward wheat in order to check the upturn. There has been some talk of resuming open trading in wheat for the crop of 1920, but this could hardly take place until some time next year, probably in time to permit speculation in the July delivery. Practically all reports on the growing crop indicate an excellent condition; and while it is rather far ahead to predict prices for the new crop, unless the unexpected happens, it is probable that a relatively high level will be witnessed.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
Wheat	8,159,000	8,135,000	7,405,000
Corn	2,442,000	2,164,000	3,893,000
Oats	4,040,000	4,383,000	5,526,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	14,641,000	16,824,000
Preceding week	14,682,000	20,524,000
Since July 1	396,448,000	499,163,000

Corn prices were on the downgrade the greater part of the past week. Weather conditions over the corn belt were very favorable for the movement, and with cars in slightly better supply a larger run of cash grain was expected. This led to free selling and with a lack of aggressive buying prices declined readily and closed about the bottom with net losses of 2½@4⅞c, the latter on December, which finished 2¼c above last year. Some change in sentiment was noted. At the inside figure December had dropped about 13½c from the recent high. Country offerings fell off materially toward the last, and distinct holding tendency is now in evidence.

Oats showed independent strength and closed with net gains of ⅝@1¼c, the December leading. Light receipts and a better cash demand were responsible for a good class of buying and brought in short covering. Light weight No. 3 whites are in moderate demand now, and the cash has been gaining on the December. While many elevators in Iowa hold liberal quantities of oats there is no great disposition to hold, although perhaps 75c net at country points would bring out a world of grain.

Cash wheat prices advanced to a new high figure on the crop and maintained the full advance at the close with dark Northern springs well above $3 per bu. An impartial view would seem to indicate that the crop is much smaller than expected in view of the fact that the advance has been in the face of the Government offer to resell hard and red winters. At the same time the hard continues to sell above the Government asking price. Part of the demand for wheat may be due to the rumors that have been going around that wheat substitutes would come into force again. This has been repeatedly denied, but there has been very heavy buying of flour by housewives recently. Prices for the week follow:

			Close		
Corn—	High.	Low.	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
Dec.	$1.34⅝	$1.27⅜	$1.27¾	$1.32⅝	$1.25½

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Nov. 15, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	62,062,000	58,369,000
Milwaukee	4,206,000	9,357,000
Minneapolis	58,533,000	59,741,000
Duluth	8,726,000	51,396,000
St. Louis	32,364,000	31,360,000
Toledo	6,324,000	4,209,000
Detroit	1,195,000	884,000
Kansas City	51,463,000	44,044,000
Peoria	2,098,000	2,938,000
Omaha	16,813,000	12,623,000
Indianapolis	6,178,000	6,004,000
Total	249,962,000	280,925,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
St. Louis	857,000	903,000	475,000
Kansas City	1,836,000	1,156,000	607,000
Omaha	461,000	390,000	179,000
Toledo	115,000	146,000	184,000
Detroit	65,000	45,000	42,000
Indianapolis	91,000	83,000	59,000
Peoria	42,000	33,000	27,000
Chicago	809,000	959,000	1,288,000
Milwaukee	93,000	110,000	205,000
Minneapolis	2,868,000	3,263,000	1,352,000
Duluth	922,000	1,047,000	2,987,000
Total	8,159,000	8,135,000	7,405,000
Shipments	3,811,000	4,033,000	8,332,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
American	7,689,000	5,927,000	4,558,000
Indian	.....	.....	340,000
Argentine	2,625,000	928,000	335,000
Australian	1,608,000	2,032,000	840,000
Others	48,000	70,000	190,000
Total	11,970,000	8,957,000	5,263,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20	1918-19.	1917-18.
American	118,636,000	72,395,000	84,434,000

INDIVIDUAL PERMIT SYSTEM

Technical Grain Trade Objections to the Plan Set Out at Length—Replies to the Objections by Regional Director

By GEO. A. WELLS.

On Nov. 7 C. E. Spens, manager of Inland Traffic, telegraphed that the individual permit system would be temporarily suspended at all interior markets insofar as grain from country stations to such markets is concerned, but that the individual permits will be continued on grain moving between primary markets. We are not informed of the reason why the individual permits have been temporarily suspended and do not quite understand how there can be any consistent reason for temporary suspension as we do not believe there was any good reason for its application to begin with, at least so far as certain primary markets were concerned.

We understand that there has not as yet been any necessity for the application of the individual permit system at Minneapolis, Milwaukee, Chicago, St. Louis and Omaha, and that in fact there has been sufficient elevator capacity to handle what coarse grain shipments might have been forwarded to those markets, without permit restrictions.

We cannot understand why shipments of coarse grain from country stations to these terminal markets should have been regulated by the individual permit system, even though the Seaboard, or export, markets are congested with wheat when there was sufficient elevator capacity available for merchandising coarse grain and the domestic requirements were sufficient to promptly absorb the receipts of coarse grains; in fact, it has been the understanding that the Grain Corporation would provide that the necessary merchandising of coarse grain through the terminals would not be interfered with by filling up all the storage with wheat.

AS IT AFFECTS COUNTRY ELEVATORS.

The "individual permit" having been only "temporarily suspended," we assume that it is still a live question and desire to point out particularly some of the objectionable features against it from the country elevator viewpoint.

My article published on page seventeen two weeks ago in THE PRICE CURRENT-GRAIN REPORTER on this subject included a copy of a letter received from Mr. Spens under date of Oct. 30, and the following is a copy of my reply to him under date of Nov. 4:

"Mr. C. E. Spens, Manager of Inland Traffic, U. S. Grain Corporation, Washington, D. C.:

"My Dear Sir: Your letter of Oct. 30 is received, and I note that it has been arranged that as the individual permits are issued copies shall at once be transmitted to the Transportation Department of the railroad that it may be arranged to have 'the car follow the permit,' so that the delay, insofar as the shipper is concerned, in securing equipment to load after he has received the permit, may be reduced to a minimum.

"We feel that this will help some, and trust that each Grain Corporation Committee will act strictly in accordance with this arrangement.

"We desire to request further that the shipper be not required in the application for the permit to state the kind of grain to be loaded or the name of the consignee, as certainly you will appreciate the fact that marketing conditions and values frequently change and these requirements restrict the shipper very materially in the opportunity to merchandise his grain. For example, he may desire to load a car of corn when he files the application for the permit but when he finally receives the car conditions may be changed so that he would much prefer and it would be greatly to his advantage to load a car of oats instead; and it would seem to me that there can be no special reason why the kind of grain to be shipped should be designated in the application for the permit.

"Further, we urge that it be not required to name the consignee in the application for the permit and we can see no particular necessity for doing so, as it seriously restricts the merchandising operations of the shipper. For example, when the application for the permit is filed it may seem to the best advantage of the shipper to forward the car on consignment to a commission firm in the terminal market but during the time of the delay in placing the car and also while the car is in transit, he may find market conditions to be such that it would be greatly to his advantage to make a "sale to arrive." I think you will appreciate that this would be a life saver under certain conditions, especially under such a condition as occurred when the decline of 50c to 60c per bushel took place in the market value of old corn, which resulted in disastrous losses to country shippers throughout this section.

"Will you not kindly give these two matters—the stating of the kind of grain and the naming of the consignee in the application for the permit—prompt and careful consideration; and I would be glad to have your advice by wire, at our expense, as to your conclusions in regard to same?

DUPLICATING APPLICATIONS FOR PERMITS.

"Referring to the statement in your letter that one of the principal difficulties that you experienced last year in the proper operation of permits was the fact that it frequently happened that country elevators would file applications with Grain Control Committees at various markets, covering the same prospective movement, on the theory, of course, that if permits would not be issued at one market, conditions at other markets might be different, with the result that permits on the same grain were issued at two or more markets, and each committee, anticipating that the permits would be used, would draw their conclusions as to possible receipts accordingly.

"The replies to the questionnaire which I recently mailed to shippers throughout this territory indicate that the abuse is so general that in my opinion it does in fact particularly defeat the whole purpose of the individual permit arrangement; and I do not see how it can be policed or controlled.

"There is a large section of territory, including Iowa, southern Minnesota, South Dakota and Nebraska, that is tributary to a number of different markets and market values fluctuate very materially at times, so that there is a decided advantage in shipping to one market as compared with another, and the permit system very definitely restricts the merchandising opportunity of the shipper by naming the market to which the prospective shipment is to be made in the application for the permit, thus definitely fixing the disposition of the car of grain especially when the delay is unreasonable.

"Many shippers are filing applications for permits at the different markets in order to take advantage of the marketing condition as well as to give them the additional opportunity of securing the car, this results in endless discrimination and damage to the shipper who is honestly filing his permits.

PERMITS FOR IDLE CARS.

"Another condition that is reported by the shippers, which appears inconsistent to them, is that frequently empty cars stand on the side track at their station for days which might be loaded but no permits can be obtained for the loading of such cars. It frequently occurs also that cars are placed for loading before the permits are granted and the agent will not accept billing until he has received the advice that the permit has been granted.

"The condition, that the applications for the permits expire at the end of a five-day limit, positively results in confusion, so far as the country shipper and the local railroad agent are concerned, and the result is irregular filing of applications for permits; so that the whole matter is finally lost in confusion.

"It would seem to us that the blanket permit system, with an occasion embargo applied if necessary, would work with less discrimination and confusion and that the inconvenience at the terminal markets would not amount to nearly so much as does the inconvenience imposed upon the country shippers by the individual permit system. We appreciate thoroughly the fact that the permit system positively controls the loading, whereas the embargo when applied at the terminal necessitates taking care of the loaded cars that are in transportation; but it would seem that it is possible to anticipate the necessity of an embargo, when applied in connection with the blanket system, at a sufficient time in advance so that the grain moving in transit could be taken care of, as undoubtedly you are informed by daily railroad reports of the number of cars loaded and in transit.

"All we want is a fair chance for the country shipper so that he may keep the grain moving without incurring the hazardous risks that the individual permit system, according to past experiences, has imposed upon him.

"Hoping that I may hear from you as suggested above, I am, Yours very truly,

(Signed) "GEO. A. WELLS, *Secretary*."

REGIONAL DIRECTOR'S VIEWS.

I had also taken this matter up with Mr. R. H. Aishton, Regional Director, U. S. Railroad Administration at Chicago, and received reply from him as follows:

"Mr. Geo. A. Wells, Sec'y, Western Grain Dealers' Association, Des Moines, Iowa:

"Dear Sir: I have noted very carefully your favor of the 29th ultimo, in reference to the effect of the permit system on loading from country stations, and sympathize fully with your feelings in this connection.

"However, you appreciate that these are the same regulations that were in effect last year, and if we are to properly guard against a congestion of cars at primary markets in excess of the ability of the market to absorb, thereby causing delays and loss in car efficiency, it is necessary to regulate the movement of the grain from the country stations. The situation at a number of the primary markets is such that it will take very little more grain to completely block the elevators, and this, of course, must be avoided.

"I note particularly your request for a hearing on this subject, and I have made request on the authorities at Washington for a general inquiry into the subject, at which you and others interested can be represented and present your views and wishes.

"Will give you further advice as soon as possible. Yours truly,

(Signed) "R. H. AISHTON."

COUNTRY SHIPPERS' OBJECTIONS.

I have received a large number of replies to a questionnaire on this subject from country shippers and the numerous cumbersome and red tape conditions as reported certainly restricts the merchandising opportunities of the shipper and also involves him in unreasonable hazardous conditions.

The method of making application for the permit and then, after having received the permit, of ordering the cars is certainly an endless and uncertain proposition. It would probably help some if it should be arranged to have the "car follow the permit," as Mr. Spens suggests.

Shippers unanimously consider that the five-day limit is too short a time and that the permit should be kept alive for at least ten days. This would undoubtedly result in less abuse by the shippers in duplicating applications for permits.

The shippers report that frequently empty cars stand on side tracks for days when applications for permits have been made and that there is no good reason why these cars should not be loaded instead of standing idle when the shipper and the community are in desperate need of the service.

Shippers complain that they fail to receive the cars after the permi been granted, thus necessitating t ing of additional applications fo mits and adds to the confusion absolutely defeats the purpose o individual permit.

Shippers find it very necessary, having waited so long for the c load a different kind of grain or t to a different market. The require in the application for the perm state the kind of grain and the na the consignee is, we believe, un sary and is a great inconvenien the shipper. The shipper might to change the name of the cons after the car has been billed a should have a practical opportunit doing so.

Shippers complain that the loca road agents are required to mail t plications for the permits but ar provided with the postage for doi

There is considerable complaint agents have no blank permits on which also adds to confusion i matter.

We hope that the temporary su sion of the individual permit s may become a permanent suspe However, if it must be used the pers should be given an opportuni be heard.

CORN REPORT.

Following are details from *Monthly Crop Report*, giving deta the corn crop of 1919, as estimat Nov. 1:

State.	1919, yield per acre.	1919, preliminary.	1918, December estimate.	1919, quality.	1919.	Stock far Nov

Controlling Factors in Corn Ma

Inadequate transportation and di isfaction on the part of the farmer prevailing prices were the contro influences in corn until toward the of the week when more general ings of the new crop were in evid Efforts are being made to supply e cars, and it seems likely that a f good movement will appear the co week. In case this materializes, va should respond readily as the total plus the yield of kafirs, assures abundant surplus.—*Thomson & Ko non, Chicago.*

W PENNSYLVANIA ELEVATOR

New Pennsylvania Elevator at Baltiore Now in Course of Construction Nearly Ready—Preliminary Description of This Important House

ıe mammoth grain elevator now berushed toward completion by the ısylvania Railroad Co. at Canton is cted to be in operation by the first ıe year. Baltimore says this house be 100 years in advance of the usual ent-day elevator. Its storage capacwill be close to 5,000,000 bus.; reng capacity, 400 cars in 10 hours; ping capacity, up to five ships, 1,-00 bus., in 10 hours; cleaning facil- 600,000 bus. in 10 hours; drying city, 40,000 to 100,000 bus. in 10 s. All of these operations may be ed on at full capacity without interce one with another.

e structure is of reinforced conthroughout, says the Baltimore *Price Current*. To drive its mary ten miles of belting and motors ating 7,500 horse power will be red. By a system of automatic l lights, registering the location of tripper and spout, insuring perontrol and absolute accuracy, one an direct the route and movement

NEW PENNSYLVANIA ELEVATOR AT BALTIMORE, MD.

h lot of grain entering and dis- ıg from the elevator.
ı cars will be unloaded by four d link-belt car dumpers, having ity of 40 cars an hour, requiring vo men per dumper. The scales solid lever fulcrum plate bearing ith printing beam and automatic cording attachments. All elevas will be driven by individual and will be coupled to headwith electric magnetic clutch el reduction gear.
levator will have the workhouse ts center, 211 feet long, 61 feet ıd more than 200 feet high. To t of this and also to the south)6 cylindrical grain storage bins, in height divided into three known as Annex No. 1, 84 bins, 1,249,760 bus.; Annex No. 2, 90 pacity 1,359,200 bus.; Annex No. ins, capacity 1,025,000 bus., beorage in the workhouse of 663-, a total of 4,297,310 bus.
there are some elevators on the t with greater storage capacity, v elevator of the Pennsylvania l Co. will be able to handle twice ntity of grain handled by any evator, probably in the world.

w York Oats Market.

rincipal feature of the market the week was its independent compared with the action of his was due to a fairly liberal for export and the lightness of vement to primary markets, effect advanced Western premiums, particularly for oats above the average test weight. In the local market inquiry from dealers has again proven disappointing though improvement is reported in the output by jobbers for immediate consumption. The advance to a higher level has been gradual, and it is the general opinion that the present strength of the cash situation is warranted and will be maintained.—*L. W. Forbell & Co.*

ANOTHER LICENSE REVOKED.

The United States Food Administration announced Nov. 13 that it had revoked until further notice, effective at noon on Nov. 13, 1919, the license granted to the Mohlenbrock Milling Co. of Campbell Hill, Ill., as manufacturer, storer and distributor of wheat and its products. The company is a partnership composed of M. and F. Mohlenbrock. The license was revoked for violation of the Food Control Act and the rules, etc., of the Food Administration, particularly including the failure and refusal on the part of the company to permit an authorized representation of the Food Administration to inspect their property and records, and their refusal to extend necessary facilities for such inspection during ordinary business hours, and their further failure and refusal to furnish said representative with information concerning their licensed business as required by him and by the United States Food Administration. The Wheat Director also announced that because of the revocation of the Food Administration license and because of offenses leading to such revocation, it has revoked the Wheat Director license granted to the same company as wheat flour miller, such revocation also to be effective at noon, Nov. 13, 1919.

Quality of Crops.

The quality of various crops is estimated, yearly, by the Bureau of Crop Estimates, upon the basis of 100 representing "high medium grade." The averages for the United States, yearly, are shown below for important products:

Year.	Corn.	Potatoes.	Flax.	Buckwheat.
1919	89.1	86.0	89.8	91.7
1918	85.6	88.6	90.2	88.6
1917	75.2	90.5	88.7	85.2
1916	83.8	86.0	95.4	85.3
1915	77.2	85.3	89.5	90.8
1914	85.1	90.9	90.4	91.6
1913	82.8	87.8	91.2	86.5
1912	85.5	90.5	90.6	91.1
1911	80.6	85.3	83.5	87.9
1910	87.2	88.5	84.8	92.0
1909	84.2	88.9	92.1	91.1
1908	86.9	87.6	91.4	90.7
1907	82.8	88.3	89.7	87.3
1906	89.9	90.0	92.7	90.4
1905	90.6	85.4	94.6	93.0
1904	86.2	93.4	92.0	91.5

If this paper pleases you, kindly recommend it to your neighbors in the trade.

WHO WILL BE CORN KING?

Chicago will be the battle ground this year for the annual struggle between the best corn producers of the entire country to determine who will be crowned Corn King of the United States. The struggle will be staged at the International Grain and Hay Show which will be held in connection with the International Live Stock Exposition at the Union Stock Yards Nov. 29 to Dec. 6. This is the first corn show since 1914, because of the war.

Already the entry list is large, with the very best corn growers in the country competing for the $10,000 in prizes offered by the Chicago Board of Trade and the sweepstakes trophies given by the Grain Dealers' National Association and the American Association of Manufacturers of Corn Products. At all previous shows, which started in 1907, Indiana producers carried off the premier honors in most of the classes, not only showing the best ten-ear samples every year but the best single ear at four of the six shows which have been held and the best bushel of corn at three of the shows.

This year, however, the corn growers in the other states of the Middle West declare that Hoosiers will have to look to their laurels or they will go elsewhere. Iowa has the best corn crop in years. Men from that state have been the principal contestants against the Hoosiers at most of the previous shows and they are coming strong this year with corn which they hope will win and take back home with them the crown and all the honors that go with the kingship in the realm of corn. Illinois, Ohio, Missouri and other corn growers are coming with the same intentions this year.

In addition the corn which will be on display from the various states, fourteen agricultural colleges will have exhibits of an educational nature. The states to be represented in this are Michigan, South Dakota, Kentucky, Kansas, Missouri (southeast), Illinois, Indiana, Ohio, Iowa, Wisconsin, Louisiana, Minnesota, and the United States Department of Agriculture. One of the special features will be a miniature farm which will be known as the "International Livestock Hay and Grain Farm." This will be a complete layout of a farm, showing the number of cattle, hogs, sheep, horses, chickens, etc., which an average corn belt farm can profitably carry. It also will show a good crop rotation, with the farm all laid so as to move labor and increase the efficiency of the operator.

Judging from the many entries of corn, oats, wheat and all kinds of hay now being received, the show this year will far surpass those of previous years. The corn and small grain growers not only are interested but the hay producers who are given an opportunity to show what they can do will be at the show in force.

CORN MILLERS' MEETING.

The annual convention of the American Corn Millers' Federation will be held at the Congress Hotel, Chicago, on Nov. 21 and 22, and any corn miller who "is not entirely satisfied with his corn milling business and has not all that he desires and wants should not let personal antipathies, jealousies and selfishness interfere with the exercise of his sound business judgment" but attend this meeting. Registration fee will be $3, which will cover ticket to the Federation banquet on Nov. 21. Annual dues to the Association are $25, due Dec. 1.

The program has not as yet been completed but among the features contemplated and assured will be an address by Dr. Carl Alsberg, chief Bureau of Chemistry, on "The Outlook for the Utilization of Corn and Its Products"; also an address by Leslie F. Gates, president of the Chicago Board of Trade, on "The Interdependence of Production and Marketing Facilities"; one by W. N. Adams, first vice-president of the Federation and chairman of the Traffic Committee, on "Coöperation." There will be discussions on such subjects as Dr. Bailey's "Standards and Definitions," the new differentials, price cutting, uniform sales contracts and deerred sales, and other matters.

WEIGHTS PER MEASURED BUSHEL.

The estimated average weight in pounds per measured bushel of wheat, oats, and barley, of the yearly crops of the United States, is as follows:

Year.	Wheat. Lbs.	Oats. Lbs.	Barley. Lbs.
1919	56.3	31.1	45.2
1918	58.8	33.2	46.9
1917	58.5	33.4	46.6
1916	57.1	31.2	45.2
1915	57.9	33.0	47.4
1914	58.0	31.5	46.2
1913	58.7	32.1	46.5
1912	58.3	33.0	46.8
1911	57.8	31.1	46.0
1910	58.5	32.7	46.9
1909	57.9	32.7	.....
1908	58.3	29.8	.....
1907	58.2	29.4	.....
1906	58.3	32.0	.....
1905	57.5	32.7	.....
1904	55.5	31.5	.....
Average	57.93	31.95	46.50
Average yearly variation	.55	.95	.47

The average yearly variation in weight for the United States is, for wheat about 1 per cent, oats 3 per cent, and barley 1 per cent. The standard weight, the usual basis of sales transactions, is wheat 60 pounds, oats 32 pounds, barley 48 pounds.

Kindly say: "I saw your ad in THE PRICE CURRENT-GRAIN REPORTER."

ANOTHER FEED BILL IN

Delayed Hearings on Commercial Feed Bills Will Take Place in January—Some Features of the Newly Offered Mann Feedingstuffs Bill.

WASHINGTON, Nov. 15.—[Special Correspondence.]—Consideration of legislation relating to commercial feeds will not be begun by the House Committee on Agriculture until some time in January, according to the present plans of Representative Haugen of Iowa, chairman of the committee. There has been pending for some time before the committee the bill introduced by Mr. Haugen designed to prevent adulteration and misbranding. This week another bill was introduced by Representative Mann of South Carolina, who recently was elected to fill the vacancy caused by the resignation of Asbury F. Lever, former chairman of the Committee on Agriculture, who was appointed as a member of the Federal Farm Loan Board. The Mann bill is identical with one which was sponsored by Mr. Lever last session and is less radical and more acceptable to the trade than the Haugen bill. Representative Mann also introduced a similar bill applying to fertilizers.

Representative Haugen in discussing his plans for legislation said he had intended to start hearings on the commercial feed bills this month but had been delayed by other matters. "It looks now as though the committee would not be able to take up these bills until some time in January," he said. "When Congress convenes for the regular session in December we shall have to start in on the annual agricultural appropriation bill. We are not likely to have an opportunity to consider the feed legislation until along in January."

Incidentally the Agriculture Committee appears to have put a quietus on the bill extending the Lever food and fuel control act for six months after the proclamation of peace. This bill was urged by Attorney General Palmer as a means of curbing profiteering. The fact that the coal strike made it seem desirable that the Fuel Administration should retain its power for a few more months caused the Committee on Agriculture to give the bill serious consideration for two or three days last week. The moment the coal strike was called off members of the committee took a very decided stand against the bill on the ground that they objected to any continuation of Governmental control of business.

Representative Haugen made two unsuccessful attempts to get a quorum of his committee together the latter part of this week to act on the bill. He intimated that he thought it useless to make another attempt at this session or at the next session either for that matter.

In case the coal strike had continued the committee might have reported out a bill extending only the sections of the Lever act which would have enabled the Fuel Administration to retain some of its power. Spokesmen for the National Wholesale Coal Association opposed even that, contending that it was desirable that all Governmental restraint should be removed from the coal business.

Representative Haugen was determined that the bill should not extend control over wheat or grain exchanges or various other items. It was also his purpose, in case it seemed necessary, to approve a fuel extension measure to reduce the time from six to three months.

MANN COMMERCIAL FEED BILL.

The Mann commercial feed bill is designated as H. R. 10513 while the companion bill applying to fertilizers is H. R. 10511.

H. R. 10513 authorizes the Secretary of Agriculture to establish standards of classification of commercial feed; regulates the sale and shipment in interstate and foreign commerce and forbids deception. It is provided that the Secretary of Agriculture shall give 60 days' notice of the establishment of such standards or any alteration or modification thereof.

No person shall ship or deliver for shipment in commerce any commercial feed in a container, other than in a loose lot in the vehicle of transportation, unless such container be marked, tagged, branded, or labeled to show the kind of each ingredient, the per cent by weight of each ingredient constituting 5 per cent by weight or less, the per cent by weight of each ingredient of low feeding value, the name and address of the manufacturer or manipulator, if the feed be prepared in the United States, and of the importer, if it be imported. Similar facts must be contained in invoices of loose lots of feed.

Any commercial feed shall be deemed to be adulterated within the meaning of the bill if it contains any ingredient that is poisonous or deleterious or which may render it injurious to the health of live stock or poultry, or if it contains any humus, peat, sawdust, sphagnum moss, or any added sand, soil, rice hulls, or any other ingredient having no practical value for feeding live stock or poultry. In the case of poultry feed it is provided that it may contain not to exceed 5 per cent by weight of sand, grit, carbonate or lime, or other non-injurious inorganic material. Feed shall be considered adulterated also if when intended for the use of live stock it contains the seeds of any plant injurious to agriculture, the germinating properties of which have not been destroyed; or if it be so packed or prepared as clearly to misrepresent its character or condition; or, if it be grain or seed, any other substance has been mixed and packed with it so as to reduce, lower, or injuriously affect its quality or strength or any substance that has been substituted in whole or in part for such grain or seed.

Any commercial feed shall be deemed to be misbranded if there be on the container thereof, or on any tag or label attached thereto, or on any invoice, bill of lading, or other document any statement, design or device with respect to such commercial feed which is false or misleading in any particular.

The Secretary of Agriculture is authorized to investigate and ascertain the demand for, the supply, consumption, cost and private use, and the basic facts relating to the ownership, production, transportation, manufacture, storage and distribution of commercial feed and raw materials entering into its composition. He is given authority to require the furnishing of any information desired.

The Haugen bill, known as H. R. 8342, contains most of the features of the Mann bill, many of the sections being phrased in identical language, but is somewhat more drastic. Many protests have been received by members of the Agriculture Committee against it and modifications are certain to be made before it is reported from the committee. An opportunity will be given for hearings on the bills.

MILLERS' EXPORT ASSOCIATION.

The Millers Export Association, Inc., has filed its statement of intention to engage in the exportation of wheat flours under the Webb-Pomerene act with the Federal Trade Commission. Its offices are given as 105 Produce Exchange Building, New York. Officers are Walter Stern, president and director, Milwaukee; Charles L. Roos, first vice-president and director, Wellington, Kas.; Frank H. Henry, treasurer and director, Buffalo; Chauncey Abbott, Jr., secretary and director, Omaha; W. L. Sparks, director, Terre Haute, Ind.; H. S. Helm, director, Minneapolis. Other stockholders are Richard F. Bausman, 105 Produce Exchange Building, New York; A. Spotswood Campbell, 165 Broadway, New York City; and J. Herbert Harrison, 172 St. Marks avenue, Brooklyn. The authorized preferred capital stock totals $1,000,000, of which $1,000 has been issued and paid in. There also is authorized 300 shares of common stock with no par value, none of which has been issued.

THE BREAD SUBSIDY GOING

Effect on the English Grain and Milling Industries of Decontrol of Wheat—How is the Subsidy to be Abolished?

By JACK BROOKS.

LONDON, Oct. 23.—[Special Correspondence.]—There is considerable agitation in the market just now as a result of a statement by the Prime Minister here that the bread subsidy of $250,000,000 per year is shortly to go. Grain men, speculators, millers and master bakers are scrambling around in an endeavor to get some authentic line on the Premier's tip. It is taken pretty seriously and believed to foreshadow the disappearance of the subsidy very shortly, with the decontrol of flour by the end of the present year. The fear is expressed that if the two come together a stiff rise in bread and confectionery prices is bound to follow. Mark Lane says that the knowledge that the bread subsidy would, sooner or later, have to be abolished had already "reduced the trade to a chaotic condition." As one dealer in the Lane said, "It is not so much a question whether the loaf is to be 25 cents or 29 cents, instead of the present 19 cents, as it is a matter of restricting speculation. Speculation would run up prices, and it is thought that grain importers should be afforded an opportunity for reacquiring their extensive knowledge of the world's wheat position at present zealously guarded by the Wheat Commission."

In August of this year a special parliamentary committee reported to the House of Commons the need for drastic reduction in the bread subsidy, which was criticized in no uncertain terms. Earlier in the year Walter Runciman, Board of Trade president under the Asquith regime, attracted considerable attention with a letter in which he expressed the view that if wheat control were abolished vast supplies then lying in Argentine and Australia might be made available in Britain and bring about an early fall in the world price of wheat. The letter was answered by the chairman of the Royal Commission on Wheat Supply. It was thought the wheat stocks in the countries mentioned were probably much over-rated, and that the question of tonnage would curtail considerably any especially large supplies of grain that might be available from the countries concerned. Runciman, however, returned to the attack; and the matter, finally coming under the attention of the Ministry of Food, was considered by a department committee which went into the matter of the subsidy very thoroughly last month. This seems to have paved the way for the hint dropped by the premier in his recent speech. Abolition of the subsidy, the dealers say, will mean that flour used in making bread for consumption by the British public will be governed in price in the open market by the law of supply and demand.

The millers are inclined to think the abolition of the subsidy will take effect very gradually. The questions that are being asked are: Is the subsidy to be withdrawn this year? What are the reasons for withdrawing it? Is flour to be cheaper? What action has the government taken to this end? The feeling in the trade is that the government must withdraw the subsidy gradually, it being possible to do this by obtaining "better terms abroad" and by increasing the price of flour to the bakers. Under the subsidy terms flour was fixed at $11.06 per sack of 280 pounds. That was in 1917, when flour was simply soaring in price skywards. Until a few weeks ago it remained at that price. Costs of bread manufacture, however, having risen to such an extent, the authorities decided to increase the price of the 4-pound loaf by another cent, making it 19 cents. For every $1 increase in the price of flour, it is estimated, bread will go up at least one cent per loaf. The bakers say the subsidy has not benefited them a bit since the government met the difference between the price of flour and what the charging the bakers for it. Th tional Association of Master Bake Confectioners wants to know what are being taken by the governm cheapen flour—whether the gover with farseeing logic is seeking crease the wheat acreage of the D ions and the wheat growing distri the world. The Association says is the only way out.

The views of the big coöperati cieties of Britain, so far as decontrol of flour and the abolit the bread subsidy are concerne not lacking in interest, since the ties control the biggest portion food supplies of the country. The ers of the coöperative movement a posed to subsidies on the ground like indirect taxation subsidie based on unsound financial prin The government scheme is cha ized as a very slipshod and unec cal arrangement of national fi and the societies hope to see all dies abolished in order to ascerta true financial standing of the r The coöperators think the flour s should never have been introduce ing the view that during the w public was better able to stand a r the price of bread than at the p time. They think pastry and c tionery should be run on comm lines and that the flour used i manufacture of them should not b plied at the expense of the state.

The question of the governme linquishing control of the flour and of the milling industry ge should, the coöperative societies be given very careful consideratio societies' heads say: "The experie food distributors such as oursel that the result of decontrolling a ticle of everyday demand, such as is an almost immediate rise in Therefore, should flour be decon by the end of the year, there is of one increase as a result of it a other increase in price due to ab of the subsidy."

Taken generally the consens opinion (in the absence of an definite on the matter from the g ment) is that the application of t posed abolition policy will require ful handling and that the disa ance of the subsidy must be a g process. Of course, in practice stantial portion of the subsidy ha to reduce the cost of the home-ma try, cakes and buns, apart from th used in bread-making. To preve use of subsidized flour for ind purposes, such as the manufact biscuits, a system of licensing w stituted by the authorities so tha could be obtained only for sch purposes on payment of a duty i ed to be the equivalent of the su

So far as the grain men ar cerned, they are waiting calmly an official pronouncement on th sidy question—to go, or not to go. say: "No one knows what is go happen; but it comes as no surpr learn of a possibility of an early tion."

CORN CROP OF NEW ENGL

New England Field Agent of t reau of Crop Estimates says tha for all uses has given good yield erally this year, although excessi weather reduced the yields and considerable loss and damage in ern New England, the rain prev husking everywhere. (000 omitte

THE BIG SHOW.

The real big show was the convention of delegates from state associations of farm bureaus at the La Salle, held to arrange a federation. The ecstatic *Prairie Farmer* (daily edition) said this was "the most important meeting in the history of agriculture. The future of agriculture, perhaps even the future of the Nation itself, depends on the formation of a strong, aggressive, nation-wide farmers' association." The *Farmer* continues:

Labor and capital are strongly organized and in their struggle for supremacy and for greater returns for themselves, conditions of living for the rest of the world are being made so hard that they cannot be borne.

The nation-wide demand for cheap food is making conditions unbearable for the food producer. When food prices are forced below the cost of production, soil fertility cannot be maintained, farm equipment cannot be purchased and the brightest boys and girls cannot be kept on the farm. When the nation eats food that is sold below the cost of production it is mortgaging the food supply of the future.

Agriculture must organize to correct this condition—to create a change in the attitude of the nation toward farming—the nation's most fundamental industry.

Only in a strongly organized agriculture can we hope to find a force strong enough to hold in check the insatiable demands of labor for more power.

The Federation movement originated at Ithaca, N. Y., in January. Twenty states were represented at this meeting. The objects of the Federation may be surmised from the following excerpt from the address of William G. Eckhardt of Illinois, called the "dean of Illinois farm advisers":

There seems no just reason why last year's corn crop should be plunged from about $1.50 per bushel in December to nearly $1 per bushel in January and then up to $2 per bushel before the next crop goes on the market. Neither is there justice in the hog market being plunged from $22 down to $12 within two months. The cost of producing these products varied but little during this period. Today the farmer is penalized for producing a large crop by lowering prices, often below the cost of production. The law of supply and demand in many cases seems to have been repealed.

Let us stand as one unit for the same returns on capital in farming as in other industries, for the same pay for skilled managers and farm labor as is received by other industries requiring the same degree of intelligence and labor and a margin of profit in accordance with the hazard and the frequence of the turnover. By making the national organization broad in scope, we can build through it the machinery for marketing our farm produce by making a national clearing house for agricultural products and otherwise providing the means for preventing a congestion on the market, but insuring a constant and steady supply of farm produce. Farmers are producing as large crops as labor and economic conditions warrant. They have not gone on strike even when a whole year's work is wiped out in the decline of the market during the two months.

We must put ourselves in a position to carry our own surplus of produce from the period of heavy marketing until consumption absorbs it—in other words, use the same degree of wisdom in handling our produce as is used by men making binders or any other line of business. Let us hope that we are wise enough to form a real national farmers' organization, broad enough in scope to cover all farm problems in all the states and strong and big enough to take the business of producing human food and clothing and put it on a par with manufacturing, banking and other necessary business.

Another illuminator was Prof. F. A. Pearson of the University of Illinois, who said:

1. Labor demands higher prices and cheap food—a principle which organized agriculture cannot support.
2. Capital demands cheap food in order that labor will be satisfied with lower wages, a principle organized agriculture cannot support.
3. The farmer is both a capitalist and a laborer. His income is derived from both sources. The farmer in the role of a capitalist is antagonistic to organized labor, and as a laborer is antagonist to organized capital.

Dean Davenport of Illinois also spoke. He said among other things:

Farmers should have a national organization because they desire to be heard nationally, because the work and purposes of the farm bureau need national expression, because the time is near when farmers will have something to say to both sides of the warring factions that are holding up the producing power of the country while everybody working, or striking, is demanding cheaper food.

Fred Basting of McLean County, Illinois, said:

Farmers here will not breed nearly as many sows this year as they did last, because of the discouraging market outlook. A drop of $10 a hundred not only wipes out the profit but takes part of the principal as well. Farmers must organize to take the uncertainty out of their business and have something to say about the price they get for their products.

The main items of the Federation's program as put forward and approved by the convention are as follows:

To force laws to allow co-operative marketing, collective bargaining for the farmer to insure a profit to the producer and decrease the cost of living to the consumer.

To reduce wild fluctuation in food markets, stabilize markets and food prices by controlling the flow of products to the primary markets.

To assist the government in perfecting a more reliable system of crop reporting for the entire world.

To assist the Government in placing agricultural ambassadors in all foreign countries and consulates so that intelligent service may be available on world crop conditions.

To insist that a federal board be created to advise the making of contracts with this or any foreign government for food products, thereby making possible disposition of foods at contract prices, so aiding in the stabilization of prices on other foods.

To keep control of food products until they get much closer to the consumer than at present, thereby not only returning a profit to the farmer, but serving humanity by giving the consumer quality food at no increased cost.

In explaining this program, Mr. Sconce, president of the Illinois Federation, said: "We do not want to eliminate the grain markets. The stock market is necessary; but we do want to eliminate the illegitimate food speculator and to stabilize foods to prevent wild fluctuations in grains, meats, etc. We want, through our co-operative organizations, to be able to sell to the consumer without his having to pay half a dozen men who have nothing whatever to do with food production—the fungus of the food industry—a profit on the farmers' products."

HANDLING NEW CORN A HAZARDOUS PROPOSITION FOR THE COUNTRY DEALER.

By GEO. A. WELLS

The hazardous conditions of the country elevator business involved in the ownership of grain from the time of the contract with the farmer until the cars are unloaded at destination, is burden enough for the country dealer under normal conditions; but these hazardous conditions are now materially increased by the restrictive requirements of Government regulations, railroad permits, strikes, etc. The country shipper is now facing a serious problem in undertaking to handle the new corn crop. Fortunately, the quality is good and it may be handled and shipped with a minimum of depreciation in quality, if reasonable care is exercised.

The market basis upon which the price should be fixed to the farmer is a question that should be carefully considered if the shipper is to earn a reasonable handling margin of profit. If the car shortage should continue to such an extent that terminal stocks are not accumulated, the scarcity of supplies for the industries and consuming trade will reflect an abnormal higher value than the crop production and farm reserves justify. If the country shipper at the beginning of the movement accumulates a stock of corn on hand and in transit, purchased on the basis of the abnormal higher value, he will no doubt suffer loss when the market adjusts itself to the supply basis. The question of a buying basis is therefore vital to the country shipper.

Certainly he would not buy on the basis of the spot market under such conditions, and he would be taking great chances under car shortage conditions to sell to arrive as such sales may result in default of shipment and probable loss. If he should hedge his purchases from the farmer by selling the nearby future, he may be able to buy

CHAS. A. HEATH, President, Continental Seed Co., Chicago.

in the future at a profit and merchandise the cash corn; or, if the market should advance, he may have a hedging profit, providing the future price at which he sold reflected a reasonable carrying charge. The stocks of corn carried over are small, the reserves November 1 this year being one of the lowest years since 1900.

If the coal strike should continue and the movement of corn from country stations be cut off on that account, the scarcity of supplies of corn in the East will become serious, and extremely abnormal high prices will be reflected in the primary markets. The country grain dealer can certainly not afford to increase his holdings at such a time and on the basis of such abnormal values. If transportation is interfered with by the coal strike, we may have a repetition of the situation which occurred during the winter of 1917, when the severe storms and snow blockades prevented the movement from the farms to the consuming sections of the East, which resulted in exceedingly high prices for corn.

The country dealer in spite of himself accumulated stocks on the basis of those high prices and when the railroads were able to move the corn to market, found that he was unable to make delivery and realize the abnormal high market prices that had previously prevailed in the terminal markets.

MONDAY CORN MARKET.

There was a quick turn about in the action of the market on Monday after a weak opening, which came chiefly from an extended short interest which had been created during the past two sessions. Receipts were larger everywhere and cash markets generally lower, but outside points overbid Chicago on new corn for shipment from the country; and this fact, coupled with considerable talk about the shortage of coal creating a possible shutdown in motive power, started a buying movement, chiefly by shorts, which resulted in an advance of 4¼c in December from the low point of the opening. The market was a very nervous affair, with December leading the advance and closed on a recession from the high point. Cash prices here were called 1 to 4c lower, Peoria 2 to 4c lower, Kansas City unchanged to 1c lower, St. Louis irregular, 3c higher early for yellow to 4c lower for other grades.—*Bartlett, Frazier Co., Chicago.*

The Russian autocrat Lenine recently addressed a dramatic appeal to the peasants of Russia "requesting" them to deliver to the army all their excess grain. The appeal was supplemented by the threat that unless the appeal was complied with the peasants would be "excommunicated by the Socialist State."

Crop Reports

Compiled by GEO. A. WELLS

The Government November report on corn crop production indicates that the surplus corn producing states west of the Mississippi River, including Texas, will have nearly 300,000,000 bushels more corn than last year and about 80,000,000 bushels more than the five-year average, while the consuming states of Wisconsin, Minnesota and Arkansas will have 37,800,000 more bushels than last year and 58,000,000 bushels more than the five-year average.

The Government estimates indicates that all of the states west of the Missouri River, including Wisconsin, will have 1,427,290,000 bushels as compared with 1,092,294,000 bushels last year and 1,288,248,000 bushels five-year average. In other words the corn crop in all of these states is about 335,000,000 bushels greater than last year and about 140,000,000 bushels greater than the five-year average. The report shows that Texas will have 208,104,000 bushels this year as compared with 69,000,000 bushels last year. Whether or not the Texas crop can be depended upon to furnish 100 per cent feeding value may be a question.

The drouth of last fall, which prevailed through North Dakota, Montana and the Northwest Pacific Coast will increase the requirement of corn for that section of the country to be supplied largely from South Dakota and Nebraska.

Iowa is far in the lead in corn crop production this year, with 409,000,000 bushels as compared with Illinois, the next highest state, having a production this year of only 296,208,000 bushels.

The surplus corn producing states east of the Mississippi River, including Ohio, Indiana and Illinois, are reported to have a corn crop of 636,249,000 bushels, this being about 18,000,000 bushels less than last year and about 20,000,000 bushels less than the five-year average.

The corn consuming states east of the Mississippi River, including Michigan, are reported to have a crop of 636,960,000 bushels, which is about 4,000,000 bushels less than last year and about 8,000,000 bushels more than the five-year average. It would thus seem that the increased corn crop of this year, which is 2,910,250,000 bushels as compared with last year of 2,582,814,000 bushels, is largely due to the increase of the crops in the states west of the Mississippi River and particularly to Iowa, Nebraska, Oklahoma and Texas.

Our Own Reports.

SOIL CONDITION—The soil condition as reported by our correspondents is quite generally divided in the states of Ohio, Indiana, Illinois and Iowa, portions of these states reporting "favorable" and other portions "too wet." The states of South Dakota, Nebraska, Kansas and Oklahoma report generally "favorable" for the growth condition of winter wheat.

WINTER WHEAT—Basing the Government term normal at 100, the comparative percentage of the growth condition of winter wheat is reported as follows: Ohio, 95; Indiana, 95; Illinois, 94; Iowa, 93; Nebraska, 94; Kansas, 80, and Oklahoma, 85.

FALL PLOWING—The percentage of the fall plowing that has now been done is reported as follows: Ohio, 73; Indiana, 48; Illinois, 81; Iowa, 81; Minnesota, 75; North Dakota, 85; South Dakota, 78; Nebraska, 83; Kansas, 77, and Oklahoma, 88.

FARM SURPLUS—The percentage of the marketable farm surplus of the new crop of wheat that has now been sold by the farmers is reported as follows: Ohio, 76; Indiana, 82; Illinois, 89; Iowa, 84; South Dakota, 77; Nebraska, 68; Kansas, 65, and Oklahoma, 73. Of oats—Ohio, 68; Indiana, 68; Illinois, 53; Iowa, 59; South Dakota, 63, and Nebraska, 65.

General Reports.

The disposition of the farmers to sell new corn, the time when the movement will begin and the price that is being offered to the farmers for new corn are indicated by the following general reports:

OHIO.

Bryan (1): New corn has been moving very slow. Farmers generally inclined to hold. Dealers offering around $1.60 per hundred, but corn has about 21 to 24% moisture as yet.

Bucyrus (4): No new corn will be sold. The farmers in this section feed all their corn instead of shipping it out. They ship in some also.

Sidney (2): New corn will move freely soon as favorable weather for dry and conditioning. On account recent excessive rains we have not yet begun buying new corn, but think we will soon. On present markets we will pay $1.60 per bu.

Xenia (3): Very little selling of new corn. Movement will begin about December 1. Has been delayed by wet weather. Price of corn ranged from $1.00 to $1.10 per bu.

Greenville (2): Owing to excessive rains there has been light movement of corn. Farmers not pleased with present price, and will not be free sellers. Our corn is in bad shape, and where shocks are down corn is sprouting. There will be some loss.

Liberty Center (1): Corn coming in quite briskly. Some farmers are too busy hauling beets. We are paying $1.55 per hundred. Corn is good quality; 85% yield.

Agosta (5): Some corn would be sold but too wet to get it from fields, where it is sprouting badly. Paying $1.50 per cwt.

Circleville (6): Farmers are marketing their corn freely at $1.00 per bu (70 lbs.). About all wheat sown before Oct. 1 was killed by the fly, which was about 20% of the crop sown.

Upper Sandusky (4): No corn is ever shipped from this point. Farmers are being offered $1.45 per cwt. The weather has been too wet and not much corn has been husked.

Lima (1): New corn not in shape to sell.

Ansonia (2): The farmers will not sell their corn at this price, will feed most of it. We have been having lots of rain for three days. Last week was good weather for husking.

Rockford (1): The farmers are selling corn out of fields, but not inclined to sell crib corn.

Portsmouth (6): Not over ¾ of wheat sown on account of heavy rains. Probably 75,000 to 100,000 bus. of corn lost in Scioto River bottoms by high water.

Eaton (2): Farmers not disposed to sell new corn. Old corn probably all sold. Offering $1.00 to $1.15 per bu.

Camden (2): No new corn to sell here. All will be fed on the farms. Offering $1.20 per bu., but what we buy is immediately resold to local feeders.

INDIANA.

Tipton (5): Will not sell corn here as it will be fed.

Greenfield (5): Farmers are not inclined to sell new corn. Rains have interfered with gathering. Would perhaps sell if they could deliver from feld, but after put in crib they want a price that will pay for the extra handling.

Winchester (8): Not selling new corn. Corn good quality, but very wet. Farmers feeding. With a few days' dry weather corn picking will begin. Very little cribbed so far.

Lawrenceburg (9): Farmers will be slow to sell at $1.25 per bu. offered for new corn.

So. Whitley (7): No new corn will be shipped from here. Will ship corn in to feed.

Brook (1): Paying $1.20 for new corn. Farmers will sell as fast as cars are available.

Marion (5): Farmers will sell corn. Present price $1.10 for 72 lbs.

Decatur (7): No new corn offered in any quantities. Feeders buying.

Wabash (4): Farmers not disposed to sell at price. Offering $1.20 for No. 4 corn.

Monticello (1): Farmers are inclined to hold their corn for higher prices, and at the present time they do not seem inclined to sell freely.

Frankfort (2): Farmers are selling corn now. Price $1.55 to $1.74 per cwt.

Angola (7): No corn for sale to be shipped out. All will be fed in community where grown. Commencing to ship in.

Shelbyville (5): Farmers not offering corn. They are more interested in the price of hogs. Price is about $1.00 to $1.10 per bu.

Jasper (3): Farmers are not selling new corn. Price is between $1.25 and $1.50. Corn testing high in moisture.

Princeton (3): About half of crop sown. Farmers not inclined to sell new corn at prices offered by shippers —$1.20 per bu. Very little surplus corn.

ILLINOIS.

Rockport (2): There should be some new corn moving by the 25th. The feeders are offering $1.25 to the farmers, but they want $1.30 to $1.35.

Highland (6): Have had about a month of rain, but it is reported that this has helped the early sown wheat which had been practically killed by Hessian Fly. It is making new growth.

Sidell (8): Farmers not disposed to sell new corn at less than $1.25, at which price sales will be rather free. Rainy weather conditions have delayed movement of new corn for past ten days.

Decatur (5): Shucking pretty well along. No disposition to sell new corn. We are bidding $1.34 today and no takers. Farmers cribbing.

Riggston (5): Not much selling. Price is but $1.25, but no sales.

Mattoon (8): New corn is moving now at $1.18. Farmers will not be liberal sellers of new corn.

Mt. Carroll (4): No disposition to sell new corn. Some has changed hands among farmers, bringing $1.20 and $1.30 per bu.

Princeton (4): Farmers will sell new corn at $1.25 and over when through husking.

Minier (5): New corn will not move in volume until December. We are offering $1.27 today for new No. 4.

Eureka (1): Not inclined to sell corn at present. Some movement in December.

Freeport (4): Farmers not disposed to sell much corn at present. Price is $1.20 for No. 4. Only surplus for which they have no crib room is being sold.

Wenona (4): Farmers have not finished husking, but would move considerable if completed. Price $1.30 for No. 4.

Belleville (3): Farmers not selling corn. Cannot shock as ground is too soft. Am paying now $1.35 a bu., got three wagon loads today.

Earlville (4): Farmers will move quite a little corn if price stays $1.25 or better, less than that they are slow sellers.

Nashville (3): No surplus of oats and corn is about a failure.

Ashton (4): With favorable weather look for a liberal movement of corn. No. 4 corn $1.30. Wet weather has delayed husking and conditioning corn.

Marshall (8): Farmers are holding new corn at $1.25, getting it for feeding purposes.

Pocahontas (3): Farmers are buying corn, having had a failure in corn around here.

Rantoul (5): Selling very little $1.15.

IOWA.

Hull (1): $1.20 to $1.25 per bu. to sell but too wet.

Glidden (2): Farmers will se corn as soon as they are done p The movement will not be genera about Dec 1.

Oakville (9): Farmers not corn. Holding for more money. ment will begin when we can pay $1.50 per bu. We are bidding fro to $1.25 per bu.

Wall Lake (2): Have not boug new corn as farmers are not t picking.

Belmond (4): No wheat h amount to anything. Farmers to sell corn at present price ($1.

Moulton (6): Corn is changing between farmers at $1.00 to $1. bu. Will have no corn to ship

Clemons (5): Farmers can't ge to market on account wet w Don't look for an early moveme

Gilbert (5): Farmers very anxi dispose of corn at around $1.10 p Heavy movement last week. Ra hold it up a few days now.

Marcus (1): Early picked moved. Since price declined f stopped selling. Farmers had t picking account heavy rain.

Whitten (4): Farmers anxious new corn. Too much moisture no

Truesdale (1): Holding cor $1.25. Weather bad for husking.

Kirkman (2): Farmers not in to sell corn. Nothing moving December.

Coburg (3): Farmers not incli sell new corn. Sell nothing below

Jefferson (5): Very little cor as yet.

Hamlin (2): $1.15 per bu toda not much selling.

Osceola (6): Farmers will sel at $1.00 or higher. Movement w gin in December.

Lowden (8): Corn won't mo fore December. Farmers may s $1.25, but have made no bids.

Wright (5): $1.00 to $1.10 see be the prevailing prices for new and farmers are slow to sell in t cality. Corn will start to move Dec. 15.

MINNESOTA.

Warren (1): No corn marketed.

Donnelly (2): We do not ship new corn. Will crib up some ear Am paying $1.06 for ear corn at ent.

Hayward (6): Farmers are n clined to sell much at these pr $1.08 to $1.12 ear corn.

Henderson (6): Farmers want per bu., and will not sell much at $1.15 price offered for new corn n

Albert Lea (6): Farmers wil corn freely at these prices. It has raining so much the last coup weeks that the roads were in poo dition and delayed corn picking ing $1.05 to $1.10.

Prior Lake (6): The farmers i locality are holding their whea spring, with the expectation that i advance then, the same as last ye

Eden Prairie (6): About all the is fed. Don't think they can plow more this year as ground is froze

Minneota (3): Early moveme corn will be slow account wet we and snow. Lots of corn in the yet. Farmers not disposed to sell under $1.25. No corn has been tracted at this station as yet.

Hutchinson (6): There will n much corn sold at the price we paying, which is $1.06 to $1.08.

NORTH DAKOTA.

Drayton (7): Tendency to hold ance of wheat crop, expecting h prices. Very small per cent to m until toward spring.

Vose (7): No corn or oats for Long winter ahead of us and it take lots of feed, as it is two fe snow on the ground now. Big bliz the 10th of November.

Fargo (8): Local demand will all raised in N. D. Lots of corn husked yet. Eighteen inches of sno

akota (7): Very little oats for sale. teen inches of snow and no winter eat.

SOUTH DAKOTA.

itchell (5): Corn not more than husked, and is covered with and snow. Offering $1.20 for No. 4 n. None bought.

eresford (9): New corn will move, ther permitting, freely the last of month. Farmers holding at pres- here for $1.25 per bu.

rookings (8): No general movement new corn to date. Weather unfa- ble to husking or marketing, so not determine farmers' willingness ell on present basis.

ankton (9): Farmers are free sell- of corn. Prices for new corn about for ear corn. Not over 60% of picked. Snow and cold weather cause the rest to remain in the for some time.

urley (9): New corn market opened t $1.25, and movement at this price brisk until stopped by storm.

ark (7): Not much corn for mar- here. Farmers are getting $1.10 to for what corn is being sold.

andreau (8): Weather has delayed husking. Corn offerings were light will be for about thirty days.

NEBRASKA.

:Cook (6): Corn picking is hardly r way, little if offered.

mboldt (9): Small amount selling .25.

leans (6): New corn is offered y and $1.00 per bu. is paid.

nnetoon (7): Will sell new corn on as husking is finished.

ligh (7): Farmers are busy in . No corn being marketed; $1.15 u. is being offered.

braska City (9): We have not put ny price to date. Farmers act in- ent about selling corn. Think will in this territory.

anton (9): Offering $1.20 and new now moving.

erior (9): No new corn will be here. We will ship in.

tral City (9): Corn not moving too early.

rmont (9): Paying $1.25 for corn.

trice (9): Just had two inch rain.

den (9): Farmers seem to be fa- le to selling their corn as soon ndition of corn will do to shell. is $1.25 to $1.30 and expect corn ve in about two weeks.

KANSAS.

dison (9): No corn for sale. Will p all new corn to sell, and ship n to feed. Wheat sown, up and g fine; 25% less than sown last

land (3): We had no rain to of here all fall until the 7th inst. wheat, or only a small percent- as germinated, so our percentage nparative growth is plenty high %.

ceeny (2): No corn to put on arket. All will be used locally.

do (5): No corn will be for sale. of rain. Threshing not all done. cars very scarce, so movement is rge.

ol (4): Only one dollar is being t for new corn at present, and ttle is moving.

tion City (7): Very little corn marketed.

burg (9): Farmers will hold very light crop. Corn acreage mall, so practically none will be Offering $1.35 per bu. for corn, is still too tough to shell good.

ca (7): Farmers not disposed to rn at present price.

ington (6): Late rains have de- plowing and seeding. They are wing, however, where the ground enough to work.

oyer (7): Not much to sell, and s talk of holding until next or summer.

aska (4): No new corn to put market here.

go (9): Disposition to hold both nd oats. Not enough corn for se here. Price depends on qual- s from $1.00 to $1.25. Only about f of our wheat sown, as it has been too wet to sow for the last month.

Pleasanton (8): Wheat acreage will be only about 30% of last year's, account of dry weather during summer and fall.

Uniontown (9): Not much corn moving. What little corn is selling is bringing $1.25. A few who have corn to sell are holding for higher price.

Hillsboro (5): No new corn for sale in this vicinity. We will have to ship in corn.

Minneapolis (4): Very little corn for sale, all of which is bought by feeders at $1.40 to $1.45.

Neodesha (9): We are having much rain, rather unusual. Delays wheat. We will need all the oats. Had but little corn.

OKLAHOMA.

Enid (4): Corn being sold freely where elevators are in shape to handle it. Movement retarded by car shortage.

Miami (7): Not much surplus corn here. Not much effort to market account other necessary farm work to be done.

Enid (4): No corn in our section.

Kingfisher (4): Not much corn grown in this locality, none to ship out. Wheat acreage reduced about 15 to 20% from last year.

Enid (4): Corn movement an average run of sales from farmers.

Cordell (2): No corn will be offered except for local needs.

Geary (2): Paying $1.20 for new corn. Farmers disposed to market surplus corn at present price.

El Reno (5): Favorable weather would see general movement of corn at $1.10 per bu.

Marshall (5:) Farmers not offering new corn freely. Bidding $1.50.

Altus (3): We do not raise any corn here.

F. G. CROWELL MARRIED.

KANSAS CITY, Nov. 17.—[Special Telegram.]—The announcement was made today of the marriage in New York City on Saturday of Frank G. Crowell, first vice-president of the Hall-Baker Grain Co. of Kansas City. The bride was Miss Renel H. Clements of New York. Mr. and Mrs. Crowell will be at home in Kansas City after December 15. During the war up to July 1 this year Mr. Crowell was first vice-president of the Food Administration Grain Corporation.

T. J. TANNER.

ARGUMENTS ON NO. 9009.

Arguments were made at Washington on Nov. 8 in the celebrated case "9009," entitled "Loss and Damage Claims on Shipments of Grain"; T. J. Norton represented the carriers, H. A. Feltus the Northwestern grain interests, and Henry L. Goemann grain shippers generally and specifically the committee appointed by the shippers to confer with a like committee representing the carriers to bring about a better understanding between the parties. Clifford Thorne represented the Farmers Coöperative Elevator Associations.

Mr. Norton, the *Traffic World* says, contended that it never had been the duty of the common carriers to furnish box cars coopered and lined to be grain tight; the tariffs always laid the duty on the shipper of putting cars in condition for shipping grain in bulk. Mr. Goemann called attention to the fact that the carriers through their weighing and inspection bureaus provided certificates for various cars showing that they are free from such defects as leaky roofs, side, floors, etc., to which Mr. Norton replied that of course such notices or certificates must necessarily be read in connection with tariff publications. Discussing the law points Mr. Thorne said that under the common law it is the duty of the carriers to furnish suitable and adequate equipment or pay for goods lost in transit.

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	32,590,000	51,563,000
Milwaukee	11,484,000	16,723,000
Minneapolis	8,374,000	14,913,000
Duluth	393,000	1,944,000
St. Louis	8,646,000	9,156,000
Toledo	1,384,000	4,511,000
Detroit	842,000	1,617,000
Kansas City	2,712,000	7,498,000
Peoria	2,735,000	3,897,000
Omaha	3,370,000	8,334,000
Indianapolis	4,493,000	6,379,000
Total	77,023,000	126,535,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
Chicago	1,216,000	1,629,000	2,339,000
Milwaukee	832,000	697,000	339,000
Minneapolis	410,000	488,000	592,000
Duluth	10,000	7,000	74,000
St. Louis	740,000	740,000	666,000
Toledo	73,000	59,000	181,000

Indianapolis	199,000	277,000	292,000
Total	4,040,000	4,383,000	5,526,000
Shipments	3,585,000	3,281,000	5,457,000

The Corn Market Outlook.

The willingness of the farmer to sell his corn has been under much discussion. Arguments pro and con have undoubtedly much merit. Nevertheless, we believe that the near future will witness a decided increase in receipts. The farmer may be relied upon as being well versed with general conditions that have a direct bearing on prices. Whether current values are satisfying or not, the fact remains that the large crop of an unusually good quality must produce a gradual change from the strained conditions that existed on last season's crop. The rapid and unprecedented rise in farm values has caused much farm land to change hands, and the selling of corn from rented farms this year promises to be an important feature.—*Simons, Day & Co., Chicago.*

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1919, to Nov. 15, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	2,644,000	5,552,000
Milwaukee	269,000	194,000
Minneapolis	299,000	189,000

News of the Terminal Markets

CAIRO, ILL.

John Travis, Correspondent.

Wheat is looking fine. The acreage is much less than last year and some reports of damage by fly will further decrease the yield.

The Ohio River reached a stage of 39 feet and overflowed considerable of the low lands. The high water and heavy rain did considerable damage to the corn on these lands

The receipts of oats the past week have been good. Some new corn arriving. The shipments have increased and there is a good demand for both oats and corn. The car situation is much better

The new order for minimum loading will work a hardship on shippers of sacked oats on account of the light weight of the crop. Elevator men say it is impossible to load to the marked capacity on some of the cars.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Trade this week has been dull in all lines.

Millfeeds seem to have dropped back in demand, while sellers appear anxious to let go.

Grain has been dull, with little demand for white milling corn, and slight demand for mixed and yellow.

Oats very quiet with practically no demand at all.

Hay active, with most excellent demand for clover and mixed hay, which is almost impossible to get.

Prices quoted here as follows: Reddog, $65@65.50; middlings, $47@47.50; bran, $42@43; No. 1 timothy, $30@31; light mixed timothy, $30@31; No. 1 clover, $34@35; No. 3 white oats, 78@79c; No. 2 white corn, $1.60@1.65.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

The Trusler Grain Co., of Emporia, Kans., has made application for membership in the Sioux City Board of Trade.

They have opened up offices on the second floor of the Grain Exchange. V. B. Holt, vice president, will have charge of this office.

Considerable snow fell last week in this section of the country and tied up railroads for about twenty-four hours. The country roads are in such condition very little grain will move to markets until the roads dry up. It is estimated that about 60 per cent of the corn is out of the fields.

Visitors during the week were: Mr. Comstock and Mr. Bell, of the Updike Grain Co., Omaha; Mr. Propp, manager of the Farmers Elevator Co., Southerland, Iowa; J. B. Larson, of Peck & Larson, Laurel, Nebr.; Chas. Corr, manager of the Farmers Elevator Co., Salix, Iowa; Mr. Roe, manager of the Farmers Elevator Co., Carroll, Nebr.; Mr. Westrand, of the Westrand Elevator Co., Laurel, Nebr.

DES MOINES, IA.

A. McArty, Correspondent.

Receipts: wheat, 14, corn 48, oats 52, flax 10.

Cash corn and oats have been selling well here this week, new No. 4 yellow, $1.35 to $1.36; No. 3 white oats averaging 69c to 70c, demand good.

C. J. Meredith of Meredith Feed Co., is spending his vacation in the woods of Michigan, hunting deer, he says, and also reports about five inches of snow in that section.

Inspector Tischer, a strong booster for the opportunities of Des Moines as a grain center, is untiring in such activities. It is characteristic of the growth of Western markets to observe the enthusiasm and results produced by such men.

The Planters' Terminal Elevator Co., for which incorporation papers were filed recently, as announced in the last Price-Current-Grain Reporter, plans the erection of a million-bushel elevator. It is fathered by Ralph Bolton, secretary of the Greater Des Moines Committee, Ralph Reed, A. M. Parmenter, a Grimes banker, and Geo. Close of Sheldahl. The sale of stock in the proposed corporation is by R. B. Parrott.

At a special meeting of the Board of Trade recently, A. J. Cheeseman, for many years connected with the Traffic Department of the Chicago & North Western R. R., was elected secretary. Mr. Cheeseman has had a wide and varied experience in transportation, and his thorough knowledge of traffic and operation, together with his wide acquaintance of the grain trade in Iowa, should make him a valuable asset for the Board in Des Moines.

During the past week the following grain men visited the Exchange: Clifton Kraff of F. M. McClelland & Co., St. Louis; Ed Hasenwinkle, St. Louis; Wm. Simons of Chicago; Carl Congleton of Watkins Gr. Co., Kansas City; W. W. Simmons of Sloan-Simmons, St. Joe. Also the following country shippers: John Gannon, Valera, Ia.; C. H. Patterson, Luther, Ia.; Ed Wagner, Ankeny, Ia.; Roy Johnson, Alleman, Ia.; M. R. Neilson, Dallas Center, Ia.; H. D. Harding, Rock Creek, Kans.

Jefferson D. Hardin, Jr.

Foreign Grain Freights
Grain Forwarding

NEW ORLEANS, LA.

OMAHA.

Leigh Leslie, Correspondent.

Charles H. Compton, assistant traffic manager of the Omaha Grain Exchange, is at Excelsior Springs, Mo., where he went for the benefit of his health.

Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, returned home a few days ago from Washington, where he spent some time looking after business for the exchange.

The heaviest load of wheat ever received in this market, so far as the records show, was consigned a few days ago by the Julesburg Co-Operative Assn. of Julesburg, Colo., to the George A. Roberts Grain Co. The car contained 2,507 bushels of wheat, weighing 150,460 pounds. The car came in over the Union Pacific.

These directors of the Omaha Grain Exchange were elected last Wednesday: E. E. Huntley of the J. Rosenbaum Grain Co., S. S. Carlisle of the S. S. Carlisle Grain Co., and W. T. Burns of the M. C. Peters Mill Co. The new directors, with those whose terms have not yet expired, will choose a president of the exchange to succeed John T. Buchanan.

Despite the fact that the individual permit system has been discontinued, the movement of grain to this market has continued extremely light throughout the week. The light movement has been due entirely to the car shortage, which continues acute. The trade believes that within a short time country shippers are going to be able to get enough cars to greatly increase the receipts.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Receipts of all kinds of straw are very light and all arrivals meet with ready sale. There is an urgent call for good clean oats straw suitable for packing purposes. Straw is quoted around $12.50@13 a ton.

Arrivals of oats have been light for the last few days and the tone of the market here shows some slight improvement. All receipts can be placed at quotations, which are around 78@78½ cents a bushel for the best grades. Lesser grades are fractionally lower.

There is no urgent demand for ear corn in the local market. Receipts are not up to normal and some eastern shipments are being offered here at $1.33 a bushel with no takers. Eastern corn is of a better quality and commands a premium over western grown corn.

Receipts of shelled corn are light when all arrivals of old corn readily placed; also kiln dried if in good condition. Some of the latter has been in bad condition when received here, but it is expected that the late colder weather will have a good effect in this direction. Quotations follow: No. 1 yellow, $1.67@1.68; No. 2 yellow, $1.66@1.67; No. 3 yellow, $1.61@1.64.

NASHVILLE.

John Leiper, Correspondent.

Center Town Roller Mills, of Warren County, Tenn., have been incorporated by L. B. Gilbert, W. A. Jordan and others. The capital stock is $10,000.

Marks & Anderson, wholesale grain and hay, Covington, Tenn., have sold their business to James G. Owen and Drew C. Moore, and will remove to Memphis to engage in business.

The three-story flour mill building of O'Connor & Huddleston at Centreville, Tenn., has been completed, and as soon as machinery can be installed the firm will begin business.

Receipts of grain at Nashville last week were 158 cars. Stocks at the close of the week were: Flour, 44,600 bbls., decrease of 6,400; wheat, 721,000 bus., decrease of 36,000; corn, 38,200 bus., increase of 23,200; oats, 372,000 bus., decrease of 5,500.

The Interstate Commerce Commission has entered an order to the Southern Classification Committee to make rates on flour and corn meal in rope paper bags of one-fourth barrel and less by Jan. 20, 1920. Rates have not been made on such shipments in paper bags heretofore.

Corn mills in the Southeast report more active demand for meal for later shipment. Southeastern corn mills, with capacity of 126,000 bus., had output last week of 21,463 bus., or 17 per cent of capacity, which compared with 13.62 per cent the preceding week. Prices: Plain meal, sacked, per 100 lbs., f.o.b. Ohio river points, $3.25@3.45.

Wheat prices continue strong with mills receiving supplies to cover demands. Rains have delayed movement of local corn. Demand for corn is fair. Oats are in moderate demand, and stronger. Prices: Wheat, No. 2 red, $2.35@2.37. Corn—No. 2 white, $1.60@1.63; No. 3 white, $1.58@1.60; No. 3 mixed, $1.55@1.58. Oats—No. 3 white, 81@82 cents; No. 3 mixed, 80@81 cents; No. 3 red, 82½@83½ cents.

MEMPHIS.

George Williamson, Correspondent.

Effective at once the new plugging system of hay inspection has been installed on all shipments over the Missouri Pacific and the Cotton Belt roads. A spotting track was set aside a few days ago. The Illinois Central will set aside a track in a few days, according to officials.

While some of the local trade think it will interfere to some extent with their business by preventing some small customers from buying as freely as they might, the proposed ruling of the railroad administration to fix minimum weights on grain and grain products on five days' notice is regarded as a wise move. It is appreciated that the purpose is to facilitate movement and to help alleviate some of the car shortage.

The Stout-Hunt Milling Co., capitalized at $60,000, are now operating the flour and feed mill belonging to Yates & Donelson, having leased it for a term of years. C. B. Stout is president and general manager, while M. W. Hunt, formerly of Portland, Ore., is vice-president. Mr. Donelson has entered the cotton business, while Mr. Yates has retired because of his health, having recently undergone a serious operation. The new firm will travel about 15 men in the South and Southeast and will specialize in soft wheat flour and corn meal.

Business on the call board during the week has been quiet, for receipts have been light and everybody has been waiting for activity to be resumed after the long lull. The interior has been buying so slowly that incentive to trading has been lacking, but the past few days have seen improvement and signs that business will soon be lively. Feed makers have been picking up some of their needed supplies, but they also are only getting ready for the rush expected to start soon. White oats are reported steady and cash 3 selling Saturday at 76c. Some little demand has prevailed for red oats, but offerings have been limited, as it is too late now for seeding. Corn has been very quiet.

Killing frosts struck this entire territory several days ago and put an end to growth of a lot of vegetation that has been holding back purchase of grain and feedstuffs. The local dealers are anticipating early improvement in demand as one result. Never in the history of this part of the country were pastures so fine at this time of the season, and it has kept business from picking up as soon as usual. The rains have also stopped, which will enable fall work to be resumed, which will also help demand for feedstuffs. The general feeling among the trade is that the business prospect is excellent, for there is very little feed held in the interior and the South was never in such financial shape as it now is and naturally objection to high prices will be slight.

WESTERN CANADA.

A. Caldwell, Correspondent.

The question is frequently asked: "What will the Canadian wheat board's participation certificates be worth." It is impossible to say, as it depends upon the price they are obtaining and will continue to obtain from European buyers and also the expense of handling.

They start off with a gross profit of 15 cents a bushel on the quantity sold Canadian millers as they charge them basis $2.30 No. 1 northern against an initial price paid of $2.15.

What prices they are getting at the seaboard for basis No. 1 northern is not known nor has any reference been made to it.

The present quotations for No. 2 red winter, f. o. b. New York, is $2.37½, and as Manitoba No. 1 northern is worth a premium over red winter it may be said that the value of Manitoba wheat at the seaboard for export might be well over $2.40 and on that basis will make a satisfactory return to the producer as his share of the profit in handling.

The Board could have very little expense in finding a market for its wheat, so therefore the charges against wheat at the seaboard would be simply the transportation costs from Fort William and Port Arthur to ocean ports on the Atlantic and the administration expenses at Winnipeg.

There is hardly any possibility that Europe can be induced to pay any greater price for wheat that has so far been charged them by producing countries and there is more reason to expect lowering values than increasing and naturally easier tendency of wheat values would have its effect on coarse grains. In comparing the price of rye with wheat the former is absolutely too low, based on its intrinsic value, but the price probably represents its real logical value based on world's conditions and absence of Government regulations while wheat is controlled under certain fixed values or guarantees and to a great exent the price may be on stilts.

It would seem that during the longsh men's strike at American ports a li quantity of our oats must have been for export from Canadian ports and cash demand of the past few days has to fill space.

No doubt after the close of navig there is more probability of the all business being confined almost exclus to wheat. This will bring an accun tion at the lake heads and premiums go.

At present the movement of grain the interior to the terminals is slow, largely to the diversion of rolling stoc hauling coal. The long strike of miners left the West bare of coal res and severe weather has necessitated rushing of coal to points in need to exclusion of all other business.

PEORIA.

L. L. Eckard, Correspondent.

Oats receipts, 16 cars; market ½c l with fair demand: No. 2 white, 72@7 No. 3 white, 71½@72c.

Peoria live stock market was stron the close. Saturday's hog receipts 300 cars, with market steady to 15c hi bulk of sales, $14@14.45. The cattle ket was steady with light receipts.

Country offerings of corn at Peoria rather free last week and receipts been somewhat larger than expected is feared the shortage of coal will cause a dull demand from local indust

Louis Mueller, president of the Belt Elevator Co., has announced that in a few months his company will begi erection of a concrete elevator to cost tween $350,000 and $500,00[illegible]. The structure will be built where the old elevator stood, which was destroyed by a few years ago. The new elevator have a capacity for 500,000 bushels of g and is to be built in the most modern Besides Mr. Mueller, in the new com are H. W. Dewey, Homer Dewey and L. Bowman.

Saturday's receipts of corn were 96 including 51 cars of new corn. Old with good billing was quoted about 1 lower; new corn was 3 to 5 cents lo with only fair demand; and most of offerings were sold to go to outside po Quote: Old No. 1 white, $1.52 DW; N yellow, $1.52 DW; No. 2 yellow, $1.52 No. 1 mixed, $1.52 DW. 1258 Tacoma Bldg., Chicago, Ill.

Aluminum Dockage Sieve and Pan, for corn. We have them for wheat also.

The Boerner Sampler or Splitter. Copper and steel.

New corn has made a start to market and recent sales have been made at $1.59 per bushel delivered New Orleans for No. 3 yellow corn, two cents off if four, quick shipment. Since the levee strike has been settled and the accumulated freight is being loaded on shipboard, Cuba has come into the market on corn and sales to this country have been made. The domestic demand for corn is poor, besides Europe is not taking any corn from our port, which makes the outlet for corn rather limited. Old corn seems to be scarce and all attention is riveted on new.

DULUTH.

S. J. Schulte, Correspondent.

The Steamer John Owen of the Richardson line reported lost above the Soo in the severe storm that ran over the lakes, cleared from Duluth last Tuesday morning with 100,000 bus. of rye billed for Buffalo, loaded at the Itasca elevator. The captain is reported to have had a hunch that something might happen to him on the way down the lakes, and he refused to take on 5,000 bushels more grain for fear that the buoyancy of his boat might be affected.

Trading in rye was active on this market during the last week. Operators were in the market for grain to cover contracts for shipment to the East before the close of the lake navigation season. Prices weakened in line with the general tendency and spot No. 2 rye closed 2⅝c off at $1.34. It sold at 3c over the December future quotation. Stocks of rye in the elevators here now aggregate 4,540,000 bus., but it is expected they will be nearly all shipped out before the lake season closes.

John D. Shanahan, formerly of the Shanahan Grain Co. here, and up till recently with the United States Grain Corporation, was a visitor on the Duluth Board of Trade at the end of last week. He is now associated with the Niagara Falls (N. Y.) Milling Co., with headquarters at Buffalo. He asserted that severe congestion existed in handling and shipping conditions at the time he left New York, but it was hoped that improvement would be brought about shortly now that the freight handlers' strike is over.

A cargo of 6,290 tons of flour contained in 90,000 packages was loaded from the Northern Pacific sheds at Duluth at the end of last week on the steamer Duluth. It was the largest single shipment of flour ever made by lake here, and it is thought it will be found difficult to beat that record. Flour is being rushed here by Minneapolis millers for shipment before the close of the lake navigation season. The Duluth-Superior Milling Co. also shipped out large tonnages of flour during the closing days of the season to cover contracts for Eastern delivery.

M. L. Jenks and Charles F. Macdonald, secretary of the Duluth Board of Trade, have returned from New York, where they attended a hearing on lake and rail freight rates before the Eastern Freight Traffic committee. They attacked the present structure of rates under which the Eastern roads charge 2 cents more a bushel for grain received from Lake Superior ports than they do from Lake Michigan ports. Mr. Macdonald and Francis W. Sullivan, attorney of the Board of Trade's traffic committee, will attend the final arguments on the freight rate hearing to be made at Washington on Nov. 22.

MILWAUKEE.

Erich E. Meyer, Correspondent.

Shipments of grain from Milwaukee for the week ending Nov. 15, were 415,968 bu. oats, 27,860 bu. corn, 128,960 bu. barley, 46,433 bu. wheat, 1,350 bu. rye; total, 620,571 bu., against 707,186 bu. the preceding week and 1,432,524 bu. a year ago.

Receipts of grain at Milwaukee for the week ending Nov. 15 were 108 cars barley, 67 cars corn, 313 cars oats, 65 cars wheat, 56 cars rye; 8 cars flax; total, 617 cars, against 662 cars the week before, 409 cars a year ago and 962 cars in 1917.

Buckwheat in Wisconsin this year yielded an average of 16.9 bus. per acre, or a total production of 575,000 bus., as compared with 613,000 bus. forecasted Oct. 1, 636,000 bus. produced in 1918, and a five-year average of 338,000 bus. Average yield in 1918 was 15.9 bus., the ten-year average 14.9 bus. per acre.

In the Milwaukee cash grain market the feature of the past week was the strong situation in the barley market, which advanced 10-12c. on export sales and judicial decisions halting immediate dry action in many sections. Corn closed 2@3c lower, rye, 1½c lower, wheat 10@20c higher, and oats advanced 2@3c. The movement is light and the demand good.

Elias S. Collins, for many years a prominent figure in the flour business in the middle west, having constructed several of the largest mills in this section, died Thursday, Nov. 6, at his home, 1223 Cold Spring avenue, at the age of 76. Mr. Collins was for many years employed in the flour mill department of the Allis-Chalmers Co., retiring four years ago on account of ill health. He is survived by a widow and one son.

Visitors registering at the Milwaukee Chamber of Commerce during the week included: Frank Fowler, Fremont, Neb.; H. F. Shepherdson, Minneapolis; E. J. Meyer, Buffalo; C. J. Sparr, Marshfield, Wis.; O. W. Timme, Plymouth, Wis. C. L. Perkins, Medford, C. J. Kaiser, Palmyra, D. N. Rosenheimer; Kewaskum; W. J. Kaufman, W. A. Gantz, Oak Center; W. G. Stoddart, Markesan, C. S. Morris, Berlin, Wis. H. A. Pauleau, Sioux Falls, S. D.; W. W. Freeman, Minneapolis; N. J. Huck, Zenda; A. Teweles, Sturgeon Bay, O. F. Steller, Geo. Brewing, W. J. Raden, Bloomer, Wis. J. Riley, Chicago; R. Moore, Minneapolis; H. R. Bruins, P. C. Bueyatt, Raleigh City, N. D.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen were among the visitors upon the Produce Exchange floor during the past week: George Williams, of Buffalo; A. B. Anderson, of Wichita, Kans.; M. Harris, of Toronto; L. Weitzman, of Chicago, and E. L. Grove, also of Chicago.

Some improvement has taken place in the demand for cornmeal in New York, and jobbers appear more inclined to make purchases. This probably represents a better local distribution in anticipation of larger consumption during the cold weather. There were some export enquiries for quite liberal amounts, but so far they have not brought about any actual business.

Trade in cash oats has not been brisk, but there was a fairly active demand from foreign sources for the better qualities and premiums hardened. There seems to be a scarcity of good quality oats in this market, and export interests are finding it difficult to fill orders without advancing prices, despite the weakness of futures. Liberal quantities of inferior oats are available, but these are acceptable by both domestic and foreign buyers only at good concessions. Quotations as follows: No. 1 white, 82½c; No. 2 white, 82c; No. 3 white, 81½c, and No. 2 white, 80½@81c.

Cash prices were all marked lower in New York at the close of the week, partly owing to increased offers, but mainly following the weakness in futures. The car shortage is being relieved, it is claimed, and receipts during next week are expected to be on a much larger scale. Farmers apparently are willing to sell at present levels. The demand in this vicinity has not been active, although a moderate trade has been passing around current prices. No. 2 yellow was quoted at $1.71¼; No. 3 yellow, $1.70¾; No. 2 white, $1.71¼; No. 3 white, $1.70¾; No. 2 mixed, $1.70¾, and No. 3 mixed, $1.70¼.

DETROIT.

John Barr, Correspondent.

There is a quiet market here for barley, but the tone is firm at $2.70@2.80 per cwt. for cash No. 3.

Rye is 4c off for the week. Buying for export came to a sudden termination that resulted in weakness. The close was called steady at $1.34 for cash No. 2.

Beans are inactive. Farmers are not delivering freely and there is only moderate buying. Country holders are asking an advance of 25c, but the market is still quoted at $7 per cwt. for immediate and prompt shipment.

Oats have been in good demand all week. Eastern dealers sent in bids, but they wanted heavier oats than Detroit could furnish and trade did not amount to much. Local consumers were active buyers. At the end of the week there were indications of an increase in the supply. Quote: No. 2 white, 76½; No. 3 white, 75½; No. 4 white, 74½.

Corn is very scarce in this market and trading is almost lifeless. The market held steady while others were declining, but on Saturday yielded to the extent of 2c. Receipts were very small and there is not much demand. Quote: Cash No. 3, $1.56; No. 2 and No. 3 yellow, $1.58; No. 4 yellow, $1.56; No. 5 yellow, $1.55; No. 6 yellow, $1.54. New corn is 10@16c lower than old.

The following resolution was passed by the Directors of the Board of Trade Nov. 12, 1919: "Resolved that on and after this date all interest charges on advancements against grain bought either on time shipment from the country or on spot shall be limited to six (6) days from and inclusive of the date when official inspection shall have been made and bill of lading surrendered to proper railroad authority with correct switching instruction. In no instance shall interest be charged after the date of unloading."

Hon. F. W. Hay, of Hay Brothers, grain dealers at Listowel, Ontario, was a visitor on 'Change last week. Mr. Hay is a member of the Ontario legislature, and as that part of Canada may have a spell of wetness before the prohibition law goes into force, Mr. Hay's opinion on wet goods was sought with much eagerness by grain dealers, for part of Ontario comes within a mile of dry Michigan. Mr. Hay did not know much about the drink question, but proceeded from here to Montreal and promised to write at the earliest opportunity and let the members know what their chances are for having a drink.

CLEVELAND.

F. R. Sowers, Correspondent.

In the oats market there is not a whole lot doing. The movement is light and no particular tendency on the part of the farmers to ship.

A. W. Clark of the Cleveland Grain Co. is in New York this week representing the Grain and Hay Exchange at a conference on cross lake grain rates.

Prices on No. 3 yellow declined from $1.65 to $1.58 from November 8th to November 12th. While oats, between the same dates, has risen in price from 74¾c to 75¾c.

On Tuesday, November 11th, the board of directors of the Grain and Hay Exchange met for luncheon at the Chamber of Commerce for the transaction of regular routine business.

The following members of the exchange represented this market at the meeting of the Ohio Grain Dealers at Columbus: F. E. Watkins, Cleveland Grain Co.; H. M. Strauss, H. M. Strauss & Co.; Frank Caine from the office of E. I. Bailey.

Work has just been completed in the laboratory of the Grain and Hay Exchange where the grain testers have been wired and in the future will be operated entirely by electricity, thus providing what is believed to be the most satisfactory and efficient manner for making moisture tests.

Frank Caine, well known throughout the feed trade of the country, being associated with E. I. Bailey, of this city, has been again elected as mayor of Euclid Heights, Cleveland's most exclusive and expensive suburb. His reputation as an efficient mayor has reached a point where the Democratic party does not take the trouble of putting up a ticket in opposition to Mr. Caine's Republican ticket. This honor for a feed merchant is significant.

A survey of conditions through the state with reference to corn indicates that its movement will be held up from two to three weeks on account of the unusual wet weather. It has been predicted that corn now contains at least 2 per cent more moisture than it did two weeks ago. Grain drying is going to be popular and a demand for elevators with drying facilities. The Cleveland Grain Co. reports that a car of No. 5 yellow out of Indianapolis five days arrived at destination heated discolored.

The Cleveland grain trade has been vised that on Monday, November Embargo AG 99 has been cancelled and mit system covering the movemen grain from country stations to pri markets discontinued. It is stated in cancellation of Embargo AG 99 that vidual permits are still required on ments from one primary market to other. This is good news to the trade in general and especially to the try shipper who has had difficulty in ting permits where shipments were made to primary markets.

BALTIMORE.

Robert C. Neu, Correspondent.

L. Scott, V. A. Hageman and W. A. Donald, of Toronto, Canada, were vis on the floor of the Baltimore Chamb Commerce last week.

Four new members were elected to Baltimore Chamber of Commerce at regular monthly meeting of the boa directors held November 10.

Edward T. Sheil, Jr., of the Balti Grain Co., who had been "housed up" two weeks with an infected foot, is again and attending to business, as u

TOLEDO.

Carl Bryant, Correspondent.

nel, president of the Mennel Mill- left last week to spend the win- alifornia.

Slawson of The E. B. Slawson Co., been in New York and Philadel- past week, returned Saturday.

ing the fall meeting of the Ohio lers' Ass'n at Columbus this week Cummings of J. F. Zahm & Co.; ing of Southworth & Co.; Edgar hter of Oak Harbor, and Law- ke of Napoleon, O.

L. G. Macomber, traffic manager of Toledo Produce Exchange, attended a meeting of the Easter Freight Traffic Committee in New York, Monday, discussing ex-lake and re-shipping rates. All of the important grain markets on the great lakes, including Duluth, were represented.

Produce Exchange announced on Saturday the opening of the Commercial Seed Laboratory, in charge of J. E. Benedict, for testing of clovers, timothy and other non-chaffy seeds for germination and purity. Samples will be tested to ascertain compliance with any state seed law or with the Federal seed importation act, and should be mailed to the Produce Exchange secretary, or any firm member, or to the laboratory direct.

Bill Cummings sat up all night in a hotel at Lima, O., following a meeting of grain dealers at Sidney Monday evening, listening, directing and adding words of encouragement to the syncopated strains of guttural jazz sent forth into the night by George ("Woody"" Woodman, with whom he had graciously consented to share his room. Some day Bill will compose a piece of music that will startle the world and in it will be incorporated all the drum-breaking, nerve-racking, weird misuse of the power of utterance as produced by "Woody," through the long hours of the night and minutely recorded by Bill with easy nonchalance. "Woody" looked pale and haggard on 'Change Tuesday, insisting that Bill awakened him several times during the night to demand that he "repeat the chorus" or to tell him that he had flatted his last high "C."

Cash Grain Markets.

Spot corn in good demand from feeding interests and premiums on early arrivals well over futures. Range of prices during the week: No. 3 yellow, $1.41⅞; No. 4 yellow, $1.37@1.40½; No. 5 yellow, $1.31¼@1.34½; No. 6 yellow, $1.28⅞@1.31¼; No. 4 mixed, $1.37; sample yellow, heating and musty, $1.17¾@1.18⅞; sample yellow, moisture 25.4 per cent, $1.21⅝; sample yellow, moisture 24 per cent, $1.20½.

No. 2 white oats sold during the week at 72¼@73⅜c; No. 3 white, 72¼c. Premium being paid for heavy test oats. Demand urgent with cash prices about unchanged. Rye market is sick. Receipts heavy, prices lower, demand nil.

Buying cash and selling futures. Sales here, No. 2 rye, $1.32½; No. 3, $1.30. Cash wheat demand increasing and premium now over export basis. Sales during the week were: No. 2 red, $2.22½; No. 3 red, $2.20¾@2.21½; No. 4 red, $2.15; No. 2 mixed, $2.21; sample red, weevil and musty, $2.10¾; part car No. 3 dark northern, $2.79. Should corn maintain present premium dealers anticipate big demand for feeding barley. Receipts are light; prices higher. Receipts for week: Wheat, 81 cars; corn, 25; oats, 31; rye, 32; barley, 1.

CHICAGO.

C. H. Thayer returned from a western Iowa trip reporting farmers holding for around $1.50 for corn.

J. S. Brown, traffic manager of the Board is in New York on the Northwest case and the ex-lake hearing.

The fertilizer offices of Armour & Co. have been removed from the stock yards to the McKinlock building in the loop.

Frank Coles of Middletown, Conn., visited Chicago and Western markets. He reported the demand good for grain but only fair for wheat feeds in his territory.

Application for membership in the Chicago Board of Trade has been filed by John A. Powers, Jr., and A. J. Clark and C. M. Rich have posted their memberships for transfer.

Wilson & Co., Inc., packers have purchased the stock of the Chatham Packing Co. at Chatham, Ontario. This company, a subsidiary, will be known as Wilson Canadian Co., Ltd.

Lee Callahan of Louisville visited Chicago friends last week, speaking optimistically of the business of his city now that the public elevator is operating fully and private houses are increasing their facilities.

John W. Eckhart & Co., wholesale flour jobbers, are planning a new location for their business. They have been 20 years in the one spot which block is to be torn down in order that a cold storage warehouse may be built.

The memory of the grain man is indeed short, only natural in considering the way in which he does business. It has been mentioned, however, by those who recall the 1915 weevilly wheat that they had more weevil to the sample than we now have to the car.

The Department of Agriculture, in response to a request made by the secretary of the Chicago Board of Trade, will hereafter give out crop reports at 1 p. m., Chicago time, when they are to be given the public on a Saturday, unless the report is too heavy to be completed by that time.

Among floor visitors of the Chicago Board of Trade last week were the following: Mr. Hayes, of Little Rock, Ark.; F. A. Coles, Middletown, Conn.; J. F. Redfield, Rhinelander, Wis.; Jules Smith, Ft. Worth, Tex.; C. B. Jenkins, Noblesville, Ind.; Herman Short, Oklahoma City, Okla.; Mark Schaffer, West Liberty, Ia.; A. H. Rich, Keokuk, Ia.; E. H. Griffin, Detroit, Mich.; B. S. Williams, Sheffield, Ill.

A New Firm.

The first of January, in addition to furnishing many good resolutions for the New Year, usually records many business changes and notable among them is the announcement of the new firm of Stein, Alstrin & Co., which will succeed to the Chicago end of the stock and grain brokerage business now conducted by Block, Maloney & Co., 203 South La Salle street.

FRANK E. ALSTRIN,
Chicago.

The personnel of the firm, which will engage actively in business at the same site Jan. 1, is composed of L. Montefiore Stein, who has recently been admitted to membership in the New York stock, cotton and produce exchanges, Frank E. Alstrin, who has long been identified with prominent Chicago grain firms and whose experience has been of so wide a character that his opinion is eagerly sought by those in the trade, and Herbert J. Blum, a special partner.

ST. LOUIS.

E. E. Reeves, Correspondent.

Local commission merchants report that the suspension of the individual-permit system has not resulted in the increased business that was expected.

E. S. Rosenbaum, of the J. Rosenbaum Grain Co. of Chicago, has purchased the membership of Thomas W. Carter, Jr., and has made application for membership in the Merchants' Exchange.

Sim. Fernendes, of the Murphy Grain Co. of Springfield, Ill., has secured the membership of the late Charles J. Reed, and is among the applicants for membership in the Merchants' Exchange.

E. W. Lansing, Merchants' Exchange representative for James E. Bennett & Co., of Chicago, has announced that his firm has opened a private wire branch office at 116 Marietta St., Excelsior Springs, Mo.

L. N. Hart, of the Mid-West Consumers' Grain Co. of Des Moines, Ia., who will be admitted to membership in the Merchants' Exchange, at the next meeting of the board of directors, has done considerable business in this market through the J. H. Teasdale Commission Co., but now expects to attend to most of this business himself.

The grain trade in the Mississippi Valley will be greatly interested in the announcement that in addition to the flourishing Federal Barge Line, a privately owned barge line is to be established around the first of the year between St. Louis and New Orleans. The service will be opened by the Sugar Products Company, which has purchased the barges formerly owned by the Inco Navigation Company. The Sugar Products Company also operates a line of steamships between New Orleans and Cuba, Porto Rico, Santo Domingo and Venezuela ports.

Anheuser-Busch, Inc.

The Anheuser-Busch Brewing Ass'n, which formerly was one of the largest users of barley in the world, has materially changed the character of its business, and while it will continue to use much barley and other grains, it will not buy as much as formerly, as its products are more diversified. The name of the Association has been changed to the "Anheuser-Busch, Incorporated," and last week the stockholders also voted to enlarge the scope of the company and to authorize an extension of its charter powers so as to permit it to manufacture malt sirup.

According to August A. Busch, president, the sirup will be sold only to wholesalers for a time, but later may be sold for domestic use, and there is a possibility that the business may include malt sirup candy.

The stockholders likewise voted to permit the company to become an industrial distiller of alcohol under Government license. Manufacture of near-beer will be continued, it was announced.

The mechanical departments will be operated in various lines of business, one of these now making auto bodies for the company and also for the open market.

KANSAS CITY.

T. J. Tanner, Correspondent.

The last of the grain in the Murray elevator was removed November 15, slightly more than two months after the explosion and fire in that house. Work on the rebuilding of the elevator will begin in a few days.

Failure to pay its 1 per cent administration fee has cost the G. H. Snider Roller Mills of Gunter, Tex., its Federal license. The United States Grain Corporation also accuses the company of failure to appear for a hearing and of ignoring letters and telegrams.

James Hutchins, of Ponca City, former president of the Oklahoma Grain Dealers' Association, spent a day in Kansas City this week. Mr. Hutchins said the seeding of wheat in Oklahoma was still in progress, but that the total acreage would be one-third short of last year's planting.

While endeavoring to relieve a choked chute in the elevator of the Schreiber Flour & Cereal Co., in the West bottoms, last Monday, George Bush, an employe, fell into a bin several feet below and was immediately covered with a ton or more of bran. Before he was rescued he died from suffocation.

R. A. Jeanneret, secretary of the Moore-Seaver Grain Co., has applied for membership in the Board of Trade. Mr. Jeanneret has been connected with the company for 10 years. He bought the certificate of W. H. Perrine, of Chicago, who formerly was in the grain business in Kansas City. The price paid was $14,000, which includes a transfer fee of $500.

lightly affected by weevil in the "sample grade" class has been of much benefit to sellers in Kansas City. A great deal of red wheat, and some hard, coming to the market is weevil infested, but otherwise sound and clean. Handlers declare the grain should be sold on its real merits and under high grades.

James Russell, grain buyer for the United States Grain Corporation, anticipating the discontinuation of the corporation's buying activities in Kansas City for the remainder of the season, has tendered his resignation, which is to become effective December 1. Before engaging with the grain corporation last July, Mr. Russell was chief sampler for the Board of Trade. He will return to his old position. B. M. Hayward, present chief sampler, will be assistant to Mr. Russell.

Another appeal has been made by the transportation committee of the Board of Trade for the maximum loading of cars with grain in both inbound and outbound shipments. According to records of the Railroad Administration, outbound shipments from Kansas City during the last 10 days of October utilized only 97 per cent of the car capacity, while Omaha and Minneapolis utilized 107 and 104 per cent, respectively. It is said that active measures will be taken to increase car loading in Kansas City.

Federal Wheat Distribution.

Requisitions filed this week for the wheat to be allotted from the Kansas City stocks of the United States Grain Corporation November 24 indicate that demand will exceed the supply. D. F. Piazzek, vice-president of the corporation and agent for the Kansas City zone, said Saturday that all of the hard wheat, less than 3,000,000 bus., had been asked for by mills in the Northwest, the East, the West and in Kansas City. The 5,000,000 bus. of red wheat is also going fast on requisitions from Texas and elsewhere. It is likely that all wheat will have to be prorated among applicants.

The corporation owns 7,792,000 bus. of wheat of various kinds in Kansas City, including 7,389,000 bus. bought from elevator companies on warehouse receipts and 403,000 bus. taken in carlots in the open market. For some time the market has been too high to permit deliveries, except durum or low grades, to the corporation at the guaranteed price basis, which is $2.20 for No. 1 hard and $2.18 for No. 1 red.

In the hard wheat holdings of the corporation the elevators sold nothing above No. 3, and that is all that can be expected when this grain is loaded out to mills. The corporation has only 10,000 bus. of No. 2 and No. 3 hard in special bins representing floor purchases that have not been shipped out since harvest. In special bins the corporation has 75,000 bus. of No. 2 and No. 3 red. The rest of the 403,000 bus. held by the corporation in special bins is durum, mixed, etc.

Elevator men say the wheat they will deliver against sales made to the corporation on warehouse receipts will include a considerable percentage of No. 2 red. They are not especially desirous of filling the sales with No. 3, though it could be done at a penalty against sales to the Government of No. 2. The No. 2 red was sold at $2.15 and No. 3 at $2.12, and as far as possible No. 2 will be loaded out at the 3c premium. Whatever No. 3 they may have on hand will sell in private business relatively as high as No. 2. As the elevators have practically no No. 2 hard, they will deliver only No. 3 of that grain, at $2.12. The grain corporation's selling price to mills is to be 7c over cost, so that No. 2 red will bring $2.22 and No. 3 red and No. 3 hard $2.19. These prices are 11@13c below the present market on No. 2 red, 11@19c under on No. 3 red and show 25@55c discount in the case of No. 3 hard.

When the grain corporation announced its decision to resell wheat in domestic channels, the market broke about 9c a bushel, but the bearish feeling created by the possible dumping of 60,000,000 or 65,000,000 bus. throughout the United States was quickly dispelled and carlot prices not only recovered the loss, but rose to new high levels for the year. Restoration of confidence was based on the theory of shortage of milling grades in both winter and spring wheat territory. The release of Government wheat so much earlier than last year was regarded as a confirmation of serious milling needs, a possible overestimate of the crop and a reflection of the low average quality and lighter average weight per bushel, as shown officially this year. It is believed here that the market will rule stronger than ever when the balance wheel of Federal stocks shall have been removed, and that the distribution of Government wheat from elevators will call for considerable quantities of better goods for mixing purposes to raise the quality.

Cash Grain Markets.

Wheat—Receipts for the week, 1,346 cars, against 895 a week ago and 404 a year ago. Both local millers and shippers were active buyers throughout the week, having recovered from the shock that resulted from the proposed reselling of Government stocks. The main consideration was the probable continued scarcity of high grade hard wheat. The belief existed that choice red wheat will also be inadequate to meet demands. While the Federal releasement will be important and at a sharp discount, good qualities will be required to go along with the grain to the distributors. A better car situation exists, but some farmers are holding their best grain for $3 a bushel and country mills are said to be absorbing as much grain as they can safely carry. Hard wheat here advanced

BOSTON.

R. S. Wallace, Correspondent.

There were no exports of grain for the week ending November 15th reported.

Stocks of grain in the regular elevators November 10th were: Wheat, 1,448,105 bus.; oats, 124,919 bus.; rye, 234,091 bus.; barley, 13,578 bus.

The following were visitors on 'Change during the past week: H. Patten, Indianapolis, Ind.; Leroy D. Godfrey and S. N. Osgood, Minneapolis, Minn.; Frank G. Ely, Chicago, Ill.; Daniel Anderson, Toledo, O., and C. A. Gibson, Washington, D. C.

A fair demand this week for nearby corn with liberal offerings. Prices quoted as follows: For shipment, old No. 2 yellow corn, $1.73 to $1.75 per bushel; old No. 3 yellow corn, $1.72 to $1.74 per bushel; new No. 3 yellow corn, $1.66 to $1.68 per bushel; new No. 4 yellow corn, $1.64 to $1.66 per bushel. Receipts for the week ending November 15th were 4,100 bushels.

A fair demand reported for nearby oats with the market quoted about the same as a week ago, the following prices being quoted: Fancy 38/40 lbs. clipped white oats 86c to 86½c per bushel; regular 38/40 lbs. clipped white oats, 85c to 85½c per bushel; regular 36/38 lbs. clipped white oats, 84c to 84½c per bushel. Receipts for the week ending November 15th were 42,710 bushels.

CINCINNATI.

George Mosbacker, Correspondent.

Wm. R. McQuillan, of McQuillan & Curtus, is confined to his home with a severe attack of rheumatism.

President E. B. Terrill, of the Grain and Hay Exchange, returned Friday from a ten-day business trip to the South.

Murray Eisfelder, vice-president of the A. C. Gale Grain Co., has purchased a new home in Rose Hill, the most exclusive residential section of Avondale, Cincinnati's beautiful suburb.

S. S. Reeves, traffic manager of the Grain and Hay Exchange, returned from Chicago Saturday, where he was in attendance at the meetings of the National Industrial Traffic League.

John Collins, Jr., of Collins & Co., was severely injured about the legs by falling bales of hay while showing a prospective buyer the contents of a car at the plugging yards. Fear of blood poisoning necessitated the attendance of a physician and confinement to his home.

There has been practically no market here for rye for several weeks, though stocks on hand are said to be insignificant, but white corn, new ear corn, choice white oats of 33 lbs. and over, No. 2 wheat, and clover and heavy mixed hay are eagerly sought and command substantial premiums.

The trade here generally anticipates a much larger wheat movement from now on, owing to the cancellation of the permit system, and also increased receipts of corn and oats because of the easing of the car situation. Equipment is reported as being moved to the country more freely than for some time.

W. A. Daniel, member of the Mutual Commission Co., was happy this week by the arrival of an eight-pound baby boy at Christ Hospital, Mt. Auburn, where Mrs. Daniel is confined. Mother and "Witt, Jr." are reported as doing nicely, while "W. A." proud of his second born boy, receives congratulations.

The Farm Mortgage Company, a Cincinnati organization, to handle first and second farm mortgages, was incorporated at Columbus, Ohio, this week with a preliminary authorized capital of $100,000, all common stock, which is to be increased to $1,000,000 next week. It is stated that a number of prominent bankers and business men are interested in the movement, which will make Cincinnati one of the centers of the country for farm loans and agricultural financing. The new company will supplement the activities of the Federal Farm Loan Banks, which are restricted to loans of 50 per cent of the value of farm real estate and 20 per cent of the improvements.

Ohio produced a corn crop this year of 159,544,000 bus., and a record-breaking average yield of 44 bus. per acre, according to J. L. Cochrun, in charge of the Ohio crop reporting service. This exceeds last year's crop by about 26,000,000 bus. and the ten-year average production of the state by nearly 13,000,000 bus. The quality of the crop is 92 per cent, nine points above the ten-year average, and would undoubtedly have been higher had the October weather been less unfavorable for the proper conditioning of the grain. The important role that the silo is playing in the agricultural industry of the state is shown by the fact that about 11 per cent of the total acreage planted to corn this year was cut for silos, with an average yield of 8.4 tons per acre.

Cash Markets.

Wheat—The government's announcement to resell wheat had little or no affect on the local demand, and the fairly increased receipts were quickly taken at steady to a shade better prices for good milling quality. Few of the arrivals grading No. 2 were offered on the sample market. Low grades and sample grain also sold well at firmer values. No. 1 red winter, track, $2.30@2.31; No. 2 red winter, track, $2.28½@2.30; No. 3 red winter, track, $2.23@2.26; No. 4 red winter, track, $2.17@2.19; No. 5 red winter, track, $2.13@2.15; sample, as to quality, $2@2.20. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—There was an active demand for either old or new corn here the past week, but receipts continued disappointingly small, and prices for old, though affected on several days by option fluctuations, ruled about 7c higher for white grades and 2c for yellow and mixed as compared with a week ago. New corn mostly graded No. 5 or sample, and was discounted 7c to 10c per bushel from old, with driers freely absorbing the offerings. Kiln dried sold readily at old crop values. New ear corn arrivals were comparatively larger and sold well at steady to firmer prices. No. 1 white, $1.64@1.65; No. 2 white, $1.63@1.64; No. 3 white, $1.61@1.63; No. 4 white, $1.59@1.61; No. 5 white, $1.57@1.59; No. 6 white, $1.55@1.57; No. 1 yellow, $1.52@1.53; No. 2 yellow, $1.50@1.52; No. 3 yellow, $1.48@1.50; No. 4 yellow, $1.46@1.48; No. 5 yellow, $1.44@1.46; No. 6 yellow, $1.42@1.44; No. 1 mixed, $1.50@1.51; No. 2 mixed, $1.49@1.50; No. 3 mixed, $1.47@1.49; No. 4 mixed, $1.45@1.47; No. 5 mixed, $1.43@1.45; No. 6 mixed, $1.41@1.43.

Oats—Offerings of oats were small during the week and the market a shade firmer. The demand was mainly from a few local feed dealers, who were apparently supplied by the light receipts. There was an excellent demand for choice heavy grain of 33 lbs. or over for shipment, but arrivals mostly averaged around 28 to 29 lbs. Mixed was scarce and only in fair demand. No. 2 white, 76c; No. 3 white, 75¼c; No. 4 white, 74½@75c; No. 2 mixed, 75@75½c; No. 3 mixed, 74@75c; No. 4 mixed, 73@74c.

BUFFALO.

E. Bangasser, Correspondent.

Cars are scarce here and about the only grain being shipped out is by canal, and this is nearly all rye.

Rye was wanted but at bids too low for acceptance as a rule. No. 2 sold at $1.42 on track and at the close $1.42 was bid.

John Kam, one of the best known maltsters in this city, died last Monday after an illness of several months. He was 48 years old and was highly respected by business men in Buffalo.

Although the tables were cleaned of winter wheat early in the week, millers held off at the close and nothing could be done even with the best grades with quite a few cars offered. No attempt was made to shade prices from last week. Some very high prices were asked for fancy varieties of wheat for shipment.

There was an advance of 1½c in oats this week, but at the high point buyers held off and quite a few cars had to be carried over. The sales early in the week at ½c advance were quite heavy and while a few buyers paid 1c more it was principally for choice weights. The mill oats offered were taken at 1c to 2c under other sales. Closing: No. 1 white, 79¾c; No. 2 white, 79¼c; No. 3 white, 78¼c; No. 4 white, 77¼c, on track, through billed.

Corn sold at $1.67 for No. 2 yellow and then dropped to $1.65, at which price it remained during the rest of the week with offerings in store mostly. New and mixed old and new, with a few cars of kiln dried, composed the arrivals during the latter part of the week and there was a wide range in prices. It will be impossible to fix prices for a few days. There was good buying but buyers were critical, conserving quality. Sales of No. 4 yellow, $1.50@1.55; No. 5 yellow, $1.35 to $1.45 for new and partly old. At the close today No. 2 yellow old sold at $1.65 and new at $1.62.

Inspection track receipts for the week: Wheat—No. 2 red, 14 cars; No. 3 red, 22 cars; No. 4 red, 10 cars; No. 5 red, 8 cars; sample, 2 cars; No. 2 soft white, 2 cars; No. 3 soft white, 3 cars; sample, 1 car; No. 1 mixed, 2 cars; No. 2 mixed, 12 cars; No. 3 mixed, 22 cars; No. 4 mixed, 1 car; No. 2 hard winter, 21 cars; No. 3 hard winter, 17 cars; No. 4 hard winter, 18 cars; sample, 3 cars; No. 1 northern, 3 cars; No. 3 northern, 11 cars; No. 4 northern, 15 cars; No. 5 northern, 7 cars; sample, 1 car; No. 1 dark northern, 1 car; No. 2 dark northern, 4 cars; No. 3 dark northern, 3 cars; No. 4 dark northern, 2 cars. Corn—No. 1 yellow, 18 cars; No. 2 yellow, 52 cars; No. 3 yellow, 7 cars; No. 4 yellow, 11 cars; No. 5 yellow, 12 cars; No. 6 yellow, 1 cars; sample, 6 cars; No. 2 mixed, 1

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

D. R. Bruce, assistant sales manager of the Grain Belt Mills, left on a business trip through Arkansas and Oklahoma.

T. P. Gordon has opened up a private wire office at Tarkio, Mo., under the charge of A. E. Temple. Thompson & McKinnon wire is used.

A. J. Brunswick, Fred Frederick and C. E. Addington are at present in Forth Worth, Texas, at the trial of the suit against the old Walker Grain Co.

The following were registered on the Grain Exchange during the week: C. F. Wescott, Omaha; F. C. Uhlman, Baltimore; W. F. Uhlman, C. L. Clevenger, Rockport, Mo.; J. J. McNabb, Joplin, Mo.; J. H. Pawley, Purcell, Mo.; M. L. Batson, Fortesque, Mo.; Frank Bevan, Odell, Neb.; J. T. Bradshaw, Kansas City; D. S. Warrick, Denver; C. A. Hurst, Bolckow, Mo.; C. P. White, Rea, Mo.; G. B. Rooney, Minneola; J. T. Workman, Shenandoah, Ia.; E. R. Thresher, Omaha, Neb.

Officers for the coming year were elected by the St. Joseph Live Stock Exchange last Monday afternoon. A. H. Baker and True David were respectively elected president and vice-president. Mr. Baker will serve his fourth consecutive term. The following were elected board of directors: J. C. Sager, D. McPhee, R. F. Hicks; Board of Arbitration, D. F. Sherlock, M. D. Young, Louis Brown, Horace Wood and A. E. Rush; Board of Appeals, T. N. Hutton, H. H. Otten, O. M. Hoover, J. I. Hunter and R. E. Shea; Prosecuting Committee, L. Blanchard, C. G. Kent, J. G. Adams, L. E. Cooper and H. B. Black.

Cash Markets.

Wheat.—Receipts for the week, 191 cars, against 195 a week ago and 51 a year ago. Unfavorable weather and road conditions restricted materially the movement of wheat during the past week. The shortage of offerings of choice milling wheat has become more acute and advances of 5@15c have been established during the week. Extreme bearish sentiment which had prevailed at the close of last week, owing to the resale proposition of the Grain Corporation, has been largely dispersed, and values are now practically the highest on the crop. Light test northeastern Kansas No. 3 hard of fair milling quality sold Saturday at $2.45. Demand is particularly urgent for strong milling wheat and intermediate grades are in relatively good demand. Cash wheat follows: No. 1 dark hard, $2.44@2.65; No. 2 dark hard, $2.42@2.62; No. 3 dark hard, $2.40@2.60; No. 4 dark hard, $2.36@2.57; No. 5 dark hard, $2.33@2.48; No. 1 hard, $2.38@2.60; No. 2 hard, $2.35@2.58; No. 3 hard, $2.32@2.56; No. 4 hard, $2.27@2.50; No. 5 hard, $2.20@2.38. No. 1 yellow hard, $2.38@2.40; No. 2 yellow hard, $2.36@2.38; No. 3 yellow hard, $2.32@2.35; No. 4 yellow hard, $2.30@2.33; No. 5 yellow hard, $2.15@2.24; No. 1 red, $2.35@2.37; No. 2 red, $2.32@2.34; No. 3 red, $2.29@2.31; No. 4 red, $2.23@2.28; No. 5 red, $2.14@2.30.

Corn.—Large declines in the stock market weakened corn futures early in the week. The loss took place Friday and today, and was almost altogether due to the generally favorable prospects of a larger movement from country stations. Cash corn prices have been erratic, and governed primarily by supply and demand. Cash corn follows. Receipts for the week, 24 cars, against 44 a week ago and 96 a year ago. No. 2 yellow, $1.53@1.55; No. 3 yellow, $1.51@1.52; No. 4 yellow, $1.49@1.50; No. 5 yellow, $1.46@1.49; No. 2 white, $1.52@1.53; No. 3 white, $1.49@1.51; No. 4 white $1.47@1.48; No. 5 white, $1.45@1.46; No. 2 mixed, $1.52@1.53; No. 3 mixed, $1.49@1.51; No. 4 mixed, $1.47@1.48; No. 5 mixed, $1.45@1.46.

Oats.—Cash prices have shown much strength. Supplies have been very scarce, and all varieties are in good demand. Receipts for the week, 6 cars, against 9 a week ago and 13 a year ago. Cash prices follow: No. 2 white, 75½@76c; No. 3 white 74½@75½c; No. 2 mixed, 73@74c; No. 3 mixed, 72@73c; No. 2 red, 74@75c; No. 3 red, 72@74c.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

A permit has just been issued to the Louisville Milling Co. for a $25,000 addition to its mill on Floyd street.

The Cotton Seed Products Co., Louisville, has taken out another permit, which is for a $25,000 building, let to C. A. Koerner & Co.

Oats are in good demand, receipts being fair, and the prospects for an even better market. No. 2 white oats are quoted at 76½c and No. 2 mixed, 76c.

No. 2 cash winter soft wheat is selling at $2.30@2.32 in Louisville, the market being strong. Purchases made early in the year are arriving, but there is not much wheat being sold by farmers now.

The Ballard & Ballard Co. is putting in a $25,000 addition to its mill plant and will manufacture a general line of wheat feeds, for stock, poultry and general purposes. This will give the company a full line of mill and manufactured feeds.

A recent industrial census in Louisville showed 318 employes in local flour and corn mills, of which number 52 were skilled workers. However, there appears to be a ballup in these figures, as one company has approximately that many industrial employes.

The flour market is firmer and dealers are not being buzzed as hard, as business is coming in more freely, and mills are busy. Leading mills are quoting short patent at $11.25 a barrel, and long at $10.75 a barrel, and instructing salesmen not to shade prices, as an advance is expected. Corn products are in good demand, mills running sixteen hours a day.

The demand for corn is showing some improvement, although the bulk of the demand is for white milling of No. 2 grade, old corn. Local dealers report the following market on old corn, carlots, Louisville: No. 2 white, $1.64; yellow, $1.59; mixed, $1.58. New dried corn (kiln) is quoted six cents a bushel under old corn, while country run grades are ten to twelve cents under. New corn is steadily improving in quality and movement.

Better weather has resulted in farmers getting back in their fields, but cold weather has set in and there will not be much planting now, with the result that the 1919 fall wheat planting is far below normal. A great deal of wheat land was planted to rye this fall, and will be p under in the spring for corn and crops. Kentucky farmers have not especially successful with wheat an sick of trying. Many farmers w their ground to death in planting s wheat crops in a row during the wa

PHILADELPHIA.

Geo. A. Rudderow, Corresponden

Exports for the week were 609,901 wheat and 17,465 bus. of rye.

John B. Matthaei, traffic manager Commercial Exchange is in Chicag tending the annual meeting of the Na Industrial Traffic League. After whi will go to Canistota, South Dakota, to his brother.

The receipts of flour and grain fo week ending Nov. 15 were 200 bbls 13,182,217 pounds of flour in sacks; 4 bus. wheat; 11,821 bus. corn; 375,194 oats; 36,720 bus. rye; 43,750 bus. mal 500 tons of feed.

The following is a list of cars unl during the month of October, 1919: Richmond Elevator—Wheat, 53 Twentieth Street Elevator—Oats, 60 corn, 16 cars; barley, 2 cars; buckw 1 car. Total, 79 cars.

Geo. I. King, traffic agent of the P delphia & Reading Railway at the

son for the proposed change is the increased cost of labor and all other items entering into the expense of furnishing this service, which make the present charges unremunerative.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

W. R. Bawlf, of N. Bawlf Grain Co., Winnipeg, Man., was in Minneapolis today.

LeRoy Godfrey, of the Godfrey-Blanchard Co., returned Saturday from an Eastern trip.

Dan McKinnon, Minneapolis manager for Thomson & McKinnon, returned last week from a trip to Winnipeg.

Ted Welch, who has been very seriously ill with pneumonia at a Minneapolis hospital, is at home again. He expects to leave for Florida shortly for several months to recuperate.

J. F. Bell, of the Washburn-Crosby Co., has been made a Chevalier of the Legion of Honor by the French Government, in recognition for organizing the milling industry during the first year of the war.

At the opening of the new portion of the trading floor this morning the building committee served cigars and apples as a reward for the patience of the traders, which was sadly strained while the work was being done.

Fire destroyed the Occidental mill of the New Occidental Milling Co., Friday afternoon. The loss is estimated at $100,000. It was one of the oldest mills in the city and a landmark. A shift in the wind was the only thing that saved other milling property.

The new addition to the trading floor of the Minneapolis Chamber of Commerce association was completed Saturday and thrown open to the cash grain traders this morning. This gives the association the best trading floor of any in the country. Connecting up the private table telephones remains to be done.

Cash Wheat.—The demand for cash wheat is very strong in the local market and during the week prices hit a new high level. Receipts of spring wheat are very light and choice stuff is in keen demand. Eastern and central states millers are buying some spring wheat, but the bulk of the offerings are taken by local and Northwestern mills. Importation of Canadian wheat is expected any time.

The demand for winter wheat is very strong, too, and prices advanced considerably during the week. A local milling company sent a representative to Southwestern markets last week and considerable stuff is being consigned from that territory. Dark winter wheat is in keen demand. Local millers have put in requisitions for considerable of the Kansas City wheat. Heavy offerings of Nebraska wheat are reported.

The demand for durum wheat is very strong and prices have gained considerably in the past few days. This wheat shows a good gluten content and is good for mixing.

Corn.—The market was poorly supplied for weeks and the demand from western territory has been strong. Orders from the Pacific Coast have been persistent and North Dakota bought quite a bit. Old corn is in good local milling demand at good premiums over new crop corn. Most of the new crop corn shows high moisture content. Liberal sales of new corn have been made locally for shipment to western territory, some of it out of Chicago territory.

Oats.—The demand for oats is steady and in the past week cash prices were strong compared with the futures. Elevators are good buyers and there is a steady shipping demand for the best grades. Offerings are light daily. No. 3 white sells at December price to 4c over, according to weight. No. 4 white sells at 1@1½c less.

Rye.—The demand for rye is keen and prices are stronger compared with the futures. Elevator companies are bidding much stronger prices compared with the futures and there is a moderate milling demand. Receipts are growing lighter every day and reports from North Dakota say that the farmers are feeding their rye because of the high cost of imported corn.

Flour Department

Reaching grain dealers who handle flour as a side line and for millers, flour brokers and distributors who wish to interest grain and feed dealers in the handling of their product.

The Bennett Milling Co. of Elyria, Ohio, has increased its capital from $200,000 to $350,000.

The Old Fashioned Millers of St. Paul, Minn., has been incorporated with a capital stock of $200,000 by J. C. Enright, F. B. Platt and F. B. Crane.

F. P. Burke is the new manager of the Sperry Flour Mills at Tacoma, Wash. Mr. Burke has been assistant manager for five years.

The regular monthly meeting of the Baltimore Flour Club was held on Nov. 12 at the Merchants' Club, that city. Luncheon was served and plans were discussed for sending a representative delegation to the forthcoming mass meeting of the National Federated Flour Clubs in Buffalo, probably early in December.

The William Kelly Milling Co. of Hutchinson, Kan., one of the largest concerns in the Southwest, has announced a decision to add a 2,000-bbl. unit to its mill in Hutchinson during the coming year. An elevator of 500,000 or 600,000 bus. capacity will also be erected. About $500,000 will be invested in the new construction.

Flour Market.

The withdrawal of the Grain Corporation from export buying of flour has given a black eye to a market already quite dull in most parts of the country, and the result is a very poor demand for almost all flour, save perhaps, the spring patents. Of these there is not a very large stock anywhere on hand. Eastern markets continue dull, with plenty of flour in nearly all locations. The same reports as to dullness come also from Canada where the correspondent of the *Northwestern Miller* says that "the demand has lost its snap" and Ontario wheat is now begging for a market. In the Southwest the demand for the better grades is somewhat improved. Sales, however, are not yet particularly large. Minneapolis reports the demand as quite dead. Prices, however, still continue firm in all of the producing markets.

Flour Production.

The Grain Corporation's bulletin covering the wheat movement and wheat flour production throughout the United States for the week ending Oct. 31, in comparison with the figures for the same period a year ago is as follows:

	1919.	1918.
Wheat receipts—	Bus.	Bus.
From farms, week Oct. 30	18,819,000	15,597,000
Previous week	20,774,000	20,350,000
June 27 to Oct. 31	553,822,000	530,905,000
Flour produced—	Bbls.	Bbls.
During wk. Oct. 31.	3,340,000	2,294,000
Previous week	3,350,000	2,530,000
June 27 to Oct. 31	49,224,000	40,982,000
Total stocks wheat—	Bus.	Bus.
All elvtrs. and mills	293,993,000	287,881,000
Previous week	292,167,000	277,657,000
Change for week	+1,826,000	+10,124,000

EXPORTS WHEAT AND FLOUR.

Exports of wheat and flour, July 1 to Oct. 31, amounted to 56,174,000 bus. of wheat and 6,019,000 bbls. of flour, making a total equal to 83,259,000 bus., compared with 63,519,000 bus. and 5,713,000 bbls. last year, a total equal to 89,227,000 bus.

FLOUR MARKET.

CLEVELAND.

Cleveland, Nov. 15.—Spring wheat flour on less than car lots, per half barrel, in cotton sacks, $12.90@14.57; winter straights, $10.50@11; blended, $11.75@12.75.

PHILADELPHIA.

Philadelphia, Nov. 15.—Flour receipts for the week were 200 bbls. and 13,182,217 lbs. in sacks. The market continues dull and unsettled. Spring wheats are firm and prices were advanced at the close of the week 50c per bbl. in sympathy with the enhanced cost at the mills, but buyers operate cautiously and only for urgent necessities. Winters are especially dull which to a large extent is due to the scarcity of sugar. Business is still confined to resales available below millers' limits.

We quote per 196 lbs., packed in 140-lb. jute sacks: Soft winter straight, Western, $10@10.25; do., nearby, $9.50@9.75; hard winter straight, $11.90@12.20; do., short patent, $12.40@12.90; spring, first, clear, $9.25@9.75; do., patent, $12.50@13; do., short patent, $13.10@13.75; fancy spring and city mills patent, family brands, $13.50@13.75; rye flour, $7.50@7.85 per bbl. in sacks, as to quality.

BALTIMORE.

Baltimore, Nov. 15.—Known brands of spring wheat flour are firmly held, while soft winters are in ample offering and slow sale, although holders take encouragement from the report that there will be an early resumption of flour buying by the Grain Corporation. Prices generally record no change, but rye flour is hard to move. Quotations, per 98-lb. cotton or jute sacks, follow: Spring patent, $13@13.50; spring straight, $12.25@12.75; winter patent, $10.50@10.75; winter straight, $9.75@10.25; rye flour, pure to blended, $6.75@7.75.

CINCINNATI.

Cincinnati, Nov. 18.—The flour market was firmer and higher with a rising tendency in evidence during the week. An active home consuming demand, stimulated by colder weather and improved jobbing trade, due to the prevailing high prices for Northwestern flour, were the contributing factors of a strengthened situation. The acute sugar shortage, existent here for several weeks, threatened operations of bakeshops, but promises of relief were encouraging late in the week. Buying of wheat by mills continued active and practically all in this territory are grinding to capacity. Quotations represent prices in wood. Wood basis is 45c over jute. Winter patent, per bbl., $10.85@11.15; hard patent, bbl., $12.80@13.50; bakers' Kansas patent, bbl., 140 jute, $11.75@12.35; corn flour, 100 sacks inc., $3.30.

BOSTON.

Boston, Nov. 15.—The strong feature of the situation in the local flour market is to be found in the spring wheat markets in the Northwest, and this has been reflected in advances for the week of 25c to 50c for spring patents and 15c to 25c for hard winter patents. At the new figures, many buyers are refusing to operate and others are taking only such lots of flour as necessary to round out their stocks in a prudent way. Soft winter wheat flours are unchanged. Current prices for wheat flours are $12.75@13.75 for standard spring wheat patents, $13.75@14.25 for special short patents, $9.25@10 for spring clears, $11.75@13.25 for hard winter patents, $11@11.50 for soft winter patents, $10.25@10.75 for soft winter straights, and $10@10.50 for soft winter clears. Rye flour is quoted at $8@8.40 for choice white patents. Receipts for the week ending Nov. 15 were 56,830 bbls.

NEW YORK.

New York, Nov. 15.—During the week short patent flour was wanted for the family trade and prices were very strong, otherwise the flour market here ruled dull and it was difficult to make sales. All the hard wheat mills continued to take very firm view of the situation, as the Government's offer to resell wheat to millers had made no impression on the market for high grade hard wheat. Buyers here were not disposed to pay the figures asked, and as far as the baking trade was concerned the market was in a deadlocked condition.

Flours were being pressed for sale but with little result. However, flour in second hands was somewhat less plentiful, and the opinion prevailed here that most of the good flour here had been picked up by jobbers and consumers. Buyers and sellers were generally 50c to $1 apart and neither side was disposed to make concessions.

Spring patents were quoted at $12.50@13; soft winter straights, $10@10.30; Kansas straights, $11.75@12.25; and Kansas patents, $12.25@12.75 per 196 lbs. in 140-lb. jute sacks, in carlots, to arrive.

MILWAUKEE.

Milwaukee, Nov. 15.—The local flour market continues very active, millers throughout the territory reporting a brisk demand and good inquiry throughout the week. The majority of the mills are well oversold and are awaiting relieved shipping conditions so orders on hand can be filled. Premiums have advanced 10@20c. Spring wheat patent is quoted at lower by 50c on inside and 15c on outside prices, while straight is also 30c easier on inside prices.

The rye market, which is slow in regaining itself, has showed a slight improvement for the week and prices generally are slightly higher.

Milwaukee mills produced a total of 20,300 bbls. of flour, of which 16,800 bbls. were wheat flour, or about 70 per cent of total capacity, as compared with 15,600, or 65 per cent of total capacity, for the previous week. Rye production for the week was 3,500 bbls. Current quotations, in carlots, per bbl., in cotton, are:

Spring wheat patent, $12.50@13; straight, $11.65@12.25; first clear, $8.50@9; rye flour, pure, white, $7.60@7.75; rye flour, straight, $7.20@7.35; rye flour, dark, $6.25@6.55. Corn flour is nominally quoted at $3.90; cornmeal, white, $3.85, and corn grits, $3.85, all in 100-lb. sacks.

DULUTH.

Duluth, Nov. 15.—With millers paying high premiums for spring wheat the flour market was strong here during the last week and prices were advanced 60@75c. Millers here were rushed in making end of the lake navigation shipments to East and large tonnages were loaded. District demand also quickened and mills reported that they are fairly well up. Prices of flour per bbl., in carlots, as follows: Family patents, jute, $12.13.60; bakers' patents, jute, $13@13.25; clears, $9.50@9.75; second clears, $6.

NASHVILLE.

Nashville, Tenn., Nov. 17.—Demand continues good for flour in the Southeast, production is being maintained at winter wheat mills. Prices are not changed as mills have to pay high price for wheat. Shipping instructions hold up satisfactorily.

Nashville and Southeastern flour mills with capacity of 202,170 bbls., had output last week of 144,749 bbls., or 71.5 per cent of capacity, which compared with 67 per cent the preceding week and 50.2 per cent the same week last year.

Prices: First soft winter wheat patents, 98-lb. cotton, f. o. b. Ohio river points, $11.50@11.75; standard patents, $10.80; straight patents, $10.20@10.40.

Under an order of the Interstate Commerce Commission the Southern classification committee is ordered to make a rate on wheat flour and corn meal in rope bags of one-fourth bbl. and less not later than Jan. 20, 1920. Heretofore such shipments in paper bags have not been permitted in interstate business.

KANSAS CITY.

Kansas City, Nov. 15.—Impending distribution of the United States Grain Corporation's wheat stocks at a big discount under current market prices restricted buying of flour and checked shipping directions on previous orders early in the week. Later there was a resumption of inquiries and purchases, in view of the advancing wheat market. Millers were upset by the conflicting situation in regard to wheat, with probable continued high premiums on milling grades, that prepared to make new bookings until they learned how much federal wheat each mill will get. Prices of flour were marked sharply, especially by hard wheat mills. The patent grades are still the most wanted mainly, denoting what is left for family trade. Bakers are believed to have fair stocks of straight on hand or big for early delivery. The clear and low grades are dull in the absence of a export outlet, but a resumption of Government buying for this purpose is looked for in the near future. Production in Kansas for the week was 76,000 bbls., against a week previous and 60,800 a year ago.

Following are the Kansas City prices flour in carlots, sacked in 98-lb. cotton bags, per bbl.:

Hard wheat—	Nov. 15.	Nov.
Short patent	$12.50@13.50	$12.00@
Long patent	12.25@12.75	11.50@
Straight	10.25@10.65	10.90@1
1st clear	10.50@11.50	10.00@
2nd clear	8.50@ 9.50	7.50@8
Low grade	6.00@ 7.50	6.00@6
Soft wheat—		
Fancy patent	11.10@11.40	11.00@1
Standard patent	10.75@11.15	10.60@1
Straight	10.25@10.65	10.10@
Clear	9.50@10.00	9.40@9
Low grade	6.50@ 7.50	6.50@7

TOLEDO.

Toledo, Nov. 15.—Flour production (T ledo mills this week was 29,700 bbls. r per cent of capacity. Domestic dem only fair. Grain Corporation annou ment of their intention to resell their supplies of soft and hard winter does not interest millers here except possibly one mill will purchase latte riety for special trade. Although de for cash wheat is increasing and are higher they are still less tha Grain Corporation's figure with cents carrying charge added. Va patent, $9.95@10.10 bulk; $10.45@10. halves cotton; Kansas hard patent, halves cotton, carlots, f. o. b., Toledo

RATE ON ROPE-PAPER SAC

In the case of Rope-Paper Sack Bureau *vs.* Atlantic Coast Line R. C *et al.*, the Commerce Commission ruled (55 I.C.C. 209) that the rule regulations of the Southern Classification, which in effect prohibits the portation of flour and meal in rope sacks, is unreasonable and unduly j dicial. The defendants, the Dir General of Railroads and practical of the railroads and steamships o ing in Southern territory, are req to cease such discrimination on fore Jan. 20, 1920, and thereafter stain from putting into effect rate regulations which prohibit the portation in Southern territory of and meal in any quantity in rope sacks and in rope-paper container not exceeding ¼ bbl. in amoun sack or bag.

Rope-paper, it may be explai is made from old manila rope w small percentage of burlap baggin wood pulp. Although made from materials these bags, the Commis says, are clean and sanitary. Th nila fiber is longer in proportion

omitted.

Good Buckwheat Flour.

re are certain fundamental facts ding buckwheat that must be thory understood by the trade if they o weigh one quotation against and thus not only be able to intly buy but also be able to emze these same important points in g. Competition in buckwheat is o much a matter of price as it is ality, and quality in buckwheat is means measured by the same fachat govern a comparison of other products. The consumer himas established the standard by all buckwheat products must be ired, and the chief factor in this ard is "buckwheat flavor"; for in g buckwheat in preference to othcake flours, it is "buckwheat flathat the consumer seeks. To incate "buckwheat flavor" in the highest degree in the product, necessitates using, in order to make a safe product, a process known in the trade as "kiln drying." "Buckwheat flavor" is largely a property of the darker portion of the buckwheat berry, and varies directly with the percentages of fat, protein and ash. The greater these percentages, the higher the degree of "buckwheat flavor," and conversely, the lower the percentages the less the "buckwheat flavor." Further, the darker the buckwheat the greater the percentages of fat, protein and ash, and therefore the greater the "buckwheat flavor"; conversely the whiter the buckwheat the lower the percentages of fat, protein and ash, and therefore the less the degree of "buckwheat flavor." Fat, protein and ash also measure the food value of buckwheat, these food values increasing with the greater percentages of fat, protein and ash, and decreasing with the lower percentages. Necessarily then it follows that the buckwheat which possesses in the highest degree what is known as "buckwheat flavor" also possesses the greatest food value and must be dark in color.

But a combination of the maximum degree of fat, protein and ash with the natural moisture contents of buckwheat grain would result in a product that would quickly spoil and be suitable only for quick consumption in nearby territory. Therefore for interstate commerce to produce a buckwheat product having the maximum degree of flavor, which means, as we have shown, a maximum of fat, protein and ash, requires that the natural moisture contents of the buckwheat berry be reduced to such a point that the product not become unsound during the whole period in which it is ordinarily consumed. This process of evaporating the excess moisture contents is called "kiln drying" and it is this process which has made the merchant milling of buckwheat possible.—*Blodgett-Holmes Co.*

Within the next month or two the Crop Reporting Service of Iowa will be consolidated as in Illinois, Michigan, etc., as a co-operative service, the local service joining hands with that of the Bureau of Crop Estimates. By this method, advised by the Bureau of Crop Estimates, much duplication work will be eliminated and the farmers of Iowa as well as those of the entire nation as to Iowa reports will be much better served than ever before.

Grain vessels are now beginning to congest the Buffalo harbor.

FOREIGN

Large areas in Germany will not be sown to winter grains on account of backward season.

Licenses are no longer required in Great Britain to purchase or sell either linseed or the old product.

The Algerian exportable surplus of wheat and barley will be taken by France for the army, the wheat at the equivalent of $3.65 per bu. and the barley at $1.77 at the dock.

Commercial Attache Abbott cabled from Tokio under date of Nov. 13 that the second official forecast of the rice crop of Japan places the yield at 310,500,000 bus., or 30,000,000 bus. above the average.

Bucharest reports that crops in Roumania this year are so exceptionally good that considerable quantities of wheat and corn may be exported. Bulgaria has a good crop, and therefore the Roumanian wheat will go elsewhere, perhaps to Turkey.

Bordeaux reports ideal weather for the seeding of fall grain except that there is complaint of lack of fertilizer so that a top dressing will be necessary in the spring. Supply of seed, however, has been somewhat delayed by inadequate transport facilities. An increase of wheat acreage is hoped for, although growers are said to prefer the sowing of oats and barley rather than wheat, the former grains realizing better prices and costing less for cultivation.

In late October fine weather ruled over the whole of France. Sowing is everywhere being carried out under very satisfactory conditions, and it is now to be hoped that the land sown with grain will be larger than that of the last year. Threshing has continued, and generally the situation fulfills all wishes, though there are still complaints from growers. Even for seeds there are long delays in dispatch, and fertilizers suffer greatly from the paucity of transport facilities. Distribution of wheat and rye to millers is small, though there is plenty on the farms and in controlled warehouses. The production of flour is very reduced.

A surprisingly large trade in American condensed milk was developed at Hongkong during the past year, largely for military purposes, although there is a good trade in that commodity at all times. The total imports into the colony from all countries during the year were valued at $3,881,449 of which $3,611,500 worth came from the United States. The normal import of condensed milk into Hongkong has been something like 100,000 cases, valued at about $1,200,000 gold, but the normal consumption among the Chinese has been increasing from year to year, and it is probable that the trade will reach a large volume in the immediate future. American cheese and other dairy products increased their hold on the market though the volume of business was small because of war restrictions. Cheese to the value of about $70,000, out of the $85,000 worth imported, was furnished by the United States. Australia continued to supply practically the whole of the consumption of butter in this field, including a large supply for ships fitting out at this port.—*Consular Reports.*

WHEAT SHORTAGE IN ITALY.

Trade Commissioner MacLean, Rome, reports that Hon. Luigi Murialdi, undersecretary of Food Supply and Consumption, says that although the maximum total of the wheat crop was estimated at 45,000,000 quintals (quintal = 3.67 bus.) of this amount 25,000,000 quintals must be retained by the growers for their own needs or for seed. Of the remainder only 6,000,000 quintals had actually been received up to Sept. 30, of which 5,000,000 quintals had already been consumed. Consequently, the amount of which the Government can actually make use consists of 1,000,000 quintals of domestic wheat and a little more than 3,000,000 quintals of imported wheat, or a supply for about one month. To feed the population it will be necessary to import 20,000,000 quintals. The greatest difficulty and the danger of the situation consists in the fact that Italy's tonnage, unloading facilities, and storage facilities barely permit the delivery each month of the average amount which it is necessary to import for current consumption, which is 1,650,000 quintals. Thus, if for any reason it should be necessary to hold up the arrival of foreign grain for one or two months, Italy would not be able to meet the demands of the people, who would necessarily be without bread during the last months preceding the harvest.

In addition to wheat, Italy needs 5,000,000 quintals of rice.

SOUTH RUSSIAN CROPS.

The British vice-consul at Rostov-on-Don reports that the following totals of grain were probably harvested in South Russia this season (figures representing tons):

Territory.	W.wheat.	S.wheat.	Rye.	Barley.
Don Cossack	90,180	1,502,090	420,000	972,000
Kuban	1,208,650	672,500	108,300	920,000
Stavropol .	737,420	348,720	6,600	500,000
Ter	224,000	13,580	35,000	140,000

According to rough calculations it is expected that Taurida, including the Crimea, will have a surplus of over 1,000,000 tons of grain, and Kharkov about 160,000 tons. The crop in the Government of Poltava will also more than cover local needs. In the provinces still in the hands of the Bolsheviks—Kursk, Orel, Saratov and Samara—sowings were compulsory, and reports tend to show that the crop promises to be abundant.

The general opinion is that after supplying the needs of the whole of Russia, even if one does not take into consideration the hidden stocks remaining over from previous harvests—which are also considerable—a fair surplus will be available for export; but up to the present the authorities have totally forbidden the export of grain.

[We accept the above yields per acre with all due reserve.—*Ed. London Grain Reporter.*]

HONGKONG FLOUR MARKET.

Imports at Hongkong of prepared grain foods from the United States all but ceased during last of 1918, and supplies of such goods from Europe were cut off three years ago. Australia came into the market with such foods and probably will remain a strong competitor of the United States in that line hereafter. The imports of wheat flour into the field during 1918 were the smallest in volume for many years and no American flour whatever was included. The total imports amounted to only 706,509 bags, as compared with 1,072,089 bags in 1917, 1,604,033 in 1916, 2,075,129 in 1915, 3,939,754 in 1914, 5,176,623 bags in 1913, and similarly large imports in the years immediately previous thereto. Of the imports in 1918 Australia furnished 342,009 bags, North China 322,000 bags, and Japan 42,500 bags.

Chinese consumption of wheat flour ceases when it approaches prices anything like those obtaining in the United States during the past three years. Imports from Australia were made possible by the release of Government stocks and by high silver exchange. The real supply of this field, however, came from North China, which shipped flour direct to the coast ports of Foochow, Amoy, Swatow, Canton and lower coast cities. In normal years these ports secure most of their supplies through Hongkong. Shipments from North China were limited by the comparatively short supply of wheat and flour available for export. The imports from Japan were limited by Government embargo. Considerable flour from Japan, however, was shipped to Europe for the first time in history. Japanese flour came into the Hongkong market early in the year at $2.65 local currency or $1.88 gold per bag, but advanced, soon after shipments to Europe commenced, to $3.60 local currency and later to $3.70 local currency per bag or to $2.55 and $2.63 gold. Australian flour came a little higher in price but was much better in quality. Imports of rice flour into Hongkong in 1918 were heavy, 83,249 short tons, valued at $2,029,983, being imported, practically all of it coming from Indo-China. Rice meal or rice bran came in to the amount of 60,671 short tons, valued at $1,575,734, also coming entirely from Indo-China.

Prospects for wheat flour the coming year depend entirely upon prices and the possibility of some American flour being released for export in this direction. So long as flour costs more than $2.50 local currency per bag—the cost of gold has no bearing upon the sale of flour in China—Chinese consumers will use other foods. At current exch of silver flour could be sold here in siderable quantities at $1.85 gold bag c. i. f., but until that lev reached there will be little deman flour from the United States or other country. The lowering of fr rates from the United States al has modified that phase of the tion, but so long as American w sells at $2.50 per bushel no Ame flour can come into this market in considerable quantity. The past ended with stocks of only about 32 bags on hand, mostly of high-grade tralian flour.

Kubanka seed wheat is in goo mand throughout Burleigh County D. The wheat yielded higher tha other varieties in that state and proved to resist rust more success The county agent has booked o from farmers for 1,000 bus. of this

Foreign Importers, Manufacturers and Dealer

In the resumption of exports from the United States and Canada, it is desirable to be properly represented abroad for the distribution of grain, seeds, flour, millfeeds, provisions, concentrates and feedstuffs of all kinds. We suggest that correspondence be opened with the following specialists:

News of the Country Grain Trade

DELAWARE.

ilmington, Del.—The American Pre- d Flour Co. has been incorporated a capital of $150,000 to deal in flour other ingredients used for cakes and les. L. S. Dorsey, M. Butler, M. M. y, local Wilmington men, are the in- orators.

CALIFORNIA.

kland, Cal.—The plant of the Western ng Co. here will be a 1,000-bbl. mill a 500,000-bushel elevator.

n Francisco, Cal. — Representatives the Federal Grain Supervision office he Bureau of Markets will tour the and hold meetings in every county the purpose of explaining to growers ods of cleaning and grading grain.

COLORADO.

amboat Springs, Colo.—The Farmers ator Co. expects to have its new 18,- ushel elevator completed about Dec. 1. . Potter is manager.

oli, Colo.—I. J. Taylor has sold his tor at this place.

CONNECTICUT.

rtford, Conn.—The C. H. Northam Co. Garber Bros. have been consolidated will open offices on Windsor avenue enlarge its grain storage facilities.

ILLINOIS.

ckinaw, Ill.—Walker, Vienmont & Co. succeeded Walker & Elliff.

ylorville, Ill.—The Farmers Elevator is g a new feed store room to its plant.

ckinaw, Ill.—N. P. Eastling has re- y completed the installation of a new

chester, Ill.—The Berry & Breckin- Farmers Grain Co. will erect an ele- here.

n Orin, Ill.—A new elevator with a ity of 20,000 bushels is being con- ted at Van Orin.

den, Ill.—It is reported the Farmers erative Grain Co. has leased the ele- of Frank Supple of Bloomington.

Joseph, Ill.—Paul Rising, who has managing the elevator of his father, rd Rising, has leased and will oper- t.

Caneco, Ill.—Henry Barrett has sold rain elevator here to the newly or- ed Farmers Grain Co.; consideration 0.

bor, Ill.—The Tabor Co-operative Co. certified to the Secretary of to an increase of capital stock from 0 to $30,000.

ler, Ill.—The Butler Grain Co.'s new tor is now completed. It is con- ed of reinforced concrete and has a ity of 40,000 bushels.

atur, Ill. — The Stevens-Freeman Co. has moved its offices from the Building and now occupy an office suite of the Stokes-Barkley Grain Co.

den, Ill.—Chas. E. Bowles has sold H. Hildebrands the grain elevator rly owned by Mr. Hildebrands. Mr. s gets in exchange an 80-acre farm.

lom, Ill.—The Cullom Co-operative Co. purchased both the elevators umber yards from M. R. Meents & Total consideration was $26,500 for vo places.

Sterling, Ill.—J. L. McPhail of this who is a member of the McPhail Ele- Co., and W. T. Hogan have formed a ership known as McPhail & Hogan re dealing in hay.

mington, Ill.—Lawrence Farlow has eded A. N. Steinhart, who recently ed as secretary of the Illinois Farm- ain Dealers' Association. Headquar- ill remain in this city.

ona, Ill.—The Farmers Elevator Co. ouble the capacity of its plant, in- new dumps, 2 legs and a Richardson atic compensating scale. Chas. N. s is manager.

per, Ill.—The Farmers Elevator Co. urchased the elevator of Stevens & an at this station and will operate it as the Bailey-Moore Grain Co. The headquarters will, however, remain at Elwin.

Symerton, Ill.—B. J. Baskerville has purchased a half interest in the Pierce Carey Grain Co. This company succeeded the Farmers Grain Co., bankrupt. Other members of the firm are Wm. Nugent, Pierce Carey and Stephen Tully.

Rochester, Ill.—The Supreme Court has affirmed the decision of the appellate court awarding Twist Bros. $1,750 damages in its suit against Francis M. Burns to recover on contract for grain. The Supreme Court refused to grant Burns a writ of certiorari on appeal from the lower court's decision. Burns failed to deliver corn at the agreed upon time and Twist Bros. then refused to accept at a later date because corn had dropped below the price agreed upon.

INDIANA.

Fairland, Ind.—J. S. Sellers has installed a 15-ton Fairbanks truck scale in his elevator.

Clarks Hill, Ind.—The Davis Grain Co. has sold its two elevators to Doane & Hillis of Frankfort.

Lanesville, Ind.—Russell Bary has sold an interest in his flouring mill at Lanesville to Joseph Bauer of this place.

Michigantown, Ind.—Earl Davis, formerly manager of the Davis Grain Co. at Clarks Hill is now manager of an elevator at this station.

Columbia City, Ind.—Harley Bumgardner has purchased a half interest in the Bert Jones flour mill and the firm's name is now Jones & Bumgardner.

Herr (Lebanon P. O.), Ind.—Kern, Kirtlevy & Herr Co. is building a new warehouse and coal sheds. This firm is the successor of Herr & Jenkins.

Poneto, Ind.—Arnold & Engeler are moving their elevator at Petroleum to this city, where it will be put on a new foundation, repaired and overhauled generally.

Newport, Ind.—The National Elevator Co. of Indianapolis that recently purchased the elevator site at Newport has a force of men here at work constructing a new elevator.

Waynetown, Ind.—The Waynetown Coal, Lumber & Grain Co. has been incorporated with a capital of $15,000 to manufacture cereals. Directors: Oliver Schneck, A. E. Bard, James A. Quick.

Pierceton, Ind.—Ralph W. Cole of this city was apprehended in North Manchester, Oct. 10, charged with having stolen a load of clover seed from Kraus & Apfelbaum. It is alleged that he locked himself in the elevator and later unlocked the doors and loaded up a wagon with the seed which he later sold to the Acme Grain Co. at North Manchester for $433.23. Spilled seed from a bursted bag made a trail to North Manchester and aided in his detection. This is said to be the second theft of the kind he has performed.

IOWA.

Jamaica, Ia.—The Garland & Towne Elevator Co. has succeeded the Farmers Elevator Co.

Merrill, Ia.—The Merrill Milling Co. has filed articles of incorporation with a capital of $10,000.

Muscatine, Ia.—Erection of a grain elevator on the river front is being planned by McKee Bros., commission men.

Atlantic, Ia.—Gund & Sein will take possession Dec. 1 of the elevators at Lora and Gates formerly owned by J. A. Campbell & Son.

Ft. Dodge, Ia.—The Taylor & Bournique Co. of Milwaukee has opened an office in the Snell Building, with Edwin Dwyer in charge.

Davenport, Ia.—A. W. Carver will represent the Moses Rothschild Co. of Chicago, in Iowa, southern Minnesota, etc. His headquarters will be in Davenport.

Boone, Ia.—The new 20,000-bushel elevator of Chris Williams has been completed and is now in operation. It is fireproof and is equipped with the latest machinery.

Sioux City, Ia.—The Trusler Grain Co. of Emporia, Kans., has established offices in the Grain Exchange Building. The company will seek to obtain a seat on the Sioux City Board of Trade.

Washington, Ia.—The Washington Elevator Co. has passed into the hands of farmers who will operate the business under the title, "Farmers Union Exchange." W. J. Todd is temporary manager.

Odebolt, Ia.—The Co-operative Farmers Elevator Co. of Odebolt, Ia., bought the J. L. Bruce grain elevator and cribs for use in conducting their business, taking possession Nov. 1. Purchase price was $45,000.

Stanhope, Ia.—The elevator of the Farmers Elevator & Live Stock Co. was recently robbed of $3,000. Entrance was forced through a window and the unlocked safe was opened. In their haste, the robbers overlooked $200 worth of Liberty bonds.

Farragut, Ia.—The members of the Farmers Elevator Co. met recently and voted to change from a corporation to a profit-sharing company. Directors are Sam McMullen, president; Chas. Comstock, vice-president; Tom Cox, secretary; Ray Cox, treasurer.

Sac City, Ia.—The Independence Farmers Elevator Co. is preparing to handle popcorn on an extensive scale. They will erect a popcorn plant to handle 20,000 to 40,000 bushels. Work will begin at once. Capital stock has been increased from $15,000 to $40,000.

KANSAS.

Danville, Kans.—The new elevator of the Farmers Elevator Co. is almost completed.

Herndon, Kans.—A new elevator is to be built at Herndon by the Herndon Equity Exchange.

Dwight, Kans.—The Associated Mill & Elevator Co. will build a 10,000-bushel elevator here.

Erie, Kans.—The Erie Lumber & Grain Co. and Johnson & Son are the same firm, Johnson & Son being the owners.

Hutchinson, Kans.—The Security Elevator Co. opened its new terminal elevator Nov. 15. Carl Hipple is manager.

Esbon, Kans.—The Farmers Grain & Supply Co. has built a concrete foundation under the house, a concrete approach to its elevator and has also built additional coal storage.

STATE AND FEDERAL SYSTEMS IN COLLISION.

The Inspection Department of the Minnesota Railroad and Warehouse Commission is an exceedingly jealous body and has little use for the Federal system of "supervision." Hence when the Bureau of Markets announced it would entertain appeals on state inspections of intra-state grain; there was music by Commissioner Jacobson and an opinion was sought at once. The Attorney-General of the state in an opinion says in substance:

Decisions of Minnesota grain inspectors under the state law may be changed on purely intrastate grain only by appeal to the State Board of Grain Appeals.

Federal grain supervisors may entertain appeals regarding purely intrastate grain only where the grain is to be bought by the Grain Corporation, or where the price is so far below the Government figure that a claim for the difference may be made, it is further ruled.

The Assistant Attorney General, who is special counsel to the Commission, that that "the language of both the Federal regulations and the Minnesota law on grain appeals is merely permissive and that unless the appeal is taken to the proper tribunal it is ineffectual. Unless dealers in grain are willing to abide by the grade established by the inspectors, they should appeal to the state board, he adds, except in transactions in which the United States Grain Corporation may be a party."

"We resent Federal interference with state affairs," said Commissioner Jacobson "The Government agents in some instances have gone so far as to interfere with the work of the state inspectors on wholly intrastate transactions. This opinion should end the practice."

The Shipping Board announces a reduction on freight rates of dressed meats of $1.00 to $3.50 per cwt. The date of effectiveness is not yet announced.

Field Seeds

Iroquois, S. D., reports a load of sweet clover seed which yielded the grower $75 an acre on land worth $125.

Business men and bankers as well as farmers of Oneida, Ida., have formed a seed loan association to finance the purchase of seed for needy farmers.

Prof. Arny of the Agricultural College of Minnesota advises farmers to buy clover and grass seeds early as buyers for the seed firms are picking up all the choice lots.

At a meeting held recently at Havre, Mont., with the county commissioners it was decided that relief seed grain to be distributed in that section should be handled through the local elevators.

The Illinois Cooperative Crop Reporting Service says that clover seed shows an average yield in Illinois of 1.5 bus. per acre but the crop was harvested from only 66 per cent of a normal acreage.

The Montana Grain Growers' Association, representing about 1,800 farmers, has adopted resolutions urging Congress to remove tariff restrictions on all grains imported from Canada for seed purposes.

Alfalfa seed of the Grimm variety, supplied by the Alfalfa Seed Producers' Ass'n of North Dakota, is said to have yielded this year in Cass County, on a plat of 2¾ acres, an average of $241 per acre for the seed alone.

The London *Corn Circular* says that it is universally admitted that the clover seed yield in England is small and the quality of some seed is fine, but much of it is too green to be harvested and will not be threshed until January or later.

The Toledo Commercial Seed Laboratory in the Second National Bank Bldg. are now prepared to make purity and germinating tests of clover, timothy and other seeds to ascertain if the sample is in compliance with state laws or federal seed importation act.

A flax specialist from the Department of Agriculture at the North Dakota Agricultural College advises the immediate purchase of flaxseed for next year's sowing, the seed in his belief being cheaper now than it will be later, the crop this year being only 10,000,000 bus. while the consumption is about 28,000,000.

The Southern Seedmen's Association has issued a warning that Rosen rye is being sold through the South as Abruzzi. Experiments in Georgia, Alabama and North Carolina during the past four years proved that Rosen is about ten days to two weeks later than Abruzzi and is not as well adapted to the Coast section, where it is being sold. The Abruzzi has also a taller stalk and dealers are advised not to offer the Rosen rye in that part of the country.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending Nov. 15, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plum, secretary of the Chamber of Commerce:

	Receipts		Shipments	
	1919.	1918.	1919.	1918.

Duluth Linseed Market.

DULUTH, Nov. 15.—A blockade was reached in the flaxseed market during the last week as a result of conditions created through the recent suspension of an operator. Prices in futures were held at the limits fixed by the board of directors, and operators were compelled to play a waiting game thereafter. The cash market was also strong at 2 to 15c over the November price. The business done in that department was only of a straggling nature, with receipts running at from 2 to 5 cars daily, compared with from 19 to 52 during the corresponding period last year.

Trading during the week was dominated by the probability of Argentine and other flaxseed being made deliverable on new future contracts in accordance with amendment in the rules proposed by the directors. Sentiment of the members of the board appeared to favor the change at the special meeting held on Saturday, and it is assumed that the proposal will carry at the adjourned meeting next Saturday. The step taken was brought about by the desire to avoid any possibility in future of market manipulations being made easy through a few specialists controlling the available supplies of seed. It is claimed by advocates of the heroic proposal that a movement of Argentine seed to this market could be possible only when prices reached points where they were far out of normal. It was further contended that the Northwest grower need not feel apprehensive as he is protected by the duty and the freight and handling charges in the movement of seed this way from the seaboard should the occasion for such a measure arise.

While flaxseed trade conditions were generally regarded as bullish by experts on account of the small stocks in the elevators and in the hands of crushers, the liberal imports of Argentine seed at the seaboard were taken into account bearishly. The large tonnage of flax on passage this way from down there was also noted.

Receipts of flaxseed here during the week again dropped off, amounting to 16,128 bus., against 170,586 bus. last year, and stocks in the elevators were reported at 100,000 bus. Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$4.77-90	$4.69-75	$3.95
To arrive....	4.80	4.67	3.79½
November ...	4.75	4.65	3.92
December ...	4.66	4.55	3.78½
May	4.51	4.39	3.77

Kansas City Seed Market.

KANSAS CITY.—Interest of seedsmen is turning rapidly to cane and millet, though the movement of each is later than usual. About the only marketings of millet thus far have been of the common hog variety, chiefly from Colorado. It is said that wheat threshing and sowing are responsible for delay in the Kansas movement of millet. All seed coming to the market is being absorbed by the poultry feed manufacturing trade, which desires a substitute for high-priced kafir and milo. Cane seed should be moving, but rains, car shortage and farm work have held it back. Letters from the producing sections of Kansas and Oklahoma indicate that the crop was a fairly large one and will soon begin to appear in the market.

Dealers have handled a liberal quantity of sudan grass seed, obtaining supplies mainly from Texas. At present the movement is moderate.

Scarcity is the most prominent feature of the alfalfa and clover seed trade. Prices are holding very firm in each case.

Timothy seed is plentiful and rather dull, though dealers anticipate a good distribution before spring. A large volume of bluegrass seed was bought from the big crop of 1919, and much of it has been cleaned and resold on a profitable basis.

Following are the prices quoted for seeds arriving in Kansas City:

Alfalfa—Per cwt., $25@30.

Timothy—Per cwt., $9@10.

Blue grass—Per cwt., rough, $10@15; cleaned, $17@27.

Clover—Per cwt., $35@45.

Millet—Per cwt., German, $3@3.25; Siberian, not quoted, common, $2@2.25.

Sudan—Per cwt., $9@11.

Cane—Per cwt., red top, $2.25; orange, $2; amber, $1.50@1.75.

SEED SITUATION.

RED CLOVER FAIR CROP.

LENA, WIS. (7).—Red clover seed will be fair crop, probably two-thirds of a normal one, with quality pretty good. The alsyke crop is very light here this season. The demand for both of the above seeds is very good with farmers selling freely as soon as hulled.

Hay is very good, oats light, rye and barley fair, peas a fair crop and good quality.—*J. N. Bassett.*

TIMOTHY SEED SOLD.

CEDAR RAPIDS, IOWA.—Most of the timothy seed in our locality moved early and there are only a few country lots still in farmers' hands. Clover seed also has moved pretty freely, although farmers are more inclined to hold their clover for higher prices than they were the timothy. Our vicinity has produced more clover this season than for several years past, some of it of very fair quality.—*Hamilton Seed & Coal Co., Cedar Rapids, Ia.*

CLOVER SEED IN NORTHWEST INDIANA.

DECATUR, IND. (7).—Very little clover seed or alsike has been offered for sale. The production was far below normal and the farmers have been trading among themselves. Our stock is light. We do not expect to buy much from the farmers. In the face of high prices we believe the demand will be limited.

There is very little grain moving at the present time.—*Burk Elevator Co., by A. Burk.*

Alsike and Timothy.

Alsike showed speed last week—passed clover. Receipts have been disappointing and demand is good.

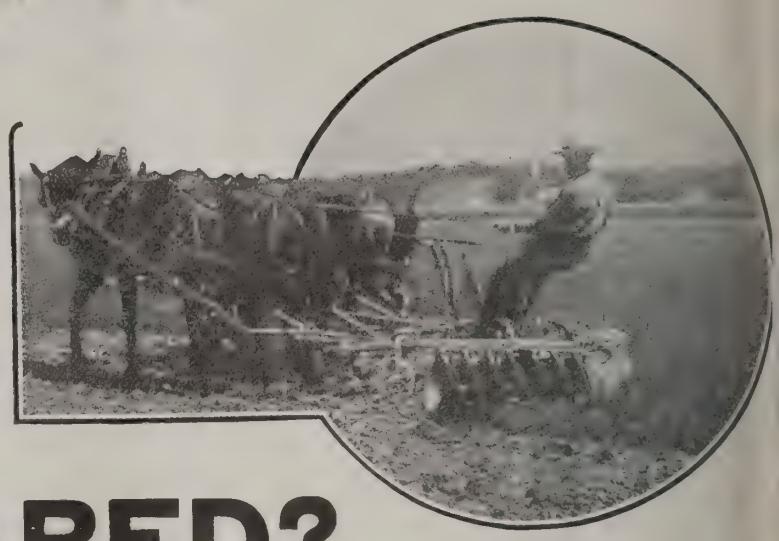
Timothy was in good demand throughout the week and scored a moderate advance. Receipts for season have been heavy, but shipments have also been larger than usual. The foreign peace demand is expected to do a good deal towards reducing stocks.—*Southworth & Co., Toledo.*

Minneapolis Flaxseed Market.

MINNEAPOLIS, Nov. 17.—The market is very strong and there is a sharp demand for the offerings as the crushers can not get their Argentine supplies here as soon as expected and they have heavy oil contracts to fill. Receipts are light and offerings to arrive are practically nil.

The trade here was much surprised at the action of the directors of the Duluth Board of Trade in fixing prices on the basis of the close of Nov. 7. It has hampered trading in seed that was hedged in the futures.

Toledo Clover Seed Market.



Clover seed was active and higher early part of last week, weak and lower latter part. Considerable "pep" was injected early, with prices up to $30.65 for March with a fairly large trade. News early favored the bull but prices did not stick. The crop is undoubtedly short, very short, and imports may be over. The present and prospective stocks may be entirely inadequate to fill the demand, but between now and spring the uncertainty will change sentiment many times, and $30 seed may prove the pivotal price of the year. The Government report issued last week caused little comment. It shows a small yield, and that the early estimates of Wisconsin crop were much too high and Illinois the biggest crop of any. Indiana, Ohio and Michigan are in the "also-ran" class.—*J. F. Zahm & Co., Toledo.*

St. Louis Seed Market.

ST. LOUIS, Mo., Nov. 15.—Offerings of spot seeds continues light, and as there is an active demand the market is firm but quiet. Most of the trading is in timothy seed. Red top and millet seed is scarce.

Quotations are as follows: Clover, choice high-grade seed, free of buckhorn, $45 to $49; average country lots, $42 to $44; heavily buckhorn-mixed, $23 to $30; poor and trashy, $5 to $19; alsike, high grade, $40 to $46; fair to choice, $35 to 40; poor and trashy, less, according to quality; timothy, choice clean seed, 11 to $11.25; average country lots, $9.75 to $10.75; low grade, $5 to $8 per 100 lbs.; alfalfa, from $20 to $35 per 100 lbs., according to quality; red top, fancy solid seed, $16 to $16.50; machine-cleaned, $12.50 to $16; chaffy, $7 to $10; millet, golden, $2.75 to $3.25; Siberian, $2.50 to $2.75; hog millet, $2.80 to $2.90; common, $2.65 to $2.70; sunflower seed, $9 to $10.30 per 100 lbs., according to quality; stock peas, whippoorwill, $5.65 per 100 lbs. Other kinds not moving in sufficient quantities to establish values. Milo maize, No. 3, $2.75 per 100 lbs.

NOW!! ARE YOU PREPARED?

To Meet This Man's Demand for Seed

Fall seeding is still going on and the wise seedsmen or seed dealer is now planning for spring trade. Tell us your requirements for spot or future delivery.

Small's Brands Sell Big

You have seen our former advertising and may have considered getting in touch with us before next season. Good! But next season's business is starting now—seed supplies and values are being determined; so, if you are to be the dealer in Small's seeds in your territory, make inquiries now.

W. H. SMALL & CO., Inc.

EVANSVILLE, INDIANA

"THE CENTER OF THE SEED TRADE OF THE UNITED STATES"

WE SELL TO DEALERS ONLY

WHEAT STILL ON THE GROUND.

Reports as to the amount of grain that is piled on the ground and exposed to the elements have been somewhat exaggerated, but in localities where wheat has not been extensively grown heretofore and no facilities for handling are available, there is a large amount of wheat so exposed, and unfavorable weather conditions have caused the wheat to become badly damaged. It is believed that receipts of wheat in Kansas City in December and January will be very poor in quality. Samples of wheat submitted to the Grain Corporation for appraisal indicate that future arrivals will be much lower in quality than the wheat that has already reached the terminal markets.

Hay Inspection Rules.

The new regulations providing for having the Federal authorities certify qualities of food in interstate transit (including hay) have been formally issued by Secretary of Agriculture Houston under date of Sept. 1, but just made public by the United States Bureau of Markets.

Potato growers in the Yakima Valley are asking $40 a ton, a recent sharp frost it is estimated having reduced the existing stocks from 10@15 per cent. A recent heavy sale was made of a crop grown on 240 acres in the Yakima Reservation at $33@37 per ton. The output realized the grower $54,500.

"Mill Oats" at Nashville.

Nashville mills are running about one-half time, and corn is dribbling in in very small amounts. Two Nashville dealers are reported as bringing in "Mill Oats" and oats screenings, containing chiefly wild oats, which apparently are intended for mixing with good oats. Outbound oat shipments are already indicative of the mixing, but so far appear to conform to the grade requirements.

The potato crop of Missouri, which averages only 75 bus. per acre, is 8,400,000 bus. or 1,000,000 less than in 1918. The sweet potato crop is somewhat smaller than last year.

While plump seed wheat sho ways be planted if possible, R. berg, in charge of seed analysis Minnesota Experiment Station that slightly shrunken seed may pected to grow satisfactorily. lieve this proposition has bee ported by experiments covering of years by the Ohio Experime tion, the results to that effect been published several years ag

The potato crop of Minnesota, 000 bus. this year, is of universal quality and the yield better than ers expected a few weeks ago. T was practically all harvested a dled with almost no loss from f

BEAN AND POTATO PRICES.

The potato market generally was a strong one the past week. Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise specified, as of Nov. 15:

Beans—

Boston—Limas, $14@14.50.

Buffalo—Marrows, $11@12; mediums, $7@8.50; pea, $7@8.50; white kidney, $11@12; red kidney, $12@13.

Chicago—Pea beans, hand picked, ch. to fancy, $7.50@8; red kidney, $13@13.50.

Cincinnati—Navies, $8@8.50; marrowfats, $12.50@12.75; red kidneys, $13.00@14.00; limas, $13@13.50; pintos, $8.

Denver—Colo. pintos, $6@7; navies, $8.50@9; limas, $10@10.50.

Detroit—H.-p. pea beans, $7.

Los Angeles—Limas, $14.50; baby limas, $13; sma.-lge. wh., $6; pinks, $6; blackeyes, $6.35@6.50, all f. o. b.

Minneapolis—Navies, h.-p. fancy, $9; soy, $5; Cal. limas, $11; brown, $6.

Montreal — Demand for Ontario handpicked beans continues steady and carloads are quoted at $5.50@5.55 and 2 to 3-pound pickers, $4.50@4.55.—Trade Bulletin.

New York—Marrows, ch., $11.50; com. to fair, $10.50@11.25; pea, ch., $7.75; com. to fair, $7@7.50; Lady Washington, Cal., ch., $7.75@8; sm. wh., Cal., $7.75@8; Kotenashi, $6.50@6.75; red kidney, ch., $13.25@13.50; com. to fair, $10.50@13; red marrow, $10@10.50; Kintoki, Manchurian, $4@5.50; yellow eye, $7.25; wh. kidney, ch., $12.25@12.50; Imperials, $10; Cranberry, Manchurian rnd., $6.75@7.25; long, $6.50@7; short, $5.50@6; Calif. pinks, $7@7.50.

Pittsburgh—Limas, $15@15.50; Cal. navy, $7.50@8; Mich., f. o. b., $7.50.

Rochester—New crop, peas and mediums, $5; yelloweyes, $5.50; red kidneys, $11; wh. kidneys, $10; wh. marrows, $9.

St. Louis—Quote white beans in car lots—Choice, hand-picked Michigan at $7.75 per 100 lbs.; prime machine-picked, $7.50; orders and small lots, higher; pinto beans, $7; California black eye, $8; choice lima beans at $16; California pink beans at $8, and white, $8.50.—Market Reporter.

Potatoes—

Boston—Green Mountain, $2.60.

Buffalo—Round No. 1, per bu., $1.60@1.65; fair to good, $1.35@1.45; small or over large, $1@1.25.

Chicago—Wis.-Mich.-Minn., rnd., wh., $2.85@2.95; blk. Idaho russets, $3.25@3.35; rurals, $3.15@3.20.

Denver—Colo. Greeley, $2.50@2.75; west'n slope, $2.75@3; Idaho, $2.80@2.90.

Kansas City — Minn. Red River, Ohio, $3.10@3.20; Minn.-Ohio, blk., $2.80; triumphs, Neb., $2.75@2.85; northern wh., $2.65@2.75; western wh., $2.60@2.75; russet Burbank, $2.80@3; h.-g., bu., $1.50@1.75.

Milwaukee—$2.35@2.60.

Minneapolis—Red River, $2.90 f. o. b. valley field run; wh. stock, $2.70@2.75.

Montreal—Receipts last week were 10,464 bags, against 22,673 bags the week previous, and 11,518 bags last year. Market firmer. $1.80 to $1.85 per 90 lbs. for finest Quebec white stock. In a jobbing way $2 per bag is obtainable. Buyers are evidently looking ahead before the cold weather sets in.—Trade Bulletin.

New Orleans—Minn. Burbanks, $3.25@3.35; Mich. rnd. wh., $3.15@3.25; Colo. brown beauty, $3.35@3.50.

Pittsburgh — York State, $2.70@2.80; Mich., No. 1, 150-lb. sks., $4.44@4.50.

Rochester—No. 1, $2.07@2.17.

St. Louis—Western russet burbank, ex. fcy., $3.40 del.; Red River early Ohio, $3 del.; Minn. rural, $3; Carmen, $3.10; North'n mixed (poor), $2@2.75.—Market Reporter.

San Francisco—Salinas, $3.50; river, fcy., $2.75@3; rivers, ch., $2.50@2.75; Ore. garnets, $2.50; Yakima gems, $3@3.25.

Feedstuffs

The Ada Flour & Feed Co. of Ada, Okla., has been incorporated with a capital of $20,000 by L. E. Pettigrew.

It is estimated that the amount of blackstrap molasses consumed in the manufacture of mixed feeds is approximately 75,000,000 gals. per year.

The Ardmore Flour & Feed Co. will erect a large warehouse at Ardmore, Okla., at once. The building will be 40x140 feet. The company will also erect a large elevator. Mr. Stromberg is manager.

A meeting of dairy experts was held at Pine Bluff, Ark., recently on the invitation of the Rice Grain Co. The subject of discussion was "Proper Feeding as a Means of Reducing the Cost of Producing Milk." Efforts were made by the local people to show how to increase the supply of milk without increasing the cost of feeding the cows.

The Stout-Hunt Milling Co. of Memphis, Tenn., a newly formed corporation with a capital stock of $60,000, has purchased the building and equipment of the Yates & Donelson Co., flour and feed mill. Improvements will be made at once. C. B. Sprout is president and general manager of the new firm, with M. W. Hunt, formerly of Portland, Ore., as vice-president.

Holland recently imported chilled meats from the United States. This meat was consigned to the Dutch government, who will put it on sale in order to reduce the price of meats to the consumer. Before the war Holland produced an excess of meats, but owing to the lack of feed and difficulty of importations production has since the war begun falling off.

Good Demand for Cottonseed Feed.

KANSAS CITY, Nov. 15.—A good demand prevailed in the market for cottonseed cake and meal in Kansas City this week. Feeders in Kansas, Missouri and surrounding feeding states are taking comparatively large quantities, accumulating supplies for winter in addition to their current requirements. Fertilizer manufacturers also have been heavy buyers from crushers of the South recently. For 43 per cent protein cake and meal the market is holding around $81 a ton, Kansas City.

Plenty of the Grain Sorghums.

The crop of corn and kafirs, plus carry-over from last year assures an enormous surplus over and above any and all demands that may appear during the next year. The one and only prop under prices is the present small movement to market. This light movement is largely a matter of transportation, and may, therefore, be considered as transient.—*Thomson & McKinnon, Chicago.*

Rice Crop Damaged About 1,500,000 Bags.

The loss to rice farmers of Texas, Arkansas and Louisiana as a result of heavy rains will be about 1,500,000 bags when the count is completed, according to General Manager E. A. Eignus of the Southern Rice Growers' Association, after receiving reports from three states. The rice which has been threshed out of the wet fields has been very unsatisfactory. The condition now is similar to that of last year—too much moisture content to make the rice mill well. It heats badly in the warehouse and breaks badly in the mill.

Rice Bran Trade Active.

The sale of rice bran during last week continued brisk at prices ranging from $33@36 per ton, sacks included, f. o. b. mill, according to location. Concessions are being made when large quantities, several hundred tons, are involved. The article is gaining in favor right along, especially among manufacturers of mixed feeds, another large St. Louis mixer having recently adopted rice bran as an ingredient.

RICE BRAN SITUATION.

Recent investigations indicate a very serious shortage in the rice crop of Arkansas, Louisiana and Texas, and severe deterioration has taken place with the advent of the adverse weather conditions of recent date—excessive rains, coupled with abnormally warm temperatures, causing the rice to sprout in the shock. These unfortunate conditions affecting the supply of rough rice will necessarily curtail the anticipated volume of rice bran to be manufactured, resulting in a scarcity of rice bran to meet the requirements of mixed feed manufacturers throughout the territory, by whom the commodity is so largely used. This condition, when coupled with the short cotton crop, resulting in a deficient production of all high proteid commodities, such as cottonseed oil cake, will have a tendency to create a big deficit in these products. Rice bran today is the cheapest feed commodity in the civilized world, intrinsic feed value compared and considered; and as such a condition is illegitimate and abnormal, we may confidently look for a serious advance in the price of rice bran when the true conditions are known. It therefore behooves the users of rice bran to investigate, become acquainted with the true conditions as they exist today, and seize the opportunity while it lasts to supply their future requirements, lest they be faced with the probability of seriousy enhanced prices.

Stocks of rice bran thus far in the mills are not at all burdensome and millers are unwilling to consider solicitations for concessions in value. In the meantime the foreign demand for high protein concentrates is abnormal, notwithstanding the high cost of ocean transportation and the unfavorable basis of foreign exchange. To sum up, every indication points to an inadequate supply of rice bran, as well as cottonseed and peanut by-products, before the season is much further advanced.

THE FEED SITUATION.

FEED DEMAND EXCEEDS SUPPLY.

SEBEWAING, MICH. (8).—As manufacturers of soft winter wheat flour we find that at the present time the demand for bran and middlings exceeds the supply. We do not think that values can decline very much; in fact, we look for higher values.

Oats and barley are very scarce in this locality. The crop was short and the yield light, and we do not expect to have large quantities to ship out during the balance of the season.—*John C. Liken & Company.*

FEED TRADE SLOW.

CLEVELAND, O.—We have found that trading on feedstuff the last month to six weeks has been very slow throughout Ohio, Pennsylvania and West Virginia, and have attributed the cause to the heavy buying on the part of every merchant in August and September; and with the open weather still prevailing, demands have not been heavy on the part of the consumer and all stocks remain in all store rooms. We find a more ready sale for December on our own products as well as all mill feeds, and look for heavy sales j soon as winter sets in.

The prevailing high prices of seed meal and old process oil mea not relaxed the demand, and the just about as heavy as when $10@15 less.—*The Lake Shore E Co., per E. G. Hart.*

DEMAND FOR FEED URGENT.

MONTICELLO, IND. (1).—The d for mill feed with us has bee good this year and is urgent at p on account of a good many mill ning on short time, because of th demand for flour. The demand h home and in the East has been ally good; and we believe, no winter is on, the demand for mi will increase and if the mills get orders for flour in the near we think the price will adva *Loughry Bros. Milling & Grain C. Loughry.*

Cotton and Meal Prices.

To farmers complaining of th price of cottonseed and linseed *Wallaces' Farmer* says: "If it we for the fact that there is this y exceedingly short crop of both fl and cottonseed, both oil meal a tonseed meal should be selling present time at around $65 to $70 As a matter of fact, they are selli to $20 a ton higher than this, an

quence farmers will feed them in er amounts than usual. Oil meal l decidedly worth while for many rs, but those farmers who have narily fed their cattle two or three s daily will this year try to get with one pound a day.
view of the short crop and the d in European countries, the it price is probably legitimate h. At the present time the for- ountries do not seem to be taking ch of the meals as they did dur- ne summer. It is expected, how- hat after the first of the year they egin to buy more heavily of cot- d meal and oil meal. During the month prices may go somewhat than they are now, but after the f the year we rather look for even prices."

FEED MARKETS.

MONTREAL.

real, Nov. 14.—The market un- d but steady under a good inquiry. t cars of bran have sold at $45 per d shorts at $52 including bags. Buy- e expecting lower prices and are uying from hand to houth.—Trade n.

NASHVILLE.

ville, Tenn., Nov. 17.—Demand was for wheat bran last week. Mid- were quiet. Other ground feeds a good demand, with prices slightly ar. Quotations: Soft wheat bran, bags, per ton, $43.70; middlings, horse feed, $45@57; dairy feed, $56 og feed. $62; poultry feed, $67@73.

CLEVELAND, O.

land, O., Nov. 15.—In the feed mar- ere has been several changes in recently and with a general ten- pward. Flour middlings are quoted which is an exception to the gen- nd and that is $1.50 below the price k ago. Standard middlings, $49; bran, $45; spring bran, $43.50; feeds, $49; hominy, $61; oil meal, % cottonseed meal, $78.75; gluten, hog meal, $71.68. These prices show ease in most cases of from 25c to the ton.

BALTIMORE.

more, Nov. 15.—The spot feed sit- is steady under a more or less con- obbing inquiry for sacked bran and gs and no pressure of first hand s. Quotations follow: Western bran, per ton, 100-lb. sacks, $45@ Western middlings, per ton, 100-lb. $48@49; city mills' winter wheat per ton, 100-lb. sacks, $48; brown gs, per ton, 100-lb. sacks, $50; niddlings, per ton, 80-lb. sacks, $65.

LOUISVILLE, KY.

ville, Ky., Nov. 15.—Demand for ntinues good with both mill and ctured feeds in demand, sweet feeds especially active. Farmers have that balanced rations produce better results and are marketing nd buying feed at a steadily in- pace.
tions on mill feeds, cotton, carlots, an, $42.50 a ton; mixed feed, $48; gs, $49; gray middlings, $55.

CINCINNATI.

nnati, Nov. 18.—The mill feed mar- pears to have recovered from the depression and was quite active the ek with a good volume of business l at steady to firmer prices. Bran ddlings, especially, sold well, while feed also ruled strong and higher to reduced supplies. Quotations nt 100-lb. sacks. Bran, $42.50@43; feed, soft, $47@47.50; mixed feed, 46.50@47; brown shorts, $48@48.50; iddlings, $52.50@53; standard fine gs, $48@48.50; hominy feed, 100-lb. s 59@60.

BOSTON.

n, Nov. 15.—The demand continues light for feeds of all kinds with airly maintained. The ranges were ws at the closing: Bran, spring, $44.50@45 per ton; bran, winter, $45@46 per ton; middlings, sacked, mixed feed, sacked, $50@53; gluten acked, $72.12; red dog, sacked,

$68.50; second clear, sacked, $68; stock feed, sacked, $68; oat hulls, reground, sacked, $28.60; cottonseed meal, sacked, $79.50@82.50. Receipts for the week ending Nov. 15 were 44 tons.

NEW ORLEANS.

New Orleans, La., Nov. 15.—Some sections of the country have been willing to force sales of bran and recent sales have been made at $2.07 per hundred delivered. Some millers asking as high as $2.15, but there is no business being done at the higher price.

NEW YORK.

New York, Nov. 15.—The market for mill feed during the week was quiet and steady. Consumers appeared to be quite well supplied and were buying only in moderate quantities. There was no scarcity of feed, but offers were not urgent, and there was a disposition on both sides to await developments. City bran was quoted at $44, middlings $54 and red dog $69, while Western bran was quoted at $44@45, middlings $50 and red dog $69.

MILWAUKEE.

Milwaukee, Wis., Nov. 15.—The local mill feed ruled very steady for the past week. Business has been of fair proportions while the supply is moderate. The car situation still remains a very serious factor and is somewhat limiting transactions. Current quotations are:
Bran, per ton, $40@40.50; standard middlings, $43.50@44.50; flour middlings, $51@52; red dog, $63@64; hominy feed, $61; rye feed, $42.50@43; old-process oil meal, $76.50@77; cottonseed meal, $76@83; brewers' dried grains, $64; gluten feed, $66, all in 100-lb. sacks.

PITTSBURGH.

Pittsburgh, Nov. 15.—There is no change in the local feed market, but the coming of colder weather is expected to bring an improvement in several respects. Mixed feeds are scarce, although arrivals in the local market are regularly increasing. About 180 tons was the total for the past period, most of which was white middlings, mill feeds and bran. No regular quotations are offered by Pittsburgh dealers.

DETROIT.

Detroit, Nov. 15.—Wheat is in only moderate milling demand and no change is noted in the price. No. 1 red is quoted at $2.27 and No. 1 white at $2.25. Buying of flour is slow. The larger bakeries and dealers did a good deal of quiet buying a couple of weeks ago and are not in need of supplies. The mills are now grinding to fill orders. All kinds of feed are firm and in demand. Quote: Fancy spring wheat flour, $13.50@13.75; fancy winter wheat patent, $12.75; second patent, $12; straight, $11@11.25 per bbl.; bran, $46; standard middlings, $51@51.50; fine middlings, $61@61.50; coarse cornmeal, $60@62; cracked corn, $66; chop, $53@55 per ton.

MEMPHIS, TENN.

Memphis, Nov. 15.—Mill feeds are a shade cheaper but are steady. Wheat bran on call today was offered at $41.50 and $39.50 was bid, while $54 was asked for gray shorts. The cottonseed meal market has been upset most of the week, due to the ruling from an official at Washington that if mills sold 7 per cent meal above $65 they would be subjected to prosecution for profiteering. As that grade was being sold daily around $70@72 a ton, the order raised a big howl of protest. The mills got busy and soon had the order rescinded, showing easily that such a price as named by the official meant enormous losses as the price paid for seed amply justified the selling price of meal. It was the consensus of the trade that the order from Washington merely lent further confirmation to the charge that some of the departments up there are in the hands of people who are worse than amateurs. Fair demand for meal is reported and on the call board here trading reflects a steady tone at current levels of value.

PHILADELPHIA.

Philadelphia, Nov. 15.—The market for feedstuffs is generally quiet but offerings are light and prices are well supported. The following quotations are for carlots, to arrive, in 100-lb. sacks, at cost, per ton: Winter bran, $45.50@46.50; spring bran, $44.50@45.50; standard wheat middlings, $47@48; flour middlings, $57.50@58.50; red dog, $67.50@68.50; shorts, $47@48; low grade flour, $68@69; rye middlings, $48@49; fine yellow hominy, $61@62; fine white hominy, $62@63; reground oats feed, $28.50@29; cottonseed meal, 36% protein, $81@82; cottonseed meal, 41% protein, $86@87; cottonseed feed, 20% protein, $62@63.

DULUTH.

Duluth, Nov. 15.—Beyond an advance of $2 in rye feeds, quotations in the feeds list were unchanged during the last week. It was noted that dealers continued to confine their buying to sufficient to cover immediate needs, although declines in quotations are not as generally expected, as they were. Consumption was heavier over the country on account of cold weather conditions.

Prices per ton are as follows: Bran, $39.50; ground oats, $48.25; No. 1 ground feed, $52.50; No. 2, $51.50; No. 3, $50.50; shorts, $44.50; flour middlings, $55; coarse corn meal, $55; red dog, $64; Boston mixed, $46; cracked corn, $55; rye feed, $42.

MINNEAPOLIS.

Minneapolis, Nov. 17.—There is a good demand for bran and prices are ruling firm for that grade, but the trade in heavier grades is rather quiet. Mills have November contracts to fill and are not offering bran very freely. Interior mills are offering practically no bran at present as they have a good local demand to take care of their offerings. Shipping directions are not very prompt on heavier grades.

Quotations in car load lots, F. O. B., Minneapolis; bran, $38@38.50; standard middlings, $42@44; flour middlings, $51@54; red dog, $61@63; rye middling, $41@44.

ST. LOUIS.

St. Louis, Mo., Nov. 15.—Wheat feeds are steady, but quiet, and other kinds are dead dull, but prices are generally firmer. Quotations are as follows: Bran, $39.50@41, the latter for choice soft; mixed feed, $44@45; middlings, white, $56@57, gray, $51@53, brown, $48@49; red dog, $64@65; white hominy feed, $57@58; oatfeed, $26@27; barley feed, $53@54; whole-ground barley, $57@58; alfalfa meal, choice, $41, No. 1, $39@40, No. 2, $36@37 per ton, all in 100-lb. sacks.

TOLEDO.

Toledo, Nov. 15.—There is a better inquiry for bran and middlings and the supply is about equal to requirements. Flour mills are operating at low ebb because of unsatisfactory flour market. Prices unchanged at: Bran, $38.50 per ton bulk; middlings, $49 per ton bulk, carlots, f. o. b., Toledo. Bag prices $5 higher. Demand for mixed feeds is light with tendency of buyers to hold off in the belief corn receipts will be larger and prices lower. Scratch feed, best grades, $66.50@68.50; corn and oats chop, $58.50; cracked yellow corn, $63.50; dairy feed, $66.50, per ton, carlots, f. o. b., Toledo.

BUCKWHEAT.

The buckwheat crop in Wisconsin this year is estimated at 575,000 bus., compared with 613,000 bus., forecasted Oct. 1 and 6,036,000 bus. produced in 1918. The average was 6.9 bus. per acre but the acreage was short.

In Michigan the yield of buckwheat is estimated to be 780,000 bus., about the same as last year and of excellent quality. The average yield is 15 bus. per acre, which is better than the 10-year average, but the acreage was somewhat decreased.

In Illinois the estimated yield of buckwheat is 18 bus. per acre, the total being only 72,000 bus. and of fairly good quality only. This is about an average crop.

Pierre, S. D., reports that while ordinarily buckwheat is grown in that state only for local consumption yet last year about 30 cars of the flour were shipped out of the state, mostly to the Black Hill section.

Indian Jute Crop.

Consul Smith at Calcutta reports the Indian Department of Agriculture's final forecast of the jute crop of 1919 in the three principal growing provinces. The total acreage in 1919 was 2,821,575 compared with 2,500,382 in 1918, the yield in 1919 is 8,486,234 bales compared with 7,019,088 bales. The increase in the acreage is due mainly to the better prices obtained last year but the weather which was too dry was not as favorable early for the crop as might have been desired, although late rains came in time to assure a good crop.

"The way of the transgressor is hard," but the way of the non-advertiser is beyond description.

Alfalfa Department

The alfalfa raised on an 18-acre tract near Hudson, S. D., at $20 a ton yielded the growers $1,320 this year.

Johnson Co., Kans., reports a big crop of alfalfa this year, with much of it still in the stack, although considerable has been baled and marketed.

The alfalfa mill at Greeley, Colo., of the Great Western Alfalfa Milling Co. was expected to shut down early in the month on account of shortage of coal.

Stock feeders from Beverly, Kans., say that feed in that neighborhood is rather short, the only good crops of hay being alfalfa raised along the bottoms.

In the Pecos Valley of New Mexico near Dexter alfalfa hay is now selling at $25 per ton. Three cuttings were made this year, averaging a little better than one ton to the cutting per acre.

A farmer near Garden City, Kans., in the Arkansas Valley irrigating his farm by pumping from shallow wells made this year four cuttings of alfalfa as well as heavy crops of soudan grass, feterita, etc. Alfalfa is worth $100 per acre.

The gopher menace is considered a serious one to alfalfa production in Nebraska. The total loss in the state by these animals is estimated at $3,000,000, all kinds of forage crops having been attacked, but damage is especially heavy to alfalfa.

E. M. Bassler is a Wisconsin man who invented the alfalfa hay steam drier which is coming into use throughout the West. The inventor claims that more than 17 per cent of the protein is retained by the alfalfa when artificially dried as compared with 12 per cent when the hay is dried in the natural way.

To stimulate interest in alfalfa growing and the best methods of local handling of the crop, a meeting was held recently by Boone County, Ia., farmers and prizes were awarded to producers of the best field of this hay. There were fields of alfalfa in almost every township of the county and the prize winner was John C. Clarke of Des Moines Twp.

Heavier Buying of Alfalfa Meal.

KANSAS CITY, Nov. 15.—Alfalfa millers and jobbing interests reported heavier buying of alfalfa meal in Kansas City this week, with closing prices showing a rise of $1 to $2 a ton. Chicago, Peoria, other Middle States territory, and the South and Southeast were the principal buyers. Demand from the Far East also improved, but this territory is still a comparatively light buyer. Snows in parts of Colorado forced some mills in the state to reduce activity. There was little business for more than November and December shipment.

Choice alfalfa meal closed at $40@42 a ton, sacked, in carlots, basis Kansas City; No. 1, $37.50@38.50; No. 2, $33@34.50; brown, $31@33. Little brown meal was offered, most sales being of No. 1 and No. 2.

An improved demand for alfalfa mixed feeds from Oklahoma, Arkansas and other nearby states gave the market a stronger tone. Open weather has been a handicap to business. Practically no business was reported with the East, though moderate sales were made in Iowa territory. Prices were unchanged, as follows: No. 1 molasses feed, $40@42; No. 2, $37@39; brown, $35@37; alfalfa grain molasses feed, $42@52.

Colorado Shipping Alfalfa.

"Colorado is supplying the bulk of alfalfa hay coming to the Kansas City market," declared W. B. Poindexter of North Bros. "Much hay is available in the state, and with the car situation easier than elsewhere in the alfalfa producing sections of the West, the hay is being drawn from fields there. Earlier in the season northern Colorado was a heavy buyer of hay, some shipments having been made from Kansas City to that section. For this reason, no large movement from Colorado was expected, owing to the drouth in the northwest. But the drouthy areas have been unimportant buyers, due, no doubt, to the heavy movement of cattle to other range areas. Thus, the Colorado hay surplus has been diverted to Kansas City for distribution. Much alfalfa is available in Kansas and Nebraska, too, large supplies of hay from the latter state moving directly to the East without passing through the Kansas City terminal. There is hay in the country, but it is merely a matter of obtaining sufficient cars."

New Alfalfa Mill in Operation.

The Western Alfalfa Milling Co. of Denver recently erected and has now in operation an alfalfa meal mill at Henderson, Colo. The machinery and buildings are all as modern as can be, in design and character and the plant cost about $25,000. It has a capacity of 50 tons of meal per day. Stanley G. Coon, who recently returned to his position with the company from the U. S. Naval Flying Corps, is superintendent of the new plant.

ALFALFA SITUATION.

ALFALFA IN CENTRAL NEBRASKA.

GIBBON, NEBR. (5)—The situation in central Nebraska at the present time is as follows: Weather is unfavorable for milling. Exceptionally brisk demand for meal, especially No. 2. Acute shortage of cars to ship in. There will be as much of a movement to market as the car situation will permit. Alfalfa is held at exceptionally high prices by the growers.—*Woolworth Alfalfa Mills.*

COLORADO ALFALFA.

PUEBLO, COLO.—The alfalfa crop was very good in this territory this year and was all put up in very good shape, as the weather was good during most of the harvest. We are paying the farmers $24.00 per ton for No. 1 to choice alfalfa baled, delivered at our warehouse door. We understand the eastern buyers are paying $25.00 per ton on track at points in the Arkansas Valley east of Pueblo.

There is not a great deal of alfalfa hay shipped from Pueblo, as the town absorbes a large quantity and the hay territory is not quite large enough for eastern outfits to place a buyer here. While the price of hay has kept up for shipment, we understand the alfalfa meal mills have recently reduced their price for loose hay as the alfalfa meal has not been moving out as freely as they expected it to earlier in the season, and many of the mills have their warehouses practically full of meal and have reduced the price of hay to shut off the farmers from hauling.

There are not as many cattle being fed in this territory this year as there was last year and we feel that if we have an old-fashioned open Colorado winter alfalfa will be cheaper in the spring than it is now.—*The A. McClelland M. I. & R. Co., by Tim Barbrick, Sec'y.*

ARE FATTENING HOGS.

Although packers are now neglecting heavy hogs, says W. G. Press & Co., "the quality of corn this year is perfect and hogs are coming to market in much better shape than ever at this time of year. It is reported they are yielding about 10% more than usual. While the hog receipts are not very heavy so far, the supply is becoming quite seasonable. The receipts would be much larger were it not for the fact that the weather is perfect for putting on fat. Hogs are not being rushed to market in the heavy hog raising districts. This is shown by the moderate receipts of hogs in Omaha, Sioux City and St. Paul. It is customary for Iowa to put on weight and they are taking advantage of this weather to make their hogs as heavy as possible. There has been about 10% more feeding cattle shipped into the corn belt this year than last year."

Receipts for eek were 108 cars, as compared 131 a week ago and 78 cars in Current quotations are: Good ice, 48 to 50 lb. test, is quotable 49@1.51; bright, $1.51@1.53; fair d, 45 to 47 lb. test, $1.45@1.49; to 44 lb. test, $1.40@1.47; 36@40 .35@1.40; feed, $1.35@1.42. Iowa $1.35@1.50; for light to fancy; sin, $1.40@1.53; Minnesota, $1.35 Dakota, $1.35@1.49; feed and d, $1.35@1.42.

ALO.—Barley dealers were up t it as far as local maltsters were ed, that class of buyers not even ; they would ever want barley Some inquiry from outside s mostly for export, but the prices r the offerings were about 10c what it was held at. With the advices from the West, dealers vanced their asking prices. Old ; was quoted at $1.45@1.55; new, 1.45; feed, $1.30@1.38, on track tore.

TH.—Trading in barley was re- l here during the last week, ow- the light receipts, inspections ing to only 24 cars as compared 66 cars during the same period ar. Specialists were in receipt d inquiry from the East and space is understood to have been or some grain to be shipped to before the close of the lake navigation season. Quotations were advanced 5@8c, and now stand at $1.08@1.41 for on track.

KANSAS CITY.—The week's receipts of barley were 16 cars, against 15 a week ago and 95 a year ago. Trade had no unusual features and prices were unchanged, with No. 3 quoted at $1.25@1.26 a bushel and No. 4 at $1.24@1.25. Sales were chiefly to local feed manufacturers and country feeders. Stocks increased 9,000 bus. to 131,000 bus., against 163,000 last year. Present prices are attractive to producers, who would ship more freely if cars were plentiful.

PORTLAND.—Although better prices are quoted for good barley, receipts are light and the demand for brewing No. 3 blue is only fair, says the *Commercial Review*. Feed barley is in good demand in spite of the relatively high prices for these qualities which are about 10c higher than this time last year. However, the real choice varieties are scarce and are wanted. As preference is given here as elsewhere to the movement of wheat the shortage of cars for moving barley still continues. The *Review* quotes values for No. 3 blue at $65.50@66 per ton, feed grade, $65.50 and No. 2 Eastern, $63.50.

SAN FRANCISCO.—The barley market is reported dull with offerings small and trading for future delivery quite limited. Range of prices quoted by the *Commercial Review* is $3.05@3.15 per cental, according to quality. The feed varieties are in best demand but even so, quantities changing hands are not large.

CHICAGO.—The barley market last week was a seller's market, offerings being light and the demand for practically all purposes being good and in consequence prices were very strong and advanced every day from 2@5c. On Friday $1.50 was bid for choice grain and on Monday $1.54, and none to be had. On Saturday bidding was very lively, but as some buyers were unwilling to pay the advances that had accumulated during the week they were unable to get the grain they wanted. Shippers were generally the best buyers during the week, although the maltsters were sharp buyers during at least two days. The chief feature of the market seemed to be the insistent demand and the small to moderate receipts. Monday's market continued the upward trend, there being an urgent demand from both maltsters and shippers. Receipts were a little large, as might be expected on a Monday and sales were reported of 33 cars at a range of $1.42 @1.53; three cars to arrive at $1.39@1.51. A bid of as high as $1.54 was made on some choice grain. Following the cash the futures also closed higher, December at $1.42½, May at $1.37½, after selling as high as $1.38. Exports from Atlantic ports for the week were 455,000 bus., compared with none the same week of the previous year. The visible supply is 4,180,000, which shows a reduction as compared with the previous week and also with a year ago.

MINNEAPOLIS.—There is and has been a very strong demand for malting barley, and prices are gradually working higher. Elevator companies have orders for round lots of good size and are unable to execute them in the spot market owing to the light receipts.

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Nov. 15, 1919.	Nov. 8, 1919.	Nov. 16, 1918.
American	560,000	994,000	3,726,000
Argentine	1,255,000	939,000	100,000
Total	1,815,000	1,933,000	3,826,000

Exports of oats since Aug. 1, 1919, and comparison for three years.

	1919-20.	1918-19.	1917-18.
American ..	19,019,000	39,963,000	46,933,000
Argentine ..	9,082,000	12,314,000	2,019,000
Total	28,101,000	52,277,000	48,952,000
Season		113,282,000	140,826,000

Grain Exchanges Consolidate.

The Utah-Idaho Grain Exchange and the Ogden Grain Exchange have consolidated as the Ogden Grain Exchange. This consolidation centralizes the grain business at Ogden and closes the exchange at Salt Lake City. The officers of the consolidated exchange are; Pres., G. B. Flack; vice-pres., U. G. Holley; sec'y and treas., John Taylor.

Ogden is and has been the transit point for as a greater part of the grain shipped from Utah, Idaho, eastern Nevada or western Wyoming. Salt Lake City, is merely a local market, although for convenience most of the more important intermountain buyers maintain offices there.

According to Freight Agent Johnson of Texas, that state produced 222,456,000 bus. of corn, but owing to excessive rains and weevil the crop has deteriorated to present quality condition of 68. However, this corn will make lots of feed and with estimate of 59,000,000 bus. kafir and 5,500,000 tons forage feed, the demand for corn from Texas will be for white milling only, until spring at least. However, the car situation in Texas is bad.—*Logan & Bryan.*

Hay Department

Instead of burning straw farmers are advised to scatter it over the ground as fertilizer.

The prairie hay crop this year in the neighborhood of Humboldt, Kans., was a very heavy one and was harvested in good shape.

The hay yield in Lyon, Chase, Osage and Greenwood Counties, Kans., was under the average this year and farmers are very slow sellers.

Franklin and Miami Counties of Kansas report plenty of good prairie hay, but probably little of it will go to market, at least not at present prices.

Some counties of Oklahoma report serious damage last season to hay from grasshoppers. This is particularly the case in Mazie and Washita Counties.

A press correspondent from Pierre, S. D., says that there is a good deal of hay yet in the windrow in that state, due to the inability of farmers to secure help.

Toberman, Mackey & Co., St. Louis, are inclined to believe that clover hay will continue in good demand all winter, and that stronger prices may be expected.

Stock feeders from Opal, Wyo., report stock moving out of that section very rapidly as hay is high and scarce and has to be hauled from 20 to 30 miles to the stock.

The hay crop of southeastern Iowa is very heavy this year with quality generally good. Shipments, however, are not very heavy on account of shortage of cars; but most of this hay is in bale and under shelter.

Nowata County, Okla., reports considerable hay sold out of the windrows but as cars are short little of it has been shipped. Considerable surplus still remains in the county, most of which is in bale. It grades No. 1 to No. 3 prairie.

High prices for hay in Idaho have discouraged the sheep men, very few of whom are buying although in some sections of the state hay is now offered at $12 as against $16@20 earlier in the season. Hay speculators are now hunting sheep to feed their purchases to.

Feeders in western Nebraska find plenty of hay, some of which has been selling as low as $6@8 a ton in the stack. Information as to hay as well as feeder stock can be obtained through C. H. Heard, agent in marketing work for Nebraska College and the Department of Agriculture.

The Kansas Hay Dealers Ass'n's booklet concerning rules, regulations and by-laws of the Association is temporarily out of print. The Association, however, contemplates reprinting the booklet after certain additions are made to the by-laws, when those who desire copies may be able to secure them.

The hay crop of Nebraska this year is 10,100,000 tons, according to statistics collected by the Omaha Chamber of Commerce. This includes tame and wild hay as well as timothy and alfalfa. This is probably the largest state tonnage in the country. Kansas is not far behind, with an estimated 9,500,000 tons.

The Denver *Record-Stockman* says hay is too high on the Western Slope, or the Grand River country of Colorado, although the outlook for the winter is not as bad as anticipated in the summer. Hay is now held at $20 a ton on the farm, which is about $5 higher than feeders think they can afford to pay. A meeting of the Western slope stock growers will be held at Rifle on Dec. 10 to consider the situation.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Discontinuance of its city retail feed business and enlargement of its hay consignment trade and activities, including the handling of mixed cars of feedstuffs, has been announced by the Ransom Coal & Grain Co. The organization recently suffered the loss of a considerable portion of its plant in Kansas City by fire.

A comparison of prices for hay today with the middle of November a year ago shows that tame hay is selling at a slight discount, while alfalfa and prairie are bringing a slight premium, at least on the better grades. Best prairie a year ago brought up to $29 a ton, compared with the best figure at the present time of $23. Current prices for alfalfa range from $20 to $35 a ton, compared with $22 to $33.50 in the corresponding period of 1918. The range on timothy is $18 to $26, compared with $16.50 to $29.50 a year ago. Clover is selling from $16 to $26.50, against $16.50 to $28.50 in November, 1918.

Straw prices were as high as $10.50 on sales in Kansas City the past week. There was also a top of $36 for alfalfa. One of the interesting influences in these sales was the buying for the American Royal Stock Show, which is being staged in Kansas City this week. The breeders of the high priced beef cattle who are competing in Kansas City for honors in the show ring are consumers of the best feeds available, and they are also buyers of the highest quality of straw offered for use as bedding. In the last week there was accumulation of both straw and choice alfalfa to meet the demands of the breeders. The purebred cattle business, incidentally, has grown to a point which has led hay dealers here to give special attention to the demand of those engaged in that industry. That the buying of hay by purebred cattle interests will increase is indicated by the enthusiasm over the future of the business of raising such stock which is manifest among the exhibitors at the American Royal Show. Nearly all of the dealers have arranged to attend the exhibition as spectators. They are desirous of keeping abreast of the accomplishments of the consumers of the feed they distribute.

Cattle feeding operations the coming winter will require more hay and other feedstuffs than ever before, according to present indications. This is not generally realized, but figures as to shipments of stocker and feeder cattle indicate heavy cattle feeding operations. Statistics of the Omaha and Kansas City markets combined show that in the past three months they have shipped out 718,702 stocker and feeder cattle, the largest total on record for this season. In the same time last year they shipped out 669,582 stockers and feeders. In addition, the direct movements of cattle from ranges to the leading feeding states have been fully as large as a year ago. In the Northwest, where a reduced number of cattle are being carried over, the hay requirements will be unusually heavy owing to drouth. In the Southwest rather extensive wintering operations are under way. There will, therefore, be no reason for complaining a lack of demand for hay and feedstuffs from feeders of cattle, ing to present indications. event of sharp declines in cattle which some trade interests fear, mand for hay, especially alfalfa this source may suffer in volum movement of fed cattle out of th mous shipments to feedlots in th ent season has hardly started in yards.

BOSTON.

Nov. 15.—The local hay situation is a very firm one under continued light receipts the past week. The best grades of hay are in light supply and the trade is turning to the cheaper grades, with the result that prices generally are higher than a week ago. Receivers report that there is little hay offering at the various railroads that will grade a good No. 2 or better, being mostly poor to ordinary grades which it is difficult to move at current prices. Top grades especially are firmly held and some receivers are holding above quotations, but this is purely speculative. There are few invoices reported of hay to arrive here and this helps to further strengthen the market. Some Canadian hay is still arriving out of condition and hard to move at liberal concessions from open quotations. About $34 per ton is an inside quotation for No. 1 timothy hay in large bales, although extra cars, if wanted, would bring a higher price. Small bales range at $32@33. No. 2 timothy is held at $30@32 for large bales and $29@31 for small bales. No. 1 Eastern is held higher at $31@32, and No. 2 Eastern at $28@29. No. 3 hay ranges at $26@28. Clover mixed hay is about $1 per ton higher, ranging at $27@31, with fine hay at $26@27. Receipts for the week ending Nov. 15 were: Local, 65 cars; export, 5 cars.

The straw market is dull and draggy with excessive offerings at the railroad terminals, especially the Boston & Albany. Choice rye straw is lower at $15.50@16 per ton, with oat straw at $14 for the bulk of the offerings. Receipts for the week ending Nov. 15 were: Local, 10 cars.

PHILADELPHIA.

Nov. 15.—There is a good demand for desirable grades of hay and with supplies well cleaned up prices rule firm and $1 per ton higher. Straw is in fair request and with light receipts the market closes firm at the recent advance.

Timothy hay—No. 1, $32; No. 2, $29@31; No. 3, $25@28. Clover mixed hay—Light mixed, $29@31; No. 1 mixed, $27@28. Straw—No. 1 straight rye, $15@15.50; No. 2, $13@13.50; No. 1 tangled rye, $14; No. 2, $12.50@13; No. 1 wheat straw, $13.50@14; No. 2, $12.50@13; No. 1 oat straw, $14.50@15; No. 2, $12.50@13.

ST. JOSEPH.

Nov. 15.—The hay receipts for the past week have been heavier than they have been for some time past, with the market stronger on all grades of alfalfa, prairie and clover hay. Prices on prairie hay have advanced about 50c a ton. Alfalfa about 50c a ton on choice grades. The demand for prairie, alfalfa and clover hay for the past week has been in excess of the supply. With prices as they are, shippers should take advantage of the strong market and get their stuff on wheels. Nominal quotations are as follows: Prairie—Choice, $22.50@23; No. 1, $21.50@22.50; No. 2, $20@21; No. 3, $17@19. Midland—No. 1, $17@18.50; No. 2, $14@15. Alfalfa—Choice, $35@35.50; No. 1, $33@34; standard, $29.50@32.50; No. 2, $25.50@29; No. 3, $24@25.50. Timothy—No. 1, $25.50@26; standard, $24.50@25; No. 2, $22.50@25. Clover light mixed—No. 1, $25@26; No. 2, $22@24. Clover—No. 1, $25.50@27; No. 2, $20@23.50. Straw, $10@10.50.

OMAHA.

Nov. 15.—On account of the light receipts of both prairie hay and alfalfa and with the demand being good the market is firm and higher on all grades. Oat and wheat straw in demand with market higher. Upland prairie—No. 1, $23@24; No. 2, $18@21; No. 3, $14@17. Midland prairie—No. 1, $22@23; No. 2, $18@21. Lowland prairie—No. 1, $17@18; No. 2, $13@15; No. 3, $10@11. Alfalfa—Choice, $32@33; No. 1, $30@31; standard, $27@29; No. 2, $24@25; No. 3, $19@21. Straw—Oat, $10@12; wheat, $9@11.

NEW YORK.

Nov 14.—The New York Hay Exchange reports the New York hay market as follows:

	Hay tons	Straw tons
Receipts for week	4,219	380
Receipts last week	3,953	520
Receipts Sept. 1 to date	45,429	3,610
Receipts same time last year	64,127	3,630

We note very little change in the general position of our market this week. Offerings have been somewhat freer, and while the demand has been light it has been sufficient to keep stocks moved with some degree of promptness and there has been very little tendency toward accumulation. At the moment the tone is about steady on average offerings inclining, if anything, slightly in buyers' favor. New invoices are naturally light because of the embargo on the N. Y. C. R. R., but more or less hay drifts in at off-road points about the harbor and two or three river boats have come forward the past week largly supplementing rail receipts and naturally putting a damper somewhat on 33rd St. shed. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay	$ @35.00	$ @34.00
No. 2 hay	32.00@34.00	31.00@32.00

KANSAS CITY.

Nov. 15.—Higher prices for all varieties of hay were quoted on the Kansas City market this week. Prairie closed $1 to $3 a ton higher, alfalfa was up 50c to $2, timothy and clover mixed closed unchanged to $2.50 higher, and clover gained 50c to $1 a ton. A further increase was noted in the movement, the arrivals amounting to 960 cars, compared with 859 cars last week and 660 a year ago. A keen demand prevailed for alfalfa, additional sales being made up to $36 a ton, a new high mark for the season. Sales of alfalfa were made in the East, South and Southwest, including Texas. Colorado is the principal source of supplies, with Nebraska and Kansas also shipping large quantities. Prairie hay reached a top of $23 a ton. Late in the week demand for prairie fell off slightly, and the market closed with a weak tone. Timothy is moving southward and in local territory. Straw was unchanged.

Prairie—Choice, $32; No. 1, $21.50@22.50; No. 2, $20@21; No. 3, $17@19.50; packing hay, $10@12.

Midland prairie—No. 1, $16@18.50; No. 2, $13@15.50.

Alfalfa—Choice, $33@36; No. 1, $33.50@34.50; standard, $29.50@33; No. 2, $25.50@29; No. 3, $22@25.

Timothy—No. 1, $26; standard, $24.50@25.50; No. 2, $22.50@24.50; No. 3, $18.50@22.

Clover mixed—Light, $26.50; No. 1, $24.50@25.50; No. 2, $18.50@24.

Clover—No. 1, $24@26.50; No. 2, $16@23.50.

Straw, $10@10.50.

ST. LOUIS.

St. Louis, Mo., Nov. 15.—The receipts of hay for the past week were very light, and were not sufficient to supply the active local and shipping demand. Timothy hay market strong and higher under continued light receipts and excellent local demand for all grades of sound feeding hay. Conditions warrant steady prices and liberal consignments. Light clover mixed hay scarce and wanted; everything offered is readily absorbed on arrival at full figures. Heavy clover mixed hay in scant offerings and urgent local demand. Hay containing at least ½ clover is selling at high figures, in fact, as high as timothy hay. Clover hay scarce and wanted. There is very little clover offered and if here would command top quotations.

Alfalfa hay strong and higher. There is an urgent local demand here for all grades of alfalfa. Owing to the scarcity of clover hay the dairy trade are anxiously inquiring for alfalfa hay and if here would sell at extremely high figures. Choice alfalfa sold yesterday at $40 but it was a particularly good car of soft leafy alfalfa.

Prairie hay market firm, offerings moderate and demand exceedingly good. Conditions warrant steady prices and we advise liberal shipments.

Track Sales—Timothy: No. 1, $31@33; standard, $29@30; No. 2, $25@28; No. 3, $22@24; threshed, $17@20.

Light clover mixed: No. 1, $29@30; No. 2, $26@27.

Heavy clover mixed: No. 1, $29@30; No. 2, $27@28.

Clover: No. 1, $31@33; No. 2, $30@31.

Alfalfa: Choice, $39@40; No. 1, $36@38; standard, $34@35; No. 2, $30@32.

Prairie: Choice, $26@27; No. 1, $24@25; standard, $22@23; No. 2, $19@21.

Straw: $10@10.50.

CHICAGO.

Nov. 17.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Nov. 15, also the total receipts and shipments of hay from Jan. 1, 1919:

	Nov. 1, 1919.	Nov. 8, 1919.	Nov. 16. 1918.
Total receipts	3,258	4,501	4,631
Total shipments	223	324	1,691
Rcpts. since Jan. 1.	209,568	206,310	283,262
Shpts. since Jan. 1.	40,594	40,371	81,835

Continued shrinkage of receipts has made a big demand for any hay that can be used as feed and prices are very strong, on Monday last being the highest in the Middle West. Quote:

Timothy—Choice, $30@31; No. 1, $29@31; No. 2, $26@27; No. 3, $24@25; sample, $20@24; threshed, $12@15.

Clover—No. 1 light, $28@29; No. 1 mixed, $26@28; clover, $26@30.

Prairie—Kansas, Okla., Mo., ch., $20@27;

CINCINNATI.

Nov. 18.—An accumulation caused by suspended trading due to rains early in the week slightly depressed the market but the weakness was only temporary and firmer conditions and higher prices again followed the cleanup. Colder weather also had a stimulating effect on the demand and shipping orders showed a fair increase and local consumptive buying more activity. Receipts, however, were disappointing and the slight advance in quotations was not regarded as sufficient inducement for farmers to let go, and complaints of shippers to negotiate hay in the country were quite general. The movement is not expected to be materially increased until the country is assured $30 hay. Choice timothy and cars showing a liberal percentage of heavy clover mixture and straight cars of pure clover and good alfalfa commanded a premium, but all common and ordinary quality brought higher prices. The trade is encouraging consignment as more cars are now available at loading points.

The poor quality of the offerings Saturday caused slower trading, and outside quotations were not disturbed as easily obtainable for choice hay. Receipts for the week totaled 135 cars. In the terminals 15 cars.

Timothy—No. 1, $29@29.50; standard, $28.50@29; No. 2, $28@28.50; No. 3, $25@27; threshed, $18@20. Light clover mixed, $28.50@29. Clover mixed—No. 1, $28@28.50; No. 2, $26@28. Clover—No. 1, $31.50@32.50; No. 2, $29@31; sample, grassy, $21@24. Alfalfa—No. 1 Western, $38@39; No. 1 local, $33@34; standard, $32@33; No. 2, $30@31. Straw—Wheat, $11@12; rye, $12@13; oat, $11@12.

TOLEDO.

Nov. 15.—Hay situation is practically unchanged from last week. Receipts are light due to farmers being busy at this time and the car shortage. There is urgent demand for all grades except No. 1 timothy and No. 1 light mixed. Prices steady. No. 1 timothy, $27; No. 2, $25.50; No. 1 light mixed, $26; No. 1 clover, $28.50, per ton, carlots, basis Toledo rate point.

SAN FRANCISCO.

Nov. 12.—The car situation is in a most deplorable condition, practically no cars are available at any points for the loading of hay. Stocks in this city come in by water only and are therefore becoming depleted and any hay received is held at very firm figures. The city demand is somewhat light, even with the above mentioned conditions prevailing, but there has been a big improvement in the country demand, and hay is being shipped to various points throughout the State. This demand has naturally caused a firmer feeling throughout the market and, together with the sale of several large crops by original holders at advance prices, has given a decided firmness to the market.

Fancy red oats and fancy wheat hay is seldom seen and when on the market at times brings in excess of our top quotations. Alfalfa remains about the same with a good demand.

Export trade still suffers from the stevedores' strike and shows very little signs of much improvement.

Straw is unchanged.

Fancy wheat hay (light 5-wire bales), $21@23; No. 1 wheat or wheat and oats hay, $18@22; No. 2, $17@19; choice tame oats hay, $20@23; other, $17@20; wild oats hay, $16@19; barley hay, $16@20; alfalfa, $18@23; stock hay, $13@16; No. 1 barley straw, 50@80c per bale.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 985,000 bu. last week, and rye 37,000 bu. Corn decreased 140,000 bu., oats 648,000 bu. and rye 40,000 bu. Details follow, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	6,181	13,455	19,636,000	21,508,000
Corn	167	129	296,000	1,718,000
Oats	2,153	4,104	6,257,000	6,942,000
Rye	1,738	1,064	2,802,000	558,000
Barley	149	145	294,000	1,437,000

Corn Harvest On.

Corn growers are very busy gathering their crop. This work is progressing nicely, some have completed the job and Thanksgiving week will see the 1919 crop practically all in the crib. Shucking reports from farms in this section indicate a yield somewhat under the Government estimate in bushels per acre—no doubt exists, however, that the better quality will make up the deficiency.—*H. I. Baldwin & Co., Decatur.*

Grain Imports.

The following amounts of grain in bushels and flour in barrels were imported by the United States in August, 1918 and 1919, and during eight months of the years named ending with August:

	—September—		—9 months—	
Grain—	1918.	1919.	1918.	1919.
Corn	4,808	7,959,102	1,844,430	8,051,840
Oats	131	16,583	1,440,244	573,073
Wheat	927,154	143,298	15,525,722	6,624,634
Wh. flour	10,644	451	164,481	10,700
Hay, tons	34,802	17,723	307,874	152,097
Wheat from—

Other	4	8,403	28,280	150,080

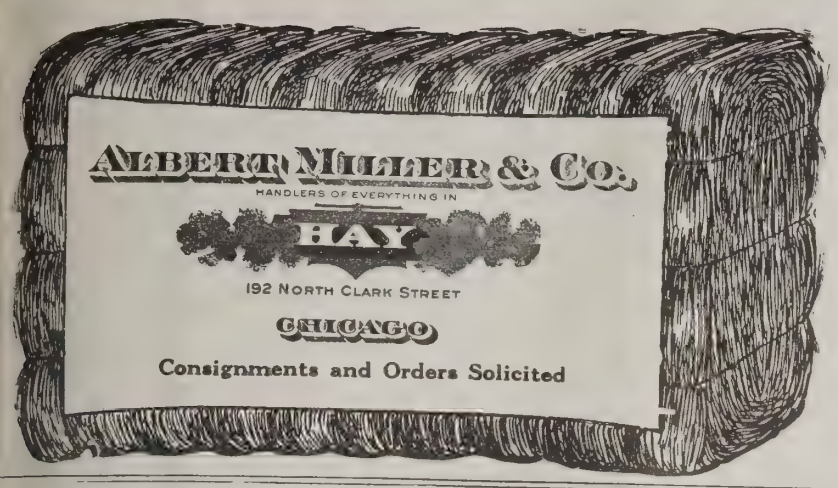
The State Federation of Farmers from Illinois, Indiana and other states are asking farmers to hold their grain and livestock for higher prices.

PRICES AND CROPS IN SPAIN.

In 1918 the Spanish government began controlling food prices by prohibiting the exportation of some and levying export duties on others, and a bounty of $1.80 per acre was paid for excess plantings of wheat in 1918-19.

Cereal selling prices were fixed in east province on the basis of a price at place of production, but it did not work out satisfactorily, so the Commissary General approved the prices recommended to him.

The government fixed the maximum price of wheat, taking into consideration the price of fertilizers, labor, agricultural machinery, cattle, and all the costs of cultivation on the one hand, and the price of bread on the other. This price, until conditions should justify a change, was put at $72 per ton in warehouses or aboard cars, and the provincial boards of supplies were authorized to fix the maximum price in their respective provinces, provided that the price should in no case be less than $7.20 or more than $7.92 per metric quintal (220.4 pounds).



With the exception of flour for so-called Vienna bread, the manufacture of only one class of white flour was permitted, and the maximum price of flour was fixed at $1.98 per metric quintal above the price paid for the wheat milled. The price of bread was fixed at the same rate as flour, except in Madrid and Barcelona where $0.007 additional charge per kilo (2.2 pounds) was allowed on condition that in neither city should bread be sold at more than $0.0454 per pound. Only 10 per cent of the wheat apportioned to each miller could be used for making flour for Vienna bread, the price of which was not regulated. But later in the year it was forbidden to bak than one kind of bread, and on grade of flour, containing 75 p of wheat, was permitted to be m

American
Bale Ties
To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.
OTHER USES:
For baling Excelsior, Shavings, Rags and Paper. For bundling Barrel Heading and Staves, and for Box Bands.
No other form of wire has to tand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.
Complete descriptive catalog sent free for the asking.

TRADE MENTION

The *Flanley Flash*, published every ednesday by the Flanley Grain Co. of aha, is circulating bits of news and t to a long list of shippers in surnding territory. A recent issue has the back of the four-page sheet a le hint expressed as follows: "The ves are turning brown—but the long en stays with shippers who consign Flanley."

The November issue of *Scientific Grist* rmerly *Scientific Squibs*) has just ched us, and contains a little story itled "Turning Dollars Into Pens," which is timely in that it exins why we are in the midst of high ces. The little booklet, issued by e Bauer Bros. Co., Springfield, Ohio, ous for their attrition mills, as al is very attractively gotten out contains its customary number of rty laughs.

pproximately 1,000,000 bushels of ter wheat is stored in Minneapolis, of a total only slightly exceeding 0,000 bushels in a market with 55,000 bushels available. There are btless very practical reasons preting filling up this 50,000,000 bushof vacant storage, and this item in sense criticizes the Minneapolis e, for all there do their best to help country and terminal shippers of South. It does seem unfortunate, ever, that the lack of country grain age and the car shortage everre reported cannot be considerably ved as we believe is possible by g this exceedingly valuable storage lable in Minneapolis.

Posts and Lightning Immunity.

rmers lose millions of dollars evyear as a result of live stock being d by lightning near wooden-post fences. Wooden posts are nonuctors, and when the herd is driven st the fence by a storm, many ble animals may be killed by a e stroke carried along the wires great distance. With Ankorite Drive Posts the fence is grounded ery post—there is no danger from ning unless it makes a direct hit. would seem that the installation of t that lends beauty to the landscape, durability and represents considersaving in replacements necessary old-style fence posts, and possessn addition an insurance value st loss by lightning, should prove the practical post for practical farmers. Do your missionary work now, dealers and elevator men; stock up and tell the story of the "Ankorite" to the farmers of your community during the long winter months in anticipation of your spring drive for business. Simply write the Calumet Steel Co., Department 7, 208 South La Salle street, Chicago, for the Ankorite Dealer Plan.

Suggestion to the Feed Trade.

Mallory, Mitchell & Faust, advertising and merchandising counsellors, Security Bldg., Chicago, take their own medicine and are carrying an interesting series of advertisements based on their long experience and that of others, greasing the cog wheels of merchandising machinery, which is the function advertising performs.

They emphasize a truth known to feed manufacturers when they say, "Merchandising is the marketing machinery which moves a product from factory to consumer. Advertising is but one of the cog-wheels in this machinery. Expenses incident to personal selling are almost twice what they were a few years ago. This increased cost of getting orders tends to decrease profits. The solution of this problem is to permit your salesmen to do nothing by 'retail' calling that you can do by 'wholesale' advertising. Fewer calls and bigger orders are the natural result of insuring your market by constant, well-utilized advertising. Some salesmen still believe advertising is an academic thing. Others sell it to the dealer before they talk the goods. Educate your salesmen how to team-work with advertising and your next campaign will produce more sales."

An ABC Paper.

It is right and proper that THE PRICE CURRENT-GRAIN REPORTER subscribers should know something of the basis of the advertising submitted you in our pages. We hope your patronage of such firms will continue: and we should like to tell you something about our ABC membership (Audit Bureau of Circulation), considered by the advertiser and the agency as the most important factor in determining the best mediums to be used for business development. ABC endorsement is a world wide idea, eliminating as President Jones said, "the unknown factors." THE PRICE CURRENT-GRAIN REPORTER is the only grain paper which is a member of the ABC, thus making it possible for our advertisers who are soliciting your patronage to know just how many there are of you and what your buying power is. They know where THE PRICE CURRENG-GRAIN REPORTER circulation is spread and have definitely fixed the probable results from their advertising. The publishers of THE PRICE CURRENT-GRAIN REPORTER, desirous of maintaining its prestige, sincerely hope our subscribers will give due recognition to the business opportunities presented in our advertising columns.

Pollock Back to Middle Point.

H. G. Pollock, manager of The Pollock Grain Co., announces that they have moved back their wholesale grain and hay offices to Middle Point, O., having closed the Lima, O., office. They are now quartered in new up-to-date offices and are prepared to serve old and new customers much better than ever before. They will devote their entire time and attention hereafter to the buying and shipping of ear and shelled corn, oats, hay and straw in carload lots.

Announcement of Service at Galveston.

The W. L. Richeson Co., Inc., announce to our clients and friends that we are now prepared to serve them in Galveston, through representation by The Stone Forwarding Corporation, agents, The W. L. Richeson Co., Inc., American National Insurance Company Building, Galveston, Texas.

In effecting a Galveston connection, we have had in view a class of service which will insure for our clients a representation in the forwarding and booking of grain and other commodities of an efficiency such as we frankly believe has been operative in their New Orleans office.

THE PRICE CURRENT-GRAIN REPORTER takes pleasure in pointing out to the reader the service covering his particular requirements which this company now offers at Galveston as well as New Orleans.

PRICES PAID TO FARMERS.

Following are details of prices paid to farmers, compared quarterly on dates indicated, as reported by the Bureau of Crop Estimates:

	1918		1919		
	Sept. 15.	Dec. 15.	Mar. 15.	June 15.	Sept. 15.

Marketing Accounting Courses.

Accounting systems for marketing organizations, prepared by the Bureau of Markets, are to form the basis of courses in marketing accounting at 26 colleges next year. These accounting systems have been prepared for use in country grain elevators and creameries. The Bureau says: "Their value has been demonstrated by 800 actual installations."

The Bureau adds that it is "preparing text material which will be available by other lines, including coöperative fruit organizations, coöperative stores, livestock shipping associations and cotton warehouses. Bulletins on accounting systems for commission houses, cold-storage warehouses and milk-distributing plants are being prepared." How interesting.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Nov. 17.—A lower range of values was established for hog products for future delivery last week, with the close on pork and lard at the inside, with pork off 80c, lard 60c, for November and 87½c for January and ribs 25 to 50c, the latter on January. Hogs were also materially lower.

Speculative trading was limited. Lard was bought freely on the weak spots by local packers who took advantage of small rallies to secure profits. The short interest was anxious at times, but their buying on the whole was not heavy. Less inquiry existed for cash lard with more doing in refined lots and less in loose, the latter selling at 75c under November at the last. Early in the week cash lots brought 15c over November. Leaf lard sold at $29. The make of lard is not as large, and those of November 15 showed only 3,394,238 lbs., or 1,600,000 lbs. increase in two weeks. The total stock of all lard was 25,597,000 lbs., a decrease of 1,344,600 lbs., while last year there was an increase of 5,133,000 lbs., with the total stocks 33,544,884 lbs.

The export demand for lard has fallen off and there were reports that eastern traders, who recently were large buyers, were offering to resell both lard and meats at lower prices than they could be put down for in the West.

Short ribs and dry salted meats, as well as pickled hams and green hams, came in for a larger trade, the domestic business being better a good part of the week with a little export business, although at the last a falling off was noticeable. Bellies and backs were taken more freely and packers are giving more attention to them. Green hams have advanced 2c a pound of late and are 20½ to 20¾c for 14@16 lbs. Shipments of lard and meats for the week were 43,566,000 lbs., an increase of 3,500,000 lbs. for the week and of over 11,000,000 lbs., as compared with last year. Of meats alone there were 29,210,000 lbs., an increase of over 8,000,000 lbs. for the week. Hog supplies were larger and prices dropped sharply around mid-week, with a little rally at the last. There are indications of better supplies from now on, but farmers show a disposition to hold off on breaks.

Range of prices in October and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Nov. 15.—Settlement of the strike of coal miners gave the market for provisions in Kansas City an improved tone. Provision interests here have been feeling the effects of the strike by a reduced domestic demand in the principal mining districts, but buying has since been resumed. Prices closed irregularly, some cuts being down as much as 1c. Demand from the large consuming markets of the East was fair to good, and local demand was moderate. Fancy loins were off about ½c, with the cheaper cuts down about 1c. Lard sales were fairly liberal on the whole, with prices about ½c to 1c lower. Dry salt and heavy smoked meats shared a good demand from the South, where high cotton prices are stimulating trade. Fancy hams and bacon were off only fractionally, with a good demand. Declines to new low levels in foreign exchange rates was a restricting influence in the export trade of packers here.

Summary of Live Stock.

Hog prices in the leading markets were highest early and low at the close, the range being as follows, the compilation being by the *Daily Drover's Journal:*

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Nov. 17.—Hog supplies creased over 42,000 last week, wit run of 206,759 at Chicago, altho about 4,000 less than last year. prices were made Monday, $15.50, w the best at the close was $14.55. W ness followed with the close unsati tory and the lowest in two weeks, 3,000 left over. The widest range tween the highest and lowest prices $1.60, or 30c above the smallest spr Heavy packing hogs were slow sale of the time, while pigs and light were in active demand and sold u $15 on Friday, while the best butc brought $14.75. Average on Satu was $14.30, against $15.10 a week Average for the week was $14.60 15c under the previous week and below last year's, compared with $ two years ago.

Average weight for the week was lbs., compared with 233 lbs. the vious week and 225 lbs. last year, v the nine year average was 210 lbs. ers bought 188,700 hogs for the v against 147,000 the previous week 193,400 last year. The Armour inte took 28,500; Swift, 41,500; Wilson 000, and Morris, 16,700.

Fancy beef steers sold at the hi price on record, two head of A yearlings of extra fancy quality last Thursday at $21.21, an outside ing the buyer for the city trade. head of 1,288 lb. steers sold at $ equaling the previous high record Texas bred yearlings sold to a packer early in the week at $20.5 average being 1,015 lbs. Beef generally were 50c higher with th erage $15.50, or the same as the vious week and 40c over last year.

Butchers' stock was unevenly hi although the close was rather Packers were good buyers early prices up 10 to 15c, but the demar ceded. Heifers at one time show to 50c gain from the early low making 75c to $1 above the pre inside week's figures. Average of and heifers for the week was $8. 50c higher than the previous Bulls made a small advance w range of $5.75 to $11 with bologn $6.25 to $7.75 and average for all was $7.40, or 15c higher for the Top prices on cutter stock was with a good trade and an averag the week, $5.95, a gain of 20c fo week.

Western range steers met an sale at 35 to 50c advance with a l supply, receipts being 54,700, a 23,000 the previous week and 20,50 year.

Stockers and feeders were in demand. Ohio buyers taking hold ly, and some of the big feeders will handle as many cattle as last Feeders in central Illinois are als ing hold, picking up Canadian ar at low prices, as they have had a shrink. Prices advanced 25 to 50c the range $6 to $12.75, and av $9.80, or 30c up for the week.

Fat lambs finished the week 25c er than a week ago and 50c abo best figure on Monday with $15. top. Average for the week was or 10c better than the previous and 25c under last year's. Fat sold at $8 and the average was 40c better than the previous wee $1 under last year. Feeders were buyers and the market was stron twenty markets had 468,800, con with 530,200 the previous week 429,700 last year.

Estimated receipts at Chicago f week: cattle, 95,000; hogs, 21 sheep, 140,000. Arrivals last year cattle, 109,692; hogs, 217,639; 151,704.

Kansas City Livestock Mark

Sanders Sosland, Corresponden

Kansas City, Nov. 15.—Larger r resulted in renewed weakness in t

narket in Kansas City this week, while he trade in cattle and sheep showed small hanges. There was a small gain in the rrivals of cattle, while the movement of heep decreased.

The market for hogs closed about $1 ower, having recovered slightly the last wo days of the week. Average cost of roves was figured at about $14.62 for the eek, compared with $14.86 in the preceding eek. The top early was $15.50, but at the lose the top was only $14.55. The action f the market seemed to increase bearish- ess. It is recognized that supplies in Kan- as City territory are short, owing to small orn crops the last few years, but the belief revails here that the larger corn growing reas have heavy marketings ahead. This, ogether with the attitude of packers, oints, it is believed, to lower prices. Pigs osed around 50c lower, with a continued ood demand. The market here at times as relatively higher than at Chicago. ackers were poor buyers of pigs. Quality as lacking in the runs generally.

On the cattle yards the trade started eak, due in part to labor troubles, but ttlement of the mine strike encouraged uyers, especially of stockers and feeders. he receipts were of plain quality, giving vidence of a close cleanup on ranges. ack of cars was again felt. There were w corn-fed cattle in the arrivals, and e top sale was only $17.25, this load being medium quality. It was stated that oice yearlings might have brought $20. he bulk of grass steers sold at $9@13. ome short-feds sold around $14. Feeders ld mostly between $9 and $11.25, and ockers up to $10.75. One buyer paid 4.10 for Hereford steers for a short ish. The sales of stockers and feeders re practically at the same level as a ar ago. Calves closed with a better tone. e top being $17. Butcher stock im- oved after the early weakness, canners osing at $5@5.50, and range cows up to).

Prices on sheep and lambs closed with ght changes, the better fat offerings be- g steady to 25c higher, while breeding ock was weak. Fed lambs closed at a nge of $13.50@14.25. Feeding lambs had spread between $9.50 and $13. Ewes were oted at $6@8.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Ill., Nov. 15.—onger prices and brisk trading has char- erized the cattle market this week. Ad- nced prices were obtained on all classes d at the close of the week they are 75c $1.00 higher than the close of last week. e fair to pretty good grades show the atest advance. The year's highest price s paid on a load of yearling steers which ught $19.00. They were not strictly me, but were the nearest to it of any- ng we have had this season. The Okla- na and Western season is drawing to a se. We had several small trains this ek and will have a few trains this com- week which will about wind up the sea- from that territory. There are still a fat cattle in Texas and we anticipate y will go to market before cold weather s in.

he hog market opened at its top price the period. For the first four days re was a sharp slump aggregating a full ar. In the last two days price condi- is changed and about 25c of the loss regained. At this writing it is 60@80c er than the close of last week. Good s, that is, really good hogs, are a little this year on account of the high price orn last summer. This, together with hortage of equipment in the country t of us, has had its effect not only on quantity but the quality of our offer- s. We anticipate a much more liberal in the hog house in the very near fu- . The week's closing quotations are: ed and butchers, $14.25@14.85; good vys, $14.70@14.85; rough, $11.50@13.25; t. $14.25@14.75; pigs, $14.00@14.50; bulk, 10@14.75.

he sheep and lamb market has held to eady basis with a stronger tendency all wk. The top of the market on lambs is 0. This is slightly over last week's but the lambs were strictly good. At season of the year the quality of our s is somewhat indifferent. Good, well hed westerns will begin to come short- usually in December—and will change condition.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

naha, Nov. 15.—Receipts of cattle this showed a considerable decrease as pared with the week previous or the esponding week last year. There were oximately 50,000 head and the arrivals isted largely of belated Western rang- these being largely on the cleanup or- and including a very limited percentage esirable weighty steers. Not a great y corn fed cattle have been showing y and the meager supply of native has been made up largely of warmed nd short fed steers.

der the influence of the small supply of the general market showed a strong rd tendency throughout the week and e corn fed steers advanced fully 50@ he improvement in the western rang- has been 25@50c. Choice to prime fed beeves, of which there are none ng, would sell around $16.00@17.00, the good to choice grades are bring- 13.50@15.00, fair to good kinds $11.50@ and common to fair warmed up steers)@11.50. Best range beeves brought this week, but bulk of the beef has going at $11.00@12.50, with common ir kinds and Texans at $8.00@10.00. and heifers have shown about as advance as the beef steers and sell at a spread of $5.00@11.00, fair to good butcher and beef stock largely at $7.50@ 9.50. Veal calves at $8.00@14.00 and bulls, stags, etc., at $5.50@8.50 have shown little quotable change during the week.

There was a very fair degree of activity in stockers and feeders all week and a seasonably large volume of business was done, the output being around 25,000 head. Prices ruled steady to a quarter higher, the advance being chiefly on steers of good weight and quality. Best are quoted at $11.00@12.50, **the fair to good** grades going largely at $9.50@11.00 and common to fair stuff and odds and ends at $7.50@9.00 and on down.

The run of hogs has been disappointing in point of numbers, about 25,000 for the week, but quality has been good and demand very fair. Early in the week prices were sharply higher, but later bearish advices from eastern points were responsible for sharp declines and closing quotations are around 35@50c lower than a week ago. Today, with 3,300 hoks on sale, the market was 10@25c lower. Best butcher weights sold up to $14.85, as against $15.25 last Saturday, and bulk of the trading was at $14.40@14.65, as against $14.75@15.25 one week ago.

Sheep and lambs continue to come to market very freely, the 55,000 week's supply being about equally divided between rangers and corn feds. Demand from packers was healthy and there was vigorous competition from feeder buyers for everything so that trade was lively and closing quotations show an advance of 25@40c for the week. Fat lambs are quoted at $14.00@15.00, yearlings $10.25@11.75, wethers $9.00@10.00 and ewes $7.25@8.50. Bulk of the feeder lambs are selling around $12.50@13.25, with warmed up stuff going back to the country at $13.25@13.90 and even better. Demand for feeder stock of all kinds is active and prices very strong.

Oklahoma Livestock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Nov. 15.—The evenness in the cattle trade the fore part of the week was appreciated by all. It was an unusually good starter, considering the receipts, which aggregated 4,500 head, and it seemed to be a good steady market all around. We have not been having sufficient number of cattle coming to keep the packinghouses going full swing and other nearby markets were drawn upon to fill the demand here. The market continues in good shape with prospects for its being somewhat higher on all grades of cattle packers are using. Quality of steers has been common to fair only and they are at least 10@25c higher for the week. Best steers are bringing $9.50@10; common to fair grades, averaging 850 and 900 lbs., are selling from $8.50@9.25. The market closed a trifle lower, with cattle coming from Mexico, New Mexico, Texas and Oklahoma, furnishing some thirty carloads of steers which gave beef men a chance, the first they had in weeks although there was little doing in above 950-lb. cattle. The best coming Thursday was a load of natives showing some weight at $10.25, while $8@9.50 was the scale for grassers, many of good quality but lacking firm flesh.

The market on she-stuff started out steady and at times was claimed to be a little higher. Bulls are also showing an advance for the week with a strong demand, and calves are at least 75c higher, most of the advance being on common to fair grades. Along the stocker and feeder line the market shows little change on medium to best kinds for the week, such as sell much above $7. Mixed yearlings and twos sold up to $8.35 and straight good quality yearlings around $7.25@7.75. Stock cows are steady to weak.

Monday showed a top of $15.40 on hogs which was the highest price paid for some time. The beginning of the week packers advanced cautiously at the start and talked lower prices as the early promise only to finish bang-up steady. The market kept on fluctuating since Monday and hasn't really gotten back to a level basis with the exception of Friday's market when it was called higher. The market for the week was called 25c lower compared to a week ago. Tables were turned in the hog trade Friday. Salesmen took a fling at the price-making chart and all but discovered the $15 strata, an advancing line making the best on sure ground $14.75 with possibilities good for finding the first named.

Canadian Livestock Market.

Winnipeg, Nov. 15.—There was an active trade during the week past in the hog market with selects selling at $15.50 until today when an advance of 50c was recorded. Effective Thursday noon the Public Markets, Ltd., were forced to put forth an embargo on further receipts into the Union Stock Yards owing to the congestion there. Choice butcher steers at the beginning of the week were quoted $8.50@9.50, but on Saturday several steers weighing 1,305 lbs. topped the market at $13, others averaged $10.50@12.

The London *Times* is informed that the Vienna Produce Exchange has been sold for 6,000,000 kroner, normally about $1,250,000, to an Italian concern which will overhaul it for a movie picture house. The Viennese have difficulty in buying bread, but less apparently in finding admission price to the movie.

THE RECORDS of the Flour Mill and Grain Elevator Mutual Insurance Companies
show that 80 per cent of all fires in Mills or Elevators start in elevators. The installation of an automatic feeding device which will positively prevent an elevator choking from overfeeding and an automatic relief which will prevent an elevator choking from bin getting full or spout choking, will annually save millions of dollars in fire loss and add at least 50 per cent to efficiency of any stand of grain elevators. These devices are perfected and are available for mill and elevator owners, are very inexpensive and absolutely practical. Full particulars will be furnished, free of charge by this office, on request.

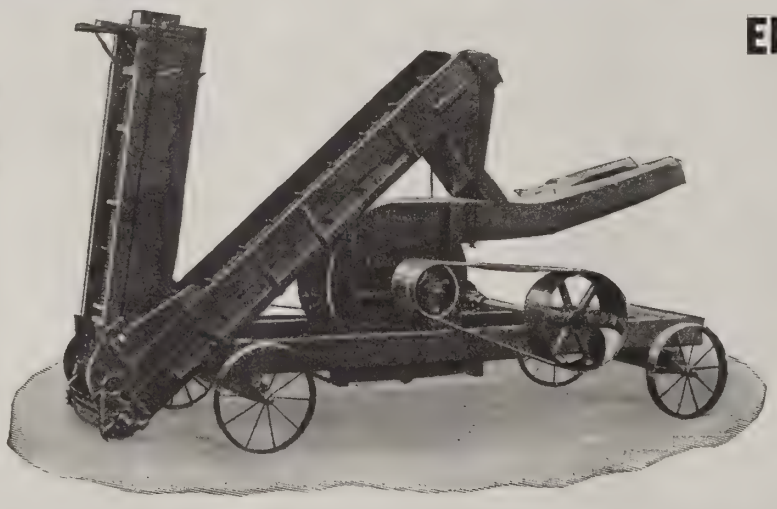
SEED TRADE REPORTING BUREAU Postal Telegraph Build CHICAGO, ILLINC



WHEAT EMBARGO LIFTED.

Julius H. Barnes, United States Wheat Director, announces that, effective on Dec. 15, 1919, the export and import embargoes on wheat and wheat flour will be eliminated. On Nov. 21 President Wilson signed a proclamation completely terminating the embargo control which has been in effect for over two years, first under the War Trade Board and then under the legislation of the Wheat Guarantee Bill, latterly maintained by the Wheat Director. This embargo was one of the first steps taken by the War Trade Board more than two years ago to protect the supplies of wheat and wheat flour for the Allies. Discussing the lifting of the embargo Mr. Barnes said last night:

"This is one step in the necessary reconstruction of trade facilities broken by the war, which must function when the Grain Corporation terminates its three years' work. While ocean transport conditions and also disorganized international finance will probably prevent free trading between merchants of the various countries for some time, it is expected that, step by step, international trade may be re-knit in the usual channels. Until this is fully accomplished, the Grain Corporation will continue to sell from its stocks of wheat and wheat flour the foreign trade that is not supplied under private initiative.

"This release of embargo also permits Canadian wheat and wheat flour to enter American markets free of duty under rulings of the customs service. It is expected that this will greatly enlarge United States' supply of spring wheat flours which are favorites in the baking trade and which, because of the partial crop failure in the Northwest this year, have been relatively in light supply."

The Wheat Director also stated that the sales of the Grain Corporation from its accumulated stocks, largely in Western markets to American mills, under its advertised offer effective Thursday, have amounted to about thirty million bushels. Mr. Barnes added that in his opinion, the mills in all sections are now amply supplied with wheat, though some particular qualities of wheat are relatively in light supply.

EMPTIES WAGON—LOADS CA WITHOUT ANY SCOOPING

MAROA MANUFACTURING COMPANY, PC Dept., MAROA, IL

NATIONAL ASSOCIATION TROPHIES.

The Grain Dealers' National Association has notified the management of the International Grain and Hay Show that it will offer a large silver trophy for the best ear of corn exhibited at the International Grain and Hay Show at Chicago on Nov. 29 to Dec. 6. This trophy is to be awarded annually and will show the names of the winners. The fortunate corn grower will be permitted to hold this trophy during the year for which he has won the same. It will then be returned and competed for at the next annual show. There are at this time cash premiums offered for the best ears of corn exhibited in different regions. This trophy will make an excellent grand sweepstakes award.

HAY MEN OFFER A TROPHY.

The National Hay Association has offered a trophy costing $200 for the best sample of hay exhibited at the International Grain and Hay Show, which is to be held in connection with the International Live Stock Exposition, Nov. 29 to Dec. 6. This is very gratifying to the management as it proves that other organizations besides the Chicago Board of Trade recognize the great educational benefit to be derived from this Show.

In addition to the above, a further trophy has been contributed by the American Association of Manufacturers of Corn Products, for the best sample of corn.

The country has been divided into six regions in which there are classes for corn, small grains and hay. The first prize winners in these regions will enter a sweepstakes class for the entire country and compete for t phies. It is recognized that one of these trophies will bring credit to the winner, and thus will be unusual competition amc grain and hay growers of the States. These trophies will be a annually and will have inscrib them the names of the winner

It is reported that the yield of seed in Kansas is 20 per cent les normal, although quality of the reported normal and somewhat than the 1918 crop. There is a bility of the crop exceeding th mate, as some growers are dep upon the third crop for seed wh merly they produced their see from the second cutting. To t of September 20 per cent of th had passed from growers' hands.

The annual meeting of the Dakota Improved Seed Growers' will he held at Fargo Jan. 20-24.

NEW RECONSIGNMENT RULES.

The Transportation Department of the Chicago Board of Trade is advised that all carriers have been authorized to publish on 5 days' notice, to become effective on or about Dec. 1, the following uniform reconsignment rules for grain, seeds, hay and straw:

"RULE 1—Grain, seeds (field or grass), hay or straw, carloads, will be placed on hold tracks of this carrier (or of the carriers parties hereto) and notice of the location of the hold tracks on which the cars are placed sent to the consignee, or posted on the bulletin board where such practice is in vogue, for the purpose of inspection (see Note 1), and held on such tracks or other tracks for disposition orders, at either the billed destination or a point directly intermediate thereto. Upon cars so placed and held the following charges will apply:

"(a) Grain and Seeds—When disposition order is received prior to the expiration of the free time provided for in the National Code of Demurrage Rules as published in I. C. C. No. 4, issued by J. E. Fairbanks, agent, supplements thereto or reissues thereof, no charge. When disposition order is given after the expiration of the free time here prescribed, $2 per car.

"(b) Hay and straw, $2 per car.

Note 1—The inspection as referred to is: (a) On grain and seeds, that made under National, state or board of trade requirements by competent and impartial authority independent of both vender and vendee; (b) On hay and straw, such as may be necessary or desired.

"RULE 2—Cars billed direct to public team tracks or to elevators, mills or other industries within the switching limits of the billed destination and there inspected and delivery taken, will not be subject to the charge provided in Rule 1.

"RULE 3—The disposition order received after the inspection will be considered as being in lieu of the consignment instructions under which the cars arrived at inspection point."

In another bulletin the Board will set forth the operation of the new demurrage rule for grain, seeds, grain screenings and seed screenings which has been published to become effective Dec. 1, 1919, in the National Code of Demurrage Rules, published in Tariff I. C. C. No. 4 issued by J. E. Fairbanks, agent, which is referred to in the reconsignment rule.

Any demurrage charge under the rules governing demurrage will be in addition to the reconsignment charge.

NEW TRAFFIC REGULATIONS.

Much of the following information has been published in one form or another in these columns; but as the date of effectiveness approaches it will be found profitable to review the new regulations, which are collated by W. H. Perrine & Co., Chicago, as follows:

"On Dec. 1 new demurrage rules go into effect, which will materially change the handling of cars at terminal markets. On all cars of which the sample and inspection is delivered to the consignee or on the floor of the Board of Trade on or before 11 a. m., the free time for disposition will expire at 6 p. m. of the same day; that is, disposition of the car must be ordered on that day. If inspection is reported after 11 a. m., free time will expire at 6 p. m. of the next day. In either case, no additional free time will be allowed for reinspection or appeal. Demurrage charges will be $2.00 for each of the first four days and $5.00 for each succeeding day, plus a $2.00 reconsigning charge and war tax on each. For example, if your car is inspected before 11 a. m. today and for any reason is carried over until tomorrow, you will be charged $4.12.

"A committee, of which W. H. Perrine is a member, is endeavoring to secure a change in the rules of the Chicago Board, covering the rights of buyer and seller, so that they will conform to this new rule and that the State Inspection will be accepted as final and the buyer's rights be protected against uniformly loaded or plugged cars. This will in a great majority of cases enable us to avoid a demurrage and reconsigning charge.

"Attention is called to the new rule now in effect covering the minimum carload weights on grain as follows:

" 'On grain, all kinds, the minimum weight will be the marked capacity of the car, except that where the marked capacity is less than 40,000 lbs., the minimum weight will be 40,000 lbs. per car. The actual weight will apply when grain is loaded to within 24 inches of the roof, at the side walls of the car for the purpose of Federal or state inspection by grain exchange at points where Federal inspection is maintained (notation to that effect being inserted in the bill of lading by shippers), or when grain is loaded to proper grain line of cars so marked.'

"It will be necessary to observe this rule to avoid excess freight charges; and be careful to see that each bill of lading carries a correct notation as to how the car is loaded. This rule will expire March 31, 1920, unless sooner cancelled."

Don't let your subscription lapse; you may lose valuable numbers.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

USINESS AND TRADE CONDITIONS

HE state of the Near East, the bushwhacking of d'Annunzio, the struggles of factions in Russia and Siberia, the festering mess in Mexico, ttitude generally of the older and nascent Contal governments toward international trade, the s of Labor leaders to reduce all workers interally to the dead level of a human swamp, do, d, seem to characterize it as utopian to talk of nent peace or the League as a means to com. Yet there was some justification for the hope n that out of the welter of the great war and ood of sentiment and pietistic preachment of oral elevation of the human race by and gh the great war, there might have emerged hing better than a peace like a *mariage de conce*. Such civilization as the world enjoyed prior gust, 1914, was, of course, the product of war; rty years of peace, in spite of Germany's bestial rists and despicable *Herr professors*, was a human achievement. The armistice, however, vealed that the world has still the self-seekers de and the politicians to deal with, whose perambitions come into conflict with the disinterattitude of real statesmen toward the arts of upon which must be predicated all future perce of peace and the material, and therefore progress of mankind through uninterrupted ry and thrift as the basis of a civilization once nourished by commerce and international trade.

supreme problem of the Paris Conference was f orienting the nations which are to be the ers of the world's peace hereafter. Innumercial groups, styled nations, have emerged from ned empires, all seeking "self determinations" nised by Mr. Wilson. To quiet their rivalries, hitherto stilled, and to bring about their tion to ensure peace in the cock-pit of Eastern , was the great task of the "Big Three," who ave been warned of the superhuman character endeavor when it appeared, as it did immethe Conference assembled, that it could not be out "in the open." The world's peace ashangs on recognition of the heterogeneouspeoples, and the preservation by governments listinctive forms of industry and of products, distinguishing cultural wants and notions of ent and religion of their component races or But peace cannot be expected to result from plication of petty sovereignties. No period of ld was so characterized by war and trade ments as when men were grouped in many ignificant communities, or governments; and hundred years the world for its diplomatic ence had endeavored to reduce the number ning units, not increase them. The only prinat can be hoped to bring about the preserf peace and at the same time promote the of peoples in ways consonant with racial ities is through a small number of supreme g units, each of which shall recognize the ng and immutable standards of justice and owever difficult their practical application. principles of government there are, but pertice is as difficult as it is rare. Yet Engd even France and the United States, but rmany) has been able to govern and matevance the estate of colonies of retarded peodapting principles of treatment of backward o imperfect practice. Prof. Sloane, as an says that when Lord Lawrence received a high judicial appointment under the British Indian government to administer the laws of primitive hill tribes, of the Brahmin code and Manu, of Islam as well as Christendom, he drew back dismayed; but the master of the rolls said: "Go, hear attentively, consider and give your verdict, but never append your reasons." It was a counsel of perfection, the success of which in India, in Egypt and elsewhere amazed the world in 1914 and dumfounded the Kaiser.

But the apparent scuttling of the Treaty and the Covenant of the League by the Senate might be more convincing as a counsel of pure Americanism if one could have more confidence in the personal disinterestedness of such men as Johnson, Borah, Reed, McCormick, even Mr. Knox and Mr. Lodge, and conceive of them as statesmen whose personal ambitions might not, in their judgment, be promoted by the defeat, not to say the humiliation in this matter, of the President. Were it not that the party now in legislative control at Washington is tarred with same pitch of semi-socialistic paternalism, hitherto defiantly characterized as "Progressivism," which has made the Democratic Administration a counsel of imperfection to many thinking people and peculiarly irritating to all engaged in productive and distributive lines of business, one might suggest the possibility that it had been better politics to have spared the Treaty and Covenant, which will go into effect in spite of America's self-isolation (and may therefore have unpleasant trade contingencies for Americans, in view of the Paris Economic Conference of 1915), and make a campaign in 1920 on the character of the Administration as an unconscionable meddler with the business interests of the country by its practice, in time of peace as in time of war, of substituting theory and pedagogic credulity for experience and philosophic economic conservatism and common sense. But of course as to this more will be seen and known in the future. Just at this time the business world is undoubtedly much perturbed by the Senate's procedure. Legal as well as *de facto* peace the country must have; and there is more meaning to the Senate's action upon the Treaty than Mr. Lenroot's sneer that "nothing is involved except the giving to or the withholding from one man, the President, of something he wants."

The coal strike is still a real thing and so much a menace to living of the poor in even tolerable comfort this winter, that already thousands of workmen are out of employment indefinitely because factories and mills can no longer obtain fuel. The miners chose the moment when they imagined it would be easiest to force the public to yield to their demands. The menace of a lack of heat for the rich was the chief thought, overshadowing the other fact that the inability of mills to secure fuel for power more seriously menaces the power of the working class to maintain themselves at all by earning wages. Both cold and lack of work therefore stare many in the face who are not able to take long vacations at any time, much less in the dead of winter. There has been some seizure of mines by the state authorities of Ohio and Kansas and talk of the Federal Government doing the same, but how the Coal Administrator and state governors can compel miners to get out coal, who defy the mandate of the Federal Government, as issued by its courts, to do the same thing, is not very clear. The penalty of spineless optimism is disillusionment. The Federal and state governments have been coddling labor without conciliating it. The unwise and unnecessary cost-plus system upset the entire morale of the industrial organism. It citiated in advance all argument to show that defiance of natural laws must "cash in" sooner or later—sometimes later, perhaps, rather than sooner. But when the demand for payment comes, the account will be large and the pain of liquidation bitter. One part of the payment for past recklessness is demanded now, and the present week will see how the Government will meet it. Secretary Wilson has warned the recalcitrant strikers that impossibilities cannot be hoped for, and some demands by them have been withdrawn; but even Mr. Wilson is hardly yet ready to tell the miners what most of our people have yet to learn, that, as the French now say: *travailler sans raisonner c'est le seul moyen de rendre la vie supportable*: to labor without questioning is the only way to render life tolerable—that has hardly become a bureaucratic habit as yet, although as we understand the Bureau of Education is beginning to dwell upon that necessity now in its "reconstruction" propaganda.

The House has adjourned the special session, leaving the Esch railroad bill in the arms of the Senate. It will prove only a flash, no doubt. Although it was only about fifty days until under his direction the roads shall be turned back to their owners, the President on the 18th vetoed the Cummins bill restoring to the Commerce Commission its pre-war rate-making power. The Commission has been functioning as in the past, passing on complaints, readjusting rates, and giving hearings on matters in controversy like docket No. 9009, and is regularly publishing its findings; but these have now in law only an advisory character; the Director-General may act on the advice handed him by the Commission or reject it as pleases him. The reason for the veto is the technical one that, "the bill would deprive the Government, which is still charged with the exclusive responsibility for operating the roads during Federal control, of any power to make any change in any intrastate rates," etc., which no doubt is true enough, but really means nothing under the circumstances, as the bill itself did not mean much more for the same reasons.

RESCUING THE HORSE

FARMERS—at least some farmers—are like other men: perfectly willing that the other fellow should volunteer to take care of their interests. In which respect those who think so are like other men who do not take much real thought for themselves and so don't get on in the world as well as they might. However, farmers in these days—some farmers—resent the city man's officious concern for his interest. One wonders, then, how the suspicious farmer who thinks every man's hand is against his pocketbook will react to the new movement to save the horse as a city animal and "beast of burden." For it has largely been left to some one other than the farmer who grows horses and the stuff to feed them to start a movement to save the draft horse from extinction, so to say. The horse for pleasure driving has already disappeared. The farmer doesn't himself set a good example, at least in this respect. At a recent farmers' picnic in West Virginia the pleasureseekers went to the rendezvous in about a thousand automobiles and only three vehicles drawn by horses were seen, and no doubt the owners of these were quite mortified by their conspicuousness. It's the same story everywhere. The farmer is poorly paid, the agitators tell us; but he is not too poor to own a flivver or better and to buy gas. And then he complains that hay is too cheap and won't sell at the price offered for the biggest crop on record; where

upon the Horse Publicity Association has been compelled to come to the rescue of the horse and the hay mow, both important factors of the farmer's business. Perhaps the association will be able eventually to convert the farmer himself to faith in and reliance on his own products and his old friend, the horse, as a business proposition, still useful in these days of gas and "social justice."

MICHIGAN DUE FOR EXPERIENCE

A GRAND RAPIDS paper says that, "The special committee of prosecuting attorneys will recommend the establishment of state elevators and storehouses for grains and foodstuffs to aid in combating the high cost of living and to eliminate profiteering." etc. In other words, the prosecuting attorneys of Michigan propose to commit the state to public taxation for the purpose of building and running elevators for a class only of the people who are amply and honestly served now. Next it will be mills, shoe shops, clothing shops, etc., *ad lib.* In other words, these officeholders' cure for high prices is to make more taxes and more jobs for men who are too incompetent or too lazy to make decent livings outside appointive state jobs, but who do make precinct politicians to help equally cheap but more energetic men to get into or to hold elective jobs. Michigan has had this matter before it for some time. It was suspended once; but in the present temper of farmers it might seem as though the state is due for an unpleasant experience before she gets rid of this insidious fallacy of militant petty officeholders seeking to perpetuate their holdings, that "the state" can do everything without calling anyone anything. Nonpartisanism has entered the state and Michigan must look to herself.

THE FEEDSTUFFS MARKET

OUR correspondents are agreed that while the demand for feedstuffs is at present rather dull, owing to the mild season thus far in a large part of the country and to the unusually good fall pastures, the winter calls for manufactured and the mill feeds will be as great at least as usual. Milk production is profitable now if it ever has been in dairy history, and there seems no reason for a change for the worse. The demand for condensed milk is increasing the world over, and it will be several years before the old world will be back to normal production for export. Exports of condensed and other milk in nine months were 617 million pounds vs. 396 in 1918 and 270 in 1917; butter exports same periods were 27 million vs. 16 and 5 million in 1918 and 1917. Feeds are not high compared with milk. It is only the spineless herd owner who thinks so; and for such people there is no argument. They will get out of the game as they got into it, by jumping at conclusions based on surface indications, not after the exercise of sound judgment based on study of trade facts and prospects.

PREPAREDNESS SUGGESTED

THE disposition of men in general to postpone what can be put off is common enough. "Poor Richard's Almanac" had much advice against the habit and less wise men repeat Poor Richard because "Poor Richard" always appealed to common sense even if he could not correct the inertia of men. Wherefore the advice is thrown out again to begin your preparations for spring repairs and new building now, by gathering your information as to machinery and accessory equipment and even getting your engineer's data for contracts for the supplies to be needed and the work to be done so far as both may be possible. These are not times, what with labor unrest in the factories, when anything should be taken for granted. Get your catalogues and descriptive matter and get at your problem long enough in advance to be able to start right when you can start to build. Know just what you want and how you want it.

CORN AND THE H. C. L.

PRESIDENT KRAUSE of the Corn Millers' Federation, in his address to that body at Chicago on Nov. 21, said what is true enough, no doubt: that the Nation's food bill could be cut 40 per cent by doubling the consumption of corn in its many appetizing forms of flour, hominy, grits, meal, flakes. If the high cost of living were really caused by the cost of cereal foods, no doubt there would be a greater demand for corn products. Unfortunately the greater trouble is the cost of high living; and attributing this to the cost of food products, especially cereal food prices, is a subterfuge cultivated by agitators, the newspapers and certain law officers whose activity seems largely confined to denunciation of profiteers. For reasons which are difficult to find, other than popular prosperity, which enables most people to consume wheat products (in all ages the bread grain of prosperous peoples, as opposed to rye or barley of poorer Continental peoples and corn in America, the grain which made settlement of the continent possible), corn is in disuse in proportion as the popular income expands. Mr. Krause says our consumption of corn is only 81 lbs. per capita vs. 181.55 lbs. of meat, many times as expensive and far from containing as many units of nutriment, and 318 lbs. of wheat with not much more nutriment and several times the cost of corn.

The corn miller's problem, as we see it, is to in some way popularize his products and make their food value known; but in doing this the fundamental fact must be borne in mind that whereas the time was when corn was an absolute necessity to the pioneer and the frontiersman, now the people have gotten so rich that corn has ceased to be a necessity, but like rye and buckwheat in this country has become a luxury, a variant of the diet. Wheat flour as a commodity needs no advertisement, except of particular brands; corn products need advertisement to recreate a demand for a particularly fine addition to the daily diet of those who are seeking variety combined with real nutritive value. Many housewives know nothing of corn products except (in the North) yellow corn meal, and most of them don't know how to cook that properly, or any other corn food. Yet we believe with Mr. Craver that the creation of a popular demand for corn products for table use must be done by individual miller's advertisements of particular goods and brands.

THE CHICAGO HAY MARKET

THE Chicago hay market has been for years following along a rut. Not entirely because it wanted to but because the railroad map of the city in a measure compelled it to follow along lines of least resistance. Several times in the past the trade has attempted reforms of inspection and handling always to butt up against a wall of railway inertia. But now the trade think they are going to win out and get what is needed down to the last detail. Shippers to this market can do much to help the local committee by writing their railway managers, not long badgering letters but brief pointed and accurate statements of fact, so that when the time comes for concerted action the railway men here will be prepared to show the higher-ups just what is needed to make the Chicago hay market what it ought to be and may be made: a market in every respect equal to the best in the land.

EDITORIALETTES

ON Nov. 18, 1918, there were in store in elevators in Chicago 7,498,177 bus. of wheat of 77 grades and varieties out of a possible 86. On Nov. 18, 1919, the complexity of the elevator holdings was somewhat less. The total was 6,181,243, and the varieties and grades numbered only 36 out of a possible 86.

THOSE who handle wheat and products must remember that the Grain Corporation rules must be lived up to scrupulously or they will be put o business. We have a list of eight concerns i Southeast who have had licenses revoked for tention to the rules. Perhaps they don't car out of the game. If they do care, they shou careful.

THE "Rules and Regulations" governing the i tion of food products under the law of July 24 have been issued; but for the present the work v confined to fruits and vegetables only. The la templates inspection of hay also; but H. E. Kr specialist in charge, notifies this paper that hope in time to extend the service to hay ar other products mentioned in the law." Present ice is confined to the metropolitan cities, but n extended to the smaller cities also.

J. R. HOWARD of Iowa, first vice-president American Farm Bureau Federation, made a hi the Conference at Chicago ten days ago, with lution which said in substance that the Confe denied the assertion of many Congressmen th farmers still want free seeds. That notion is a fiction of Congressmen who are too intent bribing small caliber farmers to vote for them than any desire of a decent, self-respecting f to get small "dabs" of seed at the expense Government.

THE broad and sane mind of John W. Shorth be seen and felt in the resolutions adopted Farmers' coöperative state association in s last week at Omaha. No Nonpartisan Leagu Equity Society, nor unbalanced Bureau agen laver has affected his mental poise. A wise m ognizes that the golden rule is the safest law ment; it was the Master's guide to safe living man who asks for special favors by law for him class must be prepared to grant the same privil all other men and classes, and nothing is gaine there is no safety in such a policy.

WEEKLY STATISTICAL SUMMARY

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and sponding time last year, here assembled for ready ence:

	Nov. 22.	Nov. 15.	Nov. 2
Wheat—			
Primary receipts	8,066,000	8,159,000	7,2
Primary shipments	4,533,000	3,811,000	13,7
Receipts since July 1	258,028,000	249,962,000	288,1
Visible	92,906,000	96,136,000	127,5
Exports, U. S.	7,626,000	7,689,000	5,4
Exports, world's	14,339,000	11,970,000	7,1

The Price Current-Grain Reporter

Published every Wednesday by the
Price Current-Grain Reporter,
912 Webster Building.
327 So. La Salle St., Chicago, Ill.

J. CARVER STRONG,
Treasurer and Manager.
EATON G. OSMAN,
President and Editor.
GEO. A. WELLS,
Vice President and Contributing Editor.
H. A. SHEPARD,
Secretary and Advertising Manager.
L. A. KOCH.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $0 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are invited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell its worth. If you would be classed with the leading firms catering to the grain trade, have your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, NOVEMBER 26, 1919

GRAIN TRADE REVIEW

Decidedly bearish developments in the grain situation failed to have as depressing effect as the trade in general expected. If the firmest believers in low prices had been allowed to name the factors which should have caused a decline they could not have asked for more than were in evidence. The coal strike caused practically all of the eastern industries to shut down temporarily, and it is expected that they will remain closed for several weeks; foreign exchange broke to the lowest figures known; the stock market was strong; weather conditions excellent for the movement; domestic call slow, and receipts at terminal markets larger. In the face of all this futures closed firm, while the cash eased off only slightly, the cash-December spread narrowed until at the last No. 4 mixed sold at a fair discount under the nearby delivery.

When a market advances in the face of very bearish news it generally represents inherent strength. The reselling of wheat by the Grain Corporation several months ahead of last year's offerings in the face of a bigger movement, while construed as bearish early, was a factor that induced considerable buying, as the demand for hard winter wheat was far in excess of the supply in one of the leading markets. The withdrawal of the embargo on wheat, which will admit Canadian grain free of duty, is not to have any effect, as it will be a month December before shipments can be made, and there is considerable doubt as to the ability of Canada to export any large quantities of the grades most desired, owing to the fact that the crop there suffered from the same causes that cut down the quality of the domestic spring wheat on this side.

There is no general desire to sell on the part of producers. In the Northwest farmers' organizations are being formed rapidly and have a great deal of sentimental effect on their attitude toward selling. The belief that the trend over at country loading stations should be received is firmly implanted in their minds, and with several years of high prices and plenty of money farmers are in a position to hold if they want to do so.

The movement of new corn is increasing and over 80 per cent of the arrivals at Chicago have been from the 1919 crop. It is seldom that a car of sample grade is received, and only a very few cars grade as low as No. 6. The grain is running from No. 3 to No. 5 with scattered cars of No. 2. The quality is exceptionally high this season, a very fortunate happening, in view of the shortage in storage room. In some sections an increase in the moisture content is noted as the result of recent heavy rains, but so far this has not been shown in the arrivals at Chicago.

The maximum price of 65 shillings per quarter ($1.97½ per 60 lbs.) on Argentine corn in the United Kingdom has resulted in export sales from the United States at around 81 to 82 shillings per quarter ($2.45⅞@2.48½), again showing the fallacy of trying to restrict buying by fixing prices. American corn has no price limit, and despite exchange at the lowest figures known, fair purchases were made because the grain could be delivered by Americans. Ocean freight rates have advanced from Argentina, and business is greatly restricted both to the United Kingdom and to the United States. The crop of the latter country is probably materially short of the 2,910,000,000 bus. suggested in the November returns, as allowance must be made in the acreage for the amount cut for silage.

Wheat prices have reacted somewhat from the high figures recently prevailing. Hard winters led the decline, but desirable kinds are still selling materially above the resale price of the Grain Corporation. Dark hard winters are wanted to mix with the low grade springs. Dard hard northern has held well above the $3 mark, although there may be some reduction in the price if Canadian grain is imported. Flour prices are high, and the Grain Corporation is going to resell straight flours to the trade in small packages in order to try to prevent a further advance. It is freely predicted that this flour will ultimately be offered by the retail stores all over the country at only a moderate increase over the cost price.

Oats, rye and barley are being taken for export in fair volume, and in the face of the low rates of exchange, German marks and Austrian crowns have declined to almost the vanishing point, but it is understood that part of the rye taken will ultimately find its way into these two countries. Neutral countries have bought oats, and a lowering of ocean freight has resulted in some business with the United Kingdom. Argentine grain is selling at better figures than American in the United Kingdom. Receipts of the three grains from the interior are not large, and for several weeks domestic shipping sales of oats at Chicago have been in excess of the arrivals. Stocks have commenced to decrease, and were exports liberal a sharp reduction might be witnessed.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points the past week follow:

	Nov. 22, 1919.	Nov. 15, 1919.	Nov. 23, 1918.
Wheat	8,066,000	8,159,000	7,274,000
Corn	3,052,000	2,442,000	3,228,000
Oats	3,989,000	4,040,000	6,304,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	15,107,000	16,806,000
Preceding week	14,641,000	16,824,000
Since July 1	411,555,000	515,969,000

While corn prices fluctuated rapidly the past week, the close was at net gains of 2@4c on the active deliveries despite extremely bearish news. The market was oversold, and short covering toward the last made a sharp upturn. Until a liberal stock is accumulated at terminal markets it is generally believed that price changes will be rapid, as there is no balance wheel. Country offerings light and cash demand fair, despite industries being out of the market the greater part of the week. Some export demand developed.

Oats continue in a rut, but there was some buying on the belief that prices were much too low, as compared with barley and corn. Domestic shipping sales liberal, and some reduction in stocks is now being witnessed. For the week net gains were ½ to ¼c, May leading. December showed a little congestion for a time, but free selling credited to the leading long eased the situation.

Around 30,000,000 bus. of wheat have been resold by the Grain Corporation to mills as the result of its recent offer. The demand came from all parts of the country, and of hard winter much larger quantities could have been sold. Embargo on imports of wheat, and also restrictions on trading with Europe will be removed Dec. 15. On Nov. 22 Canada had around 88,000,000 bus. wheat in all positions available for shipment, including 50,000,000 bus. in farmers' hands. Import business will depend on attitude of Canadian government, which controls the wheat. Receipts not large, although increasing in the Southwest, where grain from western part of the belt is being received. Range of prices for the week follows:

			Close		
	High.	Low.	Nov.22, 1919.	Nov 15, 1919.	Nov 23, 1918.
Corn—					
Dec.	$1.35⅝	$1.26¾	$1.31¾	$1.27¾	$1.24½
May	1.26⅝	1.22¾	1.25⅞	1.23½	.....
July	1.25½	1.22	1.24⅝	1.22⅝	.....
Oats—					
Dec.	.73¼	.71⅛	.72⅜	.71⅞	.72⅞
May	.76	.74⅛	.75⅞	.74⅝	.....

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago as reported to the New York Produce Exchange by the George Broomhall service and forwarded to this paper:

	Nov. 22, 1919.	Nov. 15, 1919.	Nov. 23, 1918.
American	43,000	.....	156,000
Argentine	2,653,000	2,375,000	1,790,000
African	.....	.....	112,000
Total	2,696,000	2,375,000	2,058,000

Exports of corn since Nov. 1, 1919, compared with last year and year before:

	1919.	1918-19.	1917-18.
American	59,000	282,000	1,580,000
Argentine	6,310,000	3,789,000	1,531,000
African	.....	494,000	.....
Others	.....	.....	162,000
Total	6,369,000	4,565,000	3,273,000
Season	.....	97,829,000	52,393,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1919.	1918-19.	1917-18.
P. stocks at Nov. 1	1,212,000	4,117,000	174,000
P. receipts to Nov. 22	11,357,000	15,709,000	10,761,000
P. shipments to Nov. 22	6,476,000	10,804,000	3,669,000
P. stocks on Nov. 22	1,005,000	2,853,000	661,000
P. consumpt'n to Nov. 22	5,088,000	6,169,000	6,605,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Nov. 22	268,028,000	288,099,000	112,996,000
P. shipments to Nov. 22	117,528,000	130,739,000	52,785,000
P. stocks on Nov. 22	58,157,000	83,214,000	6,110,000
P. consumpt'n to Nov. 22	95,285,000	74,372,000	56,390,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Nov. 22	97,744,000	132,889,000	139,839,000
P. shipments to Nov. 22	61,371,000	92,811,000	96,953,000
P. stocks on Nov. 22	13,314,000	15,515,000	12,939,000
P. consumpt'n to Nov. 22	29,791,000	28,611,000	30,486,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Nov. 22, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	62,720,000	59,118,000
Milwaukee	4,284,000	9,622,000
Minneapolis	61,171,000	62,267,000
Duluth	9,409,000	54,023,000
St. Louis	33,183,000	31,717,000
Toledo	6,412,000	4,281,000
Detroit	1,229,000	951,000
Kansas City	53,937,000	44,211,000
Peoria	2,113,000	2,961,000
Omaha	17,319,000	12,681,000
Indianapolis	6,251,000	6,067,000
Total	258,028,000	288,199,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Nov. 22, 1919.	Nov. 15, 1919.	Nov. 23. 1918.
St. Louis	819,000	857,000	357,000
Kansas City	2,474,000	1,836,000	167,000
Omaha	506,000	461,000	58,000
Toledo	88,000	115,000	72,000
Detroit	34,000	65,000	67,000
Indianapolis	73,000	91,000	63,000
Peoria	15,000	42,000	23,000
Chicago	658,000	809,000	1,049,000
Milwaukee	78,000	93,000	265,000
Minneapolis	2,638,000	2,868,000	2,526,000
Duluth	683,000	922,000	2,627,000
Total	8,066,000	8,159,000	7,274,000
Shipments	4,833,000	3,811,000	13,797,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago as reported to the New York Produce Exchange by George Broomhall's service and forwarded to this paper:

	Nov. 22, 1919.	Nov. 15, 1919.	Nov.23. 1918.
American	7,626,000	7,689,000	5,456,000
Indian	.....	.....	314,000
Argentine	3,263,000	2,625,000	445,000
Australian	3,384,000	1,608,000	810,000
Others	66,000	48,000	84,000
Total	14,339,000	11,970,000	7,109,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

American Corn Millers' Federation

Annual Convention at Chicago—Some Interesting and Suggestive Addresses—The Annual Banquet—Officers

Reported by H. A. SHEPARD

Friday and Saturday, Nov. 21 and 22, saw the American Corn Millers' Federation in annual convention at the Congress Hotel, Chicago. The industry has gone through a trying period, withstanding—if we may use the word—Government control, with its ever-changing policies; and the corn millers of the country are today most optimistic of the business outlook before them. President Chas. A. Krause's annual address emphasized his own faith in the future, with corn milling facilities for serving the public "so great that it is difficult for me to restrain my desire to bring every corn miller to the same enthusiastic conviction." The production of corn is this year nearly equal to that of all the other food grains and potatoes combined. At the present rate of consumption barely 6% of the corn will be milled; but while other foodstuffs may advance in price, such is not the case with corn, owing to the enormous production. It remains for us to serve the public and our country by embracing the present opportunity.

Dr. Carl L. Alsberg, chief, Bureau of Chemistry, Department of Agriculture, spoke on the utilization of corn and its products. His remarks have been covered in similar subjects in this paper in the past, and as usual with him they were right to the point. One of the outstanding features of his remarks on this occasion was his reference to the production of glue from corn cobs. It seems the profits therefrom exceed the revenue secured by burning cobs for fertilizer or from cobs chopped as feed.

COÖPERATION IN MANAGEMENT AND IN TRADE.

W. N. Adams of the Arkadelphia Milling Co., Arkadelphia, Ark., read a paper entitled "Coöperation," which was rather more comprehensive than perhaps the auditors had anticipated—an able and most suggestive address. It was as follows:

It ain't the guns, nor armament, nor honor, that you can play,
But it's co-operation that helps to win the day.
It ain't the individual nor the army as a whole,
But it's the everlasting team work of every bloomin' soul.

—Rudyard Kipling.

"Coöperation should be the purpose of any organization. The business organization is the machine by means of which the forces of industry make themselves effective. An effective organization like a good machine must work with a minimum loss of energy. Every pound of steam worthlessly dissipated must detract from the efficiency of the engine, as a source of power. The power that is to be directed by means of the engine should not be expended in pulling useless line shafts, pulleys, idlers, belts, or in overcoming needless friction. Likewise a business organization which is to direct the power of capital and labor should not permit the dissipation of its energy. Nature and labor are the primary elements in production. All the wealth of the world has been produced by the coöperation of these two factors.

"We are going to discuss coöperation as applied to individual business and as a federation necessity. 'Coöperation' is derived from the latin 'con', with, 'opus', work: 'working with' or 'working together.'

COÖPERATION IN THE BUSINESS UNIT.

"The business unit considered as a combination of capital and labor has increased in size, and the two component parts have assumed such entirely new relations to each other that many of the most pressing problems of the day depend for their solution upon making them coöperate more efficiently and harmoniously. Proper coöperation is impossible without first-class organization and first-class organization is difficult without an organizer. One of America's distinctive contributions to the industrial world is the organizer. The industrial achievements of American organization far surpass that of any other country in the world.

"The organizer is commander-in-chief of his particular industry. His first duty is to see that the correct outlines of the business he has planned are placed for execution in the hands of competent men. He mobilizes the forces of labor and capital and applies them to natural resources so that the result produced is the largest returns for the smallest outlay. Management implies three things: a force, a purpose, a director of this force to obtain this purpose. A football team illustrates this statement. The individual players represent the force. The captain or the quarterback directs the play and the winning of the game supplies the purpose. Every player may be an individual star but without teamwork they will never win the game.

"After you have selected the proper men for heads of departments to get the right sort of coöperation you must give them responsibility; otherwise they will lose their interest and initiative and the business will suffer. Remember, we must never attempt to destroy individualism, the fundamental principle of democracy. We are a nation of private enterprises and individual initiative. Let the incentive of your men be the zest and scope for doing things. The joy of creative effort. Give them almost unlimited scope for ambition, ability, force, hard work, so long as they will coöperate with you and each other. The result will be material reward of successful achievement. There is no friction between individualism and coöperation, just as there is no friction between one's body and the brain. Each hand or foot can and does act independently yet all coöperate under the direction of one head. We talk of the 'head' of a business and the 'hands' of a business. There is a certain amount of truth in the classification, but it is not the ideal one for the success of any concern. The 'hands,' as we are prone to call them, are the thinkers and the feelers as well as the doers. Perhaps we might go further with our analogy, and say that the business should have a backbone and a heart as well as head and hands. Certainly a body might have both hands and head yet be dead and useless without a living heart. If the organizer is capable, if the manager is competent, if the organization is good, if the assistants are loyal, and if the bosses are honorable American citizens who love their men, have organizing ability and can maintain discipline, there should be no difficulty in instilling loyalty and a spirit of coöperation into all their laborers or hands. Usually, if the heart and head are right the hands will be.

THE UNREASON OF LABOR.

"The fundamental principle of union labor is coöperation, but unfortunately these principles are being lost sight of by many unions. There are many union labor leaders now who are parading themselves in the twilight zone of treason. They are scattering poison among the ignorant and have invoked the spirit of unrest wherever possible. Instead of coöperating with the Government for more production and less waste, they are preaching the policy of fewer hours and higher pay. They seem to overlook that all the progress that the world has ever made is the result, direct and indirect, of human toil. Only in labor—in action—is there happiness. The animals know this. All bees work except a few drones and after a certain event they are destroyed. An ant is never a sluggard. Living organisms in the ocean build up mountains until their crest is above sea level. The bird is inactive only when asleep. We hope that soon a large portion of organized labor, which is reasonable and which aims not at the overthrow of constituted authority but at the gradual betterment of conditions and wages, will sanely coöperate with the other 90% of the good people of this country and rid themselves and their unions of the extreme radicals and revolutionary agitators. The world is tired of labor unrest. It is sick and disgusted with labor unreason. The revocation of the coal strike following on the heels of the almost complete failure of the steel strike offers a rainbow of promise. The emphatic approval of the governor of Massachusetts by both parties at the recent election impressed the labor leaders with the trend of public opinion. Instead of having the sympathy of the people they have been compelled to recognize their position as that of minority instead of majority.

"We believe in the basic principles of unionism but we are opposed to the radical element of labor who are fighting the Americanization of industrial forces of the country, and the maximum and uninterrupted production which is so essential to national progress and almost to the salvation of the world.

"There is a difference between collective bargaining and collective brigandage. Civilization is based on the coöperation of all members of organized communities. Its continuance depends upon the individual's use of his property or his labor in the way best satisfying to himself, yet without harm to others and without depriving anyone else of his rights.

CAPITAL IS LABOR SAVED.

"Loyalty and coöperation can be instilled into the men in most cases by fair treatment, by letting your employes know that the business has a heart. It is important for labor to realize, first, that capital is only labor conserved; second, that just as the forces of a business must be correlated and the machine processes coördinated, so must the laboring forces coöperate.

SALESMAN COÖPERATION.

"We now come to disposing of the products produced by the coöperation of labor and nature or coöperation in salesmanship. The industry or business coöperates with the salesmen and with the customer and looks for their coöperation in return. The customer extends his coöperation to the concern and especially to the salesman. The salesman coöperates both with the concern and the customer. The honest salesman who is loyal and has a right conception of the meaning of 'coöperation' will do nothing that is not to the best interest of his firm's business. The salesman will coöperate with the creditman. The business manager must coöperate with the salesman and with the customer if permanent success is to be obtained. Finally, a business man, whether he realizes it or not, is also a preacher and a teacher to his employes, his customers, his associates. He preaches either the doctrines of integrity, justice, honor, industry and generosity, or just as surely the opposite of these things.

BUSINESS COÖPERATION.

"Just as coöperation is essential to a successful business, so is it essential for business men in the same line of business to coöperate. This coöperation means working together with your competitors and having them work gether with you, both for the pur of helping them in their aims and ing them help you in yours.

"Some of the conditions prerequ to corn millers coöperating are:

"1st. A proper knowledge on part of the importance of our in try and its essential place in the cient and economical nourishment our people.

"2nd. Each one of us must bec convinced that the chemical and ph cal merits of the corn mill prod can become matters of general kn edge only through intelligent inter tation and through individual cont

"Did you ever know that duck are selling at 40c per dozen while eggs are bringing 70c? Why is t I believe the answer to this ques will also answer the question why products are selling relatively so m cheaper than wheat or oat food p ucts. When a duck lays an egg wabbles off without a sound. Whe hen lays an egg she lets the barn and country round-about know it her cackling. 'It pays to advert The hen advertises and her prod not only command almost twice price of the duck's products but distribution is twenty times as gr

"3d. We must realize that the eral acceptance and universal appr tion of our products can be facilit only through the collective and bined efforts of those mutually in ested.

"We may not yet be able to do as a federation, but we can work gether and each of us can put or aggressive advertising campaign in section. In this way the w community will be informed as the palatability, the economy, the health-giving qualities of mill products as a food. A of us can't do this great thing, bu of us working together can. Broad telligent concentration on the m of corn mill products is essential whole public is to be taught to der corn products and to rely on the an essential food. Concerted ef well defined and harmonious wil complish the results we are stri for.

THE FUNDAMENTALS OF CORN MIL COÖPERATING.

"1st. It is presumed that our tual incentive is the instinctive d to serve our fellowmen: service a self; and to serve so worthily a merit a remunerative reward—a ward that is equal to the needs virtuous ambitions of our inh places in the society of a great anc tured Nation; to more firmly esta our success, to perpetuate it, to bilize our future by building a bas distribution which will permit som laxation of effort later.

"2nd. The Federation offers means, and its objects are worth the necessary unity of material f so essential in the pursuit of its It is all for one and one for all.

"3rd. Personal prejudices, inh antipathies, envy and individual sions, selfish ambitions, avarice sometimes malice, are things to b carded before a unity of purpose be established.

"4th. The development of bread interest, understanding and mut fundamental aims is the direct ro accomplishment.

"5th. The reward will be the a plishment of an ambition, a succ enterprise, and all the prestige and ence and honor that go with ach ment of a man's life ambition. eration plus work and individual i tive means success.

THE LESSONS OF THE WAR.

"In conclusion, I think the le of the war should convince each of the value of coöperation. Our ing accomplishments at home abroad through coöperation fill us pride."

The paper was followed by muc teresting discussion on both phas coöperation presented by the spe

e necessity of closer coöperation in siness by corn millers to remove the parent apathy which this attendance the convention would seem to indi- e exists in the industry was dwelt on with much emphasis but with ghborly friendliness by several akers.

I ADVERTISING CORN GOODS.

. W. Craver of the Aunt Jemima ls Co., St. Joseph, Mo., was con- tulated on his paper "On Advertis- ," in spite of the fact that he did favor "coöperative" advertising in of personal, or mill, advertising. part Mr. Craver said:

I am connected with a firm that an abiding faith in advertising. buy it as we buy grain, and have le a success of it as a feature of business. When I say this I do not n to be egotistical or to advertise business at this time. I approach subject with the fear that you have e with the expectation of learning n me what advertising will accom- h for our industry, and you are g to be disappointed. For per- ally I do not know what it will be, am I in a position to forecast the lts; for advertising as applied to products is practically an un- wn quantity, since so few units e featured it.

dvertising is a business. I might it is a science. Most of you no t maintain a sales department and ccounting department and possibly dvertising department; and if you you know full well the nature of it what it means to you. Advertis- so to speak, is salesmanship per- ied. In simple language it is tell- the public what you have to sell. rtising is a distinct feature, or ld be, of our business and should andled as a separate department, ugh the manufacturing, sales and rtising departments must work in hand that the proper results be obtained.

you want to expand your business dvertising, and I hold there is no r way, you should provide the r agency, for not everyone can an 'ad.' It has been said, 'Poets orn, not made'; and so it is, in my on, with 'ad' writers. Much y is annually thrown away by advertising methods and lack of bution. Very often stupendous aigns result in failure for the rea- hat the copy was misleading and ot carry conviction. Advertising d be truthful. In my opinion a rn might advertise a poor article after year and eventually lose out se the article advertised did not ss merit. I have said before, and t it now, that if you will judi- y advertise an article of merit will win success. In saying this ot mean you can disregard proper ess methods in conducting your ess. If there is anyone that must ct his busines along proper lines eep faith with the public it is the r concern doing extensive adver- .

ove everything, if you are going vertise, let the article you adver- e exactly as, or even better, than epresent it to be. Do not break with the public; for it has become om to look upon the advertised as being a superior one; and it be, to win permanent favor, and ust keep it so, for the public is and if once deceived it would be t to win it back.

e of the biggest problems con- ig the advertisers is how to ad- and through what channels. It bject that must be studied thor- . You cannot always get re- through one particular channel; s in your method of advertising herefore sometimes necessary. you might get results that would y satisfactory by using maga- if you would support the cam- by a limited amount of news- copy, your results would be very greater and with but little addi- tional expense. Very often heavy magazine and newspaper campaigns, if supported by billboards, have shown more and better results. This for the reason you cannot reach everyone through the same channel.

"We should not overlook the fact that every form of advertising has its strong and its weak points. In our business we have used magazines, newspapers, billboards, painted signs, trade journals, street car cards, novelties, also house to house canvassing as well as demonstration in department stores and other public places. I confess I am unable to tell you which has brought the best results, but it was a combination of mediums that has produced satisfactory results. In doubling up, the great trouble is you are apt to overadvertise, and too rapidly dissipate your appropriation, which may mean financial ruin. Advertising should be run steadily and not intermittently, to secure the best results.

"To become a successful advertiser, you must also be a student of the times and a good judge of human nature. The great questions confronting the advertiser are, how to reach the public, how to get their attention and how to hold it. Through what mediums you desire to reach the public depends on what you have to sell and what class of people you desire to sell too. There are, as I said before, a number of different ways to advertise, all have their strong and their weak points, and it would not be fair for me to attempt to tell you what particular one would give you the best results.

"Our president, Mr. Krause, is an advertiser. He has some ideas on advertising as applied to corn milling as an industry that are very good. His idea, as I understand it, is that we form an association within our Federation to subscribe a definite sum of money to be paid monthly from a term of years and nationally advertise corn products. This plan has been followed by other lines and successfully. I believe the campaign put on by the California Fruit Growers' Association was very satisfactory. This plan as yet is in an embryonic stage, and I feel it should be discussed fully. While I am not as yet willing to adopt it, I am not ready to condemn it. . . .

"Advertising campaigns cannot be successful unless you have satisfactory distribution. It is not only embarrassing but disastrous to create a demand for an article and the consumer be unable to secure it, which means your money has been thrown away and it is going to be difficult to interest the buyer again, even though you have secured the proper distribution. I cannot recall with but two or three exceptions a nationally known corn meal label today. There are a number of fairly large plants simply selling corn meal, and no label if you please. How can a mill, in this progressive age, hope to win a permanent demand for its products if they are so careless as to not select a label for them? You will please pardon my allusion to the wheat miller, but he is a worthy example. Look at the large number of flour mill labels that are nationally known. Many of these labels and the good will and prestige they carry are worth and could be sold for more than the plants in which they are made. It has been said that a majority of brides, when ordering their first sack of flour from their grocer, will invariably order the advertised brand, and the order usually falls to the brand most extensively advertised. Should we not, therefore, feature our labels and make them mean something, since we have a commodity that is palatable, economical and nutritious. I am willing to admit, that manufacturers of other lines can advertise to the end that the consumption of their products is greatly increased, that we cannot increase the consumption of corn products in the same manner. Advertising, so to speak, is the dynamo behind most of the nationally known articles of today. If the label of a well-known fountain drink and the good will of the business can be capitalized and sold for many millions, then why is it not time for us to awake from our lethargy and make a start? I hope this will be done, for I am confident of the ultimate results that are to be secured through this course.

I believe in advertising, and with this thought will leave the subject with you."

The paper was well discussed, but the consensus of opinion seemed to favor individual mill advertising, as Mr. Craver suggested: it individualizes the work and throws upon each mill the duty of taking care of its own territory in a proper manner, both as to the advertising and the character of the product.

"LABOR AND ITS INFLUENCE."

The caption was the subject of a paper by Geo. H. Lewis, vice-president and manager of the Lawrenceburg Roller Mills, Lawrenceburg, Ind., one of the best known millers and mills in the winter wheat and white corn belt. Mr. Lewis himself, has for a number of years, been one of the safe and sought leaders of milling coöperation movements, both state and national. He said:

"So much has been spoken and written on this subject lately that it is somewhat difficult to say anything really new. However, this subject has been treated mostly by writers, many of whom have not had the opportunity of coming directly in contact with real labor problems. Notwithstanding all that, however, they have succeeded in giving us a perspective that is fairly truthful of present conditions.

"It is not my purpose on this occasion to pay much attention or spend much time discussing the purely academic features of the labor question. These features have been very well covered by men who are eminently qualified to place that phase of the subject before us.

WHAT BROUGHT ABOUT PRESENT CONDITIONS.

"Most of us will have to admit that the present unstable labor conditions, which are causing a great deal of social unrest, were brought about very largely as a result of the war. The instigator of this war found the balance of the world almost totally unprepared, and as a result preparations had to be made hurriedly. Industries that were organized for peace had to be turned into industries for war. Facilities for taking care of large armies had to be hurriedly adopted without much thought being given as to whether many things could be done better or cheaper. A cost plus plan was adopted in this country, and no doubt in other countries, as a war expedient, and naturally the carrying out of this sort of a plan left it up to contractors to pay almost any wages that they desired. The more they paid the more they themselves received, so that wages were advanced to a degree never before experienced in this country.

"Contractors and others engaged in war industrial activities could not be particularly careful as to the class of labor employed. They, therefore, drew from almost all walks of life men who were unaccustomed either to the work or the rate of wages paid. At the signing of the armistice and the then practical cessation of war activities, these men, or many of them, were forced back into industries where they were formerly employed and naturally they went back there with ideas entirely different with reference to the wage question. Many of them did not stop to think that the wages they were paid by the Government could not possibly be paid by private industries unless a considerable adjustment was made.

"Nothwithstanding this, however, wages have advanced over the pre-war basis as much as 100% and more, and these wages are being paid today. Meanwhile, the purchasing value of the dollar has also decreased so that the net gain to labor on account of this increase in wages has perhaps not been very great, and this has brought about a feeling of unrest and an idea prevails undoubtedly among many of the working people that they are not getting their share of the fruits of industry.

ANOTHER CAUSE.

"Personally I am one of those who believe that 90% or more of the working men in this country are reasonable and sensible, and have no desire to take undue advantage of present conditions, if they were left to their own ways of thinking. Many thousands of the men who are out on strike today are the victims of the influences of men who never did an honest day's work in their lives. Many of these so-called leaders hold no allegiance to any country and have sought to make many working men believe that the only way to better their condition is to strike. They have painted word pictures to these men that it is the only way to bring about a Utopia. They have found fault with our form of Government, with its institutions and its organized society, and are seeking to break this all down for the purpose of establishing about the same kind of government as is now being administered in Russia.

THE REMEDY.

"Getting back to the remedy. It would be possible to go on indefinitely telling of the nefarious practices of the I. W. W.'s, the Bolsheviks and other cults of a similar character, but what is really necessary at this time, perhaps more than anything else, is the initial individual effort of business itself, of each individual business, to try and solve this labor problem. No form of legislation can possibly right this question as it must be righted sooner or later. It is true that we need laws favorable to the development of industry in this country, laws that will not permit radicals to stand on street corners or occupy halls for the purpose of making sport of the institutions of this country, but legislation cannot go into the factories and do the work that must be done by the individual employer.

SYSTEM OF EDUCATION.

"Men must learn, and learn it thoroughly, that increased production means increased wealth. Increased wealth means increased investment, and this increased investment means an increase in the purchasing value of the dollar and calls for more work for the worker. On the other hand, decreased production means a lessening of the purchasing value of the dollar and an actual decrease in wealth. Money is of no use unles it be to purchase things needed. or, in other words, money value is limited to just what money will buy.

RISKS OF BUSINESS.

"The Bureau of Education of the U. S. Government is issuing a series of lessons upon economics for use in the public schools and 'Community' Leaflet No. 22 for the instruction of high school pupils contains a brief statement of the risks of capital invested in business which might be quoted on this occasion with interest:

" 'Two further sources of risk may be mentioned: The risks of capital invested in business are at their greatest when a large amount must be put in fixed capital, such as machinery, railroads, and permanent buildings. In some businesses millions of dollars must be spent and years of time must elapse before a single bit of product is made. In our rapidly changing society it is quite possible that a large part of this investment and expenditure of time and effort may have been wasted. Wants may have changed; new processes may have been invented.

" 'Then, too, our society is so interdependent that a business man may have heavy losses because of happenings over which he had no control, and indeed concerning which he may not have known. For example, when the present great war began in Europe, the price of cotton declined, and many planters and merchants in the South failed in business; that is to say, they could not pay their bills. Their cred-

itors (and this included banks from which they had borrowed and merchants from whom they had bought goods) were in some cases forced into bankruptcy also. These creditors had still other creditors, and there spread over the South, and even into the North, a condition where banks, farmers, and merchants were affected by the fall in the price of cotton.'

"Practical economics must be taught more thoroughly in the schools and teachers themselves should seek practical knowledge so that they may be able to demonstrate fully to the pupils the principles of business and its relation to labor.

NEED OF BUSINESS ORGANIZATIONS.

"It would seem that if it is a good thing for the U. S. Government to teach practical economics in the high schools and colleges, then every business organization such as this for instance should have a department of labor, not necessarily with the idea of laying down any specific plan to be adopted by anyone or group of the establishments but simply to study the fundamental principles of the labor question and to be able to give such advice to our legislators as may be considered by them in framing legislation that would be fair and just to both labor and capital. Capital itself must wherever necessary clean house and give to labor its just dues, and this must necessarily be done before capital can expect labor to be reasonable in its demands.

"There are certain features, of course, that can be considered and can be generally applied even in the milling business. We have different departments in the mill, and while no outside organization could undertake to dictate what wages should be paid in these particular departments it might not be amiss to consider the proper differential between these different departments. The actual wages to be paid, the manner of paying it, and the amount of welfare work that is to be done by an organization is, of course, something for that organization itself to carry out, and any outside interference would undoubtedly be harmful.

"Employers of labor must also consider that labor does take statements made by capital at their full value. In other words, if an employer promises to do certain things for his employes he must be prepared to carry that promise out or suffer the consequences, as things very lightly spoken by an employer are most frequently taken in a very serious way by those to whom these promises are made.

"It would not be possible for one who has not had the experience to state just what should be done in establishments where there are hundreds and thousands of employes, but, speaking particularly to members of this industry who on an average do not employ over 50, 60 or 100 people to each establishment, it is not difficult to keep so closely in touch with that number of employes so that they may be able to sense at any time necessity for certain changes. Employes in establishments of that sort should be encouraged to speak frankly to their employers as to just what things are unsatisfactory, so that a conference may be had as quickly as possible to adjust any seeming differences.

"It is also well that employers of labor in establishments of the character of mills should pay some attention to the qualifications of those who come in direct contact with men as the heads of departments. They should know that labor appreciates being treated justly and fairly, and that they should be given credit and full credit for any thing they do which may insure to the benefit of the establishment itself. Men at the heads of departments should be capable of expressing in their daily life the proper human elements, as quite frequently very serious disturbance arises not on account of unsatisfactory wages or hours but almost entirely on account of some unsatisfactory conditions that could be righted by the individual himself who has charge of a certain department. To carry out all of this in the proper spirit of cooperation running through the entire plant from the highest officer to the lowest rated employe there must be a feeling of sincere confidence and a visible spirit of fairness at all times.

"Our Government can be very helpful in seeing to it that the elements that seek to destroy organized society and the Government itself are kept properly in check either by deporting or by jailing men who will not give up their false ideas; and in order to bring about the necessary legislation to accomplish this we must have legislators and representatives who will not waiver in their duty to their country and the wishes of any particular class.

"We have a right in this representative Government to ask that men who are representing us shall be men of the highest character, who will at all times endeavor to keep inviolate the institutions that have made this country what it is. The Government doing its part, and the employers of labor acting fairly and justly towards labor, should go a long ways in solving the problem that we have before us. It may be a slow process, but it is a sure one and cannot help but ultimatey bring about conditions that will be entirely satisfactory."

THE BANQUET AND ENTERTAINMENT.

The banquet and entertainment at the Congress Hotel was all that is naturally expected from a group like the corn millers, who never do things in a small way. It was held Friday evening and fully attended by the members and invited guests.

FINAL SESSION.

Saturday's session discussed Dr. L. H. Bailey's standards and definitions. Consideration of disastrous trade practices and means to remedy them were taken up. Such interesting trade details as the determination of package differentials; uniform sales contract with such provisions for the acceptable time limit and proper carrying charge if accepted as an expedient trade practice were among the more important trade items considered.

The following officers and directors were elected: W. N. Adams, Arkadelphia Mlg. Co., president; Geo. F. Booth, Buffalo Cereal Co., 1st vice-president; W. W. Marshall, Kimball Mlg. Co., 2nd vice-president; J. F. Weinmann of J. F. Weinmann & Co.; Geo. Dahnke of Dahnke Walker Mlg. Co.; J. W. Craver, Aunt Jemima Mills Co.; T. R. Hillard, Miner-Hillard Mlg. Co.; Ellsworth Huffman, Standard Cereal Co.; E. Wilkinson, Western Grain Co., executive committee, with Chas. A. Krause, Chas A. Krause Mlg. Co., chairman. Board of directors: Geo. H. Lewis, Lawrenceburg Roller Mills Co.; T. R. Hillard, Miner-Hillard Milling Co.; L. J. Light, Patent Cereal Co.; T. M. Chivington, Wathen Mlg. Co.; Geo. F. Booth, Buffalo Cereal Co.; J. W. Craver, Aunt Jemima Mills Co.; E. Wilkinson, Western Grain Co.; W. W. Marshall, Kimball Milling Co.; Ed S. Miller, Miller Cereal Mills; Chas. A. Krause; J. W. Morrison, Lexington Roller Mills Co.; Geo. Dahnke; Thos. L. Moore, Dunlop Mills; J M. Allen, Shellabarger Elevator Co.; T. B. Andrews, Davis & Andrews Co.; Ellsworth Huffman, Standard Cereal Co.; W. L. Eastlake, Atlas Cereal Co.

Douglas W. Lackey was reappointed secretary-treasurer, and his practical knowledge gained in past years, supported by an excellent record as secretary, with which the trade is familiar, indicates that there was no uncertainty in the Federation regarding his efficiency and executive capacity.

COMING CONVENTIONS.

Jan. 13, 14, 15, 16.—Farmer Grain Dealers' Ass'n of South Dakota, at Aberdeen.

Feb. 10, 11, 12.—Farmers' Grain Dealers' Ass'n of Illinois, at Peoria.

June 22-24.—American Seed Trade Ass'n, Milwaukee, Wis.

THE SPECIAL SESSION ENDED

Congress Did Little During the Special Session of Interest to the Grain Trade —But An Extensive Program Is Laid Out for Regular Session.

WASHINGTON, Nov. 22.—[Special Correspondence.]—Congress has ended the special session, which was begun in June, and is taking a brief breathing spell. It will be back Dec. 1 to buckle down to a winter's grind.

Comparatively few measures of primary interest to the grain trade were enacted into law during the special session. Among those passed by both Houses and signed by the President were the anti-profiteering bill broadening the scope of the wartime food control act, with additional penalties, a measure designed to facilitate the marketing of agricultural products, including live stock, by increasing the amount which banks may loan on paper secured by such commodities, and a bill authorizing national banks to subscribe to corporations formed for the promotion of export trade.

The Edge bill, authorizing the formation of foreign financing corporations under the supervision of the Federal Reserve Board, was passed by both Houses and conference committees agreed on a report which was presented to the House too late for action. It will be taken up early in December.

The House passed the Esch railroad bill as the last act of the session. It was made the unfinished business in the Senate and will be pushed with a view to the enactment of a law before the end of December, when the roads are to be returned to their owners according to President Wilson's announcement many months ago.

The measures passed by the House on which no action was taken by the Senate included a cold storage bill designed to prevent hoarding and deterioration of foodstuffs in storage.

Although the Vestal bill establishing decimal weights standards for wheat and corn mill products was on the House calendar for several weeks it was not reached. It will be called up probably in December.

Agricultural interests showed their power over Congress in unmistakable fashion during the session by passing the daylight savings repeal bill over the veto of the President. This repeal was the measure of supreme importance on legislative program of the farmers' organizations.

Next in order, and upon which attention is now being concentrated, is the Capper-Hersman bill legalizing collective bargaining by farmers. Representative Volsted of Minnesota, chairman of the House Judiciary committee, which has held hearings on the bill, stated this week that action would be taken soon after the new session convenes. He expressed the belief that the bill would be revised considerably to meet various objections expressed to it. It is expected, however, that the bill will be satisfactory to its sponsors in the form in which the committee is likely to approve it. Judging from their success in the case of the repeal of the daylight savings law the agricultural interests stand better than an even chance of getting the Capper-Hersman bill through. It will be over the protests of members who view with alarm legislation singling out a class for exemption from the operation of anti-trust laws.

The National Board of Farm Organizations is expected to take a hand in railroad legislation, to the extent of making an effort to prevent the writing into the law of a provision which would countenance an increase in railroad rates. The Esch bill contains a provision which provides that the Governmental guarantee shall continue for a period of six months after the return of the roads to their owners only in case schedules for a general increase in rates shall have been filed by the roads with the Interstate Commerce Commission within 60 days after their return. An unsuccessful effort was made to eli nate this provision in the House, a another attempt will be made in Senate.

The House committee on Agricult has a number of matters pendi among them bills relating to comm cial feeds and fertilizers, on which tion probably will be delayed until J uary, after the appropriation bill is of the way.

The Kenyon bill for the regulat of the packers has been slumbering the Senate committee on Agricult ever since hearings were held upon several weeks ago. The witnesses fore the committee, including the in pendent packers, in whose interest bill was supposed to be drawn, ca raisers and others who might be s posed to have grievances against big packers, were so overwhelming their opposition to the bill that the c mittee almost seems to have tried forget the whole proceeding. The s ject will be taken up again soon, h ever, and the committee may report a bill. There seems scarcely any cha of passing it in anything like its p ent form.

The personnel of President Wils new industrial conference, which been called to meet Dec. 1, seems to dicate a stiffening of the Presi against organized labor. None of officials of the American Federation Labor was included among the se teen. Secretary of Labor Wilson, is a member of the United Mine W ers, appears to be the only one hav any connection with organized la Stanley King of Boston handled la disputes for the War Department ing the war, but he can hardly be sidered as representing labor. Agri ture has one representative in H Waters, former president of the Kan State Agricultural College, who figu in the conferences in 1917 at which price of wheat was fixed.

PRICES PAID TO FARMERS

The level of prices paid producer the United States for the princ crops decreased about 3.7 per cent ing October; in the last 10 years price level decreased about 3.6 per during October. On November 1 index figure of prices was about 3.7 cent higher than a year ago, 6.9 cent higher than two years ago, 74.5 per cent higher than the ave of the past 10 years to Nov. 1.

Following are details of prices to farmers, compared quarterly on d indicated, as reported by the Burea Crop Estimates:

	1918.	1919			
	Oct. 15.	Jan. 15	Apr. 15.	July 15.	
Hogs	$16.50	$15.69	$17.39	$19.22	$
Beef, cattle.	9.33	9.65	10 81	9.96	
Veal calves.	12.35	12.39	12.78	13.38	
Sheep	10.35	9.68	11 33	9.25

The State Department of Agricul of California is endeavoring to re the potato industry in that state, w has been marked by small yields poor quality in past years. The re legislature made a small appropria for the purpose of seed inspection G. H. Hecke has been appointed spector. No potatoes may be sold California for seed hereafter unless tified and that fact must be state the tag attached to every sack sold

BRASKA FARMERS AT OMAHA

lutions Adopted by the Nebraska rmers' Co-operative Grain and Live tock Association—Objects to All Classes of Special Legislation.

e 17th annual convention of the aska Farmers' Co-operative Grain vestock Association closed Thurs- afternoon after resolutions touch- n labor and market problems had adopted.

equest that the Federal land banks ermitted to make single loans nting to as much as $25,000; a st against any arbitrary reduction e prices of farm products unless is also a similar arbitrary reduc- n the prices of other commodities; an appeal to the Government to to the grain trade in general more lete information on conditions of in other countries and the de- for cereals in those countries, gh various consuls, were among ost significant resolutions adopted. convention took a firm stand st the Plumb plan for railroad rship and operation. A resolution also passed to the effect that the ation would never unite with or- ed labor unless such a union has s object the public welfare.

resolutions contain also a con- ation of contentions and strikes disturb peace and halt prosper- pledge to aid the Government in nforcement of law and order; a of support to the proposition oth capital and labor be given a re deal," and a condemnation of hortening of the work's day to han eight hours. In the resolu- the Association goes on record as ng arbitration of honest differ- between employer and employe. nnual car shortage was declared a "menace to the country," and creasing of storage room on the was favored in another resolu- The convention went on record s favoring collective bargaining. ast resolution expressed apprecia- f the kindness and hospitality of during the three-day convention Association. The resolution on zed labor declares:

n Labor propagandists and farmer ndists should understand plainly is Association will never be a party mbination with any interest unless mbination has for its express object motion of the public welfare, and ever will this Association entertain er of Union Labor unless Union La- willing to assume the same respon- which the farmer always has and will assume. We condemn conten- nd strikes that disturb peace and osperity, and we will support all mental authority in any sane policy preservation of law and order. We our heartiest support to the prop- that both capital and labor shall n a square deal, and we favor the e of arbitration of honest differ- etween employer and employe.

resolution on the Plumb plan for on of the railroads declares that nand of employes that they be ed to run the railroads without curing a proportionate ownership n is equivalent to a demand for onfiscation. Ownership is the r efficient operation, the resolu- clares, adding:

n or group of men, other than our ent, has any right to demand the of such property belonging to oth- l then control of such property e only such as is essential to the velfare. The railroads are indis- to modern civilization, and some ooperation or profit sharing should rtaken which will result in the ip by employes of a substantial of the railway stocks or bonds or he interest of the public in the is paramount to the interest of s, and provision should quickly be Congress to adjust the differences e arisen or that may arise between and employe to the end that no men, whether owners or employes, r be permitted to stop the proper of this most necessary instru- the public welfare.

f the most important of the res- put the convention on record sed to special legislation of any en though it be for the benefit ers themselves.

Canaday of Minden was re- president of the Association. Ed. P. Hubbard of Juniata was elected vice-president and J. W. Shorthill of Omaha was re-elected secretary. Eric Johnson of Hastings and J. R. Morrison of Chappell were named directors.

The convention was one of the most interesting in the history of the Association. Wednesday evening the delegates were entertained at a banquet given them by the Omaha Grain Exchange at the Hotel Rome. On Thursday they visited the stock yards at South Omaha and were guests of the live stock men at a luncheon.

CORN DAMAGE.

The corn production of the United States has averaged nearly 2¾ billion bushels yearly for the past 10 years, varying from 2,477,000,000 bushels in 1913 to 3,125,000,000 in 1912. However, if a normal crop could be produced, it would amount to more than four billion bushels. The difference between the quantity that would be produced under normal conditions and the quantity actually produced is assumed to be the loss or damage, from adverse conditions.

Inquiries concerning crop damages causing loss in yield, by specified causes, have been made yearly by the Bureau of Crop Estimates since 1909. A summary of the results for corn is given in the accompanying tabulation. The figures given are the averages of estimates of over 10,000 farmers, and reflect the opinion of the intelligent farmers of the country as to the relative influence of the different factors causing loss in yields. The schedule of inquiry contained the following instructions: "Where two or more causes act jointly or follow one another, it is often difficult to determine which is primarily responsible for the loss or the proportion to be assigned to each. The many possible combinations of this kind make it impossible to give definite instructions for a uniform handling of such cases. If the percentages of loss are apportioned among the different causes according to the reporter's best judgment, the averages of the reports received will fix the responsibility for the loss with sufficient accuracy to meet the purpose of the inquiry."

A normal yield is described as such a yield as would result from a crop starting out under favorable conditions and not subject afterwards to damaging influences as unfavorable weather, insect pests, or other injurious agencies. When the specified cause is not known, the reporter is asked to enter the estimated loss, opposite the proper general cause.

Quality is not included in damage, unless the yield of the usable crop is thereby lowered.

CAUSES AND EXTENT OF CORN DAMAGE IN THE UNITED STATES, YEARLY.

	Yearly loss in bus.,[1] average 1909-18.	Loss, percentage off from normal yield. 1909-18, avg. Pct.	1918. Pct.	1917. Pct.

The Letter Box

A New Motor.

Price Current-Grain Reporter: We have installed a new motor at our elevator and are now putting in an automatic scale.—*Taylorville Farmers' Grain Co., Taylorville, Ill.*

Mill Finished.

Price Current-Grain Reporter: Our mill is about complete, and we expect to be running in a few days and will soon purchase a corn cleaner and a gas engine.—*Tripp Milling Co., Tripp, S. D.*

Why They Renew.

The Price Current-Grain Reporter: We have read editorials in THE PRICE CURRENT-GRAIN REPORTER that were worth the price of the subscription. We take pleasure in renewing it.—*Shreveport Mill & Elevator Co., Shreveport, La.*

Coal Strike Settlement.

Price Current-Grain Reporter: We think it of vital importance that there be an immediate settlement of the coal strike and that there should be private ownership of railroads.

We expect to make some repairs early in the spring.—*Elmwood Elevator Co., by Chas. P. Kennell, Mgr., Elmwood, Ill.*

Opening Branch Offices.

Price Current- Grain Reporter: Effective at an early date we are opening branch offices at Greenville, Miss., under the charge of R. B. Nance. We will solicit orders from the wholesale trade in Greenville, Clarksdale, Indianola, Greenwood, Winona, Cleveland, Grenada, Lexington, Durant, Rosedale and Yazoo City.—*Lyle & Lyle, Huntsville, Ala.*

Of Incalculable Value.

Price Current-Grain Reporter: Enclosed find check for $3.00, paying my subscription for one year. I find your periodical of incalculable value to me in my seed business, where I can keep constantly posted on fluctuations and prices as well as a guide in buying. Your editorial each week, "Business and Trade Conditions," is more than worth the cost of your paper.—*J. A. Yager, Fremont, Nebr.*

Indiana Corn Not Flood Damaged.

Price Current-Grain Reporter: The damage done by the recent flood is not nearly so great as anticipated. Outside of a few damaged ears of corn, the crop is very good. The farmers are not marketing the corn very freely at this time, however.

Wheat and rye looking good, but rather restricted in acreage.

The clover seed crop is very short this year, and practically all will be used for home seeding. The timothy acreage is above the average this year and looking fine.—*O. L. Barr Grain Co., per O. L. Barr, Bicknell, Ind.*

Interesting Points.

Price Current-Grain Reporter: Business is fair, but it would be much better, in our opinion, if millers were allowed to export flour themselves, direct to their old trade in Europe. We are receiving letters nearly every day from our old customers abroad, asking when we will probably be permitted to do business with them direct. In our opinion, business would be much better if the Senate and the President would come to some agreement in regard to the League of Nations and the Treaty. It seems like child's play to think they are squabbling over these matters so long. No doubt the cause of the delay is the illness of the President, which has prevented him very likely from giving these important matters close attention.

The fly has caused great damage to the growing wheat in this vicinity. We are in hopes, however, that as we have had the very best of weather of late, cool with frequent rains, that it will recover to a great extent at least and come through the winter in excellent condition. Thus far we have had no snow at all and no cold weather to speak of, but we may expect both some time the first part of December. Should we have plenty of snow we can look for a good wheat crop next year, as the two seem to go together as a general thing.—*Goshen Milling Co., Goshen, Ind.*

Sold Elevator.

Price Current-Grain Reporter: The Fritson Grain Co. has sold its elevator at this place to the Western Terminal Elevator Co. of Sioux City, Iowa. Possession was given Nov. 1.

The corn crop in this section is extra good, some new corn being sold. Farmers are ready to sell part. It is hard to get cars to ship out the grain. We think one of the most important subjects at the present time is car shortage.

We expect to make some repairs as soon as the weather permits and will also build an addition to the elevator. —*Western Terminal Elevator Co., O. J. Sloan, Agent, Lennox, S. Dak.*

Major Moberly in Des Moines.

Price Current-Grain Reporter: For your information, wish to say that I have recently become associated with W. H. Bartz & Co., Des Moines, Ia., having severed my connections with the Moore Seaver Grain Co., of Kansas City, Mo. During the past ten days we have incorporated this company and taken in as stockholders and officers some experienced grain men, and we hope in a short time to extend the field of our operations quite a little. The officers of the company are: W. H. Bartz, president; H. D. Harding of Rock Creek, Kans., vice-president; W. G. Goy, of Tabor, Ia., vice-president; M. M. Moberly, secretary and A. H. Thomas of Montezuma, Ia., treasurer. Outside of the above, we have several other grain dealers interested with us also. If our plans do not mis-carry, we are in hopes of being able to start work on a modern, fireproof terminal elevator here at Des Moines early next spring. You are, no doubt, aware that Iowa has produced a bumper corn crop of extra good quality and we have enlarged our facilities to enable us to take care of our share of the business. —*Major Moberly, W. H. Bartz & Co., Des Moines, Ia.*

With These Exceptions, All Right.

Price Current-Grain Reporter: The threshing of our row crops, such as cream and red maize, white, red, pink and Schrock kafir, feterita, darco, hegari, amber, orange and sumac canes, has just commenced, and the quality is good—fully ripe and none damaged; but stocks for sale will be rather small in comparison with other years, on account of the vast wheat acreage. And too a great many cattle will be held on the farm this winter.

We have had dry, curing fall weather for gathering of crops. The broom corn is nearly moved, being about 60 per cent of normal tonnage, and growers are much dissatisfied with prices they received.

We have built a modern seed store this summer and are ready for seed and grain orders, but we look into the future with saddened hearts, as at the present time all seed or grain shipments are to be sacked or "no go." The small farmer who did not have any wheat is anxious to move his row crops for seed, if the quality is good enough; if not, then for feed. Where will the sacks come from? But we will try to rustle them. Otherwise than railroad troubles everything is all right.—*Claycomb Seed Store, Guymon, Okla.*

Use our liner advertisement department to sell or buy second-hand equipment.

RELIEF OR PREVENTION?

By C. A. McCOTTER.[1]

Ninety-five per cent of the insuring public looks upon insurance as a form of relief in the hour of calamity. They have been educated to this idea by the insurance fraternity offering that service only. The field of the insurance companies has been that of a collecting agency from the many to make disbursements to the unfortunate few.

The fire insurance companies have done a wonderful work in the United States in collecting and disbursing more money per capita as insurance relief than has been done in any other country in the world. The grain business of the United States has been one of the heaviest contributors and one of the largest beneficiaries. It is a fair estimate that in country elevators alone there is an annual fire loss of five millions of dollars, of which 75 per cent is covered by insurance.

The recent war brought into the limelight the importance of the grain business. As the food supply was an important problem under the stress of war, so also will it be of importance as an economic factor in the period of reconstruction. The country grain elevators are the country's storehouses, in each of which is the product of from 300 to 3,000 acres of land, or the annual food supply of from 1,000 to 10,000 people. The food regulations of the war period and of the present are evidence that there is a moral obligation on the part of those having these supplies in trust to conserve them, and that the obligation extends to the grain business as a whole. To meet the present and the future requirements of world-wide distribution, the grain business must be conducted economically.

Successful competitive conduct of a business depends upon the item of expense. Expenses are logically an investment for the advantage of the business; but when the expense is not a factor in production, it forms a burden. The fire losses of the country are a burden upon business, being ultimately incorporated in the cost of conducting the business. Therefore, the fire losses of grain elevators, whether distributed by the collection of the premiums or borne by the individual, are a handicap to the successful conduct of the grain business, and the insurance cost is quite correctly considered a burden. Insurance is the third or fourth item of expense in the conduct of the grain business, thereby forming an important factor in meeting the problem of world-wide competition.

AN EXPENSE EASY TO REDUCE.

There probably is no other item of expense connected with the country elevator so possible of reduction as is the reduction of fire losses and the corresponding reduction in the insurance cost. The oft repeated statement that 80 per cent of fires are preventable is correct and to a great extent has been proved by the work of the mutual fire insurance companies. Only in recent years has preventive work been recognized by insurance companies and cooperation been given by the public. Life insurance companies have recognized that educational methods as to preserving life are a financial benefit through prolonging the premium paying period of the policyholder. The methods followed by workmen's compensation companies in preventing accidents preserve the economic service of the experienced workmen and make the preventive cost less than injury relief. The inspection work done by the fire insurance companies during the war, under the auspices of the state councils of defense and the fire marshals and with the co-operation of the elevator and the flour mill owners, resulted in a reduction in the fire losses far greater than was the cost for the work. That inspection work as an economic factor is now recognized by the fire insurance companies and needs to be adopted by the grain business to its advantage. While the causes of fires are numerous, they are almost all entirely within the control of the individual owners.

RAILROAD LEASES AND INSURANCE.

Yet there is one source of losses that needs the attention of the grain business as a whole. While it is recognized in the various forms of liability, such as workmen's compensation, that a business must be responsible for loss or injury due to its own negligence, the railroads are taking advantage of present laws to evade their responsibility. This refers to the conditions imposed in leases for railroad sites and sidetracks, under which the lessee is made responsible for every loss to the full extent of every fire. There are two sides to every question, and undoubtedly the railroads have been driven to the course taken by the carelessness and the indifference of many who do business on or adjoining the right-of-way. Under present practices, the financial burden and expense for fire losses caused by railroad operation is shifted from the cost of railroad operation, covered by the freight rates, to a cost to the grain business, covered by the expense of insurance plus the individual loss. If equity were carried out, not only would such losses be materially reduced, but the burden would be placed where it belongs. There is an obligation on the part of both parties to the lease.

Statistics gathered by a mutual fire insurance company making a specialty of country elevators show that during a seven-year period, when the majority of the elevators insured had wood sides and shingle roofs, the losses from railroad hazards were 10.7 elevators for each ten million dollars of insurance, and that during a second seven-year period, when the majority of elevators insured were iron-clad with non-combustible roofs, the annual loss was 2.6 elevators for each ten million dollars of insurance. In fact, with one exception, the records show that all railroad hazards and lighting losses have occurred on shingle-roof, wood-clad buildings. It is a logical inference that if all buildings on or adjoining the railroad right-of-way were metal-clad and had non-combustible roofs, then the railroads could well be made responsible for their own negligence in such fires as did occur. A further advantage of metal-clad construction is that lightning losses to country elevators are second to locomotive spark hazards in amounts, but that the metal-clad, metal roof buildings are rarely damaged by lightning.

NEED OF FIRE PREVENTION.

The Grain Dealers' National Association seeks a benefit to the individual through action taken by the organization. In the past there has been an inclination to overlook fire prever and insurance in the grain busi But when we take note that for past nine years, ten mutual fire in ance companies on grain elevators flour mills paid for railroad haz over $1,100,000 and for lightning $700,000, and for all causes $13,00(and recognize that these amounts but fractions of the total of all losses, we must acknowledge that cost of insurance and the need of prevention are large factors in the business of this country. Some of problems like the railroad hazard be handled only collectively, v other problems are those of the vidual through educational meth In the past, the individual has paid premium to secure relief in the e that a calamity happened. That or indemnity has not been equal t value of the property as a going ness, so that logically more benefi sults for the premium that the in ance company uses to prevent the than when used merely in loss ments.

Fire prevention as a service has been a feature of the fire insur companies. Inspections and rates been the work of the insurance panies for their own selfish be While the property owner is the m of the hazards in his construction, housekeeping, and has control of property more days in a year tha insurance company can give it min yet nowhere can he get as good a and assistance in the preservatio that property as from the insur company.

Luckily the country grain elevat not helpless in securing experience surance service. There are mu companies devoted to the class, w have data regarding and measure prevention for every hazard that been the cause of fires. The servi experienced men with those comp is available to every individual in country grain business. Several sand country grain dealers have those companies with a result in ings greater than the amounts that companies have paid for losses. savings represent property that is standing and doing business, du the methods adopted by the policy ers of those companies. The savin might be figured, have gone to th dividuals, but the burden of payin losses has been saved to the boc policyholders as a whole.

PREVENT WASTE BY EFFICIENCY.

Many theories are to be adva for changing present conditions abnormal back to normal, but th lution in many businesses, inclu that of the grain trade, is going through increased efficiency in pre ing waste. The country grain d has a moral obligation, in handlin product of the farm and the food ply of the people, to prevent losses are within his control. The oblig extends to the grain trade collect for it can fulfill its mission profi under the world-wide competitive ditions only by reduction in the c operation. The annual loss of se millions of dollars that is now s over the business through insura probably the largest unnecessary pense and the one most easy to re The insuring public must be corr in its supposition that the inden for loss comes out of the insu company, and that if they pay the premium they have shifted the resp bility onto the insurance com Lack of responsibility breeds ne so that the very fact of insurance led to more fires than would occ insurance did not exist. It need interest and leadership of organiza like the Grain Dealers' National ciation to re-educate its members the true understanding of the pro Then a greater service should b manded of the fire insurance comp than the mere matter of indem The grain business and insuranc so closely interwoven that their ality of interests should be recogn Excessive fire losses are of as

Snyder, both nently identified with the feed Mr. Snyder as a large handler lasses.

RE ABOUT BUCKWHEAT.

literally interpreted, the term dried," as applied to buckwheat, misnomer, for no mill actually through a dry-kiln the grain or oducts; but long years of trade of this term "kiln-dried" as ap- to buckwheat has come to mean art of the natural moisture con- has been evaporated. The pur- of kiln-drying is to evaporate the moisture without eliminating or ng the natural flavor; in other , if properly kiln-dried, sufficient e natural moisture contents will porated so that the product will carry through the season with- terioration; and this must be ac- ished without affecting the nat- lavor of the buckwheat. From perience jobbers have learned that heat that was not kiln-dried was unsafe product to handle.

re is, therefore, now practically rket for the natural product in ountry outside of local territory. result, every mill competing for ate business necessarily is obliged r kiln-dried buckwheat and be- of the haphazard methods and efficient equipment employed the as come to mean but little, ex- s it is backed by the experience putation of the miller himself.

n-drying" as practiced by the mills e divided into two general sys- f evaporation: First, from the product; and, second, from the en berry. We have a complete ation of both systems and are re, we feel, in a position to give rejudiced opinion as to the mer- each. The first of the above sys- tems was used by us, as well as by others of the leading mills for a considerable period, for at that time it was the only system available. But the experience we had with this system clearly demonstrated that it was not only impossible to regulate closely the percentage of moisture evaporated, resulting in a considerable variation in the finished product, but also that in evaporating the excess moisture we eliminated part of the flavor and to a certain extent injured the natural flavor because of the high degree of heat to which the product was subjected. As a result of these objections, many years ago we installed an elaborate system for evaporating the excess moisture from the unground buckwheat, obtaining results that exactly duplicate nature's own methods. Not only can the percentage of moisture that is evaporated be regulated to the greatest nicety, but the natural flavor of the buckwheat is neither injured nor in any degree eliminated. Each of the above systems as practiced by different mills has many variations, and neither will accomplish the desired purpose unless properly equipped and carefully handled. But every mill that has any such equipment, or in any other way makes a pretense of drying, quotes its products as "kiln-dried."

The extreme importance of this process will be more fully realized when it is understood that buckwheat ranges in natural moisture contents from thirteen to twenty-five per cent. To reduce to a safe uniform basis, while still preserving the full natural flavor, constitutes the problem, the solution of which differentiates between the products of competing mills.—*Blodgett-Holmes Co., Janesville, Wis.*

OCTOBER FOREIGN TRADE.

General domestic trade continues at a swift pace, in spite of labor troubles and the continued advance of foodstuffs and menacing scarcity of all commodities. This latter condition will assuredly become more acute, as the lack of fuel closes more factories. The senate's defeat of the Treaty has disconcerted the export trades, whose operations in October were again at a record-making total as regards values. The figures are worth repeating here, as an indication of the amount of borrowing by Europe that will be necessary to be taken care of if this unwholesome tremendous outgo of goods is to continue. The senate ignored wholly all such minor considerations as this last, as of quite minor importance. The growing returns of imports is the encouraging feature of the situation:

Following is a comparison of October's total exports and imports with the preceding month and with October last year:

	Oct., 1919.	Sept., 1919.	Oct., 1918.
Exports	$632,000,000	$593,308,722	$503,099,465
Imports	416,000,000	435,446,652	246,766,586
Ex. exp.	$216,000,000	$157,862,070	$256,332,879

Merchandise trade in October during a series of years has been:

	Exports.	Imports.	Excess exports.
1919	$632,000,000	$416,000,000	$216,000,000
1918	503,099,465	246,766,586	256,332,879
1917	542,101,146	221,227,405	320,873,741
1916	492,813,918	178,658,730	314,155,188
1915	334,638,578	148,529,620	186,108,958
1914	195,283,852	137,987,778	57,305,074
1913	271,861,464	132,949,302	138,912,162

During a series of years the ten months' merchandise trade compares as follows (last three figures omitted):

	Exports.	Imports.	Excess exports.
1919	$6,501,000	$3,113,000	$3,388,000
1918	5,063,110	2,569,488	2,493,621
1917	5,146,049	2,504,021	2,642,027
1916	4,443,239	2,009,833	2,433,406
1915	2,867,694	1,451,267	1,416,426
1914	1,662,685	1,548,429	114,256
1913	2,005,283	1,400,334	544,949

New York Oats Market.

The arrivals continue principally to fill export sales, and it is believed that the amount in transit for domestic use at present has shown a decided falling off. No new export business is possible while the rates for foreign exchange continue at such an unprecedently low point, but it is believed that a substantial advance in exchange quotations would immediately be followed by new export business of volume. The demand for spot oats continues very light, notwithstanding the firm undertone to the market and the unwillingness of holders to make concessions. There are no indications of an increase in the demand for local consumption, yet it is fair to presume that the unusually dull demand for the past few weeks will shortly be followed by a better inquiry, particularly should it be demonstrated that apart from the action of corn present values are warranted.—*L. W. Forbell & Co.*

A SUCCESSFUL TRIP.

The genial and popular secretary of the Grain Dealers' National Association, Chas. Quinn, was in Chicago yesterday on his way back from a most successful trip in the far West, visiting San Francisco, Los Angeles and other Western points The membership of the Association will be increased 36 as the result of this trip. Sec'y Quinn has now covered personally 46 out of the 48 states of the Union in behalf of the interests of this large and successful organization.

The following is a list of the applications taken on the trip: Albers Bros. Mlg. Co., San Francisco, Cal., B. E. Morgan; Balfour, Guthrie & Co., 350 California street, San Francisco, Cal.; Scott, Magner & Miller, 333 Berry street, San Francisco, Cal.; Western Pacific Grain Co., 406 Merchants Exchange Bldg., San Francisco; Globe Grain & Milling Co., 635 Merchants Exchange, San Francisco, Cal.; R. Vohner, 938 Merchants Exchange, San Francisco, Cal.; John Westrope & Co., 436 Merchants Exchange, San Francisco, Cal.; Sperry Flour Co., 332 Pine street, San Francisco, Cal.; G. W. McNear, Inc., 433 California street, San Francisco, Cal.; Adolph Koshland, 901 Merchants Exchange, San Francisco, Cal.; Strauss & Co., 604 Merchants Exchange, San Francisco, Cal.; The Grange Co., Modesto, Cal., Henry G. Turner, president; Lillywhite-Brown Co., Hibernian Bldg., Los Angeles, Cal.; J. E. Miller, Lock Box 103, Los Angeles, Cal.; Taylor Milling Co., 1520 San Fernando boulevard, Los Angeles, Cal.; Tarr & McComb, Inc., J. S. Gray, Los Angeles, Cal.; Globe Grain & Milling Co., 907 East Third street, Los Angeles, Cal.; Northern Grain & Warehouse Co., 1031 Central Bldg., Los Angeles, Cal.; Newmark Grain Co., 47 South Los Angeles street, Los Angeles. Cal.: Germain Seed & Plant Co., 747 Terminal street, Los Angeles, Cal.; Great Western Milling Co., 948 South McGarry street, Los Angeles, Cal.: Nicholls-Loomis Co., 2505 Santa Fe avenue, Los Angeles, Cal.: Willits, Patterson & Green, 823 Fraction avenue, Los Angeles, Cal.; Albers Bros. Milling Co., Los Angeles, Cal.: S. C. Dunlap, Central Bldg., Los Angeles, Cal.; Pacific Wood & Coal Co., Los Angeles, Cal.; Hisey Grain Co., Los Angeles, Cal.; West Texas Fuel Co., El Paso, Tex.; Herr Bros., Inc., El Paso, Tex.; J. E. Mugge & Co., San Antonio, Tex.: Texas Cuban Molasses Co., Houston, Tex.; Houston Grain Co., Houston, Tex.; Houston Milling Co., 1015 North San Jacinto, Houston, Tex.; Waldmaw-Ross Grain Co., Box 1361, Houston, Tex.; J. E. Ervine & Co., Houston, Tex.; Oliver Cranston, Houston, Tex.

Index Figures of Crop Prices.

The trend of prices to farmers for important crops are indicated in the following figures; the base, 100.0, is the average price Dec. 1 in the 43 years 1866-1908, of wheat, corn, oats, barley, rye, buckwheat, potatoes, hay, flax and cotton; date is first day of month:

	1919.	1918.	1917.	1916.	1915.	1914.
Jan.	272.4	264.1	183.6	129.0	126.7	132.5
Feb.	259.9	271.6	195.6	139.9	140.5	132.1

The Bureau of Crop Estimates has the following as the acreage of principal crops in Denmark in 1919 and 1918:

	1919.	1918.
Wheat	124,491	140,150
Rye	558,943	542,466
Barley	568,743	548,204
Oats	960,775	937,223
Mixed grain	481,623	476,021
Potatoes	225,587	185,886
Sugar beets	101,872	89,356

INSPECTED SLAUGHTERINGS.

The Bureau of Animal Industry, in *Service and Regulatory Announcements* for September, reports the following number of inspected animal slaughterings for August 1919 and for the eight months ending with 1919 and 1918, as follows:

	August		8 months	
	1919.	1918.	1919.[1]	1918.[1]
Cattle	858,409	987,237	6,161	7,042
Calves	318,769	273,597	2,621	2,312
Sheep	1,233,883	936,683	7,524	5,987
Goats	5,205	13,207	43	71
Hogs	2,884,325	2,940,491	27,119	23,991

[1]000 omitted.

IMPORTS OF FOOD ANIMALS AND MEATS.

The following statements show the imports of food animals and meats and meat food products inspected by the Bureau of Animal Industry during September 1919 with figures for other periods for comparison:

From—	Cattle.	Swine.	Sheep.	Goats.
Mexico	4,220	.....	24	1,176
Canada	62,189	807	17,121	1
Gt. Britain	.....	4	453	.....
Sept., 1919.	66,409	811	17,598	1,177
Sept., 1918.	38,595	809	5,602	3,203
8 mos.—				
1918-19..	292,272	18,454	61,337	4,258
1917-18..	170,497	1,883	41,485	25,202

Following is a statement of imports of beef and other fresh and refrigerated meat and canned and other meat products, in pounds:

	Sept.		8 months	
	1919.	1918.	1919.[1]	1918.[1]
Beef[2]	2,796,897	1,415,825	22,267	6,138
Other	2,773,645	53,802	12,666	1,788
Canned	261,417	13,513,281	30,505	34,530
Oth'r prod.	363,896	628,791	5,877	5,023
Total	6,195,855	15,721,699	71,316	47,482

[1]000 omitted. [2]In Sept., 1919, 1,928,973 from Canada and 332,590 from Argentine.

Visible Supply of Oats.

Official statement of the visible supply of oats weekly, compared with same weeks of previous three years:

Foreign Situation.

Some business critics expect a reaction in early 1920. Others think big business will last one to three years if labor deadlocks can be broken effectually. Exchange is demoralized and central European moneys are near zero. It looks as if the world currencies and collaterals are too confused, helplessly over issued and must be revised. U. S. credits to Europe are threatened. Beyond covering cotton, lard and a few other things they look small for 1920.—*Jos. Wild, with E. W. Wagner & Co., Chicago.*

Chicago Hog Movement and Prices.

Weekly receipts and shipments of live hogs at Chicago, and ranges of prices at which sales were made during the week, for the past year:

HOG WEIGHTS AT CHICAGO.

The average weight of hogs at Chicago week of Nov. 15, 226 lbs., was the lightest weekly average since January. With a gradual dropping off in the marketward movement of heavy packing hogs and an increase of new crop hogs, including a fair quota of pigs and underweights, the average weight has dropped steadily since September, when the monthly average of 254 lbs., was the heaviest for any month since 1910. The averages for September and October this year as well as the first two weeks in November were considerably above the average for the past five-year period. Figures showing the average weights for September and October this year and for the first two weeks in November with comparisons follow (the average being for 5 years):

	1919	1918	1917	1916	1915	Av.
September	254	247	231	223	235	238
October	237	233	212	210	204	219

GRAIN GRADING MEETINGS.

Grain grading meetings in Portland, Ore., were begun by the Federal grain supervisor the last of August and have been continuing weekly since. State inspectors, samplers, weighers, dock and elevator superintendents, and members of the trade have been the students. The average attendance up to date has been twenty-five.

At first particular attention was paid to the definitions of class, sub-class and other terms used under the Federal grades. After the men became familiar with the underlying principles they were given the actual wheat to grade. The result shows the success of the instruction.

Aside from educating these men regarding the correct application of the Federal grades, it has been found by getting them together they ha opportunity to discuss many othe ters that arise from time to tim taining to grain handling at the and the mills. "This makes for ter understanding of things," say Federal grain supervisor, "and lems which have caused much ment in the past are often settled little explanation at these meetin *Office of Information.*

Marketings of Corn and Oats.

The Bureau of Crop Estimates gives the following as the estimated marketings by months of corn and oats by farmers:

CHICAGO, U. S. A.

News of the Terminal Markets

DES MOINES, IA.

A. McArty, Correspondent.

Trade in all grains has been light the past week, due to the present car situation and also farmers being busy gathering corn, which will be about completed the coming week, at which time there should be a fair movement of corn if cars can be secured.

C. E. Beall, in charge of the Des Moines office of Mayer-Holbrook Co., was approved by the directors of the Chicago Board of Trade as a solicitor on Monday. This firm has considerably extended their operations, handling a nicely growing business.

Callers during the week were Jos. Visek, with Carhart-Code & Harwood, Chicago, H. J. Koehl, with W. H. Perrine & Co., Chicago. Country Dealers—M. Neilson, Dallas Center; W. W. Eaton, Boone; J. E. Hale, Collins; Robt. Whittaker, Dallas Center; D. Mulligan, Jefferson.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Good grades of kiln dried corn are commanding a premium over values quoted on shelled varieties. The demand is light and receipts are the same. Prices have been revised and based on present values of kiln dried and new corn. Quotations follow: No. 1 yellow, $1.57@1.58; No. 2 yellow, $1.56@1.57; No. 3 yellow, $1.51@1.54. Total receipts of corn, 23,400 bushels as compared with 9,800 bushels in 1918.

According to leading brokers here the condition of the oats market is very satisfactory. Arrivals are light and all cars are easily handled at firm prices around 80 cents a bushels for best grades. Trade is reported to be adjusting itself to basis and higher prices. Total receipts for the period registered only 110,000 bushels as compared with 152,000 bushels in the previous year. Quotations are as follows: No. 1 white, 80@80½c; No. 2 white, 79½@80; No. 3 white, 79@79½c.

There are no quotations on ear corn as very little of this kind is arriving here. There is a very light demand.

MEMPHIS.

George Williamson, Correspondent.

W. C. Charles has applied for membership in the Merchants' Exchange and will engage in grain and hay brokerage business.

Weather has been ideal for the past week or ten days, and it has enabled much farm work to be done, although in most sections the interior has been busy saving the cotton crop. Some fall sowing of grain has been done, but most of the oats will be needed in the spring.

Receipts of corn and oats have been very light, for the dealers have had little need of large stocks. They are disposed to let the farmer carry the burden until demand picks up, which is expected at any time now. Demand for corn is almost nothing and prices are largely nominal. On call Saturday cash 2 white was $1.50 bid, but $1.60½ was asked for 3 white. Oats are selling in a small way and tone of the market is fairly firm. Illinois 3 white oats sold Friday at 77½c, while Iowa same grade sold at 77¼c. On call 2 white were 78½c bid and 3 at 77½c, but none was offered. Two red Oklahoma in transit was offered at 85c, but demand for them is small.

NASHVILLE.

John Leiper, Correspondent.

The coal strike is causing trouble at mills, a number in the southeast being closed down because of fuel shortage. Few have fuel to run more than ten days.

Weather in Tennessee has been more favorable for sowing wheat, and farmers who were delayed in October by rains were busy last week. Acreage, however, will fall considerably below last year.

Receipts of grain at Nashville last week were 168 cars. Stocks at the end of the week were: Wheat, 714,000 bus., decrease of 7,000; corn, 25,500 bus., decrease of 12,700; oats, 383,500 bus., increase of 11,500.

At the request of the Nashville Grain Exchange the United States Railroad Administration has modified an order for "minimum weights on grain" to read "carload minimum weights." The order greatly affects less than carlot shipments, in which many local shippers are interested, and efforts will be made to secure further modification.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

Increased demand for meal is reported by corn mills. Southeastern mills, with capacity of 157,800 bus., had output last week of 33,110 bus., or 20.9 per cent of capacity, which compared with 17 per cent the preceding week. Prices: Bolted meal, sacked, per 100 lbs., f. o. b. Ohio river points, $3.35@3.45; unbolted, $3.25@3.35.

Wheat continues very high, with mills moderate buyers. Corn was higher last week. New crop corn, it is expected, will begin moving this week, as weather has been more favorable. Oats are in moderate demand. Prices: Wheat—No. 2 red, $2.40@2.42. Corn—No. 2 white, $1.65@1.70; No. 3 white, $1.62@1.65; No. 3 mixed, $1.60@1.65. Oats—No. 3 white, 80½@81½c.; No. 3 white, 79½@80½c; No. 3 red, 81@82c.

PEORIA.

L. L. Eckard, Correspondent.

New No. 4 yellow sold at $1.32½@1.33½; No. 3 yellow, $1.36@1.36½; No. 5 yellow, $1.30.

Oats receipts were 7 cars, with market quoted unchanged. No. 3 white sold at 72½c, local.

New corn quoted 1½ to 2c lower and hard to sell. Buyers were disposed to be independent and the situation showed further signs of weakness.

Gardner B. Van Ness, the well known Chicago grain firm, have opened an office in the Schradzki building and will be managed by J. E. Eckhardt, formerly a grain dealer from Benson, Ill., who will carry on a general grain business with private wire to leading markets.

Receipts of corn at Peoria Saturday were 49 cars, of which 43 were new corn. With the advices of some of the largest corn-using industries preparing to shut down on account of coal shortage caused a very weak tendency on the cash corn market, the Pekin plant of the Corn Products Refining Company having been out of the market for several days.

Peoria live stock market strong and a more active tone prevailed on the local market Saturday. Prices in general were quoted 25 cents higher. A top of $13.75 was established on the late sales with the bulk selling at $13.30@13.60. Strong demand from all sides cleared the 1,200 arrivals. Active at the higher prices. Quotations follow: Lights, $13@13.75; mediums, $13.25@13.75; heavies, $13.25@13.75; heavy packing, $12.25@12.75; pigs, $10@13. Cattle market steady with light receipts. Top beeves, $15.50.

TOLEDO.

Carl Bryant, Correspondent.

John Monroe, the Archbold miller, visited with his many friends on 'Change Saturday.

E. W. V. Kuehn, of The Crumbaugh-Kuehn Co., Toledo seed dealers, was elected to membership in Toledo Produce Exchange.

Earl B. Slawson, of The E. B. Slawson Co., grain and bean dealers, has been confined to his home the past week as a result of a sprained ankle.

Following were visitors on 'change last week: Earl Keeler, of the Haskins Farmers' Elevator Co., Haskins, O.; Otto Lang, of the Lang Milling Co., Delphos, O.; W. H. Mahnke, of the Bellevue Milling Co., Bellevue, O.

Bill Cummings, of J. F. Zahm & Co., spent part of last week on a business trip in Indiana. He says there is little corn moving in Indiana, and about the only wheat there is remains in farmers' hands. Elevators and farmers have plenty of oats and the general feeling prevails that it will take higher markets to bring them out.

If "the way to a man's heart is through his stomach," then surely Norman Cornell, Louis Sisson and "Tim" Burke, local representatives of the firm of Pynchon & Co., won the hearts of about a dozen of the Toledo trade at a dinner tendered them at Tabernilla Inn, Thursday evening. Savory, roasted duck with all the trimmings bore witness to the completely enjoyable affair and a spirit of friendship pervaded the atmosphere, sending home the guests with as is always the case when good fellows get together. Those present were: Kent. Keilholtz, Henry Raddatz, Joe Streicher, Louis Schuster, Paul Barnes, Les. Howard, John Luscombe, Dick Sheldon and Carl Bryant.

Cash Markets.

Markets ruled firm all week with cash grain in good demand. Receipts are light. Sales of spot oats ranged for the week at: No. 2 white, 74¼@75¼c; No. 3 white, 74@74½c.; ruling Saturday close to the low of the week's prices. No. 2 yellow corn, $1.46¾; No. 3 yellow, $1.41¾; No. 4 yellow, $1.37@1.40; No. 5 yellow, $1.32@1.36½; No. 6 yellow, $1.30@1.32. Practically all corn arriving in good condition. No. 2 red wheat, $2.27¼; No. 1 red, $2.28½; No. 3 red, $2.22@2.23½. Bids for wheat at close of the week were considerably higher. No. 5 northern spring, musty, $2.70@2.70¼. Rye is quiet. No. 2, $1.37 Saturday with sales during the week at $1.31½@1.35½. Good demand is seen for barley with colder weather. Dealers are urging the mixing of barley for feed. No. 3 grade sold at $1.45. Some export inquiry noted for barley. Receipts for the week: Wheat, 56 cars; corn, 33; oats, 10; rye, 48; barley, 1.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

The Board of Trade bowling team went to Omaha to attend the Mid-West bowling tournament which began Saturday.

The Chicago, Milwaukee & St. Paul Railway took off eighteen trains running out of Sioux City the first of the week, due to the shortage of coal.

D. S. Warwick Grain Co. has opened offices in the Grain Exchange Building and will do a general grain business in connection with their Denver and Wichita offices.

Those from Sioux City that attended the Nebraska Farmers Managers Convention at Omaha the first of the week were E. P. Sullivan, manager of Rumsey Company; Will Shepard, of Merriam Commission Co.; W. H. Bailey, Geo. Strom, Taylor & Bournique Co.

Visitors on the floor during the week were: Mr. Ewart, Lincoln, Nebr.; Ed. Propp, Southerland, Ia.; Jim Larson, Cleghorn, Ia.; Joe and Bill Kupperman, Le Mars, Ia.; J. H. Berger, Everly, Ia.; Mr. O'Sullivan, Kansas City; Mr. Morris, of the U. S. Department of Agriculture, Kansas City; D. S. Warwick, Denver, Colo.

The Grain Belt Cereal Co. has let a contract to the Burrell Engineering & Construction Co., of Chicago, Ill., for a cereal mill to be erected immediately. Washington Aldridge is president and manager of the company, with offices 222 Davidson Building. This adds another cereal plant to the industries of the city, but has special importance in its increase of the actual grinding and milling operations of the market, as the other large plants under way are practically compact elevators.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

John Shorb, of South Whitley, Ind., disposed of his bakery to Fred Griswold, of Mooresville.

Fire on a farm belonging to Cary Patton, south of Rushville, Ind., caused a loss of over $3,500 when a large feed barn burned, destroying large quantities of hay and grain.

The Walsh Baking Co., of Evansville, Ind., incorporated with a capital stock of $125,000. Directors of the new company are: William P. Walsh, Joe Haas, James J. Humphrey and George S. Vickery.

Indianapolis millers advanced the buying price for wagon wheat 3c a bushel, announcing a price of $2.18 per bushel for No. 1 red: $2.15 for No. 2 red and $2.12 for No. 3 red, delivered at the mill. This makes a total advance in price of 7c per bushel since last harvest.

Edward Hobertson, employed by the Stafford Grain Co., of Hope, Ind., was found lying insensible in the company's elevator, and died a short time later. He was alone in the elevator at the time he was injured and no one knows how he received the fatal blow.

An unprecedented thing happened in the Indianapolis grain market—soft winter wheat has been sold here to go to the spring wheat flour mills of Minneapolis. Twenty thousand bushels were taken at current prices. Indiana wheat this year is unusually strong in gluten, grain men and millers say, while the spring wheat is weaker than usual in this respect.

The Noblesville Milling Co. made arrangements whereby its employes are looked to in a substantial manner. They have taken out a life insurance policy for all employes in the mill, office and sales force. The employes will be insured to the extent of $500 for the first year of their service, increasing the amount by $100 for each successive year until ten years' time or until the maximum amount of $1,500 has been reached.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The next annual meeting of the American Seed Trade Association will be held in Milwaukee, June 22-24.

New members recently elected to the Milwaukee Chamber of Commerce include Courtney H. Casebeer and William H. Bartz, of Des Moines; Robert P. Fairbain, Michael F. Cudahy and Hart C. Putnam, of Minneapolis.

The Chamber of Commerce, through the board of directors, again went on record for daylight saving locally, or in whatever way it can be promoted. This in response to a letter from daylight saving associations in the east.

Receipts of grain at Milwaukee for the week ending Nov. 22, were 151 cars barley, 151 cars corn, 251 cars oats, 74 cars wheat, 51 cars rye, 6 cars flax; total, 684 cars, against 617 cars the week before, 832 cars a year ago and 886 cars in 1917.

Shipments of grain from Milwaukee for the week ending Nov. 22 were 479,328 bu. oats, 24,490 bus. corn, 149,980 bus. barley, 56,566 bus. wheat, 1,350 bus. rye; total, 711,704 bus., against 620,571 bus. the preceding week and 2,717,119 bus. a year ago.

The Milwaukee Chamber of Commerce appointed the following committee which attended the opening night ceremonies of

simistic news. Late in the week came the announcement of an intended suspension of export and import embargoes, which will permit an influx of Canadian wheat at Northwestern milling centers. This was an important bear factor, which caused a further decline. Prices of hard wheat closed with net losses of 3@4c, No. 1 showing quotations of $2.40@2.60; No. 2, $2.39@2.60; No. 3, $2.33@2.57. Red wheat ended 5@12c down, with No. 1 at $2.30@$2.32, No. 2 at $2.28@2.29 and No. 3 at $2.25@2.26. Stocks increased 81,000 bus., to 14,387,000 bus., against 15,683,000 a year ago. As the country movement was expected to continue heavy for some time, unless checked by the shortage of coal, fears of congestion here were revived. The privilege of selling for shipment on destination weights, which had been abrogated at the week's outset, was restored, and this is expected to facilitate the outward movement.

Corn—Receipts, 115 cars, against 43 a week ago and 119 a year ago. In the first part of the week there was a keen demand and prices advanced, No. 1 yellow selling at $1.63. Later the tension relaxed and the market began to recede. At the end of the week the indications favored a liberal movement and elevator men began to have hopes that the market would soon reach a hedging basis. Closing prices were 1c lower to 6c higher than on the previous Saturday, as follows: No. 2 mixed, $1.58@1.59; No. 3, $1.57@1.58; No. 2 white, $1.54@1.58; No. 3, $1.54@1.56; No. 2 yellow, $1.58; No. 3, $1.55@1.57. Stocks showed a weekly reduction of 7,000 bus. and were 25,000 bus., against 345,000 a year ago.

Oats—Receipts, 132 cars, against 52 a week ago and 69 a year ago. Like the other grains, oats exhibited strength at the week's beginning, but the market weakened later and closed unchanged to 1½c down, as follows: No. 2 white, 75c; No. 3, 74@75c; No. 2 mixed, 73@74c; No. 3, 72@73c; No. 2 red, 74@75c; No. 3, 73@74c. Shipping and local sales reduced the stocks 20,000 bus., to 1,005,000 bus., against 1,333,000 last year.

Kafir and Milo—Receipts, 3 cars, against nothing a week ago and 6 cars a year ago. Advices from the great producing regions of Kansas, Oklahoma and Texas suggested a largely increased movement by December 1, as recent weather has favored threshing and farmers are anxious to sell. Buying was limited in view of prospective liberal offerings and cheaper prices. The market was stationary. No. 2 white kafir and No. 2 milo sold at $2.60@2.70 per cwt. and No. 3 at $2.50@2.60. Stocks were unchanged at 3,000 bus., against 35,000 a year ago.

BUFFALO.

E. Bangasser, Correspondent.

The Erie Canal is closed for the season. Shipments during the past month were the heaviest, there being a rush to get out rye.

The price of potatoes has gone up from $1.35 to $1.85 the past ten days and hard to get at the advance. Farmers are holding on and it is said have a strong combination to maintain prices. Two dollars is their limit.

Rye took a change for the better at the close of the week and holders expect to get something like the prices they have been asking, about 10c or 15c over the market at present. The difficulty is in getting permits to ship. No. 2 on track was quoted at $1.46.

Millers seemed to be out of the market for wheat this week, still the offerings were fairly well cleaned up at the close. Prices were steady at $2.30 for No. 2 red and $2.27 for No. 3 on track, through billed. Quite a few cars of smutty and musty were disposed of at a wide range of prices. Winter wheat in this state is scarce and dealers here are looking for a better demand next week.

Oats sold better early in the week at 79¾c for No. 2 white than later at 78¼c. A dullness came over the market towards the close of the week and although receipts were extremely light, it was impossible to advance prices and difficult to get buyers interested. Mill oats were even scarce. Closing: No. 1 white, 78¾c; No. 2 white, 78¼c; No. 3 white, 77¼c; No. 4 white, 76¼c on track, through billed.

There was a much smaller run of corn than expected and a good demand. All grades of yellow were represented, mostly new or kiln dried, and it was difficult to fix prices. No. 3 yellow was about the only grade holding fairly steady, the bulk of the sales being at $1.60. Some No. 2 yellow sold at $1.62 but these prices were all considered too high and with anything like fair receipts could not have been obtained. No. 4 yellow sold at $1.50 to $1.55; No. 6 yellow, $1.38. There was a generally bearish feeling at the close.

Inspection track receipts for the week: Wheat—No. 2 red, 17 cars; No. 3 red, 14 cars; No. 4 red, 6 cars; No. 5 red, 3 cars; sample, 3 cars; No. 2 soft white, 1 car; No. 3 soft white, 1 car; sample, 1 car; No. 1 mixed, 1 car; No. 2 mixed, 10 cars; No. 3 mixed, 8 cars; No. 4 mixed, 1 car; No. 2 hard winter, 17 cars; No. 3 hard winter, 5 cars; No. 4 hard winter, 5 cars; No. 5 hard winter, 2 cars; sample, 1 car; No. 2 dark hard, 1 car; No. 1 northern, 1 car; No. 2 northern, 7 cars; No. 3 northern 7 cars; No. 4 northern, 14 cars; No. 5 northern, 3 cars; No. 1 dark northern, 4 cars; No. 2 dark northern, 1 car; No. 3

dark northern, 1 car; No. 4 dark northern, 4 cars. Corn—No. 1 yellow, 5 cars; No. 2 yellow, 17 cars; No. 3 yellow, 10 cars; No. 4 yellow, 11 cars; No. 5 yellow, 9 cars; No. 6 yellow, 7 cars; sample, 6 cars; No. 1 mixed, 1 car; No. 2 mixed, 2 cars; No. 3 mixed, 3 cars; No. 4 mixed, 1 car. Oats —No. 1 white, 9 cars; No. 2 white, 65 cars; No. 3 white, 22 cars; No. 4 white, 8 cars. Rye—No. 1, 1 car; No. 2, 2 cars; sample, 1 car.

CINCINNATI.

George Mosbacker, Correspondent.

S. S. Reeves, traffic manager of the Grain and Hay Exchange, supplied the trade with printed copies of the new order concerning the minimum carload weights on grain and grain products.

L. W. Perkins, formerly assistant traffic manager of the Grain and Hay Exchange, has tendered his resignation to accept the management of the traffic department of the Cincinnati Abattoir Company.

The removal of the embargo restrictions on imports and exports of wheat and flour, effective Dec. 15, as announced by the Grain Corporation late in the week, was regarded as a promise of better things by local members of the trade.

There is little Canadian hay arriving here, but imports through Michigan to other parts of Ohio are reported as fairly liberal. The demand here is active for choice quality, but common stuff is difficult of sale unless heavily discounted.

The Richter Grain Co. is offering large quantities of new ear corn, which was damaged by the recent overflow of the Ohio river, through the inundation of the lowlands in the Big and Little Miami and White Water valleys. The corn is suitable for immediate feeding and selling at sacrifice prices.

G. A. Collier, representative of the Grain Marketing Service, at Washington, which is making a survey of hay marketing conditions and looking to the advisability of the establishment of uniform grades, was a visitor on the exchange the past week. Mr. Collier has an extensive acquaintance in Cincinnati and was formerly in the grain and hay business here as a member of the firm of G. A. Collier & Co.

Practically the entire trade is expecting an improvement in the grain business, which has been unusually light here for some time. Local stocks of corn, oats and rye have been permitted to become abnormally light, owing to cautious buying and holding off attitude for a lower level of prices, and retail feed dealers especially are short of oats and corn. The small receipts, though, have also been partly responsible for the lack of business. Large feeders who feel that grain and hay is too high to warrant them in loading up for the winter, now see little likelihood of lower values and are showing more disposition to buy. Excepting corn, all grains reached new high prices of the crop the past week. No. 2 white oats, 78@78½c; rye, No. 1, $1.41@1.43; wheat, No. 2, $2.32½ to $2.33½, and No. 1 timothy hay, $31 per ton.

Cash Markets.

Wheat—The wheat market here was featured by new high prices of the crop during the week with the urgency of demand and light movement indicating still higher prices unless the scarcity is relieved. Millers are eager for larger supplies, and nearly all of the receipts grading No. 2 were sold "to arrive." Advances of 4c were made for top grades and 7@9c for low grades and sample, which also sold readily. No. 1 red winter, track, $2.34@2.35; No. 2 red winter, track, $2.32½@2.33½; No. 3 red winter, track, $2.29@2.31; No. 4 red winter, track, $2.24@2.27; No. 5 red winter, track, $2.22@2.24; sample as to quality, $2@2.25. Smutty wheat discounted from 1c to 3c per bushel as to grade.
